This is a subject which of course is very important and is very near to the interest of the gentleman from Oklahoma as it is to me. I want to compliment the gentleman from Oklahoma on bringing to the House his thoughts on this subject, and particularly the fact that he has introduced a bill which would make it possible for the Federal Government to assist some of these schools in Federal aid, provided we do have a Federal aid bill. I have studied his bill carefully, and I have requested from him permission to put in an identical bill along this line, which shows beyond any doubt how firmly I am convinced that the gentleman's bill is really a good bill. I do hope he will maintain his interest in this matter and that there will be some legislative action on these various bills for the civil defense of the people of our Nation.

Mr. EDMONDSON. I thank the gentleman very much and recognize that he speaks from the authority of long experience and study in this field.

I am also very grateful that he is introducing an identical bill to the one which I have introduced today, as a first step toward providing urgently needed shelters for our people.

I might say by way of correction of an impression that may have been created by one of the gentleman's concluding statements, that this bill is not dependent upon the Federal aid to education bill, but could stand and is intended to, as an independent measure, if necessary.

Mr. H. CARL ANDERSEN. Mr. Speaker, will the gentleman yield?

Mr. EDMONDSON. I am glad to yield to the gentleman from Minnesota.

Mr. H. CARL ANDERSEN. I think the gentleman from Oklahoma has rendered a real service to the Nation by speaking as he has this afternoon in the House concerning a very grave question. Sometimes I feel that the question he has discussed is so vast that it leaves a feeling of helplessness in the mind of the average Congressman, a feeling of "What is the use? There is nothing that can be done about it." But I do feel that the gentleman has suggested that there is decidedly something which the Nation can do about this matter.

One need have no other experience than watching a comparatively small atomic bomb explode, as many of us have in the past, to realize what great damage one of these new hydrogen bombs would do in comparison; and I would like to compliment the gentleman, Mr. Speaker, for doing what he is doing today, trying to awaken Congress to the need for something of this nature.

Mr. EDMONDSON. I am specially grateful to the gentleman for his kind remarks and for the interest he has taken in the subject.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. EDMONDSON. I yield to the gentleman from California.

Mr. HOLIFIELD. Shortly after the gentleman brought the architects who

were responsible for drawing these plans in connection with school construction to my office for me to look over their detailed plans, I arranged for them to have an interview with Dr. H. L. Bowman—he is the Civil Defense liaison engineer consultant of the Atomic Energy Commission—and a Mr. Lawrence Moore, who is the Acting Assistant Director for Architects and Engineers of the Division of Construction and Supply.

The reason why I wanted them to have this appointment with these people was for them to have the opportunity of showing their drawings and their plans for these school buildings, because I thought this in a way would be the test of the validity of their plans.

Without making the statement that these gentleman from the Atomic Energy Commission have approved these specific plans, I will say that they were impressed very much. I received a letter from the Atomic Energy Commission in regard to this appointment. One of the key thoughts of it to which I wish to call attention is these words, "the whole proposal makes sense"; in other words this has been so well thought out that these men in the Atomic Energy Commission who are dealing with construction and engineering recognize the saving qualities for human life that would be involved in this type of school-shelter proposal. I understand also from these same architects that they maintain they can build this type of school without any appreciable additional cost over the conventional type of school construction. Is that not true?

Mr. EDMONDSON. That is my understanding. I do, however, want to agree with the gentleman from California that while neither of us is here to champion any particular design, we feel that a service has been rendered by any architect who is willing to devote his time and interest to this problem and to present actual designs for study by our Atomic Energy and military officials.

Mr. HOLIFIELD. I can say that neither of us has any personal interest in this. The design is not patented. It is available to any school for study. Their own architects and engineers can alter it to meet local needs and situations. It has occurred to me that it might be especially valuable in the tornado and hurricane districts where there is need for this type of shelter.

Mr. EDMONDSON. I think the gentleman makes a very good point there, too.

I may say that the gentleman from California has been joined by the gentleman from Florida [Mr. BENNETT] and another gentleman from California [Mr. SISK] in the introduction of identical bills and several other Members have expressed an intention to introduce similar bills tomorrow.

ADMISSION OF MASSACHUSETTS LAWYERS TO PRACTICE BEFORE THE SUPREME COURT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. HOLIFIELD). Under previous order of the House, the gentle lady from Massachusetts [Mrs. ROGERS] is recognized for 3 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I should like to express my great approval of the very fine and able and patriotic speech of the gentleman from Oklahoma [Mr. EDMONDSON], a great soldier and a great legislator.

I heed, and I hope all will heed, the warning. I, myself, cautioned against Japan and against Germany before World War II on the floor of Congress. I know very well that the country as a whole did not expect Japan to strike us, and so we were not prepared. I stated that both Japan and Germany understood only one thing and that was strength and preparedness. So I take special pleasure in thanking the gentleman from Oklahoma for his very fine remarks.

I am so very glad that the 41 very splendid women jurists from Massachusetts who were admitted to practice law before the Supreme Court today are in the gallery and had the pleasure and privilege of hearing his speech. At luncheon they had the pleasure and privilege of listening to a very fine and stirring address by a great soldier and tireless worker for national defense and fighter against communism by the majority floor leader [Mr. MCCORMACK] and an eloquent fighting speech stressing the price we must pay for a strong national defense if we are to maintain national peace, by our able and great minority floor leader and former Speaker [Mr. MARTIN].

We are very fortunate in having two such strong men from Massachusetts as our leaders in the Congress.

Mr. McCORMACK. Mr. Speaker, would the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I shall be very glad to yield to the gentleman.

Mr. McCORMACK. Mr. Speaker, I am very glad to join with the gentlewoman from Massachusetts in her appropriate expressions concerning this fine group of lawyers from Massachusetts who were admitted to practice today in the Supreme Court of the United States. It was a pleasure for me to participate at the luncheon that the distinguished gentlewoman from Massachusetts [Mrs. ROGERS] gave.

I should also like to state publicly on the floor of the House again what I have stated so many times both here and outside this Chamber, and what I stated downstairs in talking to the distinguished members of the Massachusetts bar, now members of the bar of the Supreme Court of the United States, that the gentlewoman from Massachusetts [Mrs. ROGERS] is one of the greatest Americans and one of the outstanding legislators I have ever served with.

Mrs. ROGERS of Massachusetts. I am overwhelmed. I thank the gentleman sincerely. He is always most gracious and kind. It was a great meeting downstairs and a great speech on the floor. The Chief Justice of the Supreme Court told the women jurists that they were the largest group of women from any State ever to be admitted to practice law in the Supreme Court of the United States.

He also said that they made a very fine appearance. The House can well imagine our great pride in these able lawyers and great patriotic Americans.

DIFFICULTY IN RECRUITING COMPETENT POST OFFICE PERSONNEL

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, the post office in St. Louis, Mo., has been having considerable difficulty in recruiting competent personnel to fill the existing vacancies. This has been going on for some time. It is my understanding that this problem is not confined to the St. Louis area, but is actually national in scope.

The situation is serious and requires an objective analysis to determine what is the matter. St. Louis is not an area of overemployment, although the market for competent employees is quite competitive.

Some have suggested that the civil-service examinations required are too difficult. I set forth the reports for examinations for the period of March 1956 to April 1957:

1. Number scheduled for examinations, 12,855.[1]

2. Number reported for examinations, 9,275, or 72 percent.

3. Number passed examinations: (a) clerks, 838, 9 percent of item 2 (0.090); (b) carriers, 445, 5 percent of item 2 (0.048), 14 percent.

Further breakdown of item 3 (a) (clerks): number requesting parttime only, 190; number female eligibles, 64; total, 254. Total clerks, 838, minus 254, leaves 584.[2]

Five hundred and eighty-four represents actual number of eligibles who were contacted for full-time substitute career clerks. This figure is equal to 6 percent (0.063) of the number who have participated in examinations.

4. This office at present has 300 vacancies in the clerical roster: Regular positions unfilled, 140; substitute positions unfilled, 160; total, 300.

5. Substitute carrier rosters filled and approximately 150 eligibles on carrier register.

6. It is felt that shortages in the clerk roster can be mainly attributed to night work and scheme study.

Others have stated that the postal service does not offer the same advantages paywise and as a career that exists in private employment for commensurate skills. Certainly it appears from an analysis of the skills needed in the postal service compared with the same type skills in private employment that the postal service in a high cost area like St. Louis is not in a competitive position either in starting salaries or in overall career possibilities.

[1] Represents number of persons scheduled in 129 separate examinations. As of date of this report (April 19, 1957) examinations are being held twice daily, 5 days a week.

[2] Figure of 584 indicates eligibles who have been appointed or are not available. Clerk eligible register as of this date (April 19, 1957) is exhausted.

The House Post Office and Civil Service Committee has before it several bills dealing with the employment practices in the postal service. One set of bills has to do with proposed salary increases. One set has to do with union recognition. One set has to do with increases in retirement benefits. Apparently nothing is being done in the Committee on any one of these subject matters.

It certainly behooves the Federal Government not only to have good employment practices itself but it actually should be a leader rather than a tardy follower of private enterprise. There was a time when a career in the postal service was a mark of distinction. Perhaps this is still true although the old-time postal workers as well as the newer ones state that this is no longer so. Certainly the recruitment experiences in St. Louis in the past few years indicate that it is no longer true. This has serious implications for the future, not only of the people who have embarked upon careers in the postal service, but also for the public which counts upon speedy, efficient and courteous service from the Postal Department.

I am satisfied that the basic error in the employment practices of the Post Office Department is the failure to recognize and deal with union leaders of the postal employees' own choosing. I cannot understand why the postal unions have not received full and adequate recognition long before now. The union leaders have been fair in their approach by recognizing a basic truth that there can be no right of strike against the Federal Government. For the workers not to have the right through representatives of their own choosing to discuss employment practices with those who are responsible for administering the postal service is not only archaic, but stupid. The people who best know working conditions and who best can give suggestions for improving them are the workers themselves. I have many times stated that if unions did not exist smart management would create them as a part of good employment organization.

The basic problems that exist in the wage scales of the postal employees seem to arise from the fact that wages in the postal service are fixed on a national basis, and that job classifications are likewise national in scope. The reclassification of jobs is a never-ending one in a well-run modern-day organization. With automation moving at the pace it moves, constant reclassification becomes even more significant. Workers' organizations are of the greatest help in carrying on this task of reclassification. Yet the Federal postal service does not avail itself to any real extent of the help that the unions could give them in this area.

Recently, the Postmaster General took public exception to the $58 million cut in the Post Office Department's fiscal 1958 budget. In that budget was a request for 15,000 additional employees, an increase of 3 percent over last year's employment figure. Yet over the past few years the Pose Office Department has received appropriation for much new machinery and equipment designed, it was stated, to increase the productivity of the employees. The House Appropriations Committee report and hearings reveal that productivity in the postal service has increased markedly, as a result of the acquisition of this new machinery and I presume the adoption of new techniques. Certainly if there has not been a marked increased productivity, further explanation is in order from the Post Office Department on this matter.

Yet with increased productivity and an increase in only 1 percent of the mail to be handled along with a decrease in other services rendered by the Post Office Department, the Postmaster General requested the Congress to increase his employees by 3 percent. There has been no explanation of this request to date other than the statement that in certain areas, notably the suburban areas, there has been considerable increase in population. But in other areas there has been a decline of population. In rural areas there have been consolidations of post offices and substitutions of rural routes for others, thus releasing employees. The population increase over the last year has been less than the 3-percent increase in personnel requested by the Postmaster General.

The point of all this is that in private enterprise when there has been an increase in productivity of the employees through the use of new and better machinery and working techniques the employees rightfully come in for some of the gain derived therefrom by the way of increased wages and salaries. So our postal workers should come in for an increase based upon increased productivity if we are to have a good and modern set of employment practices.

Rather than get into the many details of good employment practices at this time, I prefer to again emphasize that recognition of unions of the workers' own choosing is the best way to be certain that the new techniques in employment practices are adopted and utilized by the Post Office Department. It is no wonder to me that we have not gone as far and as fast as private enterprise in the postal services with the archaic benevolent despotism existing under the present procedures. Our postal workers in effect have not been permitted to participate in making the postal service better and more efficient as have employees in private enterprise through the technique of good and strong labor unions led by dedicated and forward-looking labor leaders.

Finally, I would say a word about economy. The basic purpose of economy in the Federal Government is to preserve the integrity of the purchasing power of the dollar. The basic reason for preserving the purchase power of the dollar is to preserve the living standards of our people, particularly those who are dependent upon fixed pensions and wage scales for their income and have no capital investment with which they can hedge against inflation. Now if we are going to economize on the salaries of the people in the Federal Government we defeat the very purpose of the overall economizing. We adversely affect the standard of living of this large block of American people. The last place to economize in the Federal Government is in the salaries and wages of our Federal employees. For another reason, too, that economizing on peoples' salaries is not the road to further efficiency in the performance of their jobs.

Many of the postal employees in the St. Louis area have to hold down two jobs, to the detriment I might state of the efficient performance of both, and a detriment to the very concept of the 40-hour week. Yet to make ends meet to maintain their standard of living they must do this.

I am sending a copy of these remarks to the Postmaster General as well as the chairman of the Post Office and Civil Service Committee. I think we can greatly improve the employment practices in the Federal Government. The place to begin is in union recognition. Once the representatives chosen by the Federal employees are recognized by our Federal administration, I am satisfied that we will improve the Federal Service constantly so that once again service in the United States Post Office Department will be a mark of distinction.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. COAD (at the request of Mr. MCGOVERN), for the balance of the week, on account of official business.

Mr. SIEMINSKI (at the request of Mr. HOLIFIELD), for Monday and Tuesday, May 20 and 21, 1957, on account of death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAILEY, for 45 minutes, on tomorrow.

Mr. KEATING, for 30 minutes, on tomorrow.

Mr. EVINS, for 40 minutes, on tomorrow.

Mrs. ROGERS of Massachusetts, for 5 minutes, today.

Mrs. ROGERS of Massachusetts, for 5 minutes, on tomorrow.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. BENTLEY and to include the text of the report on his recent visit to Poland.

Mr. JENSEN and to include a speech.

Mr. COLMER (at the request of Mr. BAILEY) and to include extraneous matter.

Mr. CRAMER and to include extraneous matter.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 413. An act to provide for transfer of title to irrigation distribution systems constructed under the Federal reclamation laws upon completion of repayment of the costs

thereof; to the Committee on Interior and Insular Affairs.

S. 768. An act to designate the east 14th Street highway bridge over the Potomac River at 14th Street in the District of Columbia as the Rochambeau Memorial Bridge; to the Committee on the District of Columbia.

S. 999. An act authorizing the Secretary of the Interior to convey certain land to the State of North Dakota for the use and benefit of the North Dakota State School of Science; to the Committee on Interior and Insular Affairs.

S. 1556. An act granting the consent of Congress to the States of Montana, North Dakota, South Dakota, and Wyoming to negotiate and enter into a compact relating to their interest in, and the apportionment of, the waters of the Little Missouri River and its tributaries as they affect such States, and for related purposes; to the Committee on Interior and Insular Affairs.

S. 1794. An act to amend section 6 of the act approved July 3, 1890 (26 Stat. 215), relating to the admission into the Union of the State of Idaho by providing for the use of public lands granted therein for the purpose of construction, reconstruction, repair, renovation, furnishings, equipment, or other permanent improvements of public buildings at the capital; to the Committee on Interior and Insular Affairs.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 4897. An act making appropriations for the Treasury and Post Office Departments and the Tax Court of the United States for the fiscal year ending June 30, 1958, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills of the House of the following titles:

On May 16, 1957:

H. R. 1544. An act to provide for the conveyance of certain real property of the United States situated in Cobb County, Ga., to the trustees of the Methodist Church, Acworth, Ga.

On May 20, 1957:

H. R. 4897. An act making appropriations for the Treasury and Post Office Departments and the Tax Court of the United States for the fiscal year ending June 30, 1958, and for other purposes.

ADJOURNMENT

Mr. EDMONDSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 2 minutes p. m.) the House adjourned until tomorrow, Tuesday, May 21, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

860. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Tennessee Valley Authority for the fiscal year ended June 30, 1956, pursuant to the Government Corporation Control Act (31 U. S. C. 841) (H. Doc. No. 178); to the Committee on Government Operations and ordered to be printed.

861. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill relating to the procedure for altering certain bridges over navigable waters"; to the Committee on Public Works.

862. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

863. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to Public Law 863, 80th Congress; to the Committee on the Judiciary.

864. A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation entitled "A bill to authorize certain persons to wear the uniform of a Reserve Officers' Training Corps"; to the Committee on Armed Services.

865. A letter from the Comptroller General of the United States, transmitting a report on the review of the Housing Authority of Jacksonville, Fla., May 1956, Public Housing Administration, Housing and Home Finance Agency, pursuant to the Housing Act of 1954, approved August 2, 1954 (42 U. S. C. 1435); to the Committee on Banking and Currency.

866. A letter from the Comptroller General of the United States, transmitting a report on the review of the Housing Authority of the City of Charleston, S. C., April 1956, Public Housing Administration, Housing and Home Finance Agency, pursuant to the Housing Act of 1954, approved August 2, 1954 (42 U. S. C. 1435); to the Committee on Banking and Currency.

867. A letter from the Secretary of the Treasury, transmitting copies of a quarterly report to the Congress on the progress of liquidation of the Reconstruction Finance Corporation to March 31, 1957; to the Committee on Banking and Currency.

868. A letter from the Secretary of Labor, transmitting recommendations relative to the financial reports and other information filed with the Secretary of Labor by labor organizations under subsections (f) and (g) of section 9 of the National Labor Relations Act, as amended; to the Committee on Education and Labor.

869. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation entitled "A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes"; to the Committee on Government Operations.

870. A letter from the Acting Archivist of the United States, transmitting a report on lists or schedules covering records proposed for disposal by certain Government agencies, pursuant to the act approved July 6, 1945 (59 Stat. 434); to the Committee on House Administration.

871. A letter from the Secretary of Commerce, transmitting a report on war risk insurance and certain marine and liability insurance for the American public for the period as of March 31, 1957, pursuant to Public Law 763, 81st Congress; to the Committee on Merchant Marine and Fisheries.

872. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of the orders granting the applications for permanent residence filed by the subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

873. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

874. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, United States Army, dated February 26, 1957, submitting a report, together with accompanying papers and illustrations, on a cooperative beach erosion control study of Santa Cruz County, Calif., prepared under the provisions of section 2 of the River and Harbor Act approved July 3, 1930, as amended, and supplemented (H. Doc. No. 179); to the Committee on Public Works and ordered to be printed with four illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FRAZIER: Committee on the Judiciary. House Concurrent Resolution 117. Concurrent resolution to commemorate the quadricentennial anniversary of the establishment of the first settlement in Florida; without amendment (Rept. No. 463). Referred to the House Calendar.

Mr. COOLEY: Committee on Agriculture. H. R. 6814. A bill to provide for the compulsory inspection by the United States Department of Agriculture of poultry and poultry products; without amendment (Rept. No. 465). Referred to the Committee of the Whole House on the State of the Union.

Mrs. GREEN of Oregon: Joint Committee on the Disposition of Executive Papers. House Report No. 466. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. KILDAY: Committee on Armed Services. H. R. 7505. A bill to permit a retired officer of the Navy to be employed in a command status at Port Lyautey, Morocco; without amendment (Rept. No. 464). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 or rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. EDMONDSON:

H. R. 7621. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. BENNETT of Florida:

H. R. 7622. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. HOLIFIELD:

H. R. 7623. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. SISK:

H. R. 7624. A bill to authorize Federal assistance to States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. GUBSER:

H. R. 7625. A bill to amend the Federal Voting Assistance Act of 1955 to provide for the transmission and forwarding under such act of ballots, sample ballots, and other election material from governmental sources; to the Committee on House Administration.

By Mr. BERRY:

H. R. 7626. A bill to provide for the sale of certain lands to the Rosebud Sioux Tribe in South Dakota; to the Committee on Interior and Insular Affairs.

By Mr. HYDE:

H. R. 7627. A bill to amend title II of the Social Security Act to include Maryland among the States which may obtain social security coverage, under State agreement, for State and local policemen and firemen; to the Committee on Ways and Means.

By Mr. MASON:

H. R. 7628. A bill to amend part III of subchapter O of chapter 1 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. O'HARA of Illinois:

H. R. 7629. A bill to amend title IV of the National Housing Act, as amended (12 U. S. C. 1726), relating to insurance of savings and loan accounts, and to amend section 5 (1) of the Home Owners Loan Act of 1933, as amended (12 U. S. C. 1464), relating to termination of insurance of accounts; to the Committee on Banking and Currency.

By Mr. O'NEILL:

H. R. 7630. A bill to amend the Postal Field Service Compensation Act of 1955 to establish four longevity steps for postal field service employees, to accelerate the granting of longevity step increases, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BERRY:

H. R. 7631. A bill to provide for the sale of certain lands to the Oglala Sioux Tribe in South Dakota; to the Committee on Interior and Insular Affairs.

By Mr. PATTERSON:

H. R. 7632. A bill to amend the Federal Insurance Contributions Act to provide that, in determining whether two-thirds of the employees of a nonprofit organization have signed the waiver certificate required for social security coverage, employees covered by a State or local retirement system shall not be counted; to the Committee on Ways and Means.

By Mr. PELLY:

H. R. 7633. A bill to make the Civil Service Retirement Act amendments of 1956 applicable to certain persons who retired under the automatic separation provisions of the Civil Service Retirement Act prior to the enactment of such amendments; to the Committee on Post Office and Civil Service.

By Mr. REUSS:

H. R. 7634. A bill to increase the normal tax and surtax exemption, and the exemption for dependents, from $600 to $700, without inflation, and to reduce the percentage depletion for natural resources; to the Committee on Ways and Means.

By Mr. SCOTT of Pennsylvania:

H. R. 7635. A bill to permit one-half of the budget surplus for any fiscal year to be applied against the public debt and to provide that one-half of such surplus shall be applied as tax credits against individual income taxes; to the Committee on Ways and Means.

By Mr. SIKES:

H. R. 7636. A bill to provide for the conveyance to the State of Florida of a certain tract of land in such State owned by the United States; to the Committee on the Judiciary.

By Mr. SMITH of Wisconsin:

H. R. 7637. A bill to amend the Internal Revenue Code of 1954 to provide that recorded mechanic's liens shall have priority over unrecorded liens for Federal taxes; to the Committee on Ways and Means.

By Mr. TALLE:

H. R. 7638. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. THOMPSON of New Jersey:

H. R. 7639. A bill to create a Supply and Service Administration as a Department in the Department of Defense, to provide that at least 25 percent of the procurement contracts by the Administration shall be let to small business, to protect the Government's interest in certain patent rights, and for other purposes; to the Committee on Armed Services.

H. R. 7640. A bill to amend the act of August 31, 1956, to extend the time within which the report required by that act shall be made by the President's Advisory Commission on Presidential Office Space; to the Committee on Public Works.

By M. THOMSON of Wyoming:

H. R. 7641. A bill to amend section 27 of the Mineral Leasing Act of February 25, 1920, as amended, in order to promote the development of coal on the public domain; to the Committee on Interior and Insular Affairs.

By Mr. UDALL:

H. R. 7642. A bill to change the method of computing basic pay for members of the uniformed services, to provide term retention contracts for Reserve officers, and for other purposes; to the Committee on Armed Services.

By Mr. VAN PELT:

H. R. 7643. A bill to permit Cheddar cheese imported from foreign countries for the purpose of exhibition at the international Cheddar cheese scoring contest, to be held at Fond du Lac, Wis., to be admitted without payment of tariff, or subject to quota limitations, and for other purposes; to the Committee on Ways and Means.

By Mr. WITHROW:

H. R. 7644. A bill to amend the Trade Agreements Extension Act of 1951 with respect to escape clause procedure, and for other purposes; to the Committee on Ways and Means.

H. R. 7645. A bill to provide for the release of restrictions and reservations contained in instrument conveying certain land by the United States to the State of Wisconsin; to the Committee on Armed Services.

H. R. 7646. A bill to repeal the cabaret tax; to the Committee on Ways and Means.

By Mr. ZABLOCKI:

H. R. 7647. A bill to amend title II of the Social Security Act to provide that a widow who loses her entitlement to benefits by remarriage may, if otherwise eligible, become entitled immediately upon such remarriage to wife's insurance benefits on the basis of her second husband's wage record; to the Committee on Ways and Means.

By Mr. McCONNELL:

H. J. Res. 335. Joint resolution directing that the financial reports and other information filed with the Secretary of Labor pursuant to subsections (f) and (g) of section 9 of the National Labor Relations Act, as amended, be made available to the public; to the Committee on Education and Labor.

By Mr. SCHWENGEL:

H. J. Res. 336. Joint resolution to establish Civil War Centennial Commission; to the Committee on the Judiciary.

By Mr. ENGLE:

H. Con. Res. 176. Concurrent resolution authorizing the printing as a House document of certain material relating to the Central Valley project of California, and providing for additional copies; to the Committee on House Administration.

By Mr. THOMPSON of New Jersey:

H. Res. 258. Resolution to express the sense of the House with respect to procurement by the Department of Defense from small-business concerns; to the Committee on Armed Services.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to hunting and fishing on military reservations in California; to the Committee on Armed Services.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States to give consideration to leasing or giving control to the Parker Dam County Recreation District the lands located within the boundaries of said district; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Florida, memorializing the President and the Congress of the United States relative to House Concurrent Resolution No. 1083, relating to the property on which Tyndall Air Force Base Reservation is located in Bay County, Fla.; to the Committee on Armed Services.

Also, memorial of the Legislature of the State of Minnesota, memorializing the President and the Congress of the United States to repeal excise taxes levied on the transportation of persons and property by common and contract carriers; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Missouri, memorializing the President and the Congress of the United States relative to going on record as endorsing the salary adjustment for postal employees commensurate with that in private industry; to the Committee on Post Office and Civil Service.

Also, memorial of the Legislature of the Territory of Hawaii, memorializing the President and the Congress of the United States to provide for a Federal contribution to the Hawaiian home loan fund and for other purposes; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Hawaii, memorializing the President and the Congress of the United States to amend the Hawaiian Organic Act so as to raise the maximum debt limitation; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 7648. A bill for the relief of Jennie Alpern and daughters Berthe F. and Bellina F. Alpern; to the Committee on the Judiciary.

By Mr. ASHLEY:

H. R. 7649. A bill for the relief of Thomas Samuel Minott; to the Committee on the Judiciary.

By Mr. BROWNSON:

H. R. 7650. A bill to provide for the sale of the Lockefield Gardens housing project to the Board for Fundamental Education, and for other purposes; to the Committee on Banking and Currency.

By Mr. CRETELLA:

H. R. 7651. A bill for the relief of Christos H. Skapoulis; to the Committee on the Judiciary.

By Mrs. GRANAHAN:

H. R. 7652. A bill for the relief of Religiosa Luigia Frizzo, Religiosa Vittoria Garzoni,

Religiosa Maria Ramus, Religiosa Ines Ferrario, and Religiosa Roberta Ciccone; to the Committee on the Judiciary.

By Mr. GRIFFIN:

H. R. 7653. A bill for the relief of Otto Gray; to the Committee on the Judiciary.

By Mr. HENDERSON:

H. R. 7654. A bill for the relief of Richard M. Taylor and Lydia Taylor; to the Committee on the Judiciary.

By Mr. JUDD:

H. R. 7655. A bill for the relief of Alice Eirl Schaer (Mi On Lee); to the Committee on the Judiciary.

By Mr. LANKFORD:

H. R. 7656. A bill for the relief of Lt. Comdr. William E. Farrell, United States Naval Reserve, retired; to the Committee on Armed Services.

By Mr. McCONNELL:

H. R. 7657. A bill for the relief of Robert N. Jordan; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois:

H. R. 7658. A bill for the relief of Mrs. Misao Obata; to the Committee on the Judiciary.

By Mr. ROGERS of Colorado:

H. R. 7659. A bill for the relief of James Edward Bundgaard; to the Committee on the Judiciary.

H. R. 7660. A bill for the relief of Dan Hill; to the Committee on the Judiciary.

By Mr SMITH of Virginia.

H. R. 7661. A bill for the relief of Dolores Cocke Moyano; to the Committee on the Judiciary.

By Mr. YOUNG:

H. R. 7662. A bill for the relief of Jimmie Thurmond; to the Committee on the Judiciary.

By Mr. ZELENKO:

H. R. 7663. A bill for the relief of Julio Alberto Chorie Alamo; to the Committee on the Judiciary.

By Mr. PATTERSON:

H. R. 7664. A bill for the relief of Dr. Carmela Maria Torre; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

247. By the SPEAKER: Petition of the executive director, commissioners, roads and revenue, Brunswick, Ga., petitioning consideration of their resolution with reference to endorsing a salary schedule for postal employees commensurate with that in private industry and which will give adequate recognition of the increased productivity of postal employees; to the Committee on Post Office and Civil Service.

248. Also, petition of the president, the Panama Canal Society of Chicago, Highland Park, Ill., petitioning consideration of their resolution with reference to urging enactment of legislation providing for the creation of an Independent Interoceanic Canals Commission to study and review all the problems involved in the matter of increased capacity for the canal, with recommendations in the premises; to the Committee on Merchant Marine and Fisheries.

249. Also, petition of the secretary, Roanoke Bar Association, Roanoke, Va., petitioning consideration of their resolution with reference to approving passage of H. R. 9, and H. R. 10; to the Committee on Ways and Means.

250. Also, petition of the secretary, Curley Creek Grange, Southworth, Wash., petitioning consideration of their resolution with reference to requesting their Congressional delegation in Washington to put up a relentless fight for the building of the Hells Canyon Dam; to the Committee on Interior and Insular Affairs.

EXTENSIONS OF REMARKS

Improper Activities in the Labor or Management Field

EXTENSION OF REMARKS

OF

HON. JOHN L. McCLELLAN

OF ARKANSAS

IN THE SENATE OF THE UNITED STATES

Monday, May 20, 1957

Mr. McCLELLAN. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a copy of a letter I received from the American Civil Liberties Union under date of May 15, 1957; a copy of my reply, dated May 18, 1957; and a news article which was published as a result of the letter I had received.

There being no objection, the correspondence and article were ordered to be printed in the RECORD, as follows:

AMERICAN CIVIL LIBERTIES UNION,
New York, N. Y., May 15, 1957.

The Honorable JOHN L. McCLELLAN,
Chairman, Select Committee on Improper Activities in the Labor or Management Field, Washington, D. C.

DEAR SENATOR McCLELLAN: Because of the American Civil Liberties Union's long-established concern about the abuses of democratic rights within labor unions, we have followed the proceedings of the Select Committee with great interest. Since 1942, when we prepared our first study on the subject, we have endeavored to have these abuses corrected. We believe that, as the labor movement has assumed a major position in our society, it is vital for it to assume the responsibility which comes with this status by safeguarding its members' intraunion rights of free speech, fair trial, and nondiscrimination.

So, when the select committee was appointed, we favored the investigation as leading possibly to an improved observance of democratic practices within the labor movement. We felt that this issue is a proper area of Congressional investigation, as information is needed before Congress can consider whether remedial legislation is necessary. We have also been glad to note the AFL–CIO's firm action toward removal of unethical practices, and hope this will aid internal democracy too.

We present this background because we do not wish the following comments to be misconstrued as an attack on the committee's objectives, for we are in accord with its purpose. In fact, our concern is that the committee's occasional lapses from fair procedure may lessen its contribution in the important field of internal union democracy. Granting the committee's frustration over the refusal of some witnesses fully to disclose information pertinent to its inquiry, we are sure you will agree that procedures violative of due process should not be used to achieve the desired objective.

We refer to two specific examples: the first concerns the recall of Dave Beck, president of the Teamsters Union, as a witness following his Federal indictment for income-tax evasion; and the second concerns your statement at a hearing, reported in the New York Times of March 28, following Beck's refusal to answer questions about misuse of union funds, "I don't know any word to describe it less than theft."

These examples, in our opinion, raise the disturbing question of the committee's functioning as a judicial body whose purpose is to convict, rather than a legislative body whose purpose is to gain information to assist in the framing of legislation. The decision as to guilt is a criminal matter to be determined in court, where all the judicial safeguards may apply in the course of a regular criminal trial. We do not believe it is within the purview of Congressional committees to make findings of guilt or innocence. It is this blurring of the line between judicial and legislative functions that aroused public opposition to the probes of Congressional bodies investigating communism in recent years. The problem is amplified in this instance when a witness is already under indictment and must stand trial in our courts.

We want to emphasize that we offer these comments not in defense of Mr. Beck or the Teamsters Union, but in defense of vital civil liberties principles which need constant affirmation, particularly when the power of Government is being exercised. To repeat our original statement, the good work and objectives of the committee can be jeopardized if procedures which invade constitutional guaranties are not fully observed. We respectfully urge that future hearings will not be marked by departures from the principles of due process.

Sincerely yours,

PATRICK MURPHY MALIN,
Executive Director.

MAY 18, 1957.

Mr. PATRICK MURPHY MALIN,
Executive Director, American Civil Liberties Union, New York, N. Y.

DEAR MR. MALIN: This acknowledges your letter of May 15.

The committee recalled Mr. Beck to testify for the purpose of giving him an opportunity to deny, refute, or explain the derogatory evidence the committee had received against him. Do you claim that is a violation of "civil liberties"? Had he not been recalled and given that opportunity, then no doubt you would have charged the committee was unfair and only willing to hear one side—the testimony against him—without giving him an opportunity to defend himself or explain his actions.

Regarding your other complaint, may I say that the committee has not convicted Mr. Beck of any crime, although it is my belief that he has committed many criminal offenses. As an American citizen, as a Member of Congress, and as chairman of this Senate select committee, I reserve the right to express my views regarding testimony developed before the committee. That is a "civil liberty" I have not surrendered and do not intend to relinquish.

Sincerely yours,

JOHN L. McCLELLAN,
Chairman,

CIVIL LIBERTIES UNION RAPS ATTACK ON BECK

The American Civil Liberties Union today hit out at a remark by Senator JOHN MCCLELLAN, Democrat, of Arkansas, that Dave Beck's handling of Teamster Union funds was theft.

The union wrote to Senator MCCLELLAN that it approved the purpose of an investigation of Beck by a special Senate committee

of which Senator McCLELLAN is chairman. But it said the investigation has been marked by lapses of fair procedures.

Among these, the union said, was the Senator's comment, "I don't know any word to describe it but theft," in reference to Beck's use of teamster money. "The decision as to guilt is a criminal matter to be determined in court," the civil liberties group said.

Jefferson-Jackson Day Dinner Address by Hon. Wayne Morse, of Oregon

EXTENSION OF REMARKS
OF
HON. PAT McNAMARA
OF MICHIGAN
IN THE SENATE OF THE UNITED STATES
Monday, May 20, 1957

Mr. McNAMARA. Mr. President, I send to the desk a copy of the address delivered by the able and distinguished senior Senator from Oregon [Mr. MORSE] at a Jefferson-Jackson Day dinner in Detroit, Mich., on Saturday, May 18, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LET'S JOIN THE ISSUES

(Remarks by Senator WAYNE MORSE to Jefferson-Jackson Day Dinner, Detroit, Mich., May 18, 1957)

Governor Williams, reverend clergy, Senator McNAMARA, Lieutenant Governor Hart, my Congressional colleagues, all Democratic officials, and fellow Democrats, it is a high honor to be invited to speak to a Jefferson-Jackson Day dinner in Detroit, Mich., particularly at a time when the Democratic Party in this State is rising to a zenith of power and prestige that is almost unmatched elsewhere in this country. Your great Governor Williams has demonstrated an ability unusual in American politics, and that is a capacity not just to win an unprecedented number of terms in office for himself, but to lead his entire party to success in his State.

It is a great privilege to me to be at the meeting with my good friend PAT McNAMARA. He can close his ears for a minute while I talk about him. In 1954 I campaigned for PAT McNAMARA in Michigan. I knew I was campaigning for a true liberal, a fine man, and a great Democrat. His record in the Senate proves I was right. Pat is doing a wonderful job for Michigan and the Nation in the Senate of the United States. In my book of political qualifications for high office PAT McNAMARA rates with the best. He personifies courage. He inspires me with his honest independence of judgment. He has brains and please remember that there is no substitute for brains in public service.

Pat enjoys and deserves the esteem and respect of the Senate. Start reelecting him now because it is very important to Michigan and the country that he be kept in the Senate for many years to come.

It is not often that politicians do more than achieve their own success at the polls and in public affairs. It is rare, indeed, as American election statistics show, when the popularity of a candidate can be transferred to other candidates in sufficient numbers to help them win elections, and it is even more rare when a popular leader can sustain the gains of his party even when he is not on the ticket.

Governor Williams has been able to achieve that for the same reasons that a very few other State and National leaders have achieved it—because he has personified a program and policy of government that has served the general welfare of his State. He has brought vitality and liberalism to the Democratic Party in Michigan and made the party the true servant of the people. As a result its candidates have been elected to more State and local offices than Democrats have ever held in your State before.

I am proud to say that we have been making the same record in Oregon. Last fall we not only held the Senate and House seats we Democrats already had, but gained 2 more of Oregon's 3 Republican Congressional seats; we captured the statehouse, the lower house of the State legislature, and gained a tie with Republicans in the State senate, so that Democrats in Oregon, too, now hold more State and local offices than ever before in history.

Much has been made of the strong showing by our party in the Pacific Northwest last fall in face of the Eisenhower vote. I want to talk to you about the reason for that success, which is the same, I think, as the reason underlying your great victories here in Michigan.

Our example to the party nationally is essentially that in neither State have we provided Eisenhower and his administration with their political clothes, nor have we permitted Eisenhower to pose as a liberal while he carries out the traditional Republican policies of economic royalism. In both States Democrats have drawn the issues clearly and have taken their stand on the side of the welfare of the people and against Eisenhower's Republican policies of economic favoritism and special privilege. Thus I selected as my subject Let's Join the Issues.

Michigan has an outstanding example from its own history of why a party gains popular support and another party loses it. In the 1840's and 1850's the two national parties reached a complete stalemate on the most searching issue of the age—human slavery. The result was indecision, compromise, and evasion by the parties of an issue that was choking to death the American experiment.

As party conventions met and party platforms were drafted, they avoided coming to grips with the great issue of whether the institution of chattel slavery should be extended into the free territories. They sought to evade, to straddle, and to compromise on what was then the most divisive and paralyzing paradox of American life.

The Whig Party did not even survive its failure to face up to that issue. As its leadership hedged and compromised, its rank and file and its voting strength drifted away into new political organizations.

The State of Michigan helped give birth to the strongest and clearest voice that emerged from that welter of the 1850's. I understand that Wisconsin and Michigan dispute the actual founding of the Republican Party, but there existed in both States the desire for a political party through which firm and uncompromising opposition to the expansion of slavery could be expressed. A few candidates ran under the Republican label in 1854; in 1856 it offered the major opposition to the Democrats for the Presidency; by 1860 it captured the White House from a shattered and disorganized Democratic Party that had wound up with two candidates and two platforms.

I need not come to Michigan to relate to you the history of your State, but I would point it out to you as a graphic reminder of the futility of compromise on the great issues of human freedom and progress by a political party and the necessity for positive and unequivocating party policies. As a footnote to history, let me add that it was a declaration by independent Democrats in 1854 that furnished the greatest impetus to the founding of the Republican Party here in the Midwest. "Demagogs may tell," they wrote, "that the Union can be maintained only by submitting to the demands of slavery. We tell you that the Union can only be maintained by the full recognition of the just claims of freedom and man. The Union was formed to establish justice and secure the blessings of liberty. When it fails to accomplish these ends, it will be worthless, and when it becomes worthless it cannot long endure."

The same might well be said of a party, and of the Democratic Party. One hundred years ago, a strong stand for the just claims of freedom and man brought the Republican Party to the heights of power within 6 years of its founding. The failure to take such a stand ruined the Democratic Party for a generation and nearly caused its destruction.

It is to the credit of our party that it survived those years of political cowardice and impotence, which terminated in a shameful defense of human slavery and disunion. We should be proud of the fact that our party was able to recapture the tradition of Jefferson and Jackson, and to become again the symbol and vehicle of human progress in America.

That was because the Democratic Party remained, basically, the party of the workingman, the farmer, and the small-business man and under Cleveland, Woodrow Wilson, Roosevelt, and Truman it emerged in its best tradition. Where we dodge or equivocate on the great economic and social issues of our day, when we fail to stand for the general welfare of the American people and for programs needed to push back the limitations on human freedom, when we give aid and comfort and political support to a morally corrupt Eisenhower administration, we fail the true, historic mission of the Democratic Party and do not earn or deserve the support and votes of the people.

When we stick by our basic principles of fighting for the interests and welfare of all the American people, we have won elective office. I think that is the great lesson the national Democratic Party can learn from Michigan and from the Northwest.

We have opposing us in Washington a typically reactionary Republican administration, despite the new labels that are pasted on it, all the way from dynamic conservatism to Modern Republicanism. All of them boil down to synthetic idealism when it comes to an examination of what the administration is actually doing. On the great economic issues of today, on natural resources, interest rates, and on tax policies, the Eisenhower administration has proved over and over again that its purpose is to promote not the general welfare, but the welfare of the investor and profiteer. A study of American political history would show that the genuinely modern Republicans were Lincoln, Teddy Roosevelt, Gifford Pinchot, and George Norris; the Eisenhower administration's claim to being modern rests solely on chronology, and has no relationship whatever to development or historical progress.

I know of no more serious or far-reaching issue on which our party must draw the line against the Eisenhower administration and take forthright leadership than on that of conservation and preservation of our natural resources, of which water is among the most important.

Let us never forget that water is the greatest nourishment of the civilization of any nation. When I talk about conservation and full development of the natural resources of our great river basins—the Tennessee, the Missouri, the Columbia, and the rest, I am talking about the need for maintaining a high water table in order that we may maintain a high level of civilization. Without water, human and plant life is impossible. Lack of adequate water has doomed whole areas that once flourished. In the strife-torn Middle East, for example, there was four times the amount of land

under cultivation in Roman times as there is today.

It is urgent that the dimensions of our water problem be recognized, for it takes years and decades to achieve the means of adequate multipurpose water development. I predict that as our population grows, and our industry becomes more extensive, we will find that the adequacy of our water systems will be the ultimate limitation upon our capacity to grow.

It is within man's power to waste water or use it to the full. The most fearful waste is that which permits the destruction of sources of water by failure to protect watersheds and the irresponsible pollution of our God-given streams. The Democratic Party should carry the fight to the Republican Party on the water resources issue, because the Eisenhower administration has already made a sorry record against the future generations of American boys and girls by its various proposals for underdevelopment in our Nation's river basins. Its phoney partnership plan, for example, selling out the people's heritage of their own water rights to private utilities, will result in the cheating of future generations out of a full enjoyment of the maximum economic potentials of our river basins.

There can be no compromise of the principles inherent in this issue. I hold no brief for any Democrat in the Congress of the United States who gives aid and comfort and support to the Eisenhower administration's underdevelopment proposals because it is only through comprehensive development that we can protect the water rights of future generations, and assure the greatest benefits to the greatest number of our people.

We will make progress on comprehensive development when there is adequate reccgnition of the public interest, and protection is given it without evasion or equivocation.

The project that best dramatizes the water resource issue is the great Hells Canyon Dam issue. I am sure that none of you came to this meeting expecting to go home without hearing me mention this issue. I do so with great political relish, because it is one of the many Achilles' heels of this Republican administration.

The Hells Canyon Dam symbolizes the great difference between the private utility-controlled Republican administration of President Eisenhower and the program for the future of forward-looking Democrats.

The power to be generated at site and which Hells Canyon would make possible downstream will make possible new private enterprise with new plants and the businesses which spring up to serve new industrial communities. What the supporters of high Hells Canyon Dam want is a transfusion of low-cost power for a more vigorous private enterprise economy. A more balanced local economy will be achieved as population, with new purchasing power, grows. There will be a larger market for regional farm products and the manufactured wares of the whole country. This new economic vitality will be good for the whole country.

The Nation's farmers needs the new low-cost phosphate fertilizer which low-cost Hells Canyon power alone can make possible to the fullest extent. Farmers from the west coast to as far east as Ohio would benefit because cheap power from Hells Canyon Dam would make possible full use of the phospate deposits of Idaho and Utah, greater production of high concentrates of phosphate fertilizer, and reduced costs of fertilizers. Farm organizations owning phosphates beds in Idaho and Utah cannot now proceed with their plans for development because of the lack of an assured power supply at less than 4 mills per kilowatt-hour. Hells Canyon Dam site is uniquely situated within economic transmission distance of this great phosphate resource, and power from the dam can be made available at wholesale costs of approximately 3 mills, permitting full utilization of the phosphate beds.

Farm cooperatives through the West and Midwest expect to utilize Idaho-Utah phosphates, provided low enough power rates are available. Farmers in these regions could thereby save between $15 to $18 per ton for fertilizer. The combination of Hells Canyon power with the Idaho phosphate deposits has long been considered feasible, and as a result, the indirect benefits could be very large in the conservation of national phosphate and sulfur resources, encouragement of greater use of fertilizer, better soil conservation, and great yields per acre of food and fiber.

It does not take much foresight to know that in but a few decades our growing population will need a more abundant food supply. Expansion of agricultural capacity will require expansion of irrigation and reclamation. Even Interior Secretary Seaton has warned of that need.

That expansion cannot be accomplished economically without the historic aid of public power revenues for irrigation and reclamation projects. In Idaho and eastern Oregon especially, the future of irrigation and reclamation depends upon Hells Canyon as a Federal project. In 1953, when Secretary McKay withdrew former Secretary Chapman's opposition to the application for licenses by the Idaho Power Co., he mentioned that other possible dams might be pressed into service to provide power revenues for irrigation. Those alternatives are disappearing under the administration's resources policies. So-called partnership makes no provision for aid to irrigation.

These are the reasons why I am convinced that the Democratic Party has a great duty to oppose the political expediency of the Eisenhower administration in the field of natural resources, and to do it now by authorizing the Federal high Hells Canyon Dam. What Congress does or fails to do, and what the administration does or fails to do will have long-range and permanent effects. The floods and power shortages of the future, the economic consequences of full development or underdevelopment cannot be undone once the pattern is set. An inadequate low private utility dam built by the Idaho Power Co. cannot be repealed. A gerrymandered river cannot be reclaimed.

The Democratic Party must draw this issue of water conservation and full development of river basins with the Republican Party in a fight to the finish. We are right, and the voters will so decree in 1958 and in 1960 if we give no quarter, and stop providing the Eisenhower administration with the votes that will give away the people's heritage in their own natural resources which include th Hells Canyon Dam site.

A second issue which the Democratic Party must carry to the people of the country is fiscal policy—the tight-money policy the Republicans put into effect just 9 days after they took office in 1953. I have a lot of first-hand knowledge of this subject because I was the first to raise my voice in protest. Yet despite all the opposition put up since then against rising interest rates, and despite the fact that time and experience have proved we were right to oppose it, the administration has done nothing to reverse it.

The exercise by the Eisenhower administration of its executive discretion in fixing interest rates has shown these results: First, small business, which finances expansion mostly by borrowing instead of from profits as big business does, must now pay so much more to borrow that half the small and medium-sized companies which had bank credit lines in March of 1955 had been cut off by March of 1956; second, the rate of business failures has risen from 29 per 10,000 enterprises in 1952 to 48 per 10,000 in 1956. The Cabinet member who said in 1953 that "Big business is back in the saddle" was absolutely right. The depressed condition of small business proves that he was right.

The high interest rate policy of the Eisenhower administration is a throw-back to Republicanism of old—of McKinley and Coolidge—regardless of what is done to peddle it under the name of "Modern" Republicanism. It is a policy that lines the pockets of bankers, investors, and big-business men, and brings ruin to farmers and small-business men. Already, the Pacific Northwest has shown the effects of this policy in declining employment, and so have other sections of the country.

To many, the terminology of this economic issue is not dramatic, and lacks political sex appeal, but in my judgment, it is one of the most critical of all economic issues because if the tight money policy continues unchecked, it can put the country right back where the last Republican administration put it—in a first-class economic depression. The Treasury Secretary may very well be right when he says the country faces a depression that will curl our hair, but he cited the wrong reason. If one does occur, it will be as a result of his own tight money policy, and his tax policy of favoritism for big business.

An old, old issue that plagues the Nation and therefore the Democratic Party, too, because of the very fact that we are a national party, is that involving civil rights. I am not one to stand up in Detroit, or in Chicago, or in Cleveland, or New York and point to the South and say that that region of the country is the one that must start assuring its racial minority of equal protection of law, and social and economic opportunity. But I do say that the Democratic Party must show the way, and to the extent that we fail to do so, we fail the people and do not deserve their support.

The day when an eligible voter can be intimidated, or otherwise denied the exercise of this basic right of participation in self-government, belongs to the historic past. It is abhorrent to every principle on which our Nation is founded, and is therefore equally abhorrent to the principles of our party. That practice must be attacked wherever it occurs, and the voting privilege protected vigorously by all three branches of the Government.

Equivocation on suffrage and on equal protection of the law is intolerable and inexcusable, and will lose for the Democratic Party the confidence of millions of Americans who have every right to expect strong leadership from us. If we fail them, they will be right to turn away from the Democratic Party.

There are many other issues on which we must demonstrate leadership founded on the great moral principle of the Constitution that the objectives of our Government are the establishment of justice, the securing of liberty, and promotion of the general welfare. It is not enough that we work for the specific legislative and administrative proposals for farmers, working people, and small-business men that we have championed over many decades. There are new and confusing challenges we must come to grips with, such as the revolution in industrial and employment patterns as a consequence of automation, and whether the marvelous potential of power from atomic energy is to be put to its maximum use for all the people, or monopolized for private profit.

But above all, we must not compromise our party by compromising our principles. The examples of betrayal of the public trust by the Eisenhower administration in natural resources, in its domination by big business with continuing business interests, and its neglect of the people's need for help in the fields of education, civil rights, and social and employment security are already on record.

Let there be no equivocation or timidity in taking this record to the American people. When they know the facts about it, and when we have proved that we are the party of America's future, we will find that we have earned their votes on election day.

Armed Services Day Speech of Hon. John C. Stennis

EXTENSION OF REMARKS

OF

HON. WILLIAM M. COLMER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1957

Mr. COLMER. Mr. Speaker, on Saturday last—May 18—on the occasion of Armed Services Day, the Honorable JOHN C. STENNIS, Senator from Mississippi, made a most impressive, thought-stirring, and logical address on the observance of this important day at Keesler Air Force Base, Biloxi, Miss.

Senator STENNIS, a member of the important Armed Services Committee of the United States Senate, in my judgment logically and appropriately pointed out that our Military Establishment is a two-edged sword. It can destroy as well as protect us. In the words of this able Mississippian:

The cost of maintaining the military preparedness necessary to insure our freedom can destroy the very freedom we seek to protect.

Again, he said:

We, as a nation, must learn to build and maintain our Military Establishment within the limits of our economy to absorb its frightening cost.

Mr. Speaker, at a time when the country is most conscious of the necessity for cutting unnecessary expenditures and at the same time obtain some relief from an all-peacetime-high taxation program, we think these sentiments are sound. Moreover, as we have repeatedly pointed out during the past decade, "Russia neither wants war nor peace." She is following the doctrine laid down by Lenin that the way to destroy the United States is to make it spend its way into bankruptcy.

Therefore, Mr. Speaker, we commend the statement of this outstanding Mississippian and express the hope that the Congress can and will make reasonable and justifiable cuts in this lion's share of the budget along with the other cuts that are being made. We think it can be done without in any wise weakening the Nation's defense.

Senator STENNIS' speech in full is as follows:

TWO STRIKING TRUTHS

First, I want, for myself, for Mississippi and the Nation, to commend the Army, Navy, Marine Corps, and the Air Force; the career men and the inductees; the officers and the enlisted men; the Reserves of each branch of the Service and our National Guard. In keeping with the finest traditions of American military service, they are doing their job in a manner in which all of us are rightfully proud. Our faith and trust in them is well placed; their record is the best. They are unequaled in courage, willpower, self-discipline and honor.

We, the people of America, who have the most at stake, owe them more than does any other country, in gratitude and appreciation. All the free world's people share this debt of gratitude, for our servicemen are the vanguard and the guardian of the world's peace and freedom.

Armed Forces Day is the day specifically set aside for them. No day of national recognition and acclaim is more deserving. When their sacrifices are considered, it is small homage indeed. I want to assure them here and now, however, that the heartfelt thanks of the American people are no less sincere on the other 364 days of each year.

The task they face is that of being the front line of world leadership.

This position, world leadership, neither sought nor wanted, was thrust on us—the youngest major power in the world. As a result of the catastrophic losses suffered by Great Britain and France in World War II, we suddenly found ourselves in a position we were not prepared to meet. We emerged from that war as the leading and most powerful nation in the world. We did not ask for this role, nor fully recognize its awesome responsibilities when it came. We are not accustomed to carrying its burdens; we do not have the centuries of diplomatic experience nor the trained personnel to meet this problem with assurance. Our way may have been faltering, but it has had no selfish motive. We have no aggressive aims to be furthered by its continuance.

It is to our credit, as the youngest major world power, that we realized the situation in time to salvage freedom and to protect ourselves. We have rapidly and soundly built the necessary military strength to meet the requirements of this new position in world affairs.

As a measure of the results we have achieved, and as a note of reassurance, let me give you the following outline of our striking power:

For the Army, the next year will see a strength of about 1 million officers and men, organized into 17 divisions, 9 regimental combat teams, 127 antiaircraft battalions, and a number of newly organized atomic support units; the Army Reserve will number 297,000 men in 1958.

Current plans for the Navy provide for 675,000 officers and men who will be assigned to 1,000 ships. A shipbuilding program includes construction of a nuclear-powered aircraft carrier and guided missile ships, 15 nuclear-powered submarines. Some 150,000 men will be included in Naval Reserve personnel.

The Marine Corps will have its 3 marine divisions and 3 air wings for a total of 200,000 men, equipped with a variety of atomic weapons.

By 1958 the Air Force will have its 128 wings. The B–36 bomber wings are being rapidly replaced by all-jet B–52 bombers. The KC–135 jet tanker production program will be continued. To man these planes there is a strength of 925,000 officers, enlisted men and cadets, with 80,000 Air Reserve personnel and 73,000 Air National Guardsmen. We have extensive radar warning networks.

The Air Force will be 50 years of age August 1 of this year, and in that period has grown from the initial order for a 3-man group "to study the flying machine and the possibility of adapting it to military purposes" to an organization requiring $17.7 billion annually for operations.

On January 16, 1957, three B–52 bombers completed nonstop flights around the world in 45 hours and 19 minutes, refueling in flight. They conclusively demonstrated that they can range to any target assigned anywhere in the world. This bomber can climb to over 50,000 feet and fly more than 650 miles per hour. The world's first supersonic bomber will soon be added as a member of the Strategic Air Command bomber team.

New research aircraft afford a glimpse of the manned aircraft of tomorrow. The X–1A has obtained a speed of over 1,650 miles per hour and flown an altitude of over 90,000 feet.

The guided missile, which I shall not undertake to discuss in detail, forecasts more perhaps than any other single weapon what the Air Force of the future will be like. The era of manned aircraft is not over, but the era of the unmanned missile in warfare is very much at hand.

What is the practical effect of this program in a world daily threatened by the inroads of international communism? Threats of a war in the Formosan area were not stopped by mere passage of a Congressional resolution. That resolution gave the approval of Congress to the continuous patrol of that area by two Navy aircraft carriers; deterring a new "brush fire war" by Communist aggressors in that troubled part of the world. All is quiet on the Formosan front.

The presence of the Sixth Fleet in the Mediterranean Sea, fully powered with all modern weapons, is the strong, silent force which has brought some stability to the Middle East. Without the presence of such a force, and the firm declaration by the United States in the Middle East Resolution, that area would probably already have been taken over by our adversaries.

From these instances in recent history, it is apparent that the United States has to maintain a strong military program—stronger than any other nation—and inferior to no combination of powers in the world.

So long as the international situation continues to be tense we must continue to be the mightiest military power. At the same time, to allay the fears of the neutrals, we must reemphasize that we build purely for the defense of freedom—never for aggression. Our granting the Philippines independence and conferring Commonwealth status on Puerto Rico have underscored this. No free nation need stand in fear of the United States.

This, then, is our obligation to ourselves and to the world: To maintain freedom's strongest arm.

But the cost of maintaining the military preparedness necessary to insure our freedom can destroy the very freedom we seek to protect.

For the year 1958, Congress has been requested to appropriate $38.5 billion directly to the Department of Defense for our largest peacetime military budget in history. This is more than 50 percent of the entire budget and does not include amounts for atomic energy development, foreign military aid, and other defense-connected items.

To illustrate the full impact of the increased cost of our vast military machine, the B–17 bomber used during World War II cost $250,000; the B–36 in use in the 1940's cost $3 million; the B–52 approaching use today costs $8 million. A World War II fighter cost $50,000; the present jet fighter costs from $700,000 to over $1,000,000. For a modern bomber there must be a stockpile and maintenance list of 46,000 line items, compared with 6,400 similar items in World War II, and $800,000 worth of ground equipment, as compared with $70,000 worth previously.

A modern submarine costs over $44 million, eight times as much as a World War II type. The largest World War II aircraft carrier costs $80 million; today's atomic carrier will cost over $300 million.

In the radar-atomic-missile age, all unit costs are continuing to soar.

This military striking power can be our downfall—not by any abuse of the power of its force—not by the corruption of our national or military leaders—but by the simple operation of basic laws of economics. We, as a nation, must learn to build and maintain our Military Establishment within the limits

of our economy to absorb its frightening cost. This challenge extends to us all.

I want to lay side by side two striking truths which we must face and adjust to in the years ahead.

1. Russia's primary attack on us is not by war but in forcing us into spending programs beyond the capacity of our free economy, and in causing us to squander our great natural resources. They have succeeded in straining our national economy through excessive Government spending.

Since the Russians completed their first atomic explosion in 1949, we have appropriated money for military programs in an atmosphere of fear. Our responsible military leaders lean all too far toward the attitude of asking for all that they can get. These two approaches must be stopped.

2. Our military appropriations have reached their peak. Increased preparedness in terms of more planes, more tanks, more carriers, more missiles, more atomic weapons, better training, better equipment, and better careers for personnel are all going to depend on the leadership shown by our military themselves in careful planning and a more efficient spending of available funds. It is their duty and their responsibility.

Congress has been told and the people have been told year in and year out that reductions in military spending cannot be made without wrecking the Nation's safety and security.

This simply is not true.

Every veteran who has served in our Armed Forces, and there are about 22,500,000 now living, was appalled at the waste involved in military operations. They know this waste continues. They know a better job can be done—defensewise—when this waste is eliminated.

The Congress has a degree of responsibility in connection with the overall cost of the military program. But they must rely on our responsible military leaders in learning what is actually needed.

The President has a high degree of responsibility, but even President Eisenhower must depend on the recommendations of admirals and generals.

So the professional military man, the career officer, has a special and peculiar responsibility with regard to economy and efficient planning. They have not fully accepted this phase of their obligations.

The Department of Defense has not fully accepted its responsibility for economy. Any department of Government asking for $38 billion a year must assume the primary and principal responsibility for maintaining a balanced economy in our Nation.

It is of little value to criticize without giving constructive examples or suggestions. Here are some examples of vast savings which can be planned only by professional military men:

1. At least some of the evils of useless duplication could be eliminated by military leadership through further unification of the three major branches of the military services. This duplication, the opposite of unification, is illustrated by our missile program. Each branch of the service has stoutly insisted on a vast program of its own, regardless of the vast expense involved in such duplication. The services bid against each other in this narrow and specialized field for the expensive materials, the limited number of industrial plants, and the small number of top-notch scientists who have become specialists in missiles. In this bidding against each other, they are running costs up for all.

These references do not discredit our professional military personnel, but they and the public must become aware of their new responsibility in this vast Military Establishment that will be our burden for the foreseeable future.

2. We now have 2,800,000 men under arms in all of the services combined. The total cost of salaries and maintenance for this force is $10.5 billion per year. Substantial savings can come through an expanded and extensive system of active Reserves for all branches of the service. Under the active Reserve program, prior military training can be utilized and further training continued through operation of Reserve units near the homes of the men. The per-man cost is war less than in the active service.

The times demand that our professional military leaders come forward with a strong and better Reserve program. This continuing challenge has not yet been met by our military leaders.

3. As a part of this personnel plan, I think we must go even further in establishing a system of permanent military careers extending from the lowest noncommissioned rank to the 5-star general. Through spreading the general popularity and appeal of such a career, we would eventually be able to abandon the peacetime selective service program.

These, in brief outline, present some of the serious major problems for which some effective solution must be found.

We realize, however, that real and permanent peace can never be the fruits of any military program, even though we must maintain the level of military preparedness necessitated by world conditions. I hope the Communist threat is ebbing because of the disillusionment of its unhappy people behind the Iron Curtain.

But the real hope for peace rests—not in armed might—but with the opportunity of freedom loving people everywhere to be free.

Newly independent nations, assuming their rightful places in the family of nations—the world community—must have the protection to keep that freedom. Their people, through the increased economic opportunities of an independent government, must have the experience of breathing freely.

Through independence, economic and political opportunities, and national respect, the desire for peaceful existence will become universal. On that day permanent peace will become a reality. This, as Americans, is our goal.

Atoms in Our Future

EXTENSION OF REMARKS
OF
HON. ESTES KEFAUVER
OF TENNESSEE
IN THE SENATE OF THE UNITED STATES
Monday, May 20, 1957

Mr. KEFAUVER. Mr. President, I have just noted, in the first edition of a new magazine entitled The Western World, an excellent article entitled Atoms in Our Future, written by the Senator from New Mexico [Mr. ANDERSON]. The article deals in a very illuminating way with the use of atomic energy, and I know that all Members of Congress will enjoy reading it. Therefore, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ATOMS IN OUR FUTURE

(By CLINTON P. ANDERSON)

(Senator ANDERSON was for 2 years chairman of the Joint Congressional Committee on Atomic Energy. Prior to his election to the Senate from New Mexico in 1948, he had served for 3 years under President Truman as Secretary of Agriculture. Born in North Dakota of Swedish immigrant parents, he has spent most of his life in the American Southwest, where he founded his own insurance company in the early 1920's.)

Many Americans, trying to make sense out of the Suez crisis, have found it difficult to understand why a narrow strip of water can so quickly divide the nations of the world, can put them, indeed, into what is virtually two armed camps, and can find them standing like small boys drawing lines in the sand and daring each other to start a first-rate war.

It is difficult for Americans generally to realize how dependent the people of Western Europe are upon Middle Eastern oil. It takes a crisis such as the Suez to bring home to America the enormous dependence of a nation like England on the tankers and pipelines that bring to it the essential sources of energy out of the Middle East. If enough ships are sunk in the channel of the Suez Canal, the headlines the next day proclaim the possibility of oil rationing in much of Europe.

The very dependence of our traditional allies, England and France, upon the oil of the Middle East gives rise to the question as to what the future will be for atomic energy and how quickly the power of the atom may become the backbone of electric-energy generation in many parts of the world, and particularly in a country such as England. It also gives rise to speculation as to whether there may not be unusual and dramatic uses for which the atom may be harnessed—uses which could transform the whole industrial economy of vast areas of the earth now scourged by poverty and an unequal share of the world's energy resources and put into these areas unheralded wealth and unknown abundance. These would not be circumscribed by a temporary flow of oil, but instead a supply of power that would be virtually limitless and eternal might be found in the waters of the sea.

NO CEILING TO EUROPE'S ECONOMY

Atomic energy will not in a few years make the oil of the Middle East unnecessary to turn the wheels of European industry, yet it could, and I believe it will, remove the ceiling which oil now places upon the economy of Europe. Indeed, it could alter the power problem of a whole continent in his generation and of the whole world in the generations to come.

Let us start with this problem of the Middle East oil coming through the Suez Canal. Must it move that way? I think not. I say that because a field which seems to hold great promise for the future—and which also has immediate importance to all of us today because of the Suez Canal crisis—is that of nuclear ship propulsion.

As you probably know, the United States Navy, under Adm. Hyman G. Rickover, pioneered in this field. The U. S. S. *Nautilus* has been in operation, and very successful and remarkable operation at that, for many months now. Other nuclear-powered submarines are under construction, and the Navy in addition recently announced plans for its first large nuclear-powered surface ship. But this is only part—the military part—of the bright future ahead for nuclear ship propulsion. The era of the peacetime atomic-driven merchant ship is opening.

NUCLEAR TANKER

During its previous session, the Congress of the United States passed legislation authorizing the construction of the first nuclear-powered merchant ship. I was very much in favor of this idea, and as chairman of the Joint Committee on Atomic Energy, I submitted a statement to the Senate committee which was considering this bill. In the summary of this statement I said:

"It would appear, on the basis of the technical information furnished us to date, that

our first step should be to design and construct a nuclear-powered oil tanker, and I hope that the Congress will provide the necessary authorizing legislation to proceed with this project."

When I submitted my recommendation a year ago in favor of an atomic oil tanker, I was acting on the basis of the best technical information I could obtain. The Joint Committee on Atomic Energy had spent many hours holding hearings on the subject of nuclear ship propulsion. We heard testimony from Admiral Rickover, from technical experts in the Atomic Energy Commission and the Maritime Administration, and from representatives of the private shipbuilding industry. On the basis of all this testimony, it seemed to me, as it seemed to others, that the oil tanker was the best bet because this was the type that would probably soonest be economically competitive, and which private industry would want to build.

To buttress this reasoning, I would like to refer to the report of the panel appointed by the joint committee to study the impact of the peaceful uses of atomic energy, known as the McKinney panel. This panel reached the following conclusion:

"Atomic propulsion should have the best chance of being competitive in the case of large, high-powered ships which carry heavy bulk cargoes in unlimited supply and spend the maximum amounts of time at sea. Ships with these characteristics could utilize the heavy investment in nuclear powerplants to the maximum advantage and could employ effectively the space saved by eliminating fuel supplies to increase the cargo payload. The Maritime Administration considers oil tankers and bulk ore carriers the best examples of these types of commercial vessels. A modern oil tanker, for example, has a very large cargo payload and spends up to 90 percent of its life at sea."

I believe that the McKinney panel reasoning is sound. If we have to put large capital investment in our engine plant—and we would have to, especially at first, in the case of atomic reactor propulsion plants—it makes only good sense to keep our ship underway a maximum amount of time in order to get our money's worth. Since oil tankers can be loaded and unloaded in a hurry, they can spend 90 percent or more of their time at sea, getting full use out of the nuclear engines. Oil tankers also hold promise, I believe, because of the possibility of using some of the oil cargo to act as a shield between the reactor and the operating crew.

Also, as pointed out by the McKinney panel report, a large portion of the United States merchant fleet will become obsolete and must be replaced during the period from 1960 to 1965.

And that leads to another point: The oil tanker field is a growing one and a good one in which the maritime nations may wish to invest. Smart investors and smart operators have been building larger and larger tankers and supertankers, with greater and greater capacities, to carry oil from the Middle East, from Venezuela, from the United States, and from other sources to the oil-hungry markets of the world.

Finally, there is the ugly specter of the Suez Canal crisis. As things look now, the countries which have been using it may no longer be absolutely sure of passage through the Suez Canal, and should plan other alternatives. A pipeline across Israel, the development of the new Algerian field—these may help. But as an additional ace in the hole, I believe that we should have large supertankers—and preferably nuclear-powered tankers—able to bypass the Canal and still deliver to Europe the oil that it may need. Many believe that these larger nuclear-powered tankers could carry oil to Europe around the Cape of Good Hope as cheaply as the present smaller tankers can carry it through Suez.

CONVERSION OF SEA WATER

But that is a problem brought on by a current difficulty. There are other problems which the world has faced for generations and which today the rising tide of population is making more urgent and difficult of solution. The problem of food is one of them and the problem of providing ordinary domestic water for human consumption and industrial use is another. To me, both are involved in recent studies on the possibility of converting sea water into potable water, a process which would at the some time provide power that might be utilized in the irrigation of now almost useless lands.

Through the years we have heard stories that the French have a plan for digging a canal from the Mediterranean into Africa; creating a salt-water lake in the middle of Sahara and thereby changing the climate of the world's greatest desert. That in itself is the sort of ambitious planning which the world needs and which many parts of the world must have if humanity is to be freed from constant pressures on its bread supply because of population growth. Recent reports on oil and mineral finds in this area may make realization more urgent.

Suppose nuclear fission offered a way of making sea water into usable drinking water. Suppose that great lake in the center of the Sahara Desert (assuming the French built their canal) could be sweetened for irrigation. Would there not be a rush of people who might want to live in that enticing climate? The fastest growing areas of the United States, populationwise, are the so-called lands of sunshine—Nevada, California, Arizona, New Mexico, Texas, and Florida. These States grow because people like the sun. They like to live in climates which are warmed by it and where, thanks to air conditioning, they can endure the heat of summer and need not suffer the discomforts of severe winters.

How much of a job is it, this production of sweet water from sea water, or from brackish ground water? In the United States, these possibilities have not been completely overlooked, as evidenced by the energetic studies being made by many cities. In addition, modest studies have been conducted for a number of years by industry and more recently by the Government of the United States directed toward developing a means for distilling salt water for agricultural and industrial uses. But they have all been on a small scale and few of the procedures investigated to date hold much promise of economic operation. Most have serious drawbacks to counter their advantages and almost all involve high capital costs.

Among the ideas tested are simple distillation, which requires enormous quantities of heat energy; vapor compression, which involves the inefficient transfer of heat to mechanical energy for the compressors; and solar evaporation—direct use of the sun's heat—which is free energywise, but prohibitively expensive as far as equipment is concerned.

THE ION EXCHANGE PROCESS

Still another method under test, and a rather ingenious one at that, is known as the ion exchange process. In this process salt is extracted from the water by passing it through a stack of semipermeable membranes. A small amount of electricity is used to drive the solution through the system. Although there are a few technical problems to overcome in the use of this method for large volumes of water of high saline content, some experts feel that in the long run this process may have the best chance of economic operation. In fact, such units are already being sold daily for use in producing potable water in desert areas of the Middle East at a cost of 20 to 30 United States cents per 1,000 gallons, and at the rate of tens of thousands of gallons per day.

But, at best, we are only scratching the surface of a problem whose implications are ever more serious. And here, may I suggest, we call on our friend, the atom. Why not harness the atom to fulfill the age-old dream of producing fresh water from salt? Difficult? Yes. Expensive? Probably. But in terms of saving great areas of the world from economic ruin and creating new areas into which population-pressed nations may expand, even saving the lives of people in times of drought, is any job too difficult? Is any project to expensive? I think the answer is obviously "no."

My suggestion is based on more than an abstract idea or dream. Modest studies have been going on for some time in the United States Atomic Energy Commission and in the National Laboratories at Oak Ridge and Los Alamos on this very problem. In addition, a number of industrial organizations have expressed interest in the idea in connection with projected plans for multipurpose nuclear plants.

A NEW TYPE OF REACTOR

The question is—how are we going to apply the atom to this job? Scientists who have studied this problem at my request have concluded that nuclear heating does not make the supercritical distillation process more feasible, since this process would be uneconomical from the equipment standpoint even if heat were free.

However, they have looked at other processes and have come upon the idea of a new type of reactor. They have suggested that we go all the way and choose a process which, while very wasteful of heat, requires only the simplest equipment—simple distillation. They suggest we build a low-cost, low performance reactor producing lots of heat at low temperatures. They suggest we use all the difference in temperature available between the reactor and the salt water to drive in heat in a single effect, giving the lowest requirement for heat transfer surface. Then, to keep maintenance costs down, they suggest we evaporate only one-fourth or less of the sea water in the still, so that less scale will form and the salt will be returned to the source in the undistilled portion.

A brief preliminary study indicates that such a low-performance breeder reactor could, provided it were extremely large, conceivably be built at very low cost per kilowatt of thermal capacity. This is because very large reactors have so little surface for their volume that not much more fuel and other materials are required than for a small reactor, since there is almost no leakage of neutrons per unit volume. The reactor they suggest is itself an unusual type, using a boiling slurry of heavy water. The heavy water constitutes almost the entire cost of the reactor, which appears to be less than $10 per kilowatt of thermal capacity. Although the quantities of all materials required are available, this type of reactor has never actually been designed, certainly not operated, and costs per kilowatt of this order

These scientists are not timid men. They suggest that a project of this nature could be constructed at a cost from $600 million to $800 million and produce 1 billion gallons of fresh water per day, about 1 million acre-feet per year, at a cost, including amortization, replacement and maintenance, operation and fuel, of between 10 and 15 cents per 1,000 gallons.

One such plant operating at 100 million kilowatts would produce 3 percent of the total heat produced by man on the entire earth. The fuel consumption would be 40 tons per year of normal uranium, or the equivalent of 160 million tons of coal. Any attempt to build a smaller scale project would raise costs at once, since the reactor

would cost almost the same at even one-tenth the capacity.

NOT A JOB FOR PRIVATE INDUSTRY

I suggest that here is a project worthy not only of dreams and imagination, but of serious consideration. This is a project too costly for an individual city, indeed, for anything less than a country. It is a perfect example, it seems to me, where one or more nations might and should step in. No municipality and no private utility company can afford to gamble $800 million on a project which when completed might not work. But governments which have gambled billions of dollars on atomic energy can afford to make one more gigantic test to see if a domestic, industrial, and irrigation water problem so vital to all parts of the earth can be solved by the distillation of salt or brackish water.

The United States does not now need nuclear reactors so urgently as do some other parts of the world. We are fortunate in having relatively abundant supplies of coal, oil, and natural gas as well as enormous resources of falling water. We could undoubtedly expand our economy for the next quarter century without having to look to the power of the atom.

But that cannot be said of lands such as England, to which I have previously alluded, where supplies of coal are limited and where the cost of mining it will grow progressively higher. Today the British nuclear program is in high gear. The plant at Calder Hall is "on the line" and other plants will follow in rapid succession. The first plant is a producer of plutonium, as well as electricity, and by assigning some arbitrary value to the plutonium output, the electrical current rate can be placed wherever the Government desires. Later plants will be solely for the generation of electricity but the costs at Calder Hall have thus far been so much cheaper than expected that there is every reason to believe that the succeeding plants will be economically feasible and produce electricity at a rate between 7 and 10 United States mills. This figure, while unattractive at present in most of the United States, is feasible and desirable in Great Britain and would be acceptable in many other parts of the earth where combinations of circumstances, both natural and man-made, have resulted in development of high power costs.

THE ATOM HAS SAVED LIVES

We seldom think of lives saved by the atomic bomb, yet they far outnumber the casualties.

We hear it said that atomic power is too costly, yet how often do we hear that atomic energy is saving millions of dollars every year?

We seldom think of strawberries when atomic energy is mentioned. Yet atomic energy has produced the world's ugliest strawberry—and some of its biggest dandelions.

Present discoveries promise health and wealth and an ease of living beyond calculation. They hint at a dazzling array of day-to-day advances, at days filled with play and very little work, travel out among the stars, pushbutton weather, and even eternal life.

Does this sound too good to be true?

It does until you think of that ugly strawberry. Then you are reminded of dozens of astonishing discoveries, each almost too good to be true. The United States has been amazingly fortunate, it seems to me, in the atomic work which it has already been able to do in the fields of medicine, biology, and agriculture. Some persons say the atomic-energy medical potential is greatest of all.

In the words of Dr. Lee Edward Farr, chairman of the medical department at the Brookhaven National Laboratory, the potential for atomic energy in medicine is so great it amounts almost to frustration. "The opportunities," Dr. Farr says, "are so fruitful in almost any direction that we don't know which way to go." Even when a course is chosen, he relates, the sense of frustration tends to remain. "For every question we answer we uncover five questions we can't answer."

One outstanding job for atomic energy in medicine, Dr. Farr says, lies in "obtaining the necessary information for understanding the aging processes and for maintaining maximum health in the individual."

The studies have already led to remarkably successful treatments of certain diseases. One striking treatment that might be mentioned is one that has been developed for brain tumors. It can be accomplished without discomfort to the patient, although it involves literally billions of atomic explosions inside the patient's head.

Knowledge gained through atomic study in the medical field is being credited by those who keep track of such things with having saved more lives than the atomic bomb destroyed in the two attacks on Japan.

BETTER, CHEAPER FOOD

Recent atomic discoveries have also opened the door to better and cheaper food, greater variety, lower cost, and a steadier supply of seasonal varieties. These studies have been made possible at Brookhaven largely through radioisotopes, but much significant work has been done with irradiation by gamma rays, beta rays, and neutrons from very powerful sources. The radioisotope method provides tracer materials which permit scientists to peer into the life processes of plants and animals, and thus gain an accurate understanding of how these processes take place. The irradiation method produces profound changes in plant and animal tissues especially the genetic cells. Experiments based on the radioisotope tracer technique have produced much greater understanding of plant growth and the chemistry of plant nutrition. Scientists have learned similar things about animals. Using this knowledge they have perfected new fertilizers, vitamin and dietary programs, and have produced striking results.

Entirely new types of plants and fruits have been produced, on the other hand, through irradiation. By selecting the beneficial changes thus induced, the experiments have developed wheat resistant to black stem rust almost overnight, when older methods would have required almost 100 years to get the same result.

We have 2½ billion people in the world today and we will have more than 6 billion people in another century. These 3½ billion new mouths will present to us an enormous problem in the planting, gathering, harvesting, and processing of foodstuffs. They will create long lists of new requirements for homes, for schools, for transportation systems and for all the accompanying luxuries which civilization has sampled and decided that it likes. I refer to radios, television sets, air conditioning units, and a thousand and one new devices that we are building in our homes and installing in our office buildings. These are not to be solely the privilege of the rich, but seem destined to become the everyday utensils of people of all classes in all climates and all countries.

In the next century the world must produce the steel to build the factories that will make the television sets and the air conditioners. It must produce the cement and the building materials out of which hundreds of millions of new homes are to be constructed. It must fabricate the airplanes, the steamships, the trains that will haul food, fiber, and raw materials back and forth across the face of the earth. Nuclear power must be available universally to fill in the gaps that our fossil fuels cannot supply. It will be used in every type of propulsion vehicle with the possible exception of automobiles. It will propel our railroads, our steamships, our tankers, our giant airplanes, and the very heavy trucks that will cross continents without a single stop.

A FORCE FOR WORLD UNITY

If I may also be permitted a guess, it is that in the long run the use of atomic energy will bring the world closer together. We shall have so many problems on the international control of the atom that in self-defense we shall be required to begin working closer together in international organizations. We have the problem of sanitation, for example. If atomic wastes are to be haphazardly dumped into the ocean, there can be widespread destruction of the fish life in a short time. The world which may become short of food in another century could not look upon such destruction with indifference. Therefore, we must have international control of the disposition of atomic wastes.

Furthermore, we must be careful about the discharge of fissionable material into the atmosphere. Strontium 90 does not affect all parts of the earth equally. Its dangerous effects may depend to some degree on the amount of calcium in the soil of a country. If calcium is available to be drawn into the bones, well and good. But if it is largely absent from the soil, then strontium 90 may replace it in people's bone structure with horrible effects.

One type of control may lead to another and endow us eventually with agreements and understandings that will ease the load of the statesmen of the future.

Finally, if I were asked to list the single greatest thing the atom can do for you and me, I think I would say "world peace." I firmly believe that our advancing atomic technology already has made full-scale, global war impossible, simply because it will mean the destruction of civilization as we know it. Is there any man so mad that he deliberately will start such a cataclysm? Further advances in technology offer to remove some of the traditional causes for war.

Man's quest for power has been blamed for past wars. Yet it has been suggested in studies made at McGill University for the Canadian Government that even our minds, our psychology, can be influenced by biological factors. Thus we may see a world of abundance undivided by disputes between nationalities, a world without war or want.

Then atomic energy will have become what the men of science first intended—a new dimension for the human spirit.

First District Florida Tabulation—1957 Questionnaire

EXTENSION OF REMARKS

OF

HON. WILLIAM C. CRAMER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1957

Mr. CRAMER. Mr. Speaker, again I have gone to the people of the four counties of the First District of Florida and have asked their opinion on the problems that face Congress today. Over 132,000 questionnaires were mailed and some 26,000 replies were received from my constituents, many of whom took the opportunity to reply at length to the problems presented. I would note at this time that the popularity of the President remains at a high level in the district and that particularly in foreign

affairs are his policies supported. It is interesting to note that there is no noticeable change from 1956 in opposition to civil rights legislation or Federal aid for school construction. Again, as last year, the people have indicated their desire to lower the national debt even ahead of a tax reduction but it appears the general desire for budget cuts reflected in both these benefits to the taxpayer is strong. I can assure this Congress, Mr. Speaker, that I shall fully consider these recommendations from the folks at home and, for the information of my honorable colleagues, under unanimous consent, I include in the RECORD at this time the full report on results of this questionnaire.

1957 Congressional questionnaire—Tabulation

	Percent	
	Yes	No
1. Should we risk Federal control of policy through Federal financing of school construction?	27	73
2. Do you approve President Eisenhower's general foreign policy?	60	40
3. Should present immigration laws—		
a. Have quotas increased?	17	83
b. Permit transfer of unused quotas to other nations?	52	48
c. Continue present quota limitations?	81	19
4. Do you favor reduced taxes for—		
a. Small business?	81	19
b. Individuals?	74	26
c. Everyone across the board?	37	63
d. No one at this time?	51	49
5. Should postal rates be raised to provide better service and facilities and to end the postal deficit?	59	41
6. Should we abolish the electoral college and elect the President by popular vote?	79	21
7. Should the United States join—		
a. Organization for Trade Cooperation?	71	29
b. International Atomic Energy Commission?	54	46
8. Should Congress enact the proposed broad civil-rights bill?	37	63
9. Should all Congressional committee hearings be open to press and public?	68	32
10. Should the President meet and confer with heads of "unfriendly" nations?	65	35

Report on Visit to Poland

EXTENSION OF REMARKS

OF

HON. ALVIN M. BENTLEY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1957

Mr. BENTLEY. Mr. Speaker, under leave to revise and extend my remarks in the CONGRESSIONAL RECORD, I wish to insert the following text of my complete report on my recent visit to Poland during the congressional recess. A condensed version of this report is contained in the report of the Special Study Mission to Europe, which was released last week, of which I was a member. I also wish, at this time, to include my own recommendations on the question of economic assistance to Poland on which negotiations have been underway for some 3 months:

REPORT OF REPRESENTATIVE ALVIN M. BENTLEY, REPUBLICAN, OF MICHIGAN, ON HIS VISIT TO WARSAW, POLAND, APRIL 25–28, 1957

I. QUESTIONS AND ANSWERS

I arrived in Warsaw on Thursday evening, April 25, and departed Sunday morning, April 28. During the period April 26–27 I saw and interviewed all available officers of the American Embassy; all major Western newspaper correspondents; representatives of the Polish press; prominent members of the Polish Parliament (Sejm); as well as high-ranking officials of the Ministries of Foreign Affairs, Foreign Trade, and Agriculture. In all, 32 people were interviewed, and in virtually all cases the following questions were asked:

1. If American assistance is provided for Poland, how can we be sure that this assistance will benefit the Polish people?

2. How can we be sure that such assistance will remain in Poland and not be siphoned off elsewhere?

3. If assistance to Poland is successful in helping Poland to achieve its economic objectives, will this in turn have a contagious impact on other Eastern European countries?

4. What will be the most likely consequences if no assistance is provided?

5. What will be the effects of American assistance on Poland's political development?

6. How can aid to Poland be justified in terms of the national interest of the United States?

A variety of more detailed and technical questions was asked of Embassy and Polish officials. The answers to these will be reflected under my general observations, following a composite response to each of the above six questions which I believe are of major importance in considering the issue of aid for Poland.

The answer to the first question was, generally, that it was not possible to separate the benefits of assistance to the Polish Government from benefits to the Polish people themselves. Assistance from the West, specifically from the United States, is necessary to reduce Poland's dependence upon the East for essential imports. Western aid is also necessary to increase Poland's internal levels of economic activity in a way which will improve consumption standards, especially for the urban worker; and which will permit gradual decontrol by the State of important sectors of the Polish economy without exposure to unmanageable inflationary pressures. Poland does not command the resources to accomplish this alone; it cannot depend upon Eastern countries to satisfy these requirements in the interest of the planned reforms; it can therefore look only to the West.

In response to the second question, all sources gave the unqualified answer that the arrangements concluded last November 19 with the U. S. S. R. provided a measure of independence for Poland which would insure that aid would not be compulsorily siphoned out of Poland. Insofar as the Polish Government is concerned, United States assistance through long-term credits is clearly an important factor in increasing domestic production, improving the standard of living, and thus contributing to internal political stability.

The consensus in respect to the third question was that if Poland is able to strengthen her economic ties with the West, and thereby is able to continue with the relatively significant political and economic reforms already under way, other Eastern European countries would attempt to follow its course.

The query on denial of aid produced responses which differed in degree but not in substance. It was generally acknowledged that the Polish economy is in a very shaky state. There is a critical shortage of investment goods. The Government is having difficulty in making a rational distribution of available food supplies. There is a chronic shortage of consumer soft goods, and consumer durables are particularly scarce. Coal output has fallen sharply in the last 2 years, and there is widespread discontent among urban workers, which manifests itself at the plant level by sporadic slow-downs and strikes. By responding to political pressure and putting wage reforms into effect before the supply situation warranted, the Gomulka regime is also facing the likelihood of serious inflation.

What is needed, therefore, is a fairly sizeable and immediate injection of outside resources into the economy.

In view of the number of factors involved, of which American aid, though economically important, is only one, it is understandable that responses to the question of "no aid" varied from statements that denial of aid would be the direct cause of the collapse of the Gomulka regime to statements that this would cause widespread discouragement and apathetic resignation to the fact that renewal of ties with the most important Western nation was not possible. It was clearly not feasible, in the brief time available, to probe more extensively into the question of how far public opinion in Poland has really seized upon the aid issue as an important psychological symbol, the denial of which would have repercussions out of proportion to its true economic significance. American sources considered that the psychological factor was of considerable importance; many Poles thought it of crucial importance.

It was explicitly agreed among Americans and newspaper correspondents and implicitly suggested by many Poles that unless economic deterioration can be halted and unless Gomulka can push through his agrarian and industrial reforms, the regime is in considerable danger of collapse, possibly by late fall of this year. In view of the overwhelming superiority of Russian forces, there is little likelihood of an uprising such as occurred in Hungary, although revolt obviously cannot be fully discounted. On the other hand, the collapse of the regime would very clearly signal the end of the Polish experiment in relative freedom and the reimposition of a Stalinist regime with its concomitant apparatus of Soviet control.

Concerning the effects of American assistance on Poland's political development, there was general agreement that Poland has already reached the outer limits of political independence from the Soviet Union; and that, barring any shift in Russian policy, there would be no significant progress in the foreseeable future. It was also reaffirmed repeatedly that there was no intention of abandoning socialism; nor was there any likelihood that the authority of the Polish Communist party would be displaced. The only alternative is a Soviet-dominated Communist party.

The sixth question was asked only of Poles. The responses varied from descriptions of generalized benefits to suggestions of particular economic advantages to the United States as a consequence of extending economic assistance. In general it was pointed out that there is more individual freedom in Poland today than in any other Eastern European country. It was suggested, for example, that for the first time in modern Polish history no one is in prison on account of his political beliefs. It was stressed that it was

in the United States interest to encourage this development wherever possible, since to the extent that political and economic stability were restored in Poland, Poland would in turn be in a stronger position to influence the maintenance of peace in the general Eastern European area.

More specifically, it was suggested that it was in the United States interest to expand our commercial markets in Poland, and that in strengthening economic ties with Poland we would inevitably open the door to wider cultural contacts.

II. GENERAL OBSERVATIONS

In my view, recent developments in Poland represent an unanticipated and courageous evolution toward national economic and cultural independence within the limits imposed by the geographical circumstances that Polish territory is a line of communications between two Soviet Armies. Poland must, therefore, during the indefinite future remain within the Soviet orbit.

I am also of the opinion that the Polish regime is convinced that post-World War II Soviet hegemony in Eastern Europe, with its imposed police regimes and imposed Soviet economic doctrines, was primarily in the interests of future Russian security. It is on the basis of this conviction that the Gomulka regime is attempting to meet public pressures to liberalize domestic, religious, political, and economic life; but always in accordance with the premise that the United Workers Party (Communist) is the chosen political instrument and that the ties with the Soviet Union are for some time to come indissoluble.

On the international front this means no neutrality for Poland, and continued adherence to the Warsaw pact. On the domestic front this means a program for the abandonment of forced collections from the farms, the restoration of private shops, the introduction of quasi-private enterprise incentives in manufacturing, and the redirection of investment to provide a more sensible balance between heavy industry and consumer-goods industry.

In restoring the agricultural sector to a market economy, the Poles are making a drastic departure from Soviet economic doctrine. If the Gomulka experiment is successful, and is permitted to succeed, it will be historically important for the Western democracies as well as for all Eastern European satellites carefully to evaluate, in the light of their respective national interests, the development in Poland of an independent economic system operating partly on the basis of private enterprise and individual incentives, and partly on the basis of state ownership and control. This development is reported to be extremely disturbing and embarrassing to the Soviets, but the Poles appear to be convinced that Soviet intervention is unlikely as long as their military security ties with the U. S. S. R. are kept intact. Ultimately the Poles seem to see the possibility of a new era of peaceful coexistence, with Poland assuming a leading role as arbiter between Eastern and Western Europe.

Following are some brief observations based on discussions relating to specific economic problems:

1. Agriculture: The Gomulka regime is committed to discontinue forced collections of farm commodities. It is also committed to de-collectivise farm lands, encourage cooperatives, and develop a method for returning farms to private ownership. Abandonment of forced collections is the most critical political requireemnt, but in order to accomplish this the Poles estimate that they will need a 4-month reserve of wheat in order to discourage speculative hoarding and inflation, and to ensure essential consumption requirements. Ministry of Agriculture officials told me that this reserve should amount to 1.6 million metric tons, and that bread grains were probably the highest priority item in the negotiations for American credits. They also said that the Government needed a 6-month lead-time from the acquisition of the reserve to the announcement of discontinuance of forced collections. Thus, if the reserve was complete by next January, they could make the announcement in July and dismantle the collection administration. There was some difference of opinion as to when Poland would again be self-sufficient in wheat production, but there was general agreement that imports would be necessary for several years.

There is also a requirement for feed grains. During the past several years an imbalance has developed between the hog and cattle populations. Before the war the number of cattle exceeded the number of hogs; now the ratio is reversed. Feed grains are required to restore the ratio to normal and to reduce the reliance of hog farmers on bread grains for feed. If successful in this field, the Poles expect not only to improve the domestic protein diet but also to increase their exports of meat, meat products, poultry and dairy products to Western Europe and England.

2. Coal mining: The export from this basic industry has been falling off sharply. In 1955 it was 25 million tons; 1956, 19 million; and this year is expected to drop to 14 million. Output has also been reduced due partly to the abandonment of required overtime and Sunday shifts, partly to the movement of labor away from the mines, and partly to obsolescence of equipment and the necessity of opening up new mines.

Mining equipment is needed for modernization of old mines and for construction of new mines when current exploration has been completed. This year approximately 50 percent of Polish exportable surplus will go to Eastern Europe and 50 percent to the West.

If the modernization program is successful and future coal production meets expectations, domestic consumption and exports will increase. The Poles maintain that present levels of exports to the East will remain about the same since Eastern Europe has not been able to satisfy Polish requirements for producers durables, and that exports should increase to Western Europe since the latter is the main assured source of these requirements.

3. Cotton textiles: This is a sick industry, especially in the Lodz area where there is serious underemployment and social unrest. The Poles estimate that their industry can utilise up to 120,000 metric tons of cotton annually. At present they are almost solely dependent upon the U. S. S. R. for imports, which have been amounting to about 95,000 tons a year, with 70 to 75,000 coming from the U. S. S. R. and the remainder coming from Egypt as long-staple cotton and therefore unsatisfactory for their purposes.

Again, cotton is a high-priority item in their stated requirements from the United States, and in order to insure their independence from Soviet supply, they need to augment their inventory at once and will have, in addition, an annual recurring requirement for United States cotton for a long time to come.

With an improvement in the output of cotton textiles, the Poles are anxious to increase their exports of low-cost textiles to Africa and southeast Asia in return for essential raw materials imports.

4. Foreign trade: In general, there has been a shift in Poland's trade relationships since 1954. Before World War II, Poland's trade was predominantly westward. But by 1954, two-thirds of her trade was with Eastern Europe, 30 percent of which was with the Soviet Union. By 1956, however, 30 percent was with the Soviets, 30 percent with Eastern Europe, and 40 percent with the West. Poland is determined to increase her trade with the West, since this is the main reliable source of supply for the modern industrial equipment she needs.

III. GENERAL IMPRESSIONS

Based upon my experience as a Foreign Service officer in Budapest in 1949, I can affirmatively report that there is now a definite "thaw" in Warsaw. There is extensive evidence of this. In 1953, for example, I was refused a visa to enter Poland. In 1957 my visa application was filed in Washington, approved by Warsaw, and picked up in Vienna in less than a week's time. Passport and customs clearance at the airport was rapid and courteous.

In Warsaw itself, the reconstruction effort has been, and is, impressive. Between 1939 and 1944 the city was 70 percent destroyed. Of the destroyed sections, 75 percent has now been rebuilt. Reconstruction has been guided by one plan: To reproduce the prewar city exactly as it was. Even the medieval section has been duplicated as exactly as possible. This example of the depth and tenacity of Polish traditionalism and culture is interrupted by the freakish Soviet-built skyscraper, the Palace of Culture. The Poles resent this geological extrusion, but there is nothing that can be done about it. I was told, however, that the most popular event ever held in its largest auditorium was the time Glenn Miller's orchestra played for a capacity audience of 3,000 plus hundreds of standees.

Unlike other Eastern European capitals, including East Germany, there are no visible evidences of Soviet or of Communist Party propaganda, no red flags, no propaganda slogans across building fronts, no statues of Stalin, and no flag-decked superphotos. Even the Boy Scouts and Girl Scouts (much in evidence) have switched from red to green neckerchiefs.

Russian forces are nowhere in evidence, although I saw an occasional Polish unit marching in the streets. I was told that the Poles are about to abandon the Russian prototype uniform and return to the traditional Polish army uniform. In general, I was told that the army was loyal to the regime even though the deputy chief of staff and other general officers are still Russian. All Russian officers have been eliminated from the navy and air force. The army, I was informed, cannot be considered as a military asset to the Russians; on the contrary, in the event of trouble with the West, it would be a liability. Any independent Polish action against Soviet pressure, however, is limited to a period of about 2 weeks because of obsolete World War II equipment and Russian control of Polish logistics.

Uniformed civilian police are in evidence but only with small sidearms. If security police are present in force, they are not identifiable. I was told that, since the thaw, Polish reaction against earlier police practices is such that it is difficult for police to effect routine arrests without running the risk of being stoned.

The Parliament (Sejm) building has been reconstructed as it was before. Here again there is no evidence of Communist Party control. The only emblem, in the Sejm, behind the speaker's desk is the traditional Polish eagle. While the United Workers Party is in complete control when the Sejm votes, I was told that there is considerable multiparty give-and-take in closed sessions of parliamentary committees. The Poles also repeatedly expressed satisfaction with the newly won independence of their judiciary system.

There was no reticence on the part of Polish officials about meeting me. On the contrary, the Embassy was able to arrange an impressive number of meetings on very short notice. Generally, the Poles were cool at first, but seemed genuinely friendly as discussion developed. I assume that our conversations were recorded, but aside from an

obvious correctness in their references to the Soviet Union, they were quite willing to discuss substantive issues. They are uniformly anxious to improve their cultural ties with the West and especially with the United States; and satisfaction was always expressed in the new Ford Foundation student-exchange program. They are also anxious to retain the support of Communist China, and of Nehru. Both China and India fully backed their independence effort last fall by implication and they feel that this backing continues to constitute a powerful offset to more active Russian intervention in their affairs.

I should judge, however, that their cultural orientation toward the West is paramount. More than once, it was pointed out that Poland regained from Germany one-half of the territory lost to the U. S. S. R., thus moving the entire country westward and providing it with a much more homogeneous population than was the case prior to World War II.

If the Poles have demonstrated their attitude toward Russia by successfully withstanding the imposition of Soviet cultural patterns, they are also still very bitter toward Germany, although there is some evidence of relaxation in respect to East Germany. In response to a question, one high official said that, in his view, there was no solution to the German problem.

On several occasions I inquired specifically as to the feasible extent of United States official representation in Poland in connection with possible American economic assistance. The answers were always the same: Poland is seeking medium term, hard currency credits, repayable in dollars. Her repayment record has in the past been good, and will be again. It would be extremely embarrassing internationally and politically difficult internally, to admit the typical USOM and technical assistance teams. Because of the nature of the loan request, and their intentions for its use (i. e., they have no intention whatsoever of reexporting the loans to the East) there was no need for, nor could they tolerate politically, numbers of end-use checkers roaming around the country. They all agreed, however, that technicians required for the practical implementation of their machinery and equipment import programs would be welcome.

Finally, I should mention that Poland's reserves are at an all-time low, possibly $15 million. This is extremely low for a country with a total volume of trade of better than $2 billion per year. The dollar drought is so severe that I was informed that any desire to reopen Polish consulates in the United States would be inhibited by their inability to provide the necessary dollars. In this connection, I inquired about possible plans to attract American tourists by improving their hotel and transportation facilities. Most Poles admitted that tourism could be an excellent source of dollars, but they also admitted that their hotel standards and transportation facilities were still far below acceptable Western standards and that it would be some time before they could devote an adequate share of their resources for tourist facilities.

RECOMMENDATIONS

The question of economic assistance to Poland and (hopefully) to the other captive nations when circumstances permit must not be treated as an isolated example or even a series of such. It is foolish and shortsighted to think of repetitions of the present program for Poland which involve a process of scratching around and using several different existing authorizations to tot up funds sufficient for the contemplated purposes. Rather, there should be a separate Polish program of economic assistance which should be refended on its own merits and should stand or fail on the same. This would hold true for any other captive nation that was enabled to achieve a comparable degree of economic freedom.

To the question: Should there be economic aid for Poland? the answer must be: Certainly, to a limited degree. This opinion comes from one who has generally opposed foreign aid in any and all forms. It also comes from one who has always adhered to the policy of liberation, whether by evolutionary or revolutionary means, and who has advocated a policy by this Government of assisting either means by any and all resources at its disposal.

To return to the specific question of Poland, the desired aid is in two general forms: credit for the purchase of our surplus agricultural commodities, specifically wheat and cotton, and a transfer to the Export-Import Bank of sufficient funds to enable the extension of a line of credit for the purchase of modern mining machinery and other articles intended for increasing industrial and agricultural production. Authority for the second part already exists under the President's special fund; authority for the desired amount of the first part will exist when the Congress completes favorable action on the pending $1 billion surplus commodity legislation.

In spite of the fact that the Poles, due to their own 5-year plan, have requested credit on at least a 3-year basis, the present extension should be on a year-to-year basis, subject to termination by either party with the minimum of notice. The tenure of the present Polish Government is extremely uncertain, due to deteriorating economic conditions, and a successor to the Gomulka regime could conceivably be a customer with whom it would not be in our best interests to do business.

The important thing to remember is that we are not necessarily trying to bail the present government out of difficulties and problems caused by practices of its predecessors but rather to show the Polish people themselves that they are not forgotten by the West and that they can count on us for a limited amount of economic assistance. It is significant that the Polish press has only discussed the current negotiations in the most general of terms and the average Pole has little, if any, idea of the amounts under consideration. The mere announcement of American aid, whether of $100 or $300 million would serve as a tremendous morale booster. That is the effect that we want to have on the Polish people who are after all, our chief concern.

There should be certain conditions attached to the program. Long-range problems, such as claims and pre-war debts, can be deferred until the existing atmosphere improves. However, it would not be unreasonable to request the Poles to establish a counterpart fund of zlotys or, at least, if the credit is to be repaid partially in zlotys, to earmark a part for local expenditures by our Government. Such a fund could be used to improve the very drastic housing problem that faces American personnel in Poland today. It could be used to assist local expenses of a student exchange program and other costs of any expanded cultural interchange policy (which the Poles allege they are most anxious for). Another condition might also be the maintenance of a favorable exchange rate for American tourists, provided that accommodations and transportation are expanded sufficiently in this direction. There could and should be a definite agreement for the importation of private relief packages (regarding customs duties) from this country into Poland. There might even profitably be some settlement of the troublesome matter of dual nationality claims which have prevented the emigration of large numbers of Poles claiming American citizenship.

It is not believed that the Poles would agree at this time to the presence of numerous American personnel in connection with a program of economic aid. It is felt, however, that there would be no objection to the sending of qualified technical experts in connection with the coal-mining machinery and similar importations. This should definitely be a part of the final agreement reached.

Aid to Poland is definitely in the nature of a calculated risk. For this reason, the initial amount should be relatively small and subject to immediate stoppage. But the possibilities of the moral impact on the Polish people cannot be overestimated. Moreover, the obvious anxiety of the Polish government to free itself from economic subservience to the Soviet Union represents a trend that should only be encouraged. At worst, we will have gambled and lost $100 million. At best, we will have exploited a chink in the Soviet armor that could be more advantageous to us than even Tito's rift. It was generally agreed that other satellites would attempt to follow Poland's example, if successful.

The question is often raised regarding economic negotiations and general questions of trade between Poland and Communist-dominated countries of the Far East, such as Red China and North Vietnam. The actual amount of Polish trade with these two countries is relatively small and consists of Polish exports of manufactured products in exchange for the same agricultural commodities which Poland is now endeavoring to obtain from the United States. To the extent that the United States can supply alternate sources of supply of these commodities, it will relieve Poland's dependence on the Communist bloc for these vital commodities.

It is also a favorite question as to why we should, through aid to Poland, relieve the Soviet Union of any economic burden on the Soviet bloc which the Poles may have represented in the past. Rather than say that the Poles were a drain on the Soviets, the converse would be more correct. Because Poland was forced to sell coal to the Soviet Union at a price considerably below the world market and, as a consequence, suffered a loss of natural resources exceeding $600 million during the last several years. The Poles now appear to have achieved a much greater degree of economic independence in this respect and it would appear to be in our best interests to assist them to maintain this position.

Our policy of liberation suffered a near-disastrous setback last fall by our failure to assist the Budapest rebels. We can do little or nothing to assist liberation by revolution. We do have an opportunity, in Poland, to assist in a policy of liberation by evolution. We may gamble and lose but it is worth the risk. If we remain passive in the face of the present trend in Poland, limited as it is, we might as well discard the entire concept of liberation and accept the idea of coexistence between the free and slave worlds. It is for the foregoing reasons that I would support a program of economic assistance to Poland, subject to the foregoing conditions.

Speech of the Honorable Ben F. Jensen Before the 44th National Convention of the National Rivers and Harbors Congress, May 17, 1957

EXTENSION OF REMARKS

OF

HON. BEN F. JENSEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1957

Mr. JENSEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following speech

made by me before the 44th national convention of the National Rivers and Harbors Congress, May 17, 1957, Mayflower Hotel, Washington, D. C.:

Mr. President and fellow Americans, I consider it an honor to speak to the members of this organization who do so very much for the development of America through the protection of our natural resources.

The proper development of our great river valleys, such as the great Missouri Valley, is a national must, but it must be done in such a way as to assist in the perpetuation of our American way, and for the benefit of the people everywhere, and without infringement on our private enterprise system of government, which has made our country great.

I was asked to talk about public works appropriations, and I most certainly will do just that, but possibly in a different light than most of you might expect. Nevertheless, the things I will point out will, I am sure, have a great and constant bearing on the amount of funds Congress will appropriate for public works in the future.

The term "public works," as you know, covers a great many important Federal activities, navigation and harbor improvements, hydroelectric power dams, irrigation, reclamation, flood control, and atomic energy, for both war and peace. Therefore, the manner in which all these important activities of Government are handled might well determine the future of America. Hence, my responsibilities, and yours as members of this fine organization, cannot and must not be taken lightly. As good Americans, there are certain guideposts that must be followed to make sure that we achieve the desired results in all our doings.

You may ask what exactly does all this have to do with public works. My answer is "everything," for unless the American people are satisfied with the way public works are administered and paid for, the day will come when the people will demand of their servants in Congress that public works appropriations be cut to the bone, and remember that what the people want they generally get. I don't have to tell you that the great majority of the thinking American people today are economy minded, hence they will demand genuine national values for the money we spend for public works, along with all other expenditures of their tax dollars. And believe me, no one is more aware of that fact today than are the servants of the people, and which I am glad to say is having good effect.

HARBORS AND NAVIGATION

Now let us get right down to cases. First, let us take a good look at harbor improvements for which we are spending hundreds of millions of dollars annually for the improvement of dock facilities and for the dredging and deepening of harbors to accommodate barges and large ships for the benefit of wealthy, foreign water-carrier companies, as well as our own, and without $1 of reimbursement and little tax return into our Federal Treasury, while our railroads build, improve and maintain their own rights-of-way, rails and facilities, and pay a heavy county, State, and Federal tax, and our truckers pay heavy licenses to use the highways. So, to my way of thinking, this is a glaring example of inequality, and the time will surely come when the American people will demand that either we cut such expenditures to the bone, or that water-carriers pay at least a part of the expenses for navigation and harbor improvements.

HYDROELECTRIC POWER

Having been a member of the House Appropriations Committee for 15 sessions of Congress, which first acts on requests for funds to build hydroelectric and multipurpose dams, I feel that I have a pretty good idea as to where such dams should be built in order that the greatest benefit can be realized for the dollars expended. During that time I have personally inspected most of the proposed dam sites, along with other members of the Committee, before Congress appropriate funds for actual construction, in order to ascertain the feasibility of such poposed projects by personal contacts with the opponents and proponents of the proposed project.

I hasten to give due credit to the United States Army Engineers and the Bureau of Reclamation by saying that generally speaking we found the information given to the committee by the officials of these two Federal agencies to be accurate and factual. While it is true that most of the tax dollars we spend for hydroelectric production are returned to the United States Treasury over a period of years, which term is normally 50 years, very often private utilities are ready, willing and able to build such facilities with their own shareholders' money, and like all other private businesses, they pay heavy State and Federal taxes, which lightens the tax burden of all the people and squares with our private enterprise system of government. No tax of any sort is paid on revenues from federally build dams.

We must be mindful of the fact that about 4 million good American citizens own all the private utilities in the United States, and that they pay almost $1 billion in Federal income tax into our United States Treasury annually, and over half a billion dollars in local, county and State taxes annually from power revenues. Of course, every user of privately produced electric power pays his share of this tax when he pays his electric power bill. But let us not forget that it comes back to him in helping pay for schools, roads, etc., and that private electric rates have increased much less in cost than any other commodity, due primarily to the enormous increase in electric consumption, modernized facilities and efficint management.

During the past several years much has been said and written pro and con about Hells Canyon, which is a current issue. Let us take a quick look at the facts.

The proponents of the high Hells Canyon Dan want Congress to spend several hundred million dollars of all the American taxpayers' money to build a hydropower producing dam, so that the people in that area might have tax free, hence cheaper electric power, at all the American people's expense. The Idaho Power Co., a company owned by thousands of American people in every walk of life wants to build three lower dams, and in fact has already started with its own money under a Federal license by the Federal Power Commission, to build the lower dams, which will produce almost as many kilowatts of power as the high dam. And it is reliably estimated that they will pay Federal taxes into your United States Treasury, during the 50-year period, over $240 million.

Now why do I talk about that controversial issue here today? Simply because it pinpoints my contention that unless we keep private taxpaying enterprise in business, the day will come, and possibly sooner than some people expect, when our United States Treasury will be so completely empty that few dollars will be available for river and harbor development, or flood control, or even to pay old-age and veteran pensions, to say nothing about paying other necessary Federal obligations. After the Fabian Socialists of England, who masqueraded as the Liberal Party, got control of most of the electric energy in England, the rest of the socialization of England was a push-over, for he who controls the electric power of most any nation in this electric age can control that nation completely, and make no mistake about it. I am sure, however, that because of the good sense of the American people, that will not happen here, but let us be sure.

IRRIGATION AND RECLAMATION

Even though I represent a district outside of the 17 western reclamation States, I long ago took the position, after seeing the parched deserts of the Western States, that water was indeed liquid gold to the people of that great area. And because Federal appropriated funds for irrigation and reclamation are over a period of years paid back in annual installments to the Federal Treasury, and because the records will show that after such projects are in full operation, Federal taxes from the irrigators' profits run into the hundreds of millions of dollars annually, and because the crops raised on such irrigated lands have contributed less than 2 percent to our farm crop surpluses, I am sure that my support of irrigation and reclamation projects has been fully justified. I may say, too, that were it not for the vegetables raised on such irrigation projects, our vegetables would be costing us at least twice what they are today.

FLOOD CONTROL

Because every section of America has now, or has had in the past a flood problem, appropriated funds for flood control are not reimbursable, however, municipalities and counties do furnish land, build bridges, etc., in all cases where the Federal Government spends the taxpayers' money for flood-control projects, when such projects directly benefit the people of a respective area, and often local participation amounts to a considerable sum. In fact, I am happy to say that quite often the local governments will contribute more than is required of them in order to prove the need for Federal aid, which shows good faith and appreciation. May I say here and now that where such is the case, those projects receive special and sympathetic consideration by the members of the Appropriations Committee, for most of the members of the committee try to save the taxpayers' dollars wherever and whenever it is proper and possible to do so. May I suggest that your organization pass out that word to your people.

How well I remember the terrible devastating floods which occurred almost annually on the Missouri River before the dams were built upstream and before the farmers in that great watershed, one-sixth of the area of the United States of America, contoured and terraced their tillable land. I am sure that never again will such floods occur on that river. The Army engineers, the Bureau of Reclamation, working in cooperation with the Soil Conservation Service, will eventually solve all or most of our flood problems. Their efforts and accomplishments have already almost completely solved the flood problems of many river valleys, such as ours in the Missouri River Valley. Your organization has greatly assisted in this important task, and has given other organizations like yours inspiration and guidance.

ATOMIC ENERGY

Possibly atomic energy has not as yet been discussed to any great degree by your organization, but nonetheless, all of you as Americans are vitally concerned with its potential as an instrument of good or evil. To most Americans it is a baffling, unknown quantity, so to speak. However, we all know of its frightening destructive power as a weapon of war, and we are gradually learning of its use as a useful commodity for the development of power, and for many other purposes, including possible cures for human ailments. It has great possibilities for peaceful purposes.

As I sit in Public Works Committee hearings and listen to members of the Atomic Energy Commission and their scientists explain quite in detail to us, and mostly off the

record, as most of their testimony is classified, which means highly secretive, I like every member of the committee am impressed to say the least by their keen knowledge of every phase in the meticulous preparation of manufacturing and harnessing the atom, always conscious of the great responsibility which is theirs, not only for the safe and speedy development of a war bomb, but to a greater degree for all of us as a blessing to humanity as a peacetime commodity. Were it not for the unbounded trust I have in the ability and integrity of these great and devoted patriotic Americans, I would shudder to contemplate the ultimate results. Like a ferocious, wild horse in the hands of a tenderfoot, it is a dangerous article; but in the hands of experts it can be tamed and trained to serve its master.

Our Atomic Energy Commission and their scientists are thoroughly schooled and trained in the art of nuclear sciences, and I say to you again, I trust them to carry on effectively, safely and sanely for the benefit of all our peoples who have it in their hearts to be free. But here again we find people in high places who advocate and contend that the Congress should appropriate several hundred million dollars annually to build every kind of atomic reactor for peaceful uses, especially for the generation of mechanical power to eventually replace hydro and steam electric power, and again such plants would be free of Federal taxes, in spite of the fact that private taxpaying industry is ready, willing and able to build the atomic reactor plants for peaceful purposes, the revenues from which would be taxable, if the Government will underwrite all after the first $60 million of accident claims, with full Federal cooperation and supervision by the experts of the Atomic Energy Commission.

FEDERAL TAX-FREE BUSINESS

In spite of the fact that our United States Constitution provides that taxation shall be uniform, tax free—and in some instances interest free—business institutions, supported with Federal funds, have driven and will continue to drive Federal taxpaying, private competitors to the wall. This situation must be corrected to ward off the evil day of national bankruptcy and its customary aftermath of national socialism.

How long, I ask, for example, could the farmers of one State stay in business if the farmers of a neighboring State were furnished by the Federal Government all the money needed to buy farms, stock, and equipment, interest free and tax free? The result, of course, would be that the taxpaying, interest-paying farmers would soon be driven to the wall by being forced to sell their products at a far below cost price at the marketplace. If that should occur, even present farm prices would look high. So, again I plead with every good American to think twice before he or she supports any program which will cripple Federal taxpaying, private enterprise—from the farmer to the corner grocer to industry—whose revenue is so desperately needed by our United States Treasury, if for no other reason.

In conclusion may I say with all the sincerity and force at my command, that it will take the combined efforts of every American who wants to preserve our free institutions—our American heritage, if you please—to be ever on guard to see that taxpaying, private enterprise continues to operate here, always remembering that the power to not tax is also the power to destroy.

And so I beg of you to realize fully that unless great care is exercised in line with the warnings I have here so humbly and sincerely expressed, it may not be too far in the distant future when the peoples will no longer have the funds to carry on the much needed public works in which you are so greatly and properly interested. Thank you.

HOUSE OF REPRESENTATIVES

TUESDAY, MAY 21, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, Thou art the light of the minds that know Thee, the life of the souls that love Thee, and the strength of the thoughts that seek Thee.

Humbly and gratefully we acknowledge that Thou alone art able to guide us safely through the hours of this new day and to guard us against its perils.

Grant that we may see Thy wise and beneficent purposes in all the dispensations of Thy divine providence and always be eager to follow Thy gracious leading.

We earnestly beseech Thee that it may be our will to obey and serve Thee and our joy to please and glorify Thee.

Show us how we may promote the temporal interests and the spiritual welfare not only of our own beloved country but of all mankind.

Hear us in Christ's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 7221. An act making supplemental appropriations for the fiscal year ending June 30, 1957, and for other purposes.

The message also announced that the Senate insists upon its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HAYDEN, Mr. RUSSELL, Mr. CHAVEZ, Mr. ELLENDER, Mr. HILL, Mr. BRIDGES, Mr. SALTONSTALL, Mr. YOUNG, and Mr. KNOWLAND to be the conferees on the part of the Senate.

HAWAII

Mr. BURNS of Hawaii. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Hawaii.

There was no objection.

Mr. BURNS of Hawaii. Mr. Speaker, at midnight last night, the revenue bill adopted by the 29th Legislature of Hawaii was pocket-vetoed by the Governor of Hawaii. Were it not for the fact that the same thing happened 2 years ago, this would not be noteworthy. However, because it did happen 2 years ago and because of the grave, even vital, consequences of last night's action, it is not only noteworthy, it is alarming and most serious.

The abnegation of the American principles of government, the exercise of the will of an appointed executive in contradiction of the will of the people by their elected representatives—is a matter that deserves the careful attention and consideration of the Congress and the President of the United States. Its seriousness cannot be overemphasized.

In capsule form, the situation is:

First. That in 1954 the people elected a legislative majority other than that in control since 1900;

Second. That the 28th Hawaiian Legislature of 1955 passed 404 bills; the appointed executive vetoed 71;

Third. In 1956 the program of the 1955 legislature was a clear-cut issue before the voters;

Fourth. The voters unmistakably indicated their support by returning the majority elected in 1954 to office;

Fifth. The legislature of 1957 enacted bills in accordance with their campaign promises and, in principle, similar to those enacted in 1955.

The need for statehood is unmistakably demonstrated. When the definitely ascertainable will of the voters—American voters, if you please—is disregarded by an executive appointed by an authority 5,000 miles removed, the day of 1776 is here again. Our forefathers, the founders of this great Nation, would not tolerate this. They revolted and founded a new Nation whose Government derived its just powers from the consent of the governed.

Hawaii's people have no place to go but to statehood. That lies within the power of the Congress. Partisanship plays no part in this, nor is there any reflection on the character or integrity of any individual. The issue is: Are the people to run their own government by those whom they elect, or is an appointive executive to do the thinking of the people for them?

OPPOSING AID TO TITO

Mr. JARMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JARMAN. Mr. Speaker, the time has come to cease adding to the military strength of the puppet dictator of Yugoslavia as a reward for his supposed rebellion against Moscow, which in reality has amounted to no more than a shrewd move to place himself in an enviable bargaining position with both parties in the

cold war and thus no more than a further manifestation of the greed and lust for power which has motivated all dictators of the Communist regimes.

The binding ties and loyalty of Tito to the Kremlin was dramatically illustrated during the historically unsurpassed totalitarian crushing of the Hungarian revolt, when escaped Hungarian freedom fighters were forcefully returned to their country for execution.

It should be obvious now that the Congress and the American people can no longer tolerate such unmoral intimacy with an actual enemy. It has never been the feeling of the Congress or the American people that aid to Communist-controlled puppets is a proper means of protecting our security.

There can be no question that in the event of an all-out war the loyalty of the Yugoslavian Government would be to its Russian prototype, and this country would have been responsible for increasing the war strength of an army under hostile direction. Our most recent experience in the last World War graphically illustrates that the lot of dictators is together. In the case of Yugoslavia, the pattern is obvious. Its philosophers are Communist ideologists, as are Russia's. Their whole philosophy of government is in complete contradiction to our own. In his quest to preserve Fascist control over the 17 million citizens of Yugoslavia, Marshal Tito would have but one course to follow in the event of war, which emphatically would not be to the best interests of the United States.

It is the duty of the Congress at this time to preserve the integrity of our country by refusing to compromise our high position among the free nations of the world with further gifts to a nation which is the antithesis of all this country stands for.

THE PRESIDENT'S BUDGET

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. THOMPSON of New Jersey. Mr. Speaker, the President of the United States last week took to the air waves and the television to go to the people in defense of his budget. I and many others have been waiting rather patiently for some members of the minority party to come to the defense of their political leader, the President, but they have not done so up to this time.

The U. S. News & World Report says the President is engaged in a dramatic struggle with the Democratic-controlled House to save his legislative program. Some 42 Democrats wired the President on the day following his speech, announcing their support of the budget in a way that would not cut national expenditures foolishly or endanger national defense. Today, to prove that he has a sense of humor, among other things, I received a letter from Sherman Adams thanking me and my fellow Democrats for supporting the President. I think this will make interesting reading for all in the RECORD.

THE WHITE HOUSE,
THE ASSISTANT TO THE PRESIDENT,
Washington, May 17, 1957.

The Honorable FRANK THOMPSON, Jr.,
House of Representatives,
Washington, D. C.

DEAR MR. THOMPSON: This will acknowledge your May 15 telegram cosigned by a number of your colleagues. The President appreciates your commending him for addressing the Nation in respect to the 1958 Federal budget and noted your various comments on this problem. He thanks you for your assurances that you and others in your party in control of this Congress will help advance administration programs already long delayed, and that you will do your best, as he has been doing and will continue to do, to keep the Congress from effecting crippling cuts in the budget.

Sincerely,

SHERMAN ADAMS.

NO GROUNDS FOR A VETO

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. O'BRIEN] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'BRIEN of Illinois. Mr. Speaker, tomorrow H. R. 2, the Lake Michigan water-diversion bill, will come to the floor of the House for a vote. The opposition to this meritorious measure, which twice has passed this body as well as the other body by overwhelming majorities, is confined to a very limited number of Members. It is supported on a strictly bipartisan basis by the entire delegation from the Chicago area; indeed, by all the Members of both parties from Illinois.

The few who oppose the bill—and they are a mere handful—have stated in newspaper interviews that in debate they will stress the danger of a Presidential veto. In order that my colleagues may be informed in advance of the fallacy of this argument, based upon the possibility of a Presidential veto, I am extending my remarks to include the lead editorial in this morning's Chicago Sun-Times, a newspaper that has never deviated from its support of President Eisenhower and is generally credited with being very close to the White House. The editorial follows:

NO GROUNDS FOR A VETO

If logic and reason prevail, a new Federal law should be enacted soon permitting an increase in the diversion of Lake Michigan water into the Illinois Waterway.

In recent years Congress has twice enacted such legislation, and it has twice been vetoed by President Eisenhower. However, the reasons that the President cited for his action no longer seem to exist.

Thus, if Congress enacts a diversion bill this year, as now seems likely, the President should logically sign it into law.

Tomorrow, the House is scheduled to debate and probably pass a bill by Representative THOMAS J. O'BRIEN (Democrat, Illinois) to increase the present diversion of 1,500 cubic feet per second to 2,500 feet. The extra diversion would be for a test period of 3 years, during which Army engineers would measure its effect on Great Lakes levels and on the Illinois Waterway.

Favorable Senate action on the measure is expected before the session's end.

In his previous vetoes, the President variously cited these objections to the diversion bills: (1) That the present rate of diversion is adequate for navigation in the Illinois Waterway and Mississippi River; (2) that more diversion might be harmful to navigation and hydroelectric power projects on the Great Lakes; (3) that Canada might be opposed to extra diversion; and (4) that increased diversion might adversely affect other States lying along the Great Lakes.

As recently pointed out in the Northwestern University Law Review, all of these objections have been answered wholly or partially by subsequent developments. An article by Anthony A. Olis, president of the sanitary district, and Robert A. Sprecher, special assistant attorney general of Illinois, brought out that:

The President himself dropped all reference to the first point between his first and second veto messages. On the second point, two expert studies concluded that the effect of increased diversion on Great Lakes navigation and power would be negligible. On the third point Canada interposed no objection to the recent increased diversion authorized by the United States Supreme Court on an emergency basis. The fourth point is answered in part by the two expert studies mentioned before and by the failure of other Great Lakes States, with the exception of Wisconsin, to object to the Illinois petition to the Supreme Court for emergency relief.

There are no more valid grounds for the President to object to the O'Brien bill, and we trust he will sign it.

POST OFFICE MORALE AND PUBLIC REACTION

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, I am bringing to the attention of the House a paragraph from Mary Stuart's widely read column in Heard and Seen, the weekly publication of her husband, William H. Stuart, for years political editor of the Chicago American and universally regarded in Illinois as the sage of politics. Mary Stuart is a brilliant writer and she has a brain as keen as a newly honed razor. Her column in Heard and Seen is, if not the best, certainly among the top 2 or 3 columns of the Nation, including all of the widely syndicated columns. Not since Benjamin Franklin has anyone in America produced a line of proverbs to compare with those with which Mary Stuart each week concludes her column.

Mary Stuart is not a rabble rouser. She is inclined if anything to be a bit on the conservative side, frequently a lot more than a bit. As a reporter and commentator she writes the impressions of one with a photographic mind. I make these observations on Mary Stuart in order that my colleagues may properly evaluate the significance of the paragraph from her current column that I am about to include in my remarks.

As my colleagues well know, I have been critical of the administration of the present Postmaster General. It has seemed to me that in his administration he has overlooked the human qualities. He has advocated and brought about a system of highly paid regional postmasters and has insisted that good men in the top echelons could not be had unless princely salaries were paid to them. Meanwhile he has overlooked the fact that the little fellows, but the very important fellows, who are the clerks and the mail carriers, also have to live. It certainly is not to the credit of the Post Office or to the Nation that the men who deliver our mail in Chicago and in other cities in Illinois are paid much less than the scale for common day laborers and that to eke out existence, their wives have to go out to work.

Meanwhile the Postmaster General has gone in in a big way for expensive frills. He has given us the stamp vending machine that plays a beautiful tune as we drop in the coin. He has erected great imposing clocks that use, goodness knows why, the military numerical timing. He has spent more money than all the postmasters general in history combined employing detectives to find whether postal clerks and carriers who took a day off on sick leave 10 years ago were really sick or feigning. All this, of course, has had the inevitable result of bringing Post Office morale to the lowest ebb in history.

What has been the effect upon the public? To me the answer was clear. It is the public that suffers when the morale among the postal workers is at a low ebb. It is the public that suffers when postoffice efficiency has been destroyed because the money goes to big salaries for those in the top echelon and for the installation of frills and innovations that ignore the human equations. This is my thinking, and there are those whose thinking is along another line. So I am leaving it to the photographic mind of Mary Stuart to give the answer of what really is the popular reaction to a policy of frills in substitution for human service.

With this introduction I commence the reading of the paragraph with which Mary Stuart begins her column in the issue of Heard and Seen of May 18, 1957. It reads:

I ran into a wild demonstration in the downtown post office. Waiting to buy some stamps, I found but one open window in the dozen-window room. A long line of people were waiting; I became 20th in line. They were the "low income" group—soiled hands and tired faces. Never have I seen such angry people. Shouts of, "They economize on us and spend our money in Washington. They spend all our money and give us no service; you voted for them Republicans; now you have them; foreigners live high on our wages." One woman said, "I can't pay my rent, while them foreigners get a tax cut." I said to her, "Why don't you write your Congressman?" "Oh," said she, "he ain't no good." Asked, "What's his name?" "I don't know." Finally, one more window opened. Said a voice, "They must have heard us." The startling thing was the quick anger of that class of voters, and how quickly the vituperation spread down the long line.

REDUCE THE FEDERAL DEBT BEFORE IT GETS OUT OF CONTROL

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, $7 billion a year.

That's just the interest on the Federal debt.

Seven billion dollars taken out of the earnings of the American people just to service the debt. Without one extra cent put aside to start paying off the principal. And before we count the many more billions required to run the Federal Government.

Seven billion dollars for interest alone.

Almost as much as the entire cost of operating the United States Government as recently as 1937.

Who ever heard of a person or a business increasing the mortgage year after year, and without making any provision for repayment? Such a course would soon lead to bankruptcy.

The Federal debt has zoomed from a mere $16 billion in 1932, to a staggering $275 billion in 1957.

The burden of high taxes, high expenditures, and a rising debt is becoming intolerable. The American people are beginning to clamor for some relief. The Boston Tea Party of 1957 was not just a publicity stunt, and the 50-cent dollar of today is not a joke.

By way of illustration, we would have to sell all the buildings, machinery, livestock, and everything else of tangible value in the United States, at their full assessed value, just to wipe out the Federal debt.

That is, if we had to do it immediately, and completely.

The public is beginning to resent the fact that there has been no realistic effort to reduce the national debt since the 1920's.

They know that now, during a period of unprecedented prosperity, is the time to make the start.

One of the most logical measures to effect a reduction in the Federal debt was introduced by Senator LEVERETT SALTONSTALL, of Massachusetts, this year.

Identified as S. 1738, it is a bill to provide for systematic reduction of the public debt. If and when enacted, it shall be known as the Public Debt Reduction Act of 1957.

This is a systematic plan, yet flexible enough to meet unforeseen circumstances in the future.

During periods of national emergency, or economic distress, the required reductions would not apply.

Under Senator SALTONSTALL'S formula:

SEC. 3. (b) The public debt limit set forth in subsection (a) is hereby reduced as follows: (1) Effective on July 1, 1958, by an amount equal to 2 percent of the net revenue of the United States for the fiscal year ending June 30, 1957.

The percentage of reduction gradually increases until it levels at a 5-percent reduction, effective on July 1, 1961, and July 1, of each year thereafter, of net revenue received by the Federal Government.

In this formula, adjustments are made to net loss of revenue resulting from any revenue law enacted by the Congress, or resulting from any decrease in tax rates.

As this bill would require more revenue than spending, it would tend to make the responsible budgets.

Furthermore, by suspending reduction in the debt for a period of 2 years after any tax cut voted by Congress, it would provide an incentive for tax relief.

This is not a bludgeon measure. It is neither blind nor rigid. It is adjusted to meet all possible contingencies, such as war or depression, so that it would not handcuff the Federal Government in meeting its responsibilities during periods of genuine emergency should they occur.

It also makes allowance for increased economic activity and the needs of a growing nation.

With these safeguards provided for, it tackles one of the main problems of our National Government today: How to reduce the Federal debt and strengthen the Government's credit, for this has an important effect on economic activity and our standard of living. When any government goes too deeply into debt, inflation and collapse are not too far behind.

Reduction of the debt means reduction of the $7 billion that we pay each year in interest for the sole purpose of servicing that debt.

The more we save from this dead cost, could be applied to constructive uses by individuals and corporations.

There is a breaking point on mounting debt.

Public opinion has served warning that it believes this debt has reached a level where it could get out of hand.

Meanwhile, Communist strategy, through fear and force, is hoping that it may bring about our crackup from within.

Our national security therefore requires a gradual but sustained effort, made mandatory by law, to reduce the topheavy national debt.

HOUSE EMPLOYEES PAYROLL SIMPLIFICATION ACT

Mr. YOUNGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. YOUNGER. Mr. Speaker, today I am introducing a bill which may be cited as the "House Employees Payroll Simplification Act." I am sure every Member of the House will agree that no other process in the Federal Government needs simplification so badly as our own employees payroll. I am equally sure that if any bureau or agency of the executive branch used such a system to determine their payroll our Government Operations Committee would have them up for investigation at once and properly so.

As the system now stands we are subject to criticism for tolerating it, with the end result that the public is confused both as to the office salaries we pay and the allowance which we have for office hire. At least that is the way it works out; for even the columnists, who spend much time on the Hill, more frequently than not when mentioning the salary of some office secretary will use the base pay instead of the gross amount which results from the 7 different percentage and flat increases after they have been calculated and added to the base.

As a good example, the National Association of Manufacturers, an organization that has never been accused of not knowing its way around the Capitol, published a pamphlet this session called Your Congressman. On page 9 this statement is made and I quote:

> A Representative is given a flat sum of $17,500 a year for hiring assistants. A Senator gets a few thousand more, the amount being determined by the population of his State. Three or four people can be hired in Washington for this amount.

Such examples merely compound the misinformation which the public receives. Under the present acts the $17,500 base allowance yields a gross annual allowance of $34,710 when the various additions are calculated as follows:

By employing the maximum number of 8 office employees and giving each employee the same base pay you start with a base—nearest amount divisible by $5—of $2,185 each. Then apply the seven formulas granted over the years as follows:

First, 20 percent increase of first $1,200; 10 percent additional from $1,200 to $4,600; 20 percent of $1,200 equals $240; 10 percent of $985 equals $98.50; total, $2,523.50.

Second, after applying the increases provided in paragraph 1, add an additional 14 percent or a flat $250 a year, whichever is the greater, but not to exceed 25 percent; 14 percent of $2,523.50 equals $353.29; total, $2,876.79.

Third, after applying the increases provided in paragraphs 1 and 2, add an additional increase of 10 percent—in lieu of overtime; 10 percent of $2,876.79 equals $287.68; total, $3,164.47.

Fourth, after applying the increases provided in paragraphs 1, 2, and 3, add an additional increase of $330; total, $3,494.47.

Fifth, after applying the increases provided in paragraphs 1, 2, 3, and 4, add an additional increase of 5 percent; 5 percent of $3,494.47 equals $174.72; total, $3,669.19.

Sixth, after applying the increases provided in paragraphs 1, 2, 3, 4, and 5, add an additional increase of 10 percent, but not more than $800 nor less than $300 a year; 10 percent of $3,669.19 equals $366.92; total, $4,036.11.

Seventh, after applying the increases provided in paragraphs 1, 2, 3, 4, 5, and 6, add an additional increase of 7½ percent; 7½ percent of $4,036.11 equals $302.70; total, $4,338.81.

The $2,185 annual base pay actually yields a gross annual salary of $4,338.81 or for the 8 employees $34,710 per year. My bill fixes the total clerk hire annual allowance at $35,000.

Another example is the maximum base pay allowed for any employee, which is $7,000. When this base pay is increased by the seven different steps it becomes a gross salary of $12,131.47, and my bill fixes the maximum salary in round numbers at $12,500.

Or, take another example of the minimum base pay allowed per year which is $5. When the 7 increases are added this $5 becomes a gross annual pay of $704.30 or over 140 times the base.

This bill will simplify the employee payroll as to the total amount allowed and in each individual case the actual salary paid; to the end that anyone who can read can understand our clerk hire allowance.

I believe this measure should pass in order for the House to be relieved of the criticism of so conducting its affairs as to compound confusion in the minds of our constituents relative to our allowance for clerk hire.

SOIL BANK

Mr. HILL. Mr. Speaker, I ask unanimous consent that the gentleman from Iowa [Mr. HOEVEN] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HOEVEN. Mr. Speaker, on rollcall No. 74, I am recorded as not voting on the Harrison amendment, which eliminated appropriations for 1958 operation of the soil bank. I had arranged for a live pair against this amendment due to my confinement in the hospital for eye surgery. Through inadvertence, however, the pair was not recorded in the CONGRESSIONAL RECORD. It is my understanding that my pair against the amendment will be recorded in the permanent RECORD. In any event, I want my constituents to know that if present I would have voted against the Harrison amendment.

PROGRAM FOR BALANCE OF WEEK

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to proceed for 1 minute to ask the majority leader if there is any change in the program for the balance of the week.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. McCORMACK. I am very glad my friend from Illinois asked that question.

I might say that House Concurrent Resolution 172 on the program for today will not be called up. That is taken off the program because there are taking place some consultations between the gentleman who introduced the resolution and the chairman and members of the District Committee. When it will be programed again is dependent upon circumstances over which I have no control.

The rest of the program is as previously announced.

Friday we will start general debate on the Defense Department appropriation bill.

Mr. ARENDS. That will be general debate all afternoon?

Mr. McCORMACK. General debate; yes.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file a report on the so-called civil-rights bill.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to:

Mr. CHIPERFIELD, for 1 week on account of death in family.

Mr. MILLER of Maryland (at the request of Mr. ARENDS), for the balance of the week, on account of illness.

Mrs. SULLIVAN (at the request of Mr. CANNON), for an indefinite period, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAILEY, on Monday next, for 20 minutes.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. HUDDLESTON.

Mr. REUSS and include extraneous matter.

Mr. Bass of New Hampshire.

Mr. BROOMFIELD.

Mr. NEAL.

Mr. CHAMBERLAIN.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 358. An act to authorize the conveyance to the State of Wyoming of about thirty-seven and seventy-five one-hundredths acres of land comprising a part of Francis E. Warren Air Force Base;

S. 1274. An act to amend the act of March 3, 1911 (36 Stat. 1077), to remove restrictions on the use of a portion of the Springfield Confederate Cemetery, Springfield, Mo., and for other purposes.

MUTUAL SECURITY PROGRAMS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 182)

The SPEAKER laid before the House the following message from the President of the United States, which was read and

referred to the Committee on Foreign Affairs and ordered printed:

To the Congress of the United States:

The safety of our country, the preservation and strengthening of world peace, the minimizing of risk to American lives and resources in future years, all imperatively demand that we hold fast in our worldwide collective security effort.

In supplementing our country's defense, the tested and proven mutual security programs give the American people more security per dollar invested than any other expenditure they make.

In our most important task of all—the waging of peace—these programs lay firmer foundations than any other effort of our country.

For almost a decade every objective analysis has supported these views. This past year they have been convincingly reaffirmed. Congressional committees, the executive branch and distinguished private citizens have just examined these programs anew. On two fundamentals these groups have unanimously found:

First, that both the military and economic elements of our mutual security programs are essential to the security of the American people and to world peace.

Second, that these programs will continue for some years to come to be indispensable to the attainment of our country's goals in the world.

These recent studies again substantiate that these programs—

Strengthen our own defenses;

Advance our own interests through the stimulation and growth of the economies of less developed countries; and

Provide a necessary, powerful weapon with which to meet political and economic crises abroad that endanger our own vital interests.

Our grave responsibility, therefore, in this session of the Congress, is not only the continuance of these programs but also their continuance at a level dictated by the dangers we face—and the opportunities we have to counter them.

The recent studies have also generally agreed that these programs will be strengthened by a clearer identification of their principal elements with their purposes. I shall first refer to these elements of the programs and then discuss specific changes which I ask the Congress to adopt to improve their effectiveness.

First is defense assistance—our and other free nations' common effort to counter the Soviet-Chinese military power and their drive to dominate the world. That power continues to grow—in armaments, in nuclear capability, in its economic base. The Communist goal of conquering the world has never changed.

For our Nation alone to undertake to withstand and turn back Communist imperialism would impose colossal defense spending on our people. It would ultimately cost us our freedom.

For other free nations to attempt individually to counter this menace would be impossible.

We in our own interest, and other free nations in their own interest, have therefore joined in the building and maintenance of a system of collective security in which the effort of each nation strengthens all. Today that system has become the keystone of our own and their security in a tense and uncertain world.

Only if truly mutual—with mutual acts building mutual strength—can this system of collective security succeed.

On our part, in addition to our own forces at home and abroad, we provide military equipment and training for many countries as well as economic assistance to some to supplement their support of enlarged forces required in the common defense.

On their part, friendly nations man their forces and, in most cases, provide the greater part of their direct financial support. These nations also provide strategic sites for our own as well as their air, ground, and naval forces—sites essential to our combined capacity to deter aggression and defend our homelands.

In the last 8 years this Nation has furnished direct military assistance to these nations' forces in an amount approximating $17 billion. In the same period free world nations have put $107 billion into their own and the common defense.

Through this $17 billion we have helped develop and equip a free world strength of 200 divisions of friendly military forces.

They have some 27,000 aircraft.

They operate some 2,500 active combatant naval vessels.

This assistance which we have furnished and are furnishing our friends increases their ability to defend themselves against subversion from within and aggression from without.

It substantially strengthens the security of the United States.

By helping to stabilize world affairs, it heightens the prospects for a just and lasting peace.

This collective security effort has proved its value to the protection of America and the prevention of war. I give here a few of the historical incidents in which failure to give aid could have meant ultimate disaster for our country and world peace.

Had it not been for American assistance in 1947, Greece and Turkey would have succumbed to Communist power.

Had it not been for our assistance since 1948, the determination of Yugoslav leaders and people to develop their nation independently of Moscow might not have survived.

Had it not been for our assistance in 1954, strategic Vietnam and Southeast Asia would probably be lost today to the free world.

Today in Korea and Free China our assistance helps preserve national will and independence under the very muzzles of Communist guns.

Today in the Middle East our assistance helps to preserve the integrity of one of the most vital regions in the world as well as the independence of some of the nations in that area.

At this very time, when our prior efforts are bearing good fruit, while Soviet intrigue and power continue their probing and pressure in every critical area in the world, it would be supreme folly for our country either to stop these efforts or to cripple them through an overweening zeal to scrimp at their expense.

The second major element of our mutual security programs is economic development assistance and technical cooperation.

This part of the programs helps less developed countries make the social and political progress needed to preserve their independence. Unless these peoples can hope for reasonable economic advance, the danger will be acute that their governments will be subverted by communism.

To millions of people close to the Soviet and Chinese Communist borders political freedom is still new. To many it must still prove its worth. To survive it must show the way to another and equally essential freedom—freedom from the poverty and hopelessness in which these peoples have lived for centuries. With their new freedom their desire and their determination to develop their economies are intense. They are fixed upon raising their standards of living. Yet they lack sufficient resources. Their need for help is desperate—both for technical know-how and capital.

Lacking outside help these new nations cannot advance economically as they must to maintain their independence. Their moderate leaders must be able to obtain sufficient help from the free world to offer convincing hope of progress. Otherwise their peoples will surely turn elsewhere. Extremist elements would then seize power, whip up national hatreds, and incite civil dissension and strife. The danger would be grave that these free governments would disappear. Instability and threats to peace would result. In our closely knit world, such events would deeply concern and potentially endanger our own people.

The help toward economic development that we provide these countries is a means to forestall such crises. Our assistance is thus insurance against rising tensions and increased dangers of war, and against defense costs that would skyrocket here at home should tragedy befall these struggling peoples.

These revolutionary developments in distant parts of the world are borne on the crest of the wave sent out a century and a half ago by the example of our own successful struggle for freedom. The determination of the people of these nations to better their lot and to preserve their newly gained liberty awakens memories of our own noblest traditions. Our helping hand in their struggle is dictated by more than our own self-interest. It is also a mirror of the character and highest ideals of the people who have built and preserved this Nation.

The third major element of the mutual security programs is the special—often emergency—assistance we provide to help friendly nations through critical periods when violent political change, natural disaster, or other circumstances threaten both their stability and our own national interests.

In 1953, strategically located Iran, under an erratic leader, verged on communism and chaos. The Iranians succeeded in establishing a government

friendly to us and freedom. Our assistance gave them the additional strength needed to stabilize their nation and to consolidate their victory over violence and subversion.

Similar aid to Guatemala enabled republican government to survive there after a pro-Communist regime was overthrown in 1954.

In the many unstable regions of the world, Communist power is today probing constantly. Every weakness of free nations to being exploited in every possible way. It is inevitable that we shall have to deal with such critical situations in the future. In America's own interest, we must stand ready to furnish special assistance when threatened disaster abroad foretells danger to our own vital concerns.

The major elements of our mutual security programs are therefore still as urgently needed for our own security as ever before. But, as others have recently urged, I believe that these elements should be more clearly defined in order to facilitate more efficient and more economical administration. I recommend four specific changes in existing programs:

First, defense assistance programs should be separated from programs for economic development.

Second, defense assistance should be recognized and treated as an integral part of our own worldwide defense efforts.

Third, economic development assistance should be provided primarily through loans, on a continuing basis, and related closely to technical assistance.

Fourth, needs for special economic assistance should be met by funds authorized and appropriated specifically for this purpose.

To accomplish these purposes I recommend the following legislative actions:

First, I recommend that defense assistance, both military assistance and related economic support, be separated from economic development assistance.

We spend the largest part of our mutual security funds to strengthen friendly military forces through the use of two types of defense assistance:

One is military assistance—that is, guns, ammunition, tanks, planes, ships and other weapons which we furnish to military allies, plus training in the use of such weapons.

The other is defense support. Although superficially economic in purpose, this assistance enables friendly nations to maintain military forces and provide military facilities substantially greater than they could otherwise support.

The present arrangement of our mutual security programs does not clearly differentiate defense support assistance from economic development assistance. Until now, both military and defense support assistance have been joined with development assistance in one appropriation measure. In the process, economic development assistance for countries with which we have military assistance agreements has tended to lose its identity.

To remove uncertainty as to the character and purpose of our aid, I recommend a clear separation of military and defense support assistance on the one hand, from economic development assistance on the other. The program being submitted to the Congress provides for this separation.

The second legislative action I propose is this: that defense assistance appropriations be included as a separate title in the regular Department of Defense budget.

Our expenditures for defense assistance differ neither in basic purpose nor character from those for our own Armed Forces. Once incorporated in our own defense budget, they will become recognized here and abroad—as indeed they should be—as part of the military effort of the United States. To assure a continuing close coordination of all elements of the entire program, I also propose that these funds be appropriated to the President.

I recommend also that appropriations for both military assistance and defense support be pursuant to a continuing authorization enacted by the Congress. This would fittingly recognize that our own security requires continuance of these parts of our own military effort as long as Communist imperialism remains a menace to free peoples. This would also enable the Congress to consider simultaneously appropriations both for our own Armed Forces and for assistance to friendly forces. In this way, these two interrelated elements of our military budget can be better integrated and balanced, and the effectiveness of both increased. I recommend also that these defense assistance funds be authorized as our own military procurement funds are authorized, whether this be on the present basis—available until expended—or as it may be modified in the future. Policy guidance for both military assistance and defense support would, of course, be effected by the President through the Secretary of State.

For these two types of defense assistance programs in fiscal year 1958 I recommend appropriations totalling $2.8 billion in a separate title of the Department of Defense appropriation. Of this sum, $1.9 billion will be for military equipment and services. The remaining $900 million will be for defense support.

As a third major legislative action, I recommend that long-term development assistance be provided from a Development Loan Fund.

Our assistance to less developed countries can add only in limited degree to their own resources. Nevertheless, if so provided as to encourage these peoples to help themselves more than they can now, it can make a critical difference.

This objective requires a clear statement of our intention, in our own national interest, to help the people of less developed countries in their efforts to develop their economies. It requires also a greater assurance of continuity.

Development assistance programs are managed as effectively and economically as possible under the present system but suffer from major difficulties. One is that the present law makes funds available only from year to year with no assurance of continuity. Obviously, sound economic development is not a year-to-year undertaking but a continuing process. Another difficulty is closely related. Under present law funds are requested each year on the basis of estimated country programs. This leads to the establishing of levels of aid for each country that have to be prematurely formulated. Thereafter they become difficult to change without risking misunderstanding on the part of the countries we help.

In addition, even the personnel needed to administer these programs, most of whom must be highly skilled technically, cannot be assured of more than short terms of employment. This makes it exceedingly difficult to recruit and to hold good personnel.

Countries seeking and meriting our help should take increasing responsibility for carefully planning the projects which they need and can justify. It is no less important that our aid be geared to these projects and that our continued assistance be related to the progress being made in carrying out these projects.

That there may be greater continuity, efficiency, and economy, and other nations encouraged to greater self-help, I recommend that the Congress establish a development loan fund to finance specific projects and programs which give promise of contributing to sound development. This fund would be used not for short-term emergency requirements but for economic development of long-term benefit to the borrowing country.

I visualize that assistance from this fund would be provided essentially on a loan basis. Such loans should not compete with or replace such existing sources of credit as private investors, the International Bank, or the Export-Import Bank.

These loans should be made on a reasonable expectation of repayment in dollars or local currencies, even though we should recognize that this expectation would be based on confidence in the long-range development of the borrowing country and on hope for an improved international political climate rather than on presently demonstrable financial soundness.

The fund would closely coordinate its operations with existing lending institutions. It could directly and independently provide financing or do so in conjunction with such institutions. A major purpose would be to promote—not impede—the flow of private investment, and to this end the fund should have authority to engage in appropriate financing operations. Properly operated, it should increase sound activity by these other sources of credit and investment.

In order to avoid needless administrative duplication and to assure coordination with our foreign-policy objectives, I believe the fund should be established and administered in the International Cooperation Administration.

To achieve its objective, the fund should initially command sufficient resources to finance its operations during the coming 3 fiscal years. Only thus can we break away from the advance country

programing and other operating practices which now encumber and complicate the administration of development assistance. Lacking such assurance of continuity, the fund would be little more than a new name for continuing, with minor improvement, the present practices.

I ask the Congress, therefore, for an initial appropriation for fiscal year 1958 and also for authority for the fund to borrow from the Treasury in succeeding years, within stated limits. Such borrowing authority has been used to finance many other United States lending operations. I believe this financing mechanism is well suited to the character of the fund.

In order to get the fund underway in its first year, not less than $500 million should be appropriated—an amount which is included in the total request for new funds later presented in this message. I anticipate a substantial increase in sound requests for assistance in the following 2 years, as countries' development programs move forward. I therefore expect the fund to require capital of $750 million in each of the fiscal years 1959 and 1960.

In order to accomplish the purposes of the fund, sufficient capital must be provided now. To create a fund for long-term economic development while denying it the means to succeed would be to deceive ourselves, discourage our friends, and dissipate our money.

The technical cooperation program is one of the most valuable elements of our entire mutual security effort. It also should be continued on a long-term basis and must be closely related to the work of the fund. I therefore propose that the Congress authorize technical cooperation on a continuing basis while continuing to appropriate funds on a yearly basis as is done now. For fiscal year 1958 I request an appropriation of $152 million for this program.

"Special assistance" I recommend be established as a separate category of aid to serve three major purposes:

First, to provide primarily by grant, economic assistance to meet needs of importance to our country which cannot be properly met by the basic types of assistance.

Second, to meet unforeseen additional military or other requirements above the funds programed and requested. This I expect to be of particular importance during the initial year of the revised program.

Third, to be prepared to meet emergencies and contingencies that require waiver of certain restrictive legal provisions to protect the Nation's security interests. I request authority to waive these restrictions on the use of appropriated funds in the same amount as now provided. Part of the additional needs in the Middle East which I discussed before the Congress last January will be provided from such special assistance.

For these three purposes of special assistance—for which appropriations should be made annually—I request $300 million of new funds for fiscal year 1958. This sum includes $100 million to cover already anticipated requirements and $200 million for reserve and contingencies.

I should like to note especially one of these anticipated requirements. I refer to a program—malaria eradication—which will appear separately in the bill proposed to the Congress, but will be financed from the special assistance fund.

Malaria is today the world's foremost health problem. Each year it attacks 200 million people, bringing death to 2 million and causing enormous suffering and economic loss in many areas. Today it is practicable to end this scourge in large areas of the world. I propose that the United States join with other nations and organizations which are already spending over $50 million a year on antimalaria activities. In 5 years these activities are expected to eradicate this disease.

In addition to the programs already discussed, $113 million is required for multilateral programs, the program for peaceful use of the atom, and the administration of the nonmilitary programs.

It is especially important to continue our contributions to United Nations and other international programs in the fields of technical cooperation, assistance to refugees and migrants and children's welfare. These contributions, augmented by the contributions of other nations, will enable these organizations to continue their valuable work. I believe participation of the United States in these endeavors should be continued at substantially the present level. I also request continuance of our program to assist escapees from Communist despotism.

Before the United Nations General Assembly in December 1953, the United States first offered to assist other countries and to share with them its technology in the peaceful application of atomic energy. Our mutual security programs for fiscal year 1958 include additional funds to implement this offer by providing assistance in financing research reactors, other equipment, and services to the growing number of countries engaged in peaceful nuclear activities.

The total request for new funds for fiscal year 1958 is $3.865 billion, a sum $535 million less than estimated in my budget message last January. Nearly all of that reduction is made possible by savings in the military assistance program in an amount of $500 million, which, if carried over, can be used to meet program needs of fiscal year 1958. This sum is not deferred spending but a real saving. These savings are largely attributable to a reduction in spare parts requirements based on experience in the actual use of our equipment by the forces we are assisting, reduced needs resulting from better planning with our allies, and a continuing improvement of the administration of the program. I ask that this $500 million be carried over to fiscal year 1958.

We are—all of us—seeking to cut the cost of government. All of us want taxes reduced when possible without injury to our country.

There is, however, only one sound way for us to achieve a substantial tax reduction. That way is to succeed in waging peace, thereby permitting a substantial cut in our heavy military expenditures. A substantial cut in these expenditures, in the face of present world conditions, would be foolhardy.

Similarly, and for the same reason, refusal to give adequate support now for our crucial mutual security programs could hardly be more ill advised or ill timed. It would risk not only the ultimate attainment of the tremendous military savings to which we all aspire; by encouraging aggression and discouraging our friends, it would also risk forcing our own defense spending to a level far higher than it is today. In this kind of a gamble, American lives are just as much in the balance as American dollars.

The Congress must also weigh these facts:

First, a substantial cut in defense assistance would force a reduction in the strength of Allied forces. Thereby the risk of local Communist aggression would be increased. In order to forestall that, we would have to expand our own forces and station more of our youth abroad, or else supinely accept Communist expansion at the expense of the free world. I need hardly point out that such a procession of events would sooner or later force an increase in the number of young men inducted into our forces as well as a substantial increase in our own defense cost.

And second, we simply cannot afford to blight the hopes of the newly independent peoples who turn to the free world for help in their struggle for economic survival. Should we do so, these peoples will perforce be driven toward Communist or other totalitarian solutions to their problems.

I know of no precise relation between economic well-being and responsible political development. Yet continued poverty and despair are conditions that will foredoom moderate political life in these countries. If the best that these free governments can offer their peoples is endless hopelessness and grinding poverty, then these governments will surely fall. Certain it is that our peace, our political freedom, and our prosperity would not long survive the sweep of Communist despotism over these new nations.

Failure to provide adequate funds to help these struggling nations move forward could well become tragically expensive to every citizen in our country.

Our mutual security programs have become, during the past 10 years, proven instruments of tremendous power for winning our struggle for peace. The proposals I have made for their improvement stem equally from the legislative and the executive branches. I urge the Congress to join with me in giving these programs the strength which the present and future security of our Republic requires.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *May 21, 1957.*

PRINTING OF HEARINGS OF COMMITTEE ON APPROPRIATIONS FOR DEPARTMENT OF DEFENSE

Mr. JONES of Missouri. Mr. Speaker, by direction of the Committee on House Administration, I am going to call up four resolutions which have been re-

ported by the committee and which have been cleared with the leadership on both sides of the aisle.

First, I call up the concurrent resolution (H. Con. Res. 174) authorizing the printing of additional copies of part 1 of the hearings on the Department of Defense appropriations for 1958 and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Committee on Appropriations, House of Representatives, 1,000 additional copies of part 1 of the hearings held by that committee during the current session on the Department of Defense appropriations for 1958.

Mr. LECOMPTE. Mr. Speaker, will the gentleman yield?

Mr. JONES of Missouri. I yield.

Mr. LECOMPTE. I wonder if the gentleman from Missouri is planning to explain that these resolutions have all been through the Committee on House Administration and that the resolutions were requested by certain committees for the operation of the committees. They are mostly for printing hearings or House documents. Would the gentleman care to tell the House the estimated cost of printing each of these resolutions? One of the resolutions is for the other body and the principle of comity between the two Houses would seem to almost compel us to pass that resolution without much of any argument or discussion because it is exclusively for the Committee on Foreign Relations of the other body.

Mr. JONES of Missouri. Mr. Speaker, I will be very happy to follow the gentleman's suggestion. This particular resolution, House Concurrent Resolution 174, relates to hearings before the Committee on Appropriations for the Department of Defense. There is a great demand for copies of these hearings. The cost of this particular printing is $3,727 for 1,000 copies. I might say that the committee gave much consideration to the printing of these hearings, and I think later on the committee will probably make a recommendation for a more judicious use of the hearings because these hearings cost a considerable amount of money.

I may say for the benefit of the Members that the first printing of 1,000 copies cost $16,000, so when you pick up this copy of the hearings for the Department of Defense appropriation, you are dealing with a $16 volume. Additional copies will cost $3.27 each. This committee is trying to cut down the cost of printing for you, but in view of the great demand it is necessary that these be printed.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

HOUSE REPORT ON UNITED STATES AID OPERATIONS IN IRAN

Mr. JONES of Missouri. Mr. Speaker, by direction of the Committee on House Administration, I call up the Resolution (H. Res. 229) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That there be printed for the use of the Committee on Government Operations, House of Representatives, 2,000 additional copies of House Report No. 10, current Congress, entitled "United States Aid Operations in Iran."

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

TECHNICAL ASSISTANCE REPORT

Mr. JONES of Missouri. By direction of the Committee on House Administration, I call up the resolution (S. Con. Res. 24) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Committee on Foreign Relations 2,500 additional copies of Senate Report No. 139, current Congress, entitled "Technical Assistance."

The SPEAKER. The question is on the resolution.

The concurrent resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BONDING OF LIBRARY EMPLOYEES

Mr. JONES of Missouri. Mr. Speaker, by direction of the Committee on House Administration, I ask unanimous consent for the immediate consideration of the bill (H. R. 7234) to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., that hereafter, each officer and employee of the Library of Congress, including the Copyright Office, who has been duly authorized in writing by the Librarian of Congress to certify vouchers for payment from appropriations and funds, shall (1) be held responsible for the existence and correctness of the facts recited in the certificate or otherwise stated on the voucher or its supporting papers and for the legality of the proposed payment under the appropriation or fund involved; (2) be required to give bond to the United States, with good and sufficient surety approved by the Secretary of the Treasury, in such amount as may be determined by the Librarian of Congress, pursuant to standards prescribed by the Secretary of the Treasury, and under such conditions as may be prescribed by the Secretary of the Treasury; (3) be held responsible and accountable for the correctness of the computations of certified vouchers; and (4) be held accountable for and required to make good to the United States the amount of any illegal, improper, or incorrect payment resulting from any false, inaccurate, or misleading certificate made by him, as well as for any payment prohibited by law or which did not represent a legal obligation under the appropriation or fund involved: *Provided*, That the Comptroller General of the United States may, at his discretion, relieve such certifying officer or employee of liability for any payment otherwise proper whenever he finds (1) that the certification was based on official records and that such certifying officer or employee did not know, and by reasonable diligence and inquiry could not have ascertained, the actual facts, or (2) that the obligation was incurred in good faith, that the payment was not contrary to any statutory provision specifically prohibiting payments of the character involved, and the United States has received value for such payment: *Provided further*, That the Comptroller General shall relieve such certifying officer or employee of liability for an overpayment for transportation services made to any common carrier covered by title III, part II, section 322, of the Transportation Act of 1940, approved September 18, 1940, whenever he finds that the overpayment occurred solely because the administrative examination made prior to payment of the transportation bill did not include a verification of transportation rates, freight classifications, or land grant deductions.

SEC. 2. The liability of these certifying officers or employees shall be enforced in the same manner and to the same extent as now provided by law with respect to enforcement of the liability of disbursing and other accountable officers; and they shall have the right to apply for and obtain a decision by the Comptroller General on any question of law involved in a payment on any vouchers presented to them for certification.

SEC. 3. The disbursing officer of the Library of Congress shall (1) disburse moneys of the Library of Congress only upon, and in strict accordance with, vouchers duly certified by the Librarian of Congress or by an officer or employee of the Library of Congress duly authorized in writing by the Librarian to certify such vouchers; (2) make such examination of vouchers as may be necessary to ascertain whether they are in proper form, and duly certified and approved; and (3) be held accountable accordingly: *Provided*, The disbursing officer shall not be held accountable or responsible for any illegal, improper, or incorrect payment resulting from any false, inaccurate, or misleading certificate, the responsibility for which, under section 1 hereof, is imposed upon a certifying officer or employee of the Library of Congress.

Mr. JONES of Missouri. Mr. Speaker, a brief explanation of this bill is that it would provide for bonding certain responsible officers of the Library. It is in line with the practice of other departments of Government. I cannot tell you why it has not been done in the past, but the committee feels it is justified and that this action should be taken.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PRIVATE CALENDAR

The SPEAKER. This is the day for the call of the Private Calendar.

The Clerk will call the first bill on the calendar.

A. C. ISRAEL COMMODITY CO., INC.

The Clerk called the bill (H. R. 5707) for the relief of the A. C. Israel Commodity Co., Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not

otherwise appropriated, to the A. C. Israel Commodity Co., Inc., New York, N. Y., the sum of $7,582.57. The payment of such sum shall be in full settlement of all claims of the said company against the United States for reimbursement of the amount paid (under protest) by such company on December 13, 1945, as damages for alleged violation, in connection with the sale by such company of imported chocolate bars, of price regulations established by the Office of Price Administration: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WAIVING CERTAIN SECTIONS OF THE IMMIGRATION AND NATIONALITY ACT IN BEHALF OF CERTAIN ALIENS

The Clerk called the resolution (H. J. Res. 288) to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens.

There being no objection, the Clerk read the resolution, as follows:

Resolved, etc., That, notwithstanding the provisions of section 212 (a) (9) and (19) of the Immigration and Nationality Act, Ramon R. Minjares may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act.

SEC. 2. Notwithstanding the provisions of section 212 (a) (9), (12), and (17) of the Immigration and Nationality Act, Mrs. Berna Lee Kelly may be admitted to the United States for peremanent residence if she is found to be otherwise admissible under the provisions of that act.

SEC. 3. Notwithstanding the provisions of section 212 (a) (6) of the Immigration and Nationality Act, the alien, Moisze Karp, may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act under such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare, may deem necessary to impose: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act.

SEC. 4. Notwithstanding the provisions of section 212 (a) (9) and (17) of the Immigration and Nationality Act, Francisco Carapia Gaytin may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act.

SEC. 5. Notwithstanding the provisions of section 212 (a) (9), (17), and (19) of the Immigration and Nationality Act, Armando Dumas Guillen may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act.

SEC. 6. The exemptions provided for in this act shall apply only to grounds for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this act.

With the following committee amendments:

Page 1, line 3, strike out the word "provisions" and insert "provision."

Page 1, line 4, after the figure "(9)," strike out "and (19)."

The committee amendments were agreed to.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DONALD F. THOMPSON

The Clerk called the bill (H. R. 2264) for the relief of Donald F. Thompson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to credit the accounts of Donald F. Thompson, of Knoxville, Md., in the amount of $223.08. Such sum represents the overpayment of accrued leave after serving in the Armed Forces in Korea in 1951.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. ELISE T. KIRK

The Clerk called the bill (H. R. 1412) for the relief of Mrs. Elise T. Kirk.

The SPEAKER. Is there objection?

Mr. AVERY. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

BENEDICT M. KORDUS

The Clerk called the bill (H. R. 1883) for the relief of Benedict M. Kordus.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Benedict M. Kordus, Milwaukee, Wis., the sum of $6,476.06. The payment of such sum shall be in full settlement of all claims of the said Benedict M. Kordus against the United States for payment of the disability compensation withheld from Matthew T. Kordus (Veterans' Administration claim No. XC-683714) pursuant to the provisions of Public Law 662, 79th Congress: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CARL A. WILLSON

The Clerk called the bill (H. R. 2083) for the relief of Carl A. Willson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Carl A. Willson, Hollywood, Calif., the sum of $216.62. The payment of such sum shall be in full settlement of all claims of the said Carl A. Willson against the United States for regular pay, overtime pay, night differential pay, and annual leave, and for reimbursement for travel performed from Los Angeles, Calif., to Oakland, Calif., as an employee of the Department of the Army, Quartermaster Procurement Agency Headquarters, Oakland, Calif., during the year 1951: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, lines 3 and 4, strike out "in excess of 10 per centum thereof."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARTIN A. McGRORY

The Clerk called the bill (H. R. 4538) for the relief of Martin A. McGrory.

There being no objection the Clerk read the bill, as follows:

Be it enacted, etc., That Martin A. McGrory, commissioned warrant officer, Marine Corps, retired (serial No. 015990), is relieved of all liability to repay to the United States amounts paid to him as retired pay for the period beginning May 18, 1949, and ending December 31, 1954, both dates inclusive. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States full credit shall be given for all amounts for which liability is relieved by this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Martin A. McGrory an amount equal to the amounts which Martin A. McGrory would have received as retired pay for the period beginning on January 1, 1955, to the date of enactment of this act if during the period from May 18, 1949, to August 4, 1955, both dates inclusive, he had not been employed as Assistant Superintendent of the Home for the Aged and Infirm, a facility of the District of Columbia: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELIEF OF CERTAIN ALIENS

The Clerk called the bill (H. R. 1848) for the relief of certain aliens.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Surma, David, Esther, Theodor, Rowena, Sargon, Marie, Rowena (daughter of Marie) and Piarim D-Mar Shimum, and Elishwa, Sulty, Paul, Sophia, Surma, Eshaya, Virginia, George, Mersina, Sophia (daughter of Elishwa) Zaya, and Mrs. Khanna Zecharia, shall be held and considered to be classifiable as non quota immigrants under the provisions of section 101 (a) (27) (F) and section 204 of that act shall not be applicable in their cases.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARY BARME ET AL.

The Clerk called the bill (S. 51) for the relief of Mary Barme and her two minor children Steran Barme and Dinah Barme.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Mary Barme and her two minor children, Steran Barme and Dinah Barme, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEE CHONG TAIK

The Clerk called the bill (S. 94) for the relief of Lee Chong Taik.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of section 101 (a) (27) (A) of the Immigration and Nationality Act, the minor child, Lee Chong Taik, shall be held and considered the natural-born alien child of Mr. and Mrs. Otto V. Byhre, citizens of the United States.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOSEPHINE SUYDAM

The Clerk called the bill (S. 124) for the relief of Josephine Suydam.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, the minor child, Josephine Suydam, shall be held and considered to be the natural-born alien child of Mr. John A. Suydam, a citizen of the United States.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JEW GIM GEE

The Clerk called the bill (S. 162) for the relief of Jew Gim Gee.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, the minor child, Jew Gim Gee, shall be held and considered to be the natural-born alien child of Jew Suey Thit, a United States citizen.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARY C. FREDERICK

The Clerk called the bill (S. 184) for the relief of Mary C. Frederick.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs is authorized and directed to pay to Mary C. Frederick, the widow of Alex J. Frederick (XC–11542142), a sum equal to the amount which would have been payable to her as death benefits for the period beginning March 24, 1950, and ending on May 2, 1952, on account of the death of the said Alex J. Frederick, had her application for such benefits been filed within 1 year from the date of the death of her husband.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PETER V. BOSCH

The Clerk called the bill (S. 189) for the relief of Peter V. Bosch.

Mr. AVERY. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

JOHANNES SUKEVAINEN

The Clerk called the bill (S. 271) for the relief of Johannes Sukevainen.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is authorized and directed to discontinue any deportation proceedings and to cancel any outstanding order and warrant of deportation, warrant of arrest, and bond, which may have been issued in the case of Johannes Sukevainen. From and after the date of enactment of this act, the said Johannes Sukevainen shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and order have issued.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING ADJUSTMENT OF IMMIGRATION STATUS OF CERTAIN FOREIGN SKILLED SPECIALISTS

The Clerk called the bill (S. 461) for the relief of Paul Yen-Hsiung Feng and his wife, Mary Stella Pao-Ching Feng, and their minor child, Joseph Shao-Ying Feng.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Paul Yen-Hsiung Feng and his wife, Mary Stella Pao Ching Feng, and their minor child, Joseph Shao-Ying Feng, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

With the following committee amendment:

Page 1, strike out all after the enacting clause and insert: "That, in the administration of the Immigration and Nationality Act, the Attorney General is authorized, pursuant to such terms and conditions as he may by regulations prescribe, to adjust the status of that of an alien lawfully admitted for permanent residence in the case of (A) an alien, physically present within the United States on May 1, 1957, who is the beneficiary of an approved visa petition for immigrant status under sections 203 (a) (1) (A) of the Immigration and Nationality Act filed on his behalf prior to the date of enactment of this act, and (B) his spouse and children physically present within the United States on May 1, 1957: *Provided*, That this act shall be applicable only to aliens admissible to the United States except for the fact that an immigrant visa is not promptly available for issuance to them because the quota of the quota area to which they are chargeable is oversubscribed. Upon the payment of the required visa fee and the adjustment of status under this act, the Attorney General shall record the aliens' lawful admission for permanent residence as of the date of the order adjusting status. Nothing contained in this act shall be held to repeal, amend, or modify any of the provisions of the act of June 4, 1956 (70 Stat. 241). Pursuant to such terms and conditions, and in accordance with such procedure, as he may by regulations prescribe, the Attorney General is authorized to grant nonquota status, and a nonquota immigrant visa shall be issued, to the spouse and child of any alien specified in clause (A) whose status has been adjusted under this act: *Provided*, That the marriage by virtue of which such relationship exists occurred prior to May 1, 1957; and definitions contained in section 101 (a) and (b) of the Immigration and Nationality Act shall be applicable to this act."

Mr. WALTER. Mr. Speaker, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. WALTER to the committee amendment: On page 2, line 7, after the word "status" strike out the word "of" and substitute the word "to."

The amendment to the committee amendment was agreed to.

The committee amendent was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act to authorize the adjustment of immigration status of certain foreign skilled specialists."

A motion to reconsider was laid on the table.

JOHN (IOANNIS) LEGATOS

The Clerk called the bill (S. 754) for the relief of John (Ioannis) Legatos.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, John (Ioannis) Legatos shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ELDUR EHA

The Clerk called the bill (S. 799) for the relief of Eldur Eha.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Eldur Eha shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BERNARD L. PHIPPS

The Clerk called the bill (H. R. 1376) for the relief of Bernard L. Phipps.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Bernard L. Phipps of Towson, Md., the sum of $100. Such sum represents the amount of the judgment for which Bernard L. Phipps was held liable to Mrs. Lawrence Langfelt on September 26, 1956, in a civil action in People's Court of Baltimore City, Md. This civil action was the result of an accident which occurred at the intersection of Joppa Road and Baltimore Avenue in Towson, Md., and which involved a United States mail truck being driven by Bernard L. Phipps, a motor-vehicle employee in the United States post office, Towson, Md. Such sum shall be paid only on condition that Bernard L. Phipps shall use such sum, or so much thereof as is necessary, to pay such judgment in full: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BEULAH I. REICH

The Clerk called the bill (H. R. 1501) for the relief of Beulah I. Reich.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $45,000 to Beulah I. Reich, of 1118 Grimes Avenue, Harlingen, Tex., in full settlement of all claims against the United States for personal injuries, hospital and medical expenses sustained as a result of an accident at the Hotel Villa Carola, Bad Neuheim, Germany, on September 9, 1949, such accident being caused by the negligence of employees of the United States Army engineers: *Provided*, That no part of the amount appropriated in this Act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 5, strike out "$45,000" and insert "$10,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM H. BARNEY

The Clerk called the bill (H. R. 1552) for the relief of William H. Barney.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That William H. Barney, of Los Angeles, Calif., is hereby relieved of all liability to the United States arising out of his failure to perform Navy contract No. NOy–22897 (specification 25380; structural alterations, building No. 2–69 and vault, building No. 2–68, United States Naval Construction Battalion Center, Port Hueneme, Calif.). The said William H. Barney submitted his bid on October 24, 1950, and accepted notice to proceed on November 6, 1950, but he did not sign the contract, or enter upon its performance, on account of certain previously unforeseen costs of performance which would have caused him irretrievable financial loss.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWARD J. MOSKOT

The Clerk called the bill (H. R. 1682) for the relief of Edward J. Moskot.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Edward J. Moskot, captain, United States Army, retired (serial No. O499596), is relieved of all liability to the United States (1) for any unpaid balance of amounts paid to him as salary by the Anniston Ordnance Depot Officer's Open Mess, Anniston, Ala., a nonappropriated fund activity of the United States Army, and (2) any amounts paid to him as retired pay from the United States Army for the period for which he received a salary from such officer's open mess.

SEC. 2. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States full credit shall be given for the amounts for which liability is relieved by this act.

With the following committee amendment:

On page 6, after the word "salary", insert "during the period February 9, 1954, to October 21, 1954, inclusive."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWIN MATUSIAK

The Clerk called the bill (H. R. 1885) for the relief of Edwin Matusiak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Edwin Matusiak, Milwaukee, Wis., the sum of $50. The payment of such sum shall be in full settlement of all claims of the said Edwin Matusiak against the United States for reimbursement of the amount which he paid to settle the claims of Nic Kotrodimos for damages arising out of a collision which occurred on February 14, 1951, in Milwaukee, Wis., and involved a vehicle operated by the said Nic Kotrodimos and a vehicle owned by the United States and operated by the said Edwin Matusiak as an employee of the postal field service of the Post Office Department: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 5, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. RHEA SILVERS

The Clerk called the bill (H. R. 2070) for the relief of Mrs. Rhea Silvers.

Mr. HEMPHILL. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

ALBERT A. HEINZE

The Clerk called the bill (H. R. 2075) for the relief of Albert A. Heinze.

Mr. HEMPHILL. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

WILLIAM R. AND ALICE M. REARDON

The Clerk called the bill (H. R. 2340) for the relief of William R. and Alice M. Reardon.

Mr. HEMPHILL. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

LEGAL GUARDIAN OF THOMAS BRAINARD, A MINOR

The Clerk called the bill (H. R. 4154) for the relief of the legal guardian of Thomas Brainard, a minor.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $10,000 to the legal guardian of Thomas Brainard, a minor, of Waukegan, Ill., in full settlement of all claims against the United States for personal injuries, medical and hospital expenses sustained as the result of an accident in an underground, unguarded, broken steam line near quarters known as D-411 and D-412 at Misawa Air Base, Japan, on February 5, 1955: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 5, strike out "$10,000" and insert "$8,500."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. M. E. SHELTON PRUITT

The Clerk called the bill (H. R. 4851) for the relief of Mrs. M. E. Shelton Pruitt.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $150 to Mrs. M. E. Shelton Pruitt, of Santo, Tex., in full settlement of all claims against the United States. Such sum represents the amount she would have been entitled for funeral allowance of her son, Olin Shelton, XC-1 299 938, who died on June 26, 1953, and claim for funeral allowance was not made within the 2 years subsequent to the date of the veteran's burial: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 2, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELIEF OF SHAREHOLDERS OF THE GOSHEN VENEER CO.

The Clerk called the bill (H. R. 6282) for the relief of the former shareholders and debenture noteholders of the Goshen Veneer Co., an Indiana corporation.

There being no objection, the Clerk read the bill, as follows:

Be it enacted etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Charles E. Gorham the sum of $87,283.93; to Nellie A. Gorham the sum of $15,403.05; to the estate of Ethel B. Dow the sum of $143,761.78; to Elizabeth Dow Snoke the sum of $56,477.84; to Barbara H. Dow the sum of $56,477.84; and to Dow M. Gorham the sum of $154,030.48, in full settlement of their claims against the United States, as sole shareholders and debenture note holders of the Goshen Veneer Co., an Indiana corporation having its principal place of business at Goshen, Ind., through (a) their surrender of de facto control of such corporation to representatives of the United States in reliance in good faith upon unfulfilled representations made by representatives of the Air Forces of the United States Army; (b) the furnishing of materials, and the fabrication and manufacture of plywood and other word parts, by such corporation during such period for the United States and for other Government contractors engaged in the manufacture of fighting, training, and transport airplanes for use by the Army Air Forces in the prosecution of the war; and (c) the eventual loss by such shareholders of their several equities in such corporation by reason of losses sustained by it in the course of its operation during such period: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Strike out all after the enacting clause and insert: "That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Dow M. Gorham, administrator of the estate of Charles E. Gorham, the sum of $12,750; to Dow M. Gorham, administrator of the estate of Nellie A. Gorham, the sum of $2,250; to Elizabeth Dow Snoke, administrator of the estate of Ethel B. Dow, the sum of $21,000; to Elizabeth Dow Snoke, the sum of $8,250; to Barbara Dow Bowen, the sum of $8,250; and to Dow M. Gorham, the sum of $22,500, former shareholders of the Goshen Veneer Co., an Indiana corporation, having its principal place of business at Goshen, Ind., representing the amounts reported by the United States Court of Claims to the Congress in response to House Resolution 814, 81st Congress, second session (Congressional No. 17365, decided March 2, 1954), in full settlement of their claims against the United States as a result of having lost their business by reason of an overexpansion of its facilities urged and encouraged by the War Department of the United States in anticipation of the requirements of the projected wartime wooden aircraft program and the subsequent abandonment of that program by the War Department before amortization could be effected: *Provided*, That no part of the amounts appropriated in this act in excess of 25 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LIEN-FU LO, ALSO KNOWN AS LUKE LO

The Clerk called the bill (H. R. 1417) for the relief of Lien-fu Lo, also known as Luke Lo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Lien-fu Lo, also known as Luke Lo, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ELEANOR FRENCH CALDWELL

The Clerk called the bill (H. R. 1754) for the relief of Eleanor French Caldwell.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Eleanor French Caldwell, who lost United States citizenship under the provisions of section 401 (e) of the Nationality Act of 1940, may be naturalized by taking prior to one year after the effective date of this act, before any court referred to in subsection (a) of section 310 of the Immigration and Nationality Act or before any diplomatic or consular officer of the United States abroad, the oaths prescribed by section 337 of the said act. From and after naturalization under this act, the said Eleanor French Caldwell shall have the same citizenship status as that which existed immediately prior to its loss.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. THOMAS L. DAVIDSON

The Clerk called the bill (H. R. 4342) for the relief of Mrs. Thomas L. Davidson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Mrs. Thomas L. Davidson, who lost United States citizenship under the provisions of section 401 (e) of the Nationality Act of 1940, may be naturalized by taking, prior to 1 year after the date of the enactment of this act, before any court referred to in subsection (a) of section 310 of the Immigration and Nationality Act or before any diplomatic or consular officer abroad, an oath as prescribed by section 337 of the Immigration and Nationality Act: *Provided*, That from and after naturalization under this act, the said Mrs. Thomas L. Davidson shall have the same citizenship status as that which existed immediately prior to its loss.

With the following committee amendment:

Page 1, line 10, strike out "Act: *Provided*, That from" and insert "Act. From".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELIEF OF CERTAIN ALIENS

The Clerk called the resolution (H. J. Res. 316) for the relief of certain aliens.

There being no objection, the Clerk read the resolution, as follows:

Resolved, etc., That for the purposes of the Immigration and Nationality Act, Roszi Berger, Chun Shu Chien, Shun Fu Chow, Yu Siu Feng Chow, Kuo Yang Chow, Kee Lee, Yuan Shun (also known as Yuan Shoon), Sun Chi Siao, Cheung Sing, Tek Tong Tan, Hsiung-Yuan Tang, and Madge Tang shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act. The number of refugees to whom permanent residence in the United States may be granted under the provisions of section 6 of the Refugee Relief Act of 1953, as amended, is hereby reduced by 12.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELIEF OF CERTAIN ALIENS

The Clerk called the resolution (H. J. Res. 322) for the relief of certain aliens.

There being no objection, the Clerk read the resolution, as follows:

Resolved, etc., That, for the purposes of the Immigration and Nationality Act, Ettore Penna, Mrs. Sirvart Minassian, Noel Kaiser, Sonja Spieker, David W. S. Ahn, and Margaret Y. A. Ahn shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to each alien as provided for in this act, if such alien was classifiable as a quota immigrant at the time of the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to reduce by one the quota for the quota area to which the alien is chargeable for the first year that such quota is available: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act in the case of Sonja Spieker.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FACILITATING ADMISSION OF CERTAIN ALIENS

The Clerk called the resolution (H. J. Res. 323) to facilitate the admission into the United States of certain aliens.

There being no objection, the Clerk read the resolution, as follows:

Resolved, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, Georgia Ziavras shall be held and considered to be the natural-born minor alien child of Mr. and Mrs. Charles Ziavras, citizens of the United States.

SEC. 2. For the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, Osmar Toniolo shall be held and considered to be the natural-born minor alien child of Stanley Szczepanek, a citizen of the United States.

SEC. 3. For the purposes of the Immigration and Nationality Act, Sofia Kavadias shall be deemed to be a nonquota immigrant.

SEC. 4. For the purposes of the Immigration and Nationality Act, Goon Shee (Goon Ju Hai) shall be classifiable as a returning resident alien as defined in section 101 (a) (27) (B) of that act.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WAIVING CERTAIN PROVISIONS IN BEHALF OF CERTAIN ALIENS

The Clerk called the joint resolution (H. J. Res. 324) to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens.

There being no objection, the Clerk read the joint resolution, as follows:

Resolved, etc., That, in the administration of the Immigration and Nationality Act, Mrs. Christa Ernst, the fiancée of Sfc. Lester F. Druse, a citizen of the United States, shall be eligible for a visa as a nonimmigrant temporary visitor for a period of 3 months: *Provided*, That the administrative authorities find that the said Mrs. Christa Ernst is coming to the United States with a bona fide intention of being married to the said Sfc. Lester F. Druse and that she is found to be otherwise admissible under all of the provisions of the Immigration and Nationality Act other than section 212 (a) (9) and (12) of that act. In the event the marriage between the above-named persons does not occur within 3 months after the entry of the said Mrs. Christa Ernst, she shall be required to depart from the United States and upon failure to do so shall be deported in accordance with the provisions of sections 242 and 243 of the Immigration and Nationality Act. In the event that the marriage between the above-named persons shall occur within 3 months after the entry of the said Mrs. Christa Ernst, the Attorney General is authorized and directed to record the lawful admission for permanent residence of the said Mrs. Christa Ernst as of the date of the payment by her of the required visa fee.

SEC. 2. Notwithstanding the provision of section 212 (a) (4) of the Immigration and Nationality Act, Wai Ling Vivian Wong may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that act: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act.

SEC. 3. Notwithstanding the provisions of section 212 (a) (9) and (10) of the Immigration and Nationality Act, Angus Learie may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act.

SEC. 4. Notwithstanding the provisions of section 212 (a) (9) and (19) of the Immigration and Nationality Act, Andres Amadeo Macha may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act.

SEC. 5. Notwithstanding the provisions of section 212 (a) (6) of the Immigration and Nationality Act, Mrs. Gabriella Mayer may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such act, under such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare may deem necessary to impose: *Provided*, That, unless the beneficiary is entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250), a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act.

SEC. 6. Notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Verulo M. Herrera may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provision of that act.

SEC. 7. The exemptions provided for in this act shall apply only to grounds for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this act.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GRANTING PERMANENT RESIDENCE TO CERTAIN ALIENS

The Clerk called the concurrent resolution (H. Con. Res. 171) favoring the

granting of the status of permanent residence to certain aliens.

There being no objection, the Clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress favors the granting of the status of permanent residence in the case of each alien hereinafter named, in which case the Attorney General has determined that such alien is qualified under the provisions of section 4 of the Displaced Persons Act of 1948, as amended (62 Stat. 1011; 64 Stat. 219; 50 App. U. S. C. 1953):

The concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

JOHN J. FARRELLY

The Clerk called the bill (H. R. 5341) for the relief of John J. Farrelly.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to grant to John J. Farrelly, St. Louis, Mo., extensions for a period of 3 years, 7 months, and 9 days, beginning September 1, 1957, with respect to certain oil and gas leases heretofore granted by the United States and identified as Denver 053930, 053931, 053934, 057169, 057169-A, and as Colorado 01233 and 01246. No annual rental payment shall be required with respect to any extension granted under this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HOWARD S. GAY

The Clerk called the bill (H. R. 3281) for the relief of Howard S. Gay.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Howard S. Gay, Westfield, N. J., the sum of $984.30. The payment of such sum shall be in full settlement of all claims of Howard S. Gay against the United States for payment for accrued annual leave due him upon retirement from his employment with the Department of the Army: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. LEONARD O. ERICKSON

The Clerk called the bill (H. R. 4045) for the relief of Mrs. Leonard O. Erickson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Leonard O. Erickson shall be deemed to have elected under section 3 (b) of the Uniformed Services Contingency Option Act of 1953 to provide the annuity specified in paragraph (1) of section 4 (a) of such act to his wife. Notwithstanding his expressed intention to do so, the said Leonard O. Erickson was prevented by physical disability from exercising the right of election granted him by section 3 (b) of such act during his life.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GEORGE W. EDWARDS, JR.

The Clerk called the bill (H. R. 2964) to confer jurisdiction on the United States District Court for the Eastern District of Texas, Jefferson Division, to hear, determine, and render judgment on certain claims of George W. Edwards, Jr., against the United States.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That jurisdiction is hereby conferred notwithstanding the lapse of time, laches, statutes of limitations, or the amount in controversy, upon the United States District Court for the Eastern District of Texas, Jefferson Division, to hear, determine, and render judgment on the claims of George W. Edwards, Jr., of Marshall, Tex., against the United States—

(1) for title to three-fourths of the oil, gas, coal, and other mineral rights, of whatsoever nature, which a deed from the United States to Roy Snider and D. R. Snider, copartners under the trade name Snider Bros. Lumber Co., provided were reserved to the United States, upon, in, to, and under the two tracts of land described in section 3;

(2) for specific performance of any contract entered into between George W. Edwards, Jr., and the United States between January 1955 and June 1955, for the purchase by George W. Edwards, Jr., of such three-fourths of the oil, gas, coal, and other mineral rights, of whatsoever nature, upon, in, to, and under the two tracts of land described in section 3; and

(3) for an accounting of all moneys received and to be received by the United States under any lease or leases entered into with respect to the oil, gas, coal, and other mineral rights, of whatsoever nature, upon, in, to, and under the two tracts of land described in section 3, if the court finds that George W. Edwards, Jr., has title to such mineral rights, or decrees specific performance of any contract to sell such mineral rights to George W. Edwards, Jr.

SEC. 2. Suits on such claims shall be initiated, and appeals prosecuted, in the same manner as in the case of suits against the United States under section 1346 (b) of title 28 of the United States Code, and if so initiated the Secretary of Agriculture shall be a party to such suit, without service of process, and shall be subject to any orders or judgments rendered by such court.

SEC. 3. The two tracts of land referred to in the first section of this act were conveyed by the United States on November 13, 1944, to Roy Snider and D. R. Snider, co-partners under the trade name of Snider Bros. Lumber Co., by a deed recorded in volume 276, page 47, of the deed records of Harrison County, Tex. On December 5, 1944, Roy Snider and D. R. Snider, as Snider Bros. Lumber Co., conveyed such two tracts of land to Andrew J. Jackson, and his wife, Margaret A. Jackson, by a deed recorded in volume 276, page 95, of the deed records of

Harrison County, Tex. On September 16, 1949, Andrew J. Jackson, and his wife, Margaret A. Jackson, conveyed such two tracts of land to George W. Edwards, Jr., by a deed recorded in volume 342, page 634, of the deed records of Harrison County, Tex. Such two tracts of land are more specifically described as follows:

Tract 1: Unit No. 28. Situated in the Bailey Anderson survey, abstract No. 29, Harrison County, Tex., and being a part of a tract of 1,315.343 acres conveyed by the estate of Mrs. E. G. Robertson to the United States of America; beginning at an iron pipe in the east line of the Boards Ferry Road and being 204.9 feet north 78 degrees 59 minutes east and 30.9 feet south 25 degrees 01½ minutes east from the south corner of a tract of 26 acres conveyed by Dora Cook to the United States of America; thence with the east line of Boards Ferry Road south 78 degrees 59 minutes west 382.8 feet to an iron pipe; thence south 18 degrees 10 minutes east 4,045.7 feet to an iron pipe; thence north 54 degrees 29 minutes east 2,418.0 feet to an iron pipe; thence north 45 degrees 49½ minutes west 2,182.3 feet to an iron pipe; thence north 45 degrees 18 minutes west 1,591.4 feet to an iron pipe in the east line of Boards Ferry Road; thence with the east line of Boards Ferry Road south 50 degrees 58 minutes west 203.0 feet to the place of beginning, containing 128.783 acres of land, more or less.

Tract 2: Unit No. 29: Situated in the Bailey Anderson survey, abstract No. 29, Harrison County, Tex., and being a part of a tract of 1,315.343 acres conveyed by the estate of Mrs. E. G. Robertson to the United States of America; beginning at an iron pipe in the south line of Boards Ferry Road on the east bank of the Sabine River and being 31.5 feet south 25 degrees 29 minutes west from the south corner of a tract of 30.164 acres conveyed by Estella Davis to the United States of America; thence with the east bank of the Sabine River, as follows: south 25 degrees 29 minutes west 314.1 feet; south 0 degrees 09 minutes east 1,039.9 feet; south 15 degrees 06 minutes east 1,297.7 feet; south 15 degrees 30 minutes west 950.5 feet; south 85 degrees 20 minutes east 257.9 feet; south 25 degrees 47 minutes east 746.6 feet; south 16 degrees 41 minutes west 528.8 feet to an iron pipe; thence north 54 degrees 29 minutes east 1,900.0 feet to an iron pipe; thence north 18 degrees 10 minutes west 4,045.7 feet to an iron pipe in the south line of Boards Ferry Road; thence with the south line of Boards Ferry Road as follows: south 78 degrees 59 minutes west 420.0 feet; south 13 degrees 04 minutes west 208.8 feet; north 82 degrees 20 minutes west 209.1 feet to the place of beginning, containing 131.736 acres of land, more or less.

With the following committee amendment:

Strike all after the enacting clause and insert "That jurisdiction is hereby conferred notwithstanding the lapse of time, laches, statutes of limitations, or the amount in controversy upon the United States District Court for the Eastern District of Texas, Jefferson Division, to hear, determine, and render judgment on the alleged claims of George W. Edwards, Jr., of Marshall, Tex., against the United States relating to the title to three-fourths of the oil, gas, coal, and other mineral rights, of whatsoever nature, which a deed from the United States to Roy Snider and D. R. Snider, copartners under the trade name Snider Bros. Lumber Co., provided were reserved to the United States, upon, in, to, and under the two tracts of land described as follows:

"Tract 1: Unit No. 28. Situated in the Bailey Anderson survey, abstract No. 29, Harrison County, Tex., and being a part of a tract of 1,315.343 acres conveyed by the estate of Mrs. E. G. Robertson to the United States of America; beginning at an iron pipe in the east line of the Boards Ferry Road and being 204.9 feet north 78 degrees 59 minutes east and 30.9 feet south 25 degrees 01½ minutes east from the south corner of a tract of 26 acres conveyed by Dora Cook to the United States of America; thence with the east line of Boards Ferry Road south 78 degrees 59 minutes west 382.8 feet to an iron pipe; thence south 18 degrees 10 minutes east 4,045.7 feet to an iron pipe; thence north 54 degrees 29 minutes east 2,418.0 feet to an iron pipe; thence north 45 degrees 49½ minutes west 2,182.3 feet to an iron pipe; thence north 45 degrees 18 minutes west 1,591.4 feet to an iron pipe in the east line of Boards Ferry Road; thence with the east line of Boards Ferry Road south 50 degrees 58 minutes west 203.0 feet to the place of beginning, containing 128.783 acres of land, more or less.

"Tract 2: Unit No. 29: Situated in the Bailey Anderson survey, abstract No. 29, Harrison County, Tex., and being a part of a tract of 1,315.343 acres conveyed by the estate of Mrs. E. G. Robertson to the United States of America; beginning at an iron pipe in the south line of Boards Ferry Road on the east bank of the Sabine River and being 31.5 feet south 25 degrees 29 minutes west from the south corner of a tract of 30.164 acres conveyed by Estella Davis to the United States of America; thence with the east bank of the Sabine River, as follows: south 25 degrees 29 minutes west 314.1 feet; south 0 degrees 09 minutes east 1,039.9 feet; south 15 degrees 06 minutes east 1,297.7 feet; south 15 degrees 30 minutes west 950.5 feet; south 85 degrees 20 minutes east 257.9 feet; south 25 degrees 47 minutes east 746.6 feet; south 16 degrees 41 minutes west 528.8 feet to an iron pipe; thence north 54 degrees 29 minutes east 1,900.0 feet to an iron pipe; thence north 18 degrees 10 minutes west 4,045.7 feet to an iron pipe in the south line of Boards Ferry Road; thence with the south line of Boards Ferry Road as follows: south 78 degrees 59 minutes west 420.0 feet; south 13 degrees 04 minutes west 208.8 feet; north 82 degrees 20 minutes west 209.1 feet to the place of beginning, containing 131.736 acres of land, more or less.

"SEC. 2. Suits on such claims shall be initiated, and appeals prosecuted, in the same manner as in the case of suits against the United States under section 1346 (b) of title 28 of the United States Code, and the Secretary of Agriculture shall be made a party to such suit, and shall be subject to any orders or judgments rendered by such court."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CLARIFYING THE IMMIGRATION STATUS OF CERTAIN ALIENS

The Clerk called the bill (S. 247) for the relief of Max Mazak Terian and his wife, Maria Terian.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Max Mazak Terian and his wife, Maria Terian, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the appropriate quota for the first year that such quota is available.

With the following committee amendments:

Strike out all after the enacting clause and insert in lieu thereof the following: "That the provisions of the Immigration and Nationality Act relating to the deportation of aliens within the United States on the ground that they were excludable at the time of entry as (1) aliens who have sought to procure, or have procured visas or other documentation, or entry into the United States by fraud or misrepresentation or (2) as aliens who were not of the nationality specified in their visas, shall not apply to an alien otherwise admissible at the time of entry who (a) is the spouse, parent, or a child of a United States citizen or an alien lawfully admitted for permanent residence; or (b) was admitted to the United States between December 22, 1945, and November 1, 1954, both dates inclusive, and misrepresented his nationality, place of birth, identity, or residence in applying for a visa: *Provided*, That such alien described in clause (b) shall establish to the satisfaction of the Attorney General that the misrepresentation was predicated upon the alien's fear of persecution because of race, religion, or political opinion if repatriated to his former home or residence, and was not committed for the purpose of evading the quota restrictions of the immigration laws or an investigation of the alien at the place of his former home or residence or elsewhere. After the effective date of this act, any alien who is the spouse, parent, or child of a United States citizen or an alien lawfully admitted for permanent residence and who is excludable because (a) he seeks, has sought to procure, or has procured, a visa or other documentation, or entry into the United States, by fraud or misrepresentation, or (b) he admits the commission of perjury in connection therewith, shall hereafter be granted a visa and admitted to the United States, if otherwise admissible, if the Attorney General in his discretion has consented to the alien's applying or reapplying for a visa and for admission to the United States. The definitions contained in section 101 (a) and (b) of the Immigration and Nationality Act shall be applicable to this act."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to clarify the immigration status of certain aliens."

A motion to reconsider was laid on the table.

CONVEYANCE OF CERTAIN REAL PROPERTY TO THE PORT OF PALM BEACH DISTRICT

The Clerk called the bill (H. R. 4945) to provide for the conveyance of certain real property in West Palm Beach, Fla., to the Port of Palm Beach District.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of General Services is hereby authorized and directed to convey to the Port of Palm Beach District, West Palm Beach, Fla., without consideration therefor, all right, title, and interest of the United States in and to the real property described in section 2. Such real property was conveyed to the United States without cost to the United States by such district, and has since been declared surplus to the needs of the United States and advertised for sale under the Federal Property and Administrative Services Act of 1949.

SEC. 2. The real property referred to in the first section of this act is more particularly

described as follows: The east 250 feet of the west 550 feet of the north 150 feet of the south 400 feet of the north 764.94 feet of Government lot 3, section 33, township 42 south, range 43 east.

With the following committee amendment:

Page 1, line 4, after word "directed", add a comma, strike the remainder of the bill, and insert in lieu thereof the following: "subject to the provisions of section 2, to convey to the Board of Palm Beach District, West Palm Beach, Fla., without consideration therefor, all right, title, and interest of the United States in and to that certain real property comprising approximately eighty-six one-hundredths of an acre and known as the customhouse and immigration station site, Riviera Beach, West Palm Beach, Fla., together with certain easement rights acquired therewith. The description of the land herewith authorized and directed to be conveyed shall be determined by the Administrator of General Services.

"SEC. 2. The Administrator of General Services shall in the conveyance of the aforementioned property reserve to the United States any easements which he may deem necessary to protect the public interest."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TO PERMIT A RETIRED OFFICER OF THE NAVY TO BE EMPLOYED IN A COMMAND STATUS AT PORT LYAUTEY, MOROCCO

The Clerk called the bill (H. R. 7505) to permit a retired officer of the Navy to be employed in a command station at Port Lyautey, Morocco.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding any other provisions of law, the Secretary of the Navy is authorized to employ Capt. Christian Harold Duborg, United States Navy, upon retirement, in a command status at United States Naval Activities, Port Lyautey, Morocco.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CERTAIN SPOUSES AND MINOR CHILDREN OF CITIZENS OF THE UNITED STATES

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the joint resolution (H. J. Res. 133) for the relief of certain spouses and minor children of citizens of the United States, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Page 2, line 1, strike out all after "*Provided,*" down to and including "act" in line 4 and insert: "That, except in the cases of beneficiaries entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250), suitable and proper bonds or undertakings, approved by the Attorney General, be deposited as prescribed by section 213 of the Immigration and Nationality Act: *And provided further,* That the exemption granted herein shall apply only to grounds for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act."

Page 3, line 6, strike out "land."

Page 3, line 6, after "Wong" insert: "Salvatore Adornetto, Mrs. Anni A. Anthony, Mrs. Antonietta Polintan Averitt, Mrs. Concetta Battaglini Bosio, Angelo Capitella, Mrs. Julia W. Chang, Mrs. Yu Yuk Chun, Mrs. Fukuko Kanda Deppiesse, Mrs. Yoshiko S. Estapa, Mrs. Maria Lourdes Figueras, Mrs. Olga M. Finartijs, Mrs. Virginia Montilla Gallego, Mrs. Cheng Kam Hou, Mrs. Mafalda Marchini Iacopucci, Mrs. Hiroko Nakagawa Irish, Rev. Gottfried G. Krodel, Mrs. Agnes Moreland McCall, Mrs. Edith D. McKinnis, Mr. Milenko Mijatovich, Jung Chew Ming, Lau Chung Oi, Gaetano Patrasso, Mychajlo Pawliczko, Michele Povia, Mrs. Wah Lung Price, Vittorio Quartarone, Mrs. Liliane Thurau, Mrs. Enrichetta Troncone, Mrs. Lydia Atienza Venzon, Mrs. Mitsuyo Shinbo Watanabe, and Mrs. Siv I. M. Woods."

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. DAVIS of Georgia. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. CANNON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 75]

Albert	Engle	Metcalf
Allen, Calif.	Fallon	Miller, Calif.
Ayres	Farbstein	Miller, Md.
Baring	Fenton	Miller, N. Y.
Barrett	Fisher	Morano
Bates	Fogarty	Morgan
Beamer	Fulton	Morris
Boggs	Garmatz	Murray
Bolton	Gavin	Norblad
Bonner	Granahan	Osmers
Bowler	Green, Pa.	Passman
Boykin	Gubser	Patterson
Bray	Hagen	Polk
Brooks, La.	Hardy	Powell
Byrd	Harris	Preston
Byrne, Pa.	Healey	Prouty
Cannon	Hébert	Reece, Tenn.
Carrigg	Hess	Rivers
Celler	Hoeven	Roberts
Chelf	Holland	Santangelo
Chiperfield	Holtzman	St. George
Christopher	James	Saylor
Chudoff	Judd	Shelley
Clark	Kearney	Sheppard
Coad	Kearns	Sieminski
Cole	Kelley, Pa.	Siler
Corbett	Kilday	Simpson, Pa.
Cunningham, Iowa	Kitchin	Sullivan
	Landrum	Thomas
Curtin	Lennon	Thomson, Wyo.
Curtis, Mo.	Loser	Tuck
Dague	McCarthy	Vinson
Dawson, Ill.	McConnell	Wharton
Dellay	Magnuson	Wilson, Calif.
Dennison	Mailliard	Winstead
Diggs	Mason	Wolverton
Doyle	May	Zelenko
Eberharter	Merrow	

The SPEAKER. On this rollcall 316 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1958

Mr. MAHON, from the Committee on Appropriations, reported the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year 1958, and for other purposes, which was read a first and second time and, with the accompanying papers, referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

Mr. WIGGLESWORTH reserved all points of order on the bill.

LEGISLATIVE BRANCH APPROPRIATION BILL, 1958

Mr. NORRELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7599) making appropriations for the legislative branch for the fiscal year ending June 30, 1958, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to 1½ hours, the time to be equally divided and controlled by the gentleman from Washington [Mr. HORAN] and myself.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Arkansas.

The motion was agreed to.

Accordingly the House resolved itself into the Committee on the Whole House on the State of the Union for the consideration of the bill, H. R. 7599, with Mr. WALTER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. NORRELL. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, before proceeding to the bill under consideration by the Committee today, I would like to take this opportunity to extend my sincere thanks to the members of my committee, especially the gentleman from Washington [Mr. HORAN], the gentleman from Ohio [Mr. BOW], the gentleman from Ohio [Mr. KIRWAN], and the gentleman from New York [Mr. ROONEY]; also I would like to extend my thanks and appreciation to our clerk, Mr. Paul Wilson, the very able clerk of our committee.

Mr. Chairman, the legislative branch appropriation bill as reported by the committee carries a total of $78,470,285 for 1958. Following the custom of some years standing, the bill omits appropriations for the Senate including certain items under the expenditure supervision of the Architect of the Capitol which relate solely to the Senate. Such items will be added when the bill reaches the Senate. The bill is $2,208,343 below the budget estimates of $80,678,728. It is also below corresponding appropriations for 1957 by $11,664,198. The bill

includes $37,927,705 for the House of Representatives; $2,611,180 for such joint activities as the police force, Office of the Legislative Counsel, education of pages, and the like; $12,833,400 for items under the Architect of the Capitol excluding, as I indicated a moment ago, items relating solely to the Senate; $275,500 for the Botanic Garden; $11,647,500 for the Library; and $13,175,000 for congressional printing and binding and for the office of the Superintendent of Documents.

The committee has tried to write a good bill. I believe we have done about as good as we could under all the circumstances. As you know, the legislative appropriation bill is not a large bill and it is therefcre impossible to make large reductions. The committee has reduced the budget estimates by about 2.7 percent. In dollars, that is $2,208,343. While the bill is materially less in total than appropriations for the current year, there are some increases above 1957. The net reduction of $11,664,198 below corresponding appropriations for 1957 of $90,134,483 as of this time can be explained in abbreviated fashion in this way:

First. There are decreases aggregating $16,346,000 brought about by reason of the fact that in fiscal year 1958, appropriation requirements for some of the major building projects now underway are materially less than 1957. Specifically, I refer to the extension of the east front of the Capitol, to the new House Office Building project, the Capitol Power Plant improvement program, and 1 or 2 small items.

Second. We have allowed increases totaling approximately $2,927,000 to maintain services at the present level, and this sum is to cover the new financial arrangement for retirement contributions, within-grade salary advancements under the classification law, the 1 day's pay in excess of the 52-week base, wage board and pay raises, and things of that kind. They are practically all mandatory one way or another and have to be provided if we are to maintain the services just at the present level.

Third. To keep our legislative establishment in reasonably good state of physical repair we include in the bill every year various maintenance, repair, and minor equipment items, mostly in appropriations for the Architect. Then the next year we drop those out and others come along. We ought to make reasonable provision for them and the result of this in the current bill is a net increase of about $36,000.

Fourth. Then there is another group of increased operating costs this year which account for $1,454,000 additional. Principally involved here are increased printing and binding costs for the Congress and appropriations to begin work on new editions of the United States and District of Columbia Codes of laws.

Fifth. There is a final group which is for new positions, additional personnel, where the committee felt it was justified in allowing a few additional people to keep up with the work. The amount involved is approximately $264,000 and practically all of it is in the Library of Congress. I will touch on that a little later.

When you add all of these up, Mr. Chairman, the result is a net decrease of $11,664,198 below appropriations for 1957.

Mr. Chairman, the details of the bill are set out rather fully in the committee report and the hearings so I shall not dwell at length on them. I would, however, like to comment just briefly on a few features of the bill.

HOUSE OF REPRESENTATIVES

We provide a total of $37,927,705 for all items under the House of Representatives. This is $752,680 less than the budget estimates but it is $1,966,965 above current appropriations, practically all of which is for the retirement-fund contribution item.

We had a request for an additional sum for the recording studio which is operated for the benefit of Members of the House. We were asked to provide four additional positions. The business is increasing but we did not feel justified in granting all four additional positions. We did, however, think we were justified in allowing two more positions to work in connection with a second television studio being established for use of the Members.

I am certain the House will be interested to know that we have held rather rigidly to the current level insofar as employment of personnel is concerned. I believe we have specifically authorized only two additional positions under the House of Representatives. As we point out in the report, Members, on their clerk-hire roll, do not come anywhere near hiring all the employees permitted by statute. Also, we noted that House committee staffs are just about at last year's level; in fact, I believe they are a few below what they were a year ago.

Another item I might mention is that under the stationery room a surplus which is not needed for operational purposes has accumulated over the past several years and we are recommending application of this surplus to new appropriation requirements and have reduced the bill on that account by an additional $80,000. We felt there was no compelling reason why we should not make use of this accumulation rather than appropriating new money.

VARIOUS JOINT OFFICES AND ITEMS

For the various joint offices and items a total of $2,611,180 is recommended. This compares with appropriations in 1957 of $2,578,135. We allowed 3 additional positions in the Office of the Legislative Counsel of the House. The testimony is that the volume of work has been increasing somewhat and this is to enable the office to keep up with it.

ARCHITECT OF THE CAPITOL

For all items coming under jurisdiction of the Architect of the Capitol for which we make appropriations in this bill, a total of $12,833,400 is recommended, a reduction of $741,300 below the estimates and, because of reduced requirements on certain of the major construction projects here on Capitol Hill, the total is also $15,680,600 below 1957 appropriations.

I might say that no funds were requested, or included in the bill, for the extension of the east front of the Capitol. Preliminary plans and estimates for this work are still in the course of development and, the committee was advised, when completed they will be presented to the Commission on the Extension of the Capitol for consideration.

We have provided the request of $7,500,000 for the additional House Office Building project. I know there is some interest on the part of some Members in this particular project, for which we have heretofore appropriated $15 million. There are a number of features and aspects to this particular project and I do not think it necessary to describe all of these in detail at this time. I would call the attention of interested Members to pages 44 and 45, and more particularly to pages 83 through 96 of the printed hearings, where there is set forth in quite some detail the present status of the project.

Under all of the items under the Architect, we have provided for only 9 additional employees. Five of those are elevator operators for 2 new elevators installed in the Senate wing of the Capitol Building. The other 4 are lower grade maintenance personnel in the 2 House Office Buildings. They are all explained in the hearings.

Aside from these items, we have provided for a number of maintenance and repair projects which come along just about every year, and will probably continue to do so if we are to keep our physical plant here on Capitol Hill in reasonably good condition.

BOTANIC GARDEN

Aside from the usual appropriation for ordinary operating expenses of the Botanic Garden, we had one other item of $587,000 requested to tear down the old delapidated greenhouses at the Garden and to provide for their replacement and relocation at the Poplar Point Nursery. We thought that item ought to be studied further and we have therefore left it out of the bill. It was the consensus of the committee that the possibility of locating these greenhouses and integrating them with the National Arboretum here in the District of Columbia, which is under the jurisdiction of the Department of Agriculture, ought to be fully explored. That possibility has not been studied and we suggest that it should be.

LIBRARY OF CONGRESS

For the Library of Congress, which as you know includes the Legislative Reference Service and the Copyright Office, we recommend a total of $11,647,500, which is $119,263 below the estimates, but it is $1,009,892 above 1957. About $700,000 of that increase is for the mandatory items such as the retirement contribution, within-grade promotions, and the like. We have allowed some additional employees for the Library. They asked for 66 additional. We have not gone quite that far, but they will be able to employ some additional personnel.

The Library of Congress is generally conceded to be the largest library in the

world. It is the richest in resources. It is an important part of the legislative establishment. It is of great value to the proper functioning of the Congress. Mr. Chairman, you may be interested to know that it has substantial and direct national defense value. Its vast collections are invaluable to the Military Establishment. This year, for example, and I think this has been going on for some years, the Department of Defense has allocated over $3 million to the Library for special studies and analyses using materials and skills found in the Library. For some years the collections of the Library have been increasing, but the basic personnel has remained almost static. They have had a chronic backlog situation over there—books, manuscripts, and other things of that sort piled up, not properly assorted, indexed, cataloged and put on the shelves promptly so that they will be available for use. We granted them some additional clerical personnel to improve that situation. We think it is justified under the circumstances. They are not large increases. On the contrary, they are rather modest but, as I said, the committee felt that we ought to try to do something about the situation.

We have allowed a handful of additional employees for the Legislative Reference Service. As most Members know, this is the Service which handles thousands upon thousands of inquiries for Members of Congress each year. It also works with many of the committees. The figures show that the volume of work is increasing slowly but steadily.

As the report shows, we have scaled down a number of the requests of the Library. We did not feel we could go quite as far as they proposed in each case.

There is another program administered by the Library having to do with braille and talking books for the blind. It is a very worthy program, and we approved the full request. This year, for the first time, the full amount authorized by the basic law is carried in the bill. This will permit some additional service to those unfortunate people which the program is designed to reach.

GOVERNMENT PRINTING OFFICE

Mr. Chairman, the remaining section of the bill has to do with congressional printing and binding and with the Office of the Superintendent of Documents. We have allowed the request for printing and binding. As to the Office of the Superintendent of Documents, which is a service organization, we have granted all but a very small portion of the estimates. He did not ask for any additional employees.

Mr. Chairman, I have tried to touch upon the principal highlights of the bill before you. As I indicated, we have tried to make reasonable provision for the operations of the legislative establishment. We have also tried to save a dollar here and there whenever we thought we could. I hope the House will find the bill to its satisfaction.

Mr. HORAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I should like to pay my respects to the chairman of this subcommittee. I think the gentleman from Arkansas [Mr. NORRELL], conducted complete hearings. I think the hearings make interesting reading and will answer questions that Members may have regarding the House of Representatives, the Office of the Architect of the Capitol, or the Library of Congress.

I do wish to point out that in the last 10 years the Library's collection has increased 67 percent while their personnel to take care of these collections has increased less than 5 percent. We felt that it was time that we helped the Library to catalog and properly display the materials they had in these collections.

The budget before the Committee, much of it, is mandatory. A good share of that is represented by the retirement fund which we have to appropriate for now. That is around $2,500,000.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. HORAN. I yield.

Mr. REES of Kansas. Is there anything in the appropriation bill that provides for the appropriation of funds for the extension of the front of the Capitol, about which we have heard so much?

Mr. HORAN. There are no funds here, but to be frank with the Committee I must say that we have had some studies made and we have obligated certain funds for architectural studies. Those are granted, however, on the usual fee basis that the Institute of Architects calls for. They are being obligated and paid for as those studies go ahead. But there is nothing in the present bill for the extension of the Capitol.

Mr. REES of Kansas. As the gentleman has said, the hearings are quite informative. Do I correctly understand that you are going to spend something over $1 million this year for the Congressional Hotel Building?

Mr. HORAN. It is stated in the report that $1,500,000 has been deposited in the courts to take care of the condemnation proceedings which are now in the courts.

Mr. REES of Kansas. It occurs to me that we might withhold some of these expenditures that are not absolutely necessary. I notice in the hearings you are going to spend about $9 million to revamp the New House Office Building. Is that correct?

Mr. HORAN. There are no funds in here for that purpose.

Mr. REES of Kansas. That is part of your program?

Mr. HORAN. That has already been authorized in previous years.

Mr. REES of Kansas. What funds are appropriated in this year for the office buildings?

Mr. HORAN. $7,500,000. That is for the acquisition of property.

Mr. REES of Kansas. About how much money is planned to be spent on the entire project?

Mr. HORAN. About $100 million.

Mr. REES of Kansas. Does not the gentleman really feel that in order to make a little saving we should withhold the expenditure of those funds now at least and postpone to a time when our country is more able to spend the money?

Mr. HORAN. Frankly, the program is underway. The gentleman's position would have come with a little more grace 3 years ago.

Mr. REES of Kansas. I agree with the gentleman, in respect to authorization, but even at this date, with the terrific amount of expenditure we have before us, it seems to me we can withhold it even now and save about $7,500,000. We can consider it at a later date. What does the gentleman think about that?

Mr. HORAN. I do not agree with the gentleman.

Mr. REES of Kansas. We might better have a so-called sunken garden out here than spend $7,500,000.

Mr. HORAN. The gentleman is entitled to his opinion and I am entitled to mine. I have no further answer for the gentleman.

Mr. REES of Kansas. It seems to me it is extravagance to be doing the thing right now. Surely we could put this expenditure off to a later date. I do not see the great need for it at the present time.

Mr. HORAN. We have the commitment made.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HORAN. I yield to the gentleman from Iowa.

Mr. GROSS. Do I correctly understand that the remodeling of the two existing House Office Buildings will go forward?

Mr. HORAN. The Commission has that in abeyance at the present time.

Mr. GROSS. What does the gentleman mean when he says "has that in abeyance"?

Mr. HORAN. There is nothing in the bill for the remodeling of the Old or the New House Office Building.

Mr. GROSS. There is no money in this bill?

Mr. HORAN. There is no money in here for it.

Mr. GROSS. There is an authorization, but there is no money appropriated for it?

Mr. HORAN. There is no money in here for it. The gentleman from New Jersey [Mr. AUCHINCLOSS] is here. Perhaps he would like to give an explanation of this matter.

Mr. AUCHINCLOSS. I am a member of the Commission. At a recent meeting of the Commission the renovation of the Old and the New House Office Buildings was indefinitely postponed. It was estimated it would cost about $18 million to do that work, but it is not in the program right now, and it is not in this appropriation bill.

Mr. GROSS. May I ask a question of the gentleman from New Jersey?

Mr. HORAN. Surely.

Mr. GROSS. Then why proceed with the purchase of the Congressional Hotel?

Mr. AUCHINCLOSS. That came in with the condemnation proceedings to acquire the land. I would say to the gentleman that there are about 40,000 square feet of space occupied in the Old House Office Building by liaison officers, legislative counsel and such which would be moved to the Congressional Hotel. That would give us room and give us additional room for the use of our own Members as well as for the use of the committees that are very crowded for space now.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield for a question?

Mr. HORAN. Surely.

Mr. DAVIS of Georgia. In discussing the remodeling of the Capitol Building with the gentleman from Kansas the gentleman from Washington said that there was no appropriation in this bill for that purpose.

Mr. HORAN. That is correct.

Mr. DAVIS of Georgia. There has been an appropriation in the past for that purpose; has there not?

Mr. HORAN. To enable them to employ architects and to make plans.

Mr. DAVIS of Georgia. What was the amount of that appropriation?

Mr. HORAN. I am informed that it is $17 million. It has not all been obligated, however. That is in the report.

Mr. ROONEY. Mr. Chairman, if the distinguished gentleman from Washington will yield, may I suggest that the amount of $17 million has been appropriated in 1956 and 1957 fiscal years.

Mr. HORAN. Seventeen million dollars.

Mr. DAVIS of Georgia. Could the gentleman state the amount of that which has been obligated and also what amount has been spent?

Mr. HORAN. We have some figures here. They have expended $2,138,401.

Mr. DAVIS of Georgia. And the balance is unobligated?

Mr. HORAN. That is right.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman further yield?

Mr. HORAN. I yield.

Mr. ROONEY. May I suggest in connection with the question of the gentleman from Georgia [Mr. DAVIS] that the amount of $2,138,401 is the total of obligations incurred in connection with this improvement and the actual expenditures up to March 1 of 1957 amounted to $189,388. The difference of $1,949,013 has, of course, been fully obligated.

Mr. Chairman, will the distinguished gentleman yield?

Mr. HORAN. I yield.

Mr. ROONEY. I believe the record with regard to the last question asked by the gentleman from California [Mr. BALDWIN] as to the legislative history of the additional House Office Building project would show that formal hearings were held in the 80th Congress by the House Committee on Public Works on the 13th of May, 1947. The bill was reported favorably in the House on May 28 of that year. It was amended to include the renewal of the plumbing in the Old House Office Building, within the scope of the plans.

This bill was passed by the House on June 16, 1947, and by the other body on June 26, 1947, and approved as Public Law 176 of the 80th Congress on July 11, 1947. In July 1947, the former Architect of the Capitol, David Lynn, submitted to the Congress a request for a supplemental appropriation amounting to $25,000 to carry out the provisions of this legislation. The item was not approved by the House Committee on Appropriations and the funds were accordingly denied at that time. Subsequently, at the direction of the House Office Building Commission, the present Architect of the Capitol, in February 1955, submitted to the Congress a request for a supplemental apppropriation in the amount of $25,000 to carry out the provisions of the public law to which I have just referred. Hearings on this request were held by the Legislative Subcommittee of the House Committee on Appropriations on March 4, 1955, and the item was approved and included in the Second Supplemental Appropriation Act, 1955, H. R. 4903, 84th Congress, as reported to the House on March 15, 1955.

While H. R. 4903, the bill reported to the House on March 15, 1955, was under consideration on the floor of the House, an amendment was offered to the bill by the gentleman from Texas, the distinguished Speaker of the House, Hon. SAM RAYBURN, as chairman of the House Office Building Commission, striking out the item of $25,000 for preliminary plans and estimates, and inserting in lieu thereof authorization for the acquisition of a site, planning and construction of an additional office building and other facilities and improvements for the House of Representatives. The amendment was endorsed by Congressman DONDERO, of Michigan, then ranking minority member of the House Committee on Public Works, and was adopted by the House and included in the bill as passed by the House, March 18, 1955.

That is some of the history of this important and much-needed program which started in 1947.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. HORAN. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. I am sure the subcommittee does not have precise jurisdiction of what I comment about. It probably actually rests in the Commission to which the gentleman from New Jersey [Mr. AUCHINCLOSS] referred. But it is my impression from talking with my colleagues over several months, that this summer there will be widespread renovations of the old and the present new House Office Buildings. Members are going to be dispossessed and moved around, and nobody is clear as to what the mechanics of the proposition will be. The gentleman from New Jersey [Mr. AUCHINCLOSS] told us that is being held in abeyance, but many of my colleagues have indicated to me that if there is going to be a new third House Office Building, then why in the world do we not wait until the new third office building is finished and ready for occupancy. Then, when it is, why cannot all these renovations, whatever they are, and if they take place in the old and present new House Office Building, then take place, instead of tearing up everybody for the next 3 years. It seems to me from what I have heard that this is the brain child of some character described as "The Architect of the Capitol." He wants something to do, so he is going to get everybody busy for the next 3 years and have us running up and down these halls. Nobody is clear—at least I am not, as usual—as to what is going to take place around here. If the gentleman will yield further to the gentleman from New Jersey [Mr. AUCHINCLOSS], if he will permit himself to be interrogated, can he tell us something about that?

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield?

Mr. FLOOD. I have asked the gentleman to yield to the gentleman from New Jersey.

Mr. HORAN. I yield to the gentleman from New Jersey for reply to the gentleman from Pennsylvania.

Mr. AUCHINCLOSS. I am very much interested in what the distinguished gentleman has had to say. I am sure the Architect of the Capitol is anxious to keep busy, if possible. As far as I know, the Commission has no definite plans at all above renovating the old or the new House Office Buildings at this time. The acquisition of the Congressional Hotel was carried out under the acquisition of the land which was contiguous to the Capitol Grounds. Many of my colleagues have asked me if they were going to be dispossessed, and I have told them that there will be no action taken for a year at least, as far as the Congressional Hotel is concerned, but I am only a minority member of the Commission.

Mr. FLOOD. But a very distinguished one.

Will the gentleman yield further?

Mr. HORAN. Mr. Chairman, I think I had better yield the floor, because my colleague the gentleman from New York [Mr. ROONEY] is a member of this subcommittee, and he has not yet had an opportunity to address the House. I yield the floor, Mr. Chairman.

The CHAIRMAN. The gentleman from Washington [Mr. HORAN] has consumed 17 minutes.

Mr. NORRELL. Mr. Chairman, I yield 12 minutes to the gentleman from New York [Mr. ROONEY].

Mr. ROONEY. Mr. Chairman, I have obtained this time in order to answer, if I can, any questions that may be in the minds of Members of the House concerning the details of the pending appropriation bill.

First, if I may refer to the colloquy that just took place between my friend, the distinguished gentleman from Pennsylvania [Mr. FLOOD], the distinguished gentleman from New Jersey [Mr. AUCHINCLOSS], and the distinguished gentleman from Washington [Mr. HORAN], I shall say that I am quite surprised that my distinguished friend from Pennsylvania would make the statement he did about the Architect of the Capitol. In my humble opinion the present Architect of the Capitol is one of the finest gentlemen I have ever met, one of the most industrious men I have ever known; and he is a former Member of this body from the other side of the aisle.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. Not just now.

Mr. FLOOD. The gentleman mentioned my name; certainly he should yield to me.

Mr. ROONEY. I shall be glad to yield to the distinguished gentleman later.

Mr. FLOOD. I am sure you will.

Mr. ROONEY. Mr. Chairman, I want to explain, if I may, in a little more de-

tail the situation with regard to when the alteration of the New and Old House Office Buildings might take place.

For every 3 Members who are moved out of the Old and New House Office Buildings only 2 can be moved back, as each 2-room suite is to be converted into a 3-room suite.

There appear to be three ways in which this matter may be solved. One way would be to delay the remodeling work until the new building is completed and occupied. This plan has great disadvantages from a time element and from a cost element.

Another way would be to utilize the Congressional Hotel and such additional structures as may be available for temporary housing of Members and to carry on the remodeling work in stages, perhaps 1 or 2 wings at a time, during the next 3 or 4 years.

The third way would be to erect a temporary structure or structures and to move Members into these structures and the Congressional Hotel in such numbers as to permit the remodeling work in the two House Office Buildings to be carried forward during the next 2 years.

As the gentleman from New Jersey, my distinguished friend [Mr. AUCHINCLOSS], has said, the Commission, which is composed of the Speaker of the House, the gentleman from Georgia [Mr. VINSON], and the gentleman from New Jersey [Mr. AUCHINCLOSS], has not yet resolved this question. I do not think this is the time or the place for us to resolve such a matter. This is the prerogative of the Commission. I feel that it is in the competent hands of these three highly distinguished gentlemen and I think that is the way we should leave it.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I shall now gladly yield to my distinguished friend from Pennsylvania.

Mr. FLOOD. I was sure the gentleman from New York would. This, of course, is the place, I would like to observe, to obtain information from this subcommittee or from any other of the Members who can give it to us. I know the complaints the Architect of the Capitol is faced with just as well as the gentleman from New York. Praise of his efforts is certainly merited and I join in that; but that has nothing to do with the case—tra-la. I would like to know who knows what the facts are.

The distinguished gentleman from New Jersey has given us a considerable amount of information that has been embellished by the gentleman from New York. That is precisely why I asked the gentleman to yield. I am momentarily encouraged about this situation for the first time.

I would urge upon the Commission and upon the Architect that no action be taken to renovate the existing office buildings until the new office building is completed and ready for occupancy. I merely make that as a suggestion.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield to me?

Mr. FLOOD. The gentleman has the floor.

Mr. ROONEY. May I suggest that he not spend too much time discussing this with the Architect of the Capitol?

Mr. FLOOD. You can be sure of that.

Mr. ROONEY. For the reason that the Architect of the Capitol is under the direction of the three members of the Commission; so I would respectfully suggest that he take this up with the three Members of the House who compose the House Office Building Commission.

Mr. FLOOD. I would like to say to the gentleman that that has been done in seriatum and in person over a series of months by half the Members of the House.

Mr. BALDWIN. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from California.

Mr. BALDWIN. As far as the east front of the Capitol is concerned, although there are no funds in this bill for that project, is it the feeling of the committee that there is any likelihood of actual construction in connection with this remodeling of the east front before we have an appropriation bill, say a year from now?

Mr. ROONEY. To be fair to the distinguished gentleman and the House, I am not in a position to make a statement one way or the other in that regard. I think that at such time as there may be brought to the floor of this House an appropriation bill containing some funds for this east Capitol-front project, no matter how small, that would be a good question. But, as matters stand, there is not a nickel in the pending appropriation bill for extension of the east front of the Capitol.

Mr. BALDWIN. I appreciate that, but there have been some funds appropriated in previous years. That means in theory at least that the Architect could start out on this project at any time.

Mr. ROONEY. As a matter of fact, exactly $17 million has already been appropriated by the Congress for extension of the east front.

Mr. SMITH of Virginia. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Virginia.

Mr. SMITH of Virginia. In response to the question the gentleman just asked as to whether or not we will have another appropriation bill for taking out the front of the Capitol, turning it around and putting it back again, I am informed that there is now in the budget an unexpended balance for that purpose of approximately $40 million. I know that situation exists. It seems to me there ought to be some way of getting at this thing and letting the House decide two questions: One is whether we want to expend all of this money in taking the front of the Capitol out and putting it back again, and the other question is an alternative that the gentleman from New York did not mention about the New House Office Building, that it would be economy to fill up the hole you have out there, cancel the appropriation and call it a day.

Mr. ROONEY. I may say to the gentleman from Virginia that that would be a very, very expensive hole filling. There has already been expended or obligated as of April 25, 1957, over $14,900,000. To abandon this project at this time, it seems to me, would be penny wise and pound foolish.

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Minnesota.

Mr. WIER. I want to pick up where this has been broken off. I have lived at the Congressional Hotel about 8 years now. I heard the gentleman from New York make mention a few minutes ago that this whole project, the Capitol improvement over here, the acquisition of land and the appropriation of money, is in good hands. The action took place originally as a rider on an appropriation bill. We came back here this year and we learned for the first time of the acquisition of these four blocks of property surrounding the Capitol Grounds. We learned that steps are being taken to acquire the Congressional Hotel. I just cannot justify an expenditure for a hotel that cost $10 million less than 10 years ago. It is the only place on the Hill where a number of us can find a convenient place to live. The gentleman justifies that by saying we are going to give all three rooms. I have been here 8 years and I have had plenty of room in my 2 offices. May I suggest that if you are going to give all of us three rooms, would the committee provide me with a sleeping room in that third room where your receptionist is supposed to sit in her lonesomeness?

Mr. ROONEY. May I say that if I lived in 1 place for 8 years I would certainly form an attachment for it. I think the acquisition of the Congressional Hotel immediately adjacent to the legislative properties up here on this side of the Capitol was an economical one. Only a million and a half dollars for the building exclusive of furnishings, was deposited in court. That is an amount less than the purchase price at the time the Congressional Hotel last changed hands. I hope we will all have spine enough to support this bill. The same thing is happening here today that happened over the years when we had legislation to increase our salaries.

Those who arose here on the floor and loudly objected to the increases in salaries were always the first in line at the Sergeant at Arms' window to collect their increased checks.

Mr. HORAN. Mr. Chairman, I yield 5 minutes to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION of Kentucky. Mr. Chairman, during the last several months all of us have written thousands of letters and made dozens of speeches complimenting ourselves on our efforts to economize. Of 9 appropriation bills considered by the House thus far we have cut 7.4 percent from the budget estimates. I also understand the committee is recommending a reduction in the defense bill of 5 percent. Now, today, when we get to talking about our own appropriation, we are doing real good. We are going to cut 2.7 percent.

Now, let me say this: Next year we are going to have to justify all of the budget

cuts, but the most difficult justification we are going to have to make is when we cut defense 5 percent and our own, 2 percent.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. ROBSION of Kentucky. I yield to the gentleman from Texas.

Mr. DIES. I understand there has not been a 2.5 percent cut. What they are doing is comparing it with the bill last year, which had some nonrecurring items, and that there is absolutely no bona fide cut.

Mr. ROBSION of Kentucky. I notice that the two large items in the reductions proposed by the committee are that we will not remove the botanical gardens at this time; secondly, that certain money will not be spent on the Capitol Power Plant. Those are the two big items.

Now, may I say that during every term of Congress there comes at least one vote where the men are separated from the boys in this House. In my opinion, there is no better day for the test than today. Let us find out who really wants to economize in this Congress. That can best be determined by our actions with respect to ourselves, and we have that opportunity today. We have heard the old saying that charity begins at home, and we have practiced a lot of that in this Congress—we have been very charitable in our own appropriations over the years. But, let us bring out a new phrase today. Let us say that economy as well as charity should begin at home.

I am not a member of the subcommittee and I am not familiar with the technical details of this appropriation bill, but there are $80 million involved, and I hope that someone on the Appropriations Subcommittee will present amendments today for us to support to bring about real economy in this bill.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. ROBSION of Kentucky. I yield to the gentleman from New York.

Mr. ROONEY. I should like to correct a statement just made with regard to some nonrecurring items and the committee having taken advantage of this. Yes, there were some nonrecurring items, and if we consider them the bill is reduced by $11,664,198. But, the fair comparative amount and the budget request for this legislative appropriation bill was $80,678,000, and that was reduced by $2,208,000. You cannot reduce it any more, because this is not the kind of a budget they have downtown in the departments. This is a solid, firm, honest, unwatered budget.

Mr. ROBSION of Kentucky. We have heard that before.

Mr. ROONEY. You have heard it from me before. And, do you know how many new and additional employees there are in it for the House of Representatives as such? Five; 5 additional employees, 2 technical employees for the recording studios and 3 in the office of the legislative counsel.

Mr. DIES. Mr. Chairman, if the gentleman will yield further, what does the gentleman think about the suggestion that we recommit this bill with instructions for the committee to pare it down at least 10 percent?

Mr. ROBSION of Kentucky. I think that is an excellent idea.

Mr. HORAN. Mr. Chairman, I yield 5 minutes to the gentleman from Washington [Mr. MACK].

Mr. MACK of Washington. Mr. Chairman, as a member of the House Committee on Public Works, and as a Member of Congress, I think most Members would like to know how a resolution calling for an expenditure of $25,000 for a survey as to the need of a new office building and the remodeling of the old buildings has grown suddenly into a proposal to spend $100 million to provide additional office space for the Members of the House of Representatives.

The House of Representatives consists of 435 Members, 2 Delegates, and 1 Resident Commissioner; 438 in all. The Architect of the Capitol in his testimony on page 93 in the Committee on Appropriations hearings said he contemplates spending $100 million at present cost for the construction of these office facilities. That means it is proposed we spend $230,000 per Member of this House to provide additional office space for the Members of the House of Representatives.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. MACK of Washington. I yield to the gentleman.

Mr. DIES. Does the gentleman honestly believe that any Member of Congress needs 3 offices?

Mr. MACK of Washington. This new office project will provide one additional office room, I understand, for each Member of the House of Representatives. The cost will be $230,000 a room. In other words, each Congressman will get one additional room at a cost of $230,000 to the taxpayers or $100 million for the 438 Members.

In my part of the country, towns of 10,000 or 25,000 population can build an entire city hall, to house a fire department, a police department, a city treasurer, a city clerk, the mayor and the city council for $230,000, which is what it is proposed to spend for additional office space for each Congressman.

This office-building project is extravagance at its worst. How can any Member of the House criticize the administration if the House spends so much money unnecessarily?

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. MACK of Washington. I yield to the gentleman from Minnesota.

Mr. WIER. In addition to the finances the gentleman mentioned growing like a mushroom from $25,000 to $100 million, I, likewise, find no authorization for any 3 Members of this House to take steps for the acquisition of 4 blocks of property here. The House has never had anything to say or to do about that.

Mr. MACK of Washington. This office building extravagance grew out of a small authorization resolution to spend $25,000 to study the feasibility of the construction of a new office building. I am not sure whether the $100 million estimate for the buildings even includes furnishings. These may be extra. I am almost certain that this building project will cost considerably more than $100 million eventually. The other body is constructing a new office building and today before our committee there was a bill to increase the authorization for that building by $2½ million to complete it. The House may have the same experience if it undertakes to spend the $100 million on these new offices for the Members of the House of Representatives.

Mr. HORAN. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas [Mr. GEORGE].

Mr. GEORGE. Mr. Chairman, as a member of the Subcommittee on Public Buildings and Grounds since the 81st Congress, I have checked the record carefully and found that in the 80th Congress there was a $25,000 authorization for a study of this problem.

Neither the Subcommittee on Public Buildings and Grounds nor the Committee on Public Works has ever approved any of these proposed projects. We have never been asked to take any official action or to hold hearings on this project. Actually what happened is that in 1955 an appropriation was put in by the Committee on Appropriations, which bypassed the lack of authorization by the Committee on Public Works of the House. There were hearings held with reference to the Senate Building, on the Senate side. But we violated the regular orderly legislative procedure in the House of Representatives. That is the reason we are having this hassle today and that is the reason we are in trouble. The Committee on Appropriations took over the prerogatives of authorizing legislation in the House of Representatives.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. GEORGE. I yield to the gentleman.

Mr. ROONEY. I respectfully say that the gentleman is incorrect. There were formal hearings before the House Committee on Public Works in the 80th Congress, the bill passed the House and became Public Law 176 of that Congress. That was not an appropriation bill.

Mr. GEORGE. That was for the study. Then it came through on a supplemental bill, without hearings by our committee to determine the need which would justify what is being here proposed.

Mr. HORAN. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. BOW], a member of the committee.

Mr. BOW. Mr. Chairman, in my service in this House and my service on the Committee on Appropriations, I am sure I have never been accused of being a spender and many times I have been accused of being too strong for economy.

I am a little surprised at this debate today. We have carefully considered this budget. I felt that the committee had done an excellent job in its work on the budget. It came out with a unanimous agreement on this legislative budget. There were some items that we could have cut, perhaps, but items which had to do with service to Members, which do not stand out in the open here where people can stand up and complain about them.

I can say to you that some of those who are complaining now about the size of this budget have some of the responsibility for the large size of the legislative budget through the Folding Room and other ways. We have some people who have gone as high as 1,150,000 mailings through the Folding Room. There are many over 500,000. Figure that on the basis of what you would be paying at a 3-cent mailing charge, and the great economists here have run up a charge of about $34,500.

In other items we are going to have to break this down. I believe the Folding Room is a good operation when properly used to help Members advise their people, but it seems to me that here today in this debate we have seen the efforts of some to find places where they might make a record, while underneath all of this are these lists of those who have caused great expenditures in the distribution of these items. I shall not introduce this list in the RECORD at this time.

Mr. HOFFMAN. If the gentleman will yield, why not put it in as long as the gentleman has made the charge?

Mr. BOW. It seems to me that what we should do is take care of the Congress in a proper way. We have attempted in this bill to do just that.

There has been a suggestion that a 10-percent reduction be made. It seems to me that some of the Members speaking on the floor have had more experience with this budget than the Members who have sat for days going through it. Let them offer amendments where they think amendments should be made to reduce this bill. If there are places where this bill can be cut without affecting the services to the Members, I will certainly go along with them. Perhaps there is someone here who has not gone through this budget the way we have and still has some ideas as to how we may be able to make these 10-percent cuts.

On the question of the buildings, the Speaker of the House offered the amendment to the bill on the floor and it was carried by this House. It has been authorized by the House. Now because of this wave of economy it becomes popular to attack it.

Mr. NORRELL. Mr. Chairman, will the distinguished gentleman from Ohio yield?

Mr. BOW. I yield to the gentleman from Arkansas.

Mr. NORRELL. May I point out that percentagewise this legislative appropriation bill has been cut deeper than the Treasury-Post Office appropriations bill?

Mr. BOW. The gentleman is quite correct. I urge the House to look at this thing objectively as to the services not only to the Members but to your constituents, and then determine what best should be done. Let us not find some way to make the headlines on this. Let us get down to what we should have and what is proper for this Congress.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield.

Mr. REES of Kansas. Leaving out the headlines and all that, but in view of the fiscal situation as it exists today in May 1957, does not the gentleman think it might be well at least to withhold the unnecessary expenditures that are included in this bill, as long as we do not have to have them?

Mr. BOW. Yes; I think that is quite right I will say to the gentleman. I think those that are not necessary should be taken out. My friend, the gentleman from Kansas, knows that I do not like to spend a lot of the taxpayers' money. But, here we have construction which has been started, where millions of dollars have been invested and costs are going up and contractual obligations exist. I am wondering how much we will actually lose. If this were a new start on a building and this debate was on the question whether or not it was to go through and whether or not we were to have the building, I would say we should go along with the gentleman. But, here we have started the construction and we have made an investment. I am fearful that in the end we will lose money if we stop construction at this time. That is my opinion and that is the way I feel about it. You say to take out the matters that are not necessary. But this is the kind of situation we run into on these things. We had one serious matter before this committee. Just think what people could have said about us? I think it should have been done, and I will be perfectly honest and frank about it. We have down here at the foot of the hill some very old greenhouses that are a part of our responsibility. The equipment and the steam plant and so on is about to go out of operation. The buildings are about to fall down. In these greenhouses is housed the Widener collection of orchids worth a half million dollars. This is our responsibility. But, can you imagine what somebody might have said on this floor today if we were to have appropriated funds to protect those orchids—that the Members of Congress were trying to protect orchids. That is not in this bill. We took it out. I say to you, in my opinion, we should go forward with this building. I do not believe it is an economy to stop it. I believe in the long run, it will cost us more money. I say again to my colleagues, I believe this committee has done an excellent job of trying to bring before this body a fair budget. I want to join with the gentleman from New York—and there were a few laughs here at the time that we said this was an honest budget—I believe the legislative branch of the Government in this budget has shown the way that budgets should be submitted. Of course, we have cut some money out of some budgets, but the fact is that the items in those budgets were such where we could take them out. Would it have helped on this floor today, my colleagues, if the legislative branch would have put these things into this budget simply so that we could take them out? I think whoever submitted this budget should be congratulated on submitting what is an honest budget, and the fact is that we are not able to take it out. I can assure my colleagues that if there were any fat in this budget, the gentleman from Washington and I would fight to take it out and I am sure other gentlemen of the committee would do the same thing.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman from Ohio yield?

Mr. BOW. I yield.

Mr. ROONEY. I should like to call attention to the fact that the deferment of the construction of the new Senate Office Building is an example of costly delay. The authorized total fixed for the new building in 1948 was $20,600,000. The plans were completed in 1949. But the other body deferred construction of the new building until 1954. In the meantime, construction costs had risen 23 percent. In an endeavor to absorb this 23 percent rise in costs, one wing of the building had to be eliminated. During the period 1954 to 1957 there has been a further rise in construction costs of approximately 17 percent, and there is no present indication of a leveling off of construction costs.

Mr. BOW. I thank the gentleman for his contribution.

Mr. BUDGE. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield.

Mr. BUDGE. I would like first to commend the subcommittee. I think it has done a rather searching job. I should also like to commend the gentleman from Ohio [Mr. Bow] for his record of economy in the Congress. It does appear to me, however, that there are some items in every appropriation bill which can be eliminated. It has been the policy of the House this year to keep employment as nearly as possible in all other departments not higher than the 1957 level. In the Defense Department appropriation bill reported to the House today, we are asking the Department of Defense to reduce its civilian employees by over 5,000. Now what justification, if the gentleman can enlighten me, is there to add 50 new employees just across the street in the Library of Congress?

Mr. BOW. The justification was given to the committee I will say to the gentleman. But, the gentleman has now touched on a point involving which there was some doubt in the mind of the gentleman from Ohio who is now speaking.

This is a unanimous report, however. The feeling was that there were backlogs of books that were very important, and other backlogs in the Library, which is the greatest library in the world today, and that they had been held down while other agencies in the past few years had been increasing, rather substantially, the number of employees. The Library has been held down over the years. In order to take care of these backlogs, those employees were necessary. I thought they made a fair case, but I quite agree this is one area where I thought perhaps we might not have an increase. But many items are there. There are Presidential papers, valuable historic documents that are in boxes. Other things should be done. I suggested to the committee that perhaps we should cut their overall appropriation for new materials so that they do not get so much of a backlog, but the gentleman has mentioned one item about which there could be some doubt.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. NORRELL. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota [Mr. WIER].

Mr. WIER. Mr. Chairman, I think I ought to make it known to the gentleman from Ohio [Mr. Bow] that insofar as I was personally concerned I was not attacking the committee as such. Neither have I any desire to recommit this bill. Neither did I mention any other item except this acquisition of land and the funds with which to go through with this tremendous building construction program.

When I came back here in January I found, much to my surprise—and I thought I was attending meetings pretty well—that the House had proceeded, and I found there had been a rider attached to an appropriation bill a couple of years ago, calling for a certain amount of money. But I came here and I find that we are now in the process of taking over 4 blocks around the 2 House Office Buildings here. Then, lo and behold, I found, to my surprise, that they are now going to take over this $10 million hotel that is less than 10 years old and make committee rooms out of it. Then I really became disturbed.

As far as this bill before us today is concerned, I now have no quarrel, because my query is not in this bill. My inquiry seems to revert to the fact that $25,000 was appropriated 2 years ago for a study by the House Architect. But someone has said this $25,000 makes available $100 million for land acquisition and construction. As far as the proposed New House Office Building is concerned, I will go along with that. But I might suggest, as I suggested a few minutes ago, I have been here 8 years, and I say that this Congress has had many, many more problems and pressing businesses than they have today.

I have not heard too many complaints about the offices they have had. For myself, do not give me another room unless you are going to evict me from the Congressional Hotel, and if that happens then I will accept a sleeping room for that third room, proposed for all Members.

Mr. ROONEY. Will the distinguished gentleman from Minnesota yield?

Mr. WIER. I yield.

Mr. ROONEY. The gentleman makes a statement about taking over a $10 million hotel. Does not the gentleman think this Commission is entitled to some credit for taking it over for $1,500,000, exclusive of contents?

Mr. WIER. I doubt if you will get it for $1,500,000, and the gentleman from New York can hardly disagree with that.

Now that is my position. I was all set here today to inquire if there were any funds in this bill for the future acquisition and I find there are no funds. That was my concern here today.

Actually the Public Works Committee did authorize a $25,000 appropriation in the 80th Congress. The Public Works Committee of the House has never heard the evidence as to the need for another House Office Building; there has been no justification before the Appropriations Committee for authorizing such a project. It was put on by the appropriation of funds a couple of years ago in a supplemental bill. That is what has actually taken place.

Mr. ROONEY. Mr. Chairman, will the gentleman yield me time to reply?

Mr. NORRELL. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. ROONEY].

Mr. ROONEY. Mr. Chairman, a while ago the distinguished gentleman, our colleague from Idaho, made a statement with regard to the departments downtown being required by the House Appropriations Committee to keep employment for the present year to the level of last year. I should remind the gentleman from Idaho that he serves on the Interior Department subcommittee on appropriations and that his subcommittee recommended at least a thousand, and if my memory serves me right, twelve hundred or thirteen hundred additional employees over the present year.

The matter of the Library of Congress has been brought up. I believe it was in that connection that the gentleman from Idaho rose. The Library of Congress here in Washington is the largest library in the world; it has the richest and best collection in the world. It has had a chronic backlog of materials—books, maps, papers, and so forth—for years. They tell us that they reject much more material than they accept for the collections, yet they continue to have a tremendous backlog. Such a chronic backlog situation impairs the ability of the Library to render proper service to the Congress, including the service of the Legislative Reference Service.

In the past 10 years the collections in the Library of Congress have increased by 67.4 percent, whereas in the same period of time the basic staff has been increased by only 4.7 percent.

The Library of Congress, which is a great American public institution, requested 66 employees at a cost of $276,110. This committee recommended 50 of these at a cost of $213,318.

Mr. BUDGE. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Idaho.

Mr. BUDGE. Since the gentleman has seen fit to comment on the action of one of the subcommittees I would just like to keep the record straight by inviting the gentleman's attention to the fact that the percentage of reduction in the Interior bill was 11.8. The percentage of reduction in this bill is 2.7.

Mr. ROONEY. Does not the gentleman realize that in that bill there were added 12 or 13 hundred new and additional employees, where in this bill there are exactly 5 employees for the House of Representatives, 9 for the Architect of the Capitol?

Mr. BUDGE. I am not complaining about the 14 at this time; I simply ask what is the necessity for 50 additional employees across the street? I do not think they are necessary.

Mr. NORRELL. Mr. Chairman, I yield to the gentleman from Texas, our distinguished Speaker [Mr. RAYBURN] 5 minutes.

Mr. RAYBURN. Mr. Chairman, I think we are taking a big bite at a mighty little thing. The gentleman from Georgia [Mr. VINSON], the gentleman from New Jersey [Mr. AUCHINCLOSS], and I are members of the House Office Building Commission. We have been through this thing very, very thoroughly.

These projects have been authorized, and we have already spent several millions of dollars over here acquiring land. The excavation for the building is going on now. Are we by our action today by cutting off this $7,500,000 to carry on this project, going to abandon that property and let it grow up in weeds and leave a tremendous ugly hole in the ground over there?

Some Members say they have enough room. If you sat in my seat practically every day, you would find some member of a committee, some chairman of a subcommittee or some individual Member of the House coming in and saying, "I have got to have more room or I cannot transact my business."

Why, last year we rented a great deal of space downtown to put subcommittees in where they could hardly be found and where it was not justified in any fashion, but we had to go downtown to some office building and rent space.

Mr. Chairman, the sum of $7,500,000 to carry on this work up here is a mighty small amount compared to the $71,800,000,000 budget that we are now dealing with. I was talking to the gentleman from Missouri [Mr. CANNON] the other day and he stated about this new office building and expanding the Capitol and grounds:

> This is not a memorial. The Capitol of the United States and its office buildings are the workshop of the representatives of 169 million people and they need room in which to transact their business.

To abandon this thing after we have acquired all this ground and not go on with the initial steps of completing excavation and starting this building it would seem to me would be as false economy as anything on earth we could do at this time.

The Congress is pretty modest in taking care of itself in comparison with other departments of the Government. I might say that all of us take a very small amount for our salaries, for our help and for our convenience compared to the millions and even billions of dollars that are being spent in other places.

It cost money to make this room in which we are sitting safe. The gentleman from Ohio [Mr. MCGREGOR] was a member of that committee. It cost several million dollars to rehabilitate this building and the Senate. The roof above us here was ready to fall down upon us, but we went about the business—it took us 2 years—to make this Hall safe and the seating better. If many of you had been here a few years ago sitting on those hard seats you would be very grateful that you have a nice, soft seat to sit in today.

Let me repeat, there is hardly a day passes when some chairman of a subcommittee, or when some Member of the House, who is crowded for room, does not come to me and say: "I cannot transact the business of my committee unless I get more room somewhere."

Mr. Chairman, when I came here we were allowed $1,500 a year for clerk hire. I could transact my business on that because I doubt if I received 10 letters a day. Now the Members receive hundreds of letters a day. The Government has expanded into many avenues that Members are corresponded with by their constituents.

Let us not do this thing in the panic of economy when it is a bagatelle compared with what the whole budget is. I think I know better than any other man in this House, and the gentleman from Massachusetts [Mr. MARTIN] when he was Speaker knew it better than anybody here, that we need this additional room in order for the Congress of the United States to perform its functions, to serve itself and to serve the American people.

Mr. NORRELL. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. CANNON].

Mr. CANNON. Mr. Chairman, during the speakership of Champ Clark, a distinguished group from London visited Washington. The group included a number of members of the English Parliament and their wives. They visited the Capitol and called on the Speaker in his room, and while in conversation with Speaker Clark, two ladies standing to one side, spoke to each other in whispers. One said to the other, "Why, the Americans have their Capitol right in the slums."

At that time Chinatown was at the foot of the Hill, and dilapidated red brick buildings lined the street on the north. We have reclaimed the areas immediately west and north, and are now clearing the slums across the street from the Capitol on the south. Any principality in Europe the size of a Texas county, presents a more attractive appearance than the surroundings of the Capitol of the United States of America.

Belatedly we are at last clearing away the debris and the unsightly tenements which should have been removed long ago.

But the alterations are not being made for the sake of appearances and the development of beautiful vistas. These expenditures are for purely utilitarian purposes. This assembly is not a town council. The United States House of Representatives is burdened with responsibilities and problems of national and world importance. Every foot of space on Capitol Hill is crowded. There is a shortage of committee rooms; individual accommodations are inadequate; filing space is lacking, halls are blocked off to provide temporary rooms; the entrances to the Capitol itself are closed and corridors partitioned to afford cubbyholes for essential services. There is no place to park, no private dining rooms for luncheon conferences, no cafeterias for visitors. The whole place is bursting at the seams.

The need should not be met piecemeal. The proposed plans meet minimum requirements. It will be remembered that when the last House Office Building was erected the blueprints included an air-conditioning system. About the time construction started somebody got excited and scared our good friend, Jack Garner, and our friend from Cincinnati, Nick Longworth, and at the last minute they bluepencilled the air-conditioning system. They proceeded with the erection of the building, and on the very day it was completed they decided to put the air conditioning back in. But, of course, it was too late. There were all those steel beams, and those impenetrable concrete walls. They finally got the air conditioning back in but it has never worked satisfactorily from that day to this simply because somebody got excited about the cost at the last minute and thought we ought not to pamper Congressmen by putting in air conditioning. Let us not repeat that fiasco.

This House legislates not only for the Nation but for the world. We have a job to do. We must have elbowroom. We must have a workshop equipped for this Congress and all the Congresses to come.

Somebody said we ought not spend this money on ourselves. We are not spending it on ourselves. Many of us will not be here in the next Congress. Few of us will be here 10 years from now. We build for the people and their accredited representatives and we must equip them with facilities with which to discharge the responsibilities placed upon them.

And may I say just one word in behalf of the Library of Congress. Announcement has been made that an amendment will be offered reducing the appropriation carried by the bill for the Library.

The committee reduced the budget estimate. It is small enough as it is. And no item in the bill is entitled to greater consideration.

When in Europe some years ago—and I was not there at Government expense—our party was regarded with courteous forbearance. With supercilious and patronizing condescension, we were given to understand, in so many words, that while Americans were fairly successful in business, we had to come to Europe to see the great art galleries, museums, libraries, universities, and centers of culture.

The Library of Congress is the greatest library in the world. It is the visible, irrefutable evidence of the academic and intellectual achievement of the American people. It is convincing proof that we are not merely shopkeepers or moneygrubbers, as Kaiser Wilhelm insisted, but a people of culture, learning, and scientific progress equal, if not superior, to any on the globe. Let no action here on the floor today retard the continued growth and development of this national institution. Its accessions are outrunning its staff. England, France, and Germany each had a greater library than we had. But today we have the greatest library in the world. It demonstrates the fact that the people of America are intellectual. They are not mere moneygrubbers as some people over there would like to leave the impression that we are. We are an intellectual, we are an educated, we are a cultured people and we must maintain these institutions.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. CANNON. I yield to the gentleman.

Mr. GROSS. We also have the biggest Federal debt of any country in the world, do we not?

Mr. CANNON. That is true. But that debt did not grow by supporting this Library, because the Library has been starved for a number of years. That debt was imposed upon us in a way not at all related to the proposition we have before us today.

Mr. HORAN. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. MCGREGOR].

Mr. MCGREGOR. Mr. Chairman, I have listened with a great deal of interest to the arguments pro and con on this proposal this afternoon. First I want to say that I have no criticism whatsoever of the Committee on Appropriations. I think they have done a very fine job with the problem they are faced with; their hands are tied.

I am one who served on the Renovation of the White House Commission. I want to pay my respects to our distinguished Speaker. It was my privilege to serve with him on the commission for the renovation of this Chamber. And certainly I have the highest regard for his ability and fairness. When the chips are down, he is for saving money, if it is worth while saving. And if we can spend a dollar and get a $5 gain, he is for that. He has great ability and is always fair.

However, as the ranking member of the Committee on Public Works, I think I should call your attention to the fact that we have an orderly procedure in Congress. Our distinguished Speaker referred to the renovation of this beautiful Chamber. He served on the commission, and so did I. But how was that commission brought into being? By a legislative committee of this House considering a bill and providing an authorization which passed on the floor of this House, went to the Senate, and there went through the same procedure. That was the orderly process of legislation on a project similar to this.

Let us check the building in question, the New Office Building. We have had before our Committee on Public Works at least for 8 or 10 years the subject of the very building that is in controversy today. We turned it down, possibly because we did not know the things that our distinguished Speaker knew. But at least he never informed us of those things. We kept passing it by and we thought it was not needed and a good way to save some money.

Some time ago, in the 80th Congress, we did approve an authorization for $25,000 for planning and for a survey only. That was authorized by our committee, by the legislative committee. It came to the floor and was passed. That $25,000 planning and survey project has grown, like Topsy, until now it is over $20 million without any further authorization of the appropriate authorizing committee of Congress. It is a situation that we are faced with. I am somewhat like our distinguished Speaker. This thing has started, rightly or wrongly—wrongly, I believe—but I do not know what kind of jam you would get into if it were stopped.

I am pleading with you this afternoon, especially the Members on the Committee

on Appropriations, to quit legislating on an appropriation bill. I think we can serve warning now that in the future we are going to give them a real battle if they attempt to come in here and jump a preliminary survey and authorization of $25,000 to a contractual obligation of $22 million, including $1,500,000 for a hotel. I am telling you that something needs investigation. I certainly do not blame it on the Speaker or the Commission, but someone in my opinion has gone far beyond the scope of what was originally intended even by the appropriation authorization of the 80th Congress.

I checked a little bit ago. I used to be in the contracting business. I find there is no contract for our new building. This work is going on for the excavation, but there seems to be a dividing line between who is going to do the excavating and who is going to build the building. I am sure that when I call this to the attention of the Building Commission they will investigate it.

Let me tell you what is in the making. Here is a bill that has jumped from $25,000 to $22 million. Our committee this morning, without my vote and seven others, voted out a Senate bill, S. 1428, to authorize the furniture and furnishings for the additional office building of the United States Senate. We endeavored to ask how much money was involved. They said—the witnesses—"We do not know." It has always been a mutual agreement that the other body take care of their affairs and we take care of ours. I think the time has arrived when we as representatives of the American taxpayer should determine who is taking care of the taxpayer.

We understood that some chairs the Members of the other body would use would cost $600. The witness said he thought that was a little high, it was probably $400.

I said, "Are you going to accept bids?" "Oh, no," he said, "We are going to allow the Commission and the Architect of the Capitol to purchase the furnishings." I learned that one of the doors is going to cost $8,000. They are asking us to vote them a blank check and send it over to them—letting them buy without bidding whatever they want. Certainly we should know the amount of money to be spent and what it is for.

The bill, S. 1429, came out of our committee without my vote this morning authorizing the enlargement and the remodeling of the Senators' suites, making structural, mechanical, and other changes and improvements in the existing Senate Office Building. This is in addition to the new Senate Building now being constructed. I hope you will give consideration to making certain that the authorizing committees are given a chance to submit these proposals to you and that the Committee on Appropriations quit legislating on appropriation bills. Let us stop this spending unless it is absolutely needed. The people ask us to cut down expenditures, yet some in the Congress are asking us to spend about $150 million for buildings and furniture for our own use. We cannot cut other departments unless we are willing to stop or reduce our own expenditures. Economy starts at home, Mr. Chairman; let us lead the way in the economy move so we can balance the budget, reduce the debt, and reduce taxes.

Mr. HORAN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN. Mr. Chairman, this is the day we feel sorry for Congressmen. We are just like the representatives of pressure groups that come in. We want economy, except when it affects us. That is their story. I do sympathize with our very distinguished Speaker. I recall that for 15 years I tried to get a decent place for us to eat, with a kitchen aboveground and not in a hole down in the ground. I did not get anywhere. My idea was not big enough. If I had asked for $25 million I might have gotten somewhere. Just a few moments ago the Speaker said, "What are you going to do with that hole in the ground?" He was referring to the hole where the new House building is going up. Well, real estate is going up and we might keep it. It might be a good investment. We might use it for a parking lot for the home folks when they come to see us. We might put some of this foreign aid money that we are appropriating, and which is wasted, in it. Some day we may need some of that money and at least we will know where the money is, which we do not know now. Nor do we know how it is spent.

I do not go along with the gentleman from Ohio [Mr. Bow] in his criticism of those who offer amendments. He rides hobby. Why not let the rest of us have our say, express our views when a bill comes to the floor? I cannot understand just what he is getting at or his reasons for what he is saying, except that the committee has put out a bill we should not touch. If I recall correctly, the Ohio delegation passed some sort of resolution indicating they were all for economy and that was not so long ago. But, today, the gentleman from Ohio comes along and if anyone questions what the committee did, offers an amendment, then he is some sort of—I cannot use the word—the rules of the House will not permit—but anyway anyone who questions what the committee did is some sort of an undesirable individual. I am afraid my friend from Ohio [Mr. Bow] has committeeitis or something. He assumes, well, in substance he said if he does not cut it out of the RECORD, that Members of the House have been before the committee asking for something and then when the bill comes to the floor of the House those Members take an opposite position. That is, that we are practicing—what is it—some kind of duplicity; I suppose you would call it using double talk. That we are on one side when we appear before the committee and then we are on the other side of the issue here on the floor of the House. Then we are accused of headline hunting. Well, who has not been headline hunting both before and after he gets to Congress. I do not know anyone seeking office who objects to publicity if it is favorable. I cannot understand why if that is the situation, if some of us have been deceiving the committee and if some of us have just been putting on a show to get our pictures or our names in the paper, why does not the gentleman name him or them and let us have it out. Maybe I am at the top of the list. All right—it will be publicity of some kind in any event. But, I say it is lacking in courage to go down in the well of the House and accuse Members of the House—a blanket indictment—of deceiving a committee or of taking an inconsistent position just for the sake of getting public support for reelection, and then refuse to name the offenders and to name those who actually voted or spoke like that, if anyone did. Maybe just a few of us—4 or 5 or more such number have not been as careful as we should or have overrated the importance of our talks.

I use the RECORD whenever I feel like it. This year I have not had inclination enough to send out talks. Of course, we have had a Republican President, and you cannot say as much about a President of your own party. They say that is not advisable. So I have not used the RECORD as much as I have at other times. It has not, in my judgment, been necessary. But use it to the utmost of your ability, and you never can keep up with the propaganda that comes out of the executive departments downtown. That, no matter which party is in power. You just cannot keep your people advised as to what is going on down here, not at least in a degree equal to that which the departments use. I cannot understand why, if we are not to be permitted to debate on the things in an appropriation bill, and if we are to be accused of political maneuvering every time we try, I do not understand why the Committee on Appropriations did not come in with a closed rule and shut us all off on amendments. But, since they have an open rule and having extended an invitation for debate and amendment by getting an open rule, why jump on us when we try to advance an argument in support of an amendment?

Now back to the bill. We will never have room enough to transact our business as Congressmen if we keep taking on additional duties. In that respect we are just like the executive departments. We get something today and we jump into something else tomorrow and so on indefinitely. You might give me 50 rooms and an adequate number of employees and I still could not serve all of the people who might seek help adequately—if I listened to all of them—is that not true? I am as crowded for room as anyone else. I am the ranking minority Member of a regular committee and I do not have any room for a minority staff. I do not have a private office of my own. Someone else is sitting in there all the time. That is all right with me. I can still attend to my business and so can the rest of you, in my opinion, at least if you want to. Of course, if you want a sleeping room in some hotel that is as the gentleman from Minnesota [Mr. WIER] suggested might be—if we took over the Congressional Hotel and gave each of us three rooms—a different matter. But, they gave us a nice davenport and they give us

air conditioning in the summer. We can sleep over there if we wish. But, the truth of the matter is that we will never have adequate room to transact our congressional business as long as we keep taking on additional activities and performing additional duties and as long as we follow along in one session, one day, one week making an authorization and the next week we come along and are told "you authorized it" and now you have to appropriate the money for it. Oh, yes—we will not practice any economy when it comes to our own business. Let us quit authorizing new projects extending old ones; give the overburdened taxpayer just a little relief.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

CONTINGENT EXPENSES OF THE HOUSE

Furniture: For furniture and materials for repairs of the same, including labor, tools, and machinery for furniture repair shops, and for the purchase of packing boxes, $231,800.

Mr. DAVIS of Georgia. Mr. Chairman, I offe. an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. DAVIS of Georgia: On page 4, line 22, strike out "$231,800" and insert "$223,800."

Mr. DAVIS of Georgia. Mr. Chairman, I do not rise to offer any criticism of the subcommittee, the very able gentlemen who have presented this bill to the House of Representatives. I hope I will not indulge in intemperate language in my efforts to reduce this bill. I do think that matters have reached a pretty pass whenever one who undertakes to reduce a bill in an amount that he thinks is reasonable and proper, must be called a headline hunter and referred to as a demagog, and things of that kind. Certainly when an appropriation bill is under consideration, it not only is the right of every Member to offer an amendment if he deems it proper, but it is his duty to do it.

I regret that this amendment I am offering involves only the sum of $8,000, but that is all that is involved in this item that I am seeking to strike. If it were possible to reduce this bill more at this point, and I think it should be reduced by amending to cut out larger sums further along in the bill, of course I would be glad to do that, but we have to take the items as we come to them. This is the first item read in the bill which, in my judgment, should be reduced.

I have offered this amendment to reduce this item, the furniture item, by $8,000, to cut out the furnishing of trunks to the Members of the House. It has about reached the point where every time I turn around and look out into the front office it seems to me that I find a new trunk there. I have never asked for a trunk since I have been in the House. My storage room down in the basement of the building now has trunks in there that the wrapping paper has never been torn off of. I do not think, in the first place, that it is a proper item for the taxpayers to furnish trunks to Members of the House, and certainly not in the number and amount that they have been furnished since I have been a Member. I think this is a legitimate item for a cut. I do not see how it can be defended. It is true it is small, but we have to offer amendments to this bill by taking each item as we come to it. We ought to cut out the items that are unnecessary. I offer this amendment to cut $8,000 out for the item of trunks.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, this is really amusing—$8,000. Do you know what these packing boxes or trunks are for? When you new Members get along to adjournment time next year around the first of August, or thereabouts, and you are going home, in an attempt to be reelected to the House of Representatives, you want to bring the files that are in your office to your hometown so as to make out a case for your reelection. The gentleman from Georgia, because he has been here so many years and has so many of these trunks, wants to deny you an opportunity to bring your files and papers home.

That is what this amendment is, pure and simple.

Mr. Chairman, I ask for a vote on the pending amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken, and on a division (demanded by Mr. ROONEY) there were—ayes 82, noes 76.

Mr. NORRELL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. DAVIS of Georgia and Mr. ROONEY.

The Committee again divided, and the tellers reported that there were—ayes 79, noes 88.

So the amendment was rejected.

The Clerk read as follows:

Miscellaneous items: For miscellaneous items, exclusive of salaries unless specifically ordered by the House of Representatives, including the sum of $30,000 for payment to the Architect of the Capitol in accordance with section 208 of the act, approved October 9, 1940 (Public Law 812); the exchange, operation, maintenance, and repair of the Clerk's motor vehicles; the exchange, operation, maintenance, and repair of the folding room motortruck; the exchange, maintenance, operation, and repair of the post-office motor vehicles for carrying the mails; the sum of $600 for hire of automobile for the Sergeant at Arms; materials for folding; and for stationery for the use of committees, departments, and officers of the House; $1,985,000, and in addition, $80,000 to be derived by transfer from surplus in the stationery revolving fund: *Provided*, That, notwithstanding the provisions of section 401 of the Civil Service Retirement Act Amendments of 1956 (Public Law 854), the Clerk of the House is hereafter authorized to pay, from the contingent fund of the House, with respect to all officers and employees of the House who are covered by such act, the amounts, which, under the terms of such section 401, otherwise would be contributed from the appropriations or funds specified therein. As used in this paragraph the term "officers and employees of the House" means employees in the legislative branch whose salaries, wages, or other compensation are disbursed by the Clerk of the House of Representatives.

Mr. DAVIS of Georgia. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DAVIS of Georgia: On page 5, line 10, strike out "$1,985,000" and insert "$1,885,000."

Mr. DAVIS of Georgia. Mr. Chairman, I am offering this amendment to reduce the item in this bill known as miscellaneous items by $100,000. On page 23 of the hearings there is set out a list of 20 items which come under this general subject of miscellaneous items. You will note if you refer to these hearings that for the 1957 fiscal year $1,065,000 was allocated. Of this amount only $606,501.66 was expended up to and including March 31, 1957. Nine months of the fiscal year have elapsed and there still remains unspent of that allocated sum, $458,498.34.

For the first 9 months of this year these funds were expended at the rate of $67,388 per month. For the remaining 3 months at the same rate of expenditure there would be left $256,498 at the end of the fiscal year.

In testifying about this, Mr. Roberts, on page 25 of the hearings, had this to say:

Mr. NORRELL. You also ask for $100,000 which, as far as I can see, is not specifically earmarked for any particular purpose. What has been your expenditure experience this year under the appropriation of $1,065,000?

Mr. ROBERTS. $606,501.66 through March 31, 1957.

Mr. NORRELL. Do you think that you need the entire amount of $1,100,000 increase?

Mr. ROBERTS. Well, we have estimated that there will be a balance of nearly $100,000.

Now, actually there will be a balance, if the same rate of expenditures is followed, of $256,498. Due to the fact that they expect a balance of $100,000, I have offered this amendment. It is a sound amendment. It does not jeopardize any necessary expense of the House. I have not cut any item in there. I am simply doing what I think is reasonable and proper and reducing a sum which everybody admits probably will result in a balance at the end of the year.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, I trust that the House will vote down this amendment. This amendment would cut $100,000 in the miscellaneous items part of the contingent expenses of the House—and they are contingent expenses—and it is impossible to exactly figure out these items far in advance. The committee has already deducted the amount of $180,000 of the total sum of $2,165,000 requested by the Clerk of the House.

Now, what would this cut apply to? Comparison was made with last year. The fact of the matter is that over $900,000 additional of this is required by law this year for the Government contribution to the retirement fund for the officers and employees of the House as the result of enactment of Public Law 854, 84th Congress. If we were to adopt this amendment would it result in economies on such things as cleansing materials,

supplies, towels, paper cups, soap, and other sundry items here in the Nation's Capital? Should we economize on necessary repairs to our typewriters? Should we economize on the payment of gratuities in connection with deceased employees of the House? Perhaps we should economize on the stationery for the standing committees and the temporary committees of the House?

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Georgia.

Mr. DAVIS of Georgia. In the first place, let me say this: I think things have come to a pretty pass when a Member cannot offer an amendment without having some other Member accuse the Member of demagoguery.

Mr. ROONEY. May I say to the distinguished gentleman that I do not mean to be and have not been personal with him. The very $100,000 the gentleman now proposes to further deduct from the pending bill by means of this amendment has already been deducted by the committee. Are we going to disregard the unanimous vote of the members of the committee, including the gentleman from Washington [Mr. HORAN], and the gentleman from Ohio [Mr. BOW]? They concurred in this determination, and I am sure oppose the pending amendment.

Mr. DAVIS of Georgia. The gentleman knows that what I have stated to the House is accurate and correct.

Mr. ROONEY. No; I do not agree with his conclusions at all.

Mr. DAVIS of Georgia. Well, the facts speak for themselves. There will be left, if the same rate of expenditures is followed for the last 3 months of this fiscal year, $256,498.

Mr. ROONEY. Does not the gentleman from Georgia realize that he is referring to a period from the 1st of last July to March 31 of 1957, and that during part of that period they did not have these additional expenditures of over $900,000 in connection with the retirement fund? The situation is entirely different from what is claimed by the gentleman.

Mr. DAVIS of Georgia. Oh, no, indeed. The House was in session until August of last year, just as it will be this year. It was in session this year from January through March. I have stated—and the gentleman knows it—accurately the figures involved in this, and the gentleman knows further that the matter of retirement is not involved in this whatsoever.

Mr. ROONEY. If the distinguished gentleman from Georgia will please refer to page 25 of the printed committee hearings, he will find this question and answer:

> Mr. HORAN. Your experience right now is that $900,000 is what the expenditure is for the contribution to the retirement fund.
>
> Mr. LIVINGSTON. About $907,000.

That is part of the miscellaneous items of the Contingent Expenses of the House. Adoption of this amendment would not save anything, Mr. Chairman. These retirement contributions have to be made by law.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman.

Mr. DAVIS of Georgia. The gentleman knows that this item of $907,000 is not involved in this amendment. That is taken care of otherwise and the gentleman knows it.

Mr. ROONEY. No; that is not so. And if the gentleman from Georgia will please read page 4 of the committee report he will find this:

> Under the appropriation for miscellaneous items, contingent fund, the committee has approved language which will permit payment of the Government's share of the retirement contribution for all officers and employees from this one appropriation, similar to the arrangement of a few years ago with respect to the Government's contribution under the employees life-insurance program.

I do not know what further I can say to point out the facts in regard to this amendment.

Mr. DAVIS of Georgia. And the gentleman knows, also, that footnote 14 states that this item includes funds contained in the third supplemental appropriation bill, 1957, as passed by the House.

Mr. ROONEY. That has nothing to do with what I am saying.

Mr. COLMER. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I had not intended to say anything on this amendment.

Mr. TABER. Mr. Chairman, would the gentleman yield for a question?

Mr. COLMER. I yield.

Mr. TABER. In all the talk on this I have not heard a word in justification of why this is put to us twice as large as last year.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield, to answer that statement?

Mr. COLMER. I yield to the gentleman from New York.

Mr. ROONEY. I will say to my distinguished friend, the ranking minority member of the House Committee on Appropriations, that it is by reason of the very testimony and the language in the report which I have just read. The $907,000 additional in this item is for the Government's contribution to the officers and employees retirement fund, occasioned by the enactment of Public Law 854, 84th Congress which did not become effective until some months after the start of this fiscal year.

Mr. COLMER. Mr. Chairman, we have our own utensils here in this appropriation bill for the conduct of our own House. In the appropriation bills that have preceded this, we have made cuts of roughly 8 percent. This is a comparatively small bill. It is not going to affect the budget a great deal whether you cut it or you do not cut it. The trunk item is a small item. I voted for the amendment because I feel that these trunks are unnecessary; that we should treat all of these appropriation bills alike. We cannot economize only on those things that do not affect us and only on those things on which we want to economize. We too must make some sacrifice.

I am sorry that some Members get emotional when we get into one of these legislative appropriation bills. I am sure that my good friend from New York [Mr. ROONEY] did not intend to reflect upon the statesmanlike conduct of my friend from Georgia [Mr. DAVIS].

Mr. ROONEY. Mr. Chairman, will the gentleman kindly yield at that point?

Mr. COLMER. I yield.

Mr. ROONEY. May I assure the gentleman and the House that that is the fact. The gentleman from Georgia [Mr. DAVIS] and I have been friends now for many, many years.

Mr. COLMER. I am glad my friend feels that way. But I think it is very unfortunate that we get into these emotional hassles. I have a great affection for the gentleman from New York, who said that these trunks were going to be taken home to get you reelected. I want to say to you that in my humble judgment, if you do not economize, if you do not cut this tremendous budget, when you go home there will not be enough trunks or packing boxes to take home to get you reelected.

Mr. ROBSION of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. COLMER. I yield to the gentleman.

Mr. ROBSION of Kentucky. The remark was made that $8,000 is not a very large item to us. I think we must continue to tell ourselves that $8,000 or $8 million may not be a big item to us, but to the person who has to pay it, it is a tremendous item.

Mr. COLMER. I agree with the gentleman.

We have had appropriation bills before us and we have cut them. We are going to have other bills coming up here. We are going to have bills affecting large sums of money and we are going to be told that they go to the very heart of the Nation's defense, and so forth. Yet we are going to cut those bills. What I am trying to say to you is this: This country is tax conscious as it has never been before. It is budget conscious as it has never been before. When you are dealing with a thing as sensitive as your own household you had better be able to show when you get those packing boxes and trunks home that you are willing to make a little sacrifice on your own part as well as to make the people at home do a little sacrificing.

I think this is a very important matter. I do not believe it should be treated lightly. I hope there will not be any more references to demagoguery, and that someone who has made a study of this problem, as the gentleman from Georgia has, as he always does, will not be charged by implication or otherwise with being anything other than sincere. The gentleman from Georgia [Mr. DAVIS] is one of the most sincere men in this House. There are few if any who are more consecrated to duty or who work harder at the job of trying to economize and retrench in these matters.

I wish we had more of his statesmanlike stature.

Mr. NORRELL. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this bill has already been cut. We have made every cut we thought we should. We ought not to cut anything else, unless we want to impair some of the services to the Members of Congress.

Mr. HORAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want you to know that we took into consideration the list of necessary housekeeping items shown on page 23, and we had before us the budget request for that list. You add to it $907,000 for retirement. We found out that there was going to be $100,000 left over, and that there would be a transfer, so we cut it $180,000. On an item that is as tight as is this item here, I do not know how you can do any more cutting without working a hardship on the Members. These are necessary items. The retirement item was mandatory. We had no other recourse. I hope we can have a vote on this amendment because the issue is very clear.

Mr. WHITTEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take the floor at this time to urge some degree of caution in dealing with this legislative appropriation bill. I had nothing to do with shaping the bill up or with setting the figures in it other than going along in the Appropriations Committee when this subcommittee brought the bill here.

We all recognize that this is the time when we need to economize throughout Government by all kinds of economizing. It is so easy for the Members to feel that the way to prove they are economy minded is to show that they cut their own appropriations for the operations of the legislative body. On that I wish to urge that the amendments be considered on their respective merits.

I have heard good friends of mine, and I hope you all are, through the years say that we did not do enough investigating, that we had inadequate staffs to be properly informed to meet the problems that we have here in the legislative body. Personally I have had investigations made annually on any bill I have handled. We have submitted to us this year a budget of more than $70 billion for the total Government. We need to really cut that. How well we will do that job will depend on how well we will run the legislative end of this Government, which is the source of our means of finding out what is going on in the rest of the Government and how much and how well we can do the job of reducing overall Government spending, will largely depend on what we do here toward providing the help to get the facts. No one here holds the gentleman from Georgia in any higher respect than I do. I think he is an outstanding Member of this Congress. However, I do not believe he is any more economy minded than I am. But, I do think it would ill become me because I have been here some 15 or 16 years to say that new Members should not have any means of taking their files home to serve their people. Now, if you say after so many years you should not have any more packing boxes provided to get these records home, that is one thing, but to refuse any service to the new Members is unsound. But, I remember the first time that I was here—I had to get out and beg and try every place in the world to borrow a packing case so that I could get my records back home to my district. I want to tell you something else, talking about office space. I oppose a good many of the things here. I think we are going too far in remodeling the old buildings. But, in the Committee on Appropriations I have felt that we should have public hearings through the years. I firmly believe if we had public hearings and the people could see the efforts we make to try to hold down expenditures and if they could see the other side representing the departments trying to get the funds, I think it would save us hundreds and hundreds of millions of dollars each year. But, do you know there is not a room to be had around this Capitol for the Appropriations Committee where you can have the public? I have been on a subcommittee where we actually had to climb down a grapevine to get to it and where witnesses who were trying to get to the hearings could not find us. We have had witnesses come from all over the United States and stand out in the corridor for hours waiting to testify for 5 minutes, and they had to wait because we could not get them in the room. I say this. Let us economize in this bill where it is sound to economize, but let us not do it just to show we are great economizers while we even cut off our own means of trying to learn something about a $71 billion budget. It is false economy to do that just to make a record here. It is always sound to cut out money that is not needed to be spent. We have appropriated in other bills funds to pay those who retire. The fact that a man happens to work for Members of Congress around the Capitol here, trying to help us meet our responsibility, I think means that we should give him the same treatment so far as providing funds for his retirement as we give to the folks downtown in the way of Federal contribution. I say again let us go at this thing on a sound basis. Let us economize where it is good economy, but let us not just make unwarranted cuts to prove to the country that we even cut the services here which, in turn, enable us to serve the people.

Mr. TABER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think we ought to know what this is that we are voting on. An attempt has been made by the gentleman from Georgia to reduce this appropriation from $1,985,000 by $100,000. They said that there would be $100,000 less out of the balance which remains, and, therefore, they cut off $100,000. If you take the old figures and subtract the $100,000 from the $1,065,000 that is available this year, you would get a figure of $964,000. According to the testimony which I get from page 25 of the hearings, there is $907,000 required for the retirement contribution. But, the $907,000 and the $964,000 make $1,871,000. But, there is available for this purpose by transfer $80,000 from the stationery revolving fund so that you subtract the $80,000 from that and you get a figure of $1,791,000.

Now that appropriation could stand a cut to that figure, instead of just the $100,000 that the gentleman from Georgia has knocked off. Why can we not be honest about it and approach it according to the evidence in front of us? If we do not do that on the things that are meant for our own use, how are we going to have the respect of the people back home?

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. DAVIS].

The question was taken; and on a division (demanded by Mr. ROONEY), there were—ayes 101, noes 94.

So the amendment was agreed to.

The Clerk read as follows:

Speaker's automobile: For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the Speaker, $8,000.

Automobile for the majority leader: For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the majority leader of the House, $8,000.

Automobile for the minority leader: For purchase, exchange, hire, driving, maintenance, repair, and operation of an automobile for the minority leader of the House, $8,000.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the Clerk just read 3 items in the total amount of $24,000 for automobiles for the leadership of the House. I am sure those gentlemen ought to be comfortable and safe in the vehicles they ride in.

My attention was called not long ago to 4 new Cadillacs and 1 new Chrysler Imperial that went to the Pentagon, with special doors 6 inches higher than the standard doors, so that the occupants could get in and out of them without removing their top hats and homburgs. Those Cadillacs and the Chrysler Imperial are rented to Pentagon officials for $500 a year. I have always been intrigued by this lend-lease proposition and how it works. I wonder if there is anyone in the Chamber who could tell me how this lend-lease of Cadillacs and Chryslers at the Pentagon works. How do they manage to rent Cadillacs and Imperials over there for $500 a year?

Mr. HAYS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I will be glad to yield to the gentleman if he can shed any light on the matter.

Mr. HAYS of Ohio. I think maybe I can. If you will notice the close liaison between the big brass in the Pentagon and General Motors I think that might explain it.

Mr. GROSS. I doubt very much that that is an answer to the inquiry I made.

I renew my question: I wonder if anyone on the Appropriations Committee has ever gone into this. These Cadillacs cost $10,000 apiece, still they are able to rent them for $500 a year.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield?

Mr. GROSS. Yes, I shall be pleased to yield to the gentleman.

Mr. ROONEY. This is something that has been discussed in the Appropriations

Committee, and some feelers were put out with regard to getting General Motors to give the legislative branch, and as a matter of fact certain other agencies of Government for which the taxpayers carry the burden, the privilege of renting a car for only $500 a year, but we apparently do not have the relationship that the members of the Cabinet and others have with General Motors, so we have not succeeded.

Mr. GROSS. Can the gentleman tell me who takes up the slack between the $10,000 cost and the rental at $500 a year?

Mr. ROONEY. It is my understanding that this slack is taken up by the taxpayers. It is indeed unfortunate that we cannot get General Motors to become more munificent and let us have three cars for the Speaker and majority and minority leaders.

Mr. GROSS. How is the slack taken up? Can the gentleman tell me? Just how is this differential made up?

Mr. ROONEY. The maintenance of one of our automobiles would be about $1,752 a year.

Mr. GROSS. That is not what I am getting at. I am trying to find out how General Motors and Chrysler can provide the Pentagon and other agencies of the Government $10,000 cars at a rental of $500 a year.

Mr. ROONEY. Probably at the expense of their stockholders and the American taxpayers through deductions of the loss on tax returns.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. WHITTEN. I am sorry I cannot answer the gentleman specifically, but in the bill for the armed services appropriation that we reported out today, I point out in the hearings that we have, through the military, in the case of 50 leading corporations in 5 years given them $80 billion of contracts, and the stock of those companies has increased from 57-plus to 149-plus per share. Spending $80 billion with these corporations in 5 years and their stock practically tripling in value—and I am speaking in broad general terms, for I do not want to get into any one individual company—it just looks on the face of it that they thought it was good business to lose money on furnishing these cars.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. GROSS. Certainly I yield; I am looking for information.

Mr. HALLECK. I am looking for information too. We hear a lot of conversation about the close association between General Motors and the present administration. It is my understanding that the matter of leasing cars to the White House has prevailed for a long time. They have been leased under this similar arrangement and from time to time from different automobile manufacturers.

Now, I want somebody on the Appropriations Committee who has been on the committee quite a while to get up and say whether or not that understanding by me is correct.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. Yes; I yield to the gentleman.

Mr. ROONEY. I would most certainly agree with the gentleman from Indiana that automobile companies have furnished cars under such arrangement to the White House in the past.

But I think the gentleman from Ohio [Mr. HAYS] was talking about this extending to other areas of Government in Washington, to each one of the Cabinet officers.

Mr. HAYS of Ohio. That is right.

Mr. HALLECK. Mr. Chairman, will the gentleman yield further?

Mr. GROSS. I yield.

Mr. HALLECK. I do not know what the gentleman from Ohio had in mind. Possibly that is my own fault, but let us keep this thing on the plane where it ought to be, and let us not try to develop out of the arrangement that there is for the leasing of cars in the executive branch some sort of sinister connection that somebody would like to make political capital out of, because this is a practice that has prevailed for a long time and was not started by this administration. I never heard any question about it before.

So it seems to be that somebody is trying to make a mountain out of a molehill.

(By unanimous consent Mr. GROSS was allowed to proceed for 3 additional minutes.)

Mr. GROSS. I want to say that I am not trying to make a mountain out of any molehill. I am seeking information. If officials of this Government are to be provided with Cadillacs and other automobiles, let us either provide them on the basis of appropriations, buy them for these officials, or let us know how they are provided on any other basis.

Mr. SHEPPARD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. SHEPPARD. I may say to the gentleman that I recently had occasion to look into the issue because I was informed that a Cadillac 75 was being leased for $500 a year for the service of a Secretary in one of our military branches. I happen to operate an automobile the same as many of the rest of you do and I know I cannot operate my automobile for $500 a year. So I was very much intrigued at the economic appeal that was involved. In trying to run it down through the Cadillac service here locally, I was advised that for a period of time three automobile manufacturing firms have supplied cars to the White House and some Cabinet members for a very small consideration as good public relations. Recently that program has been expanded to include those with certain secretarial status in the military. However, to the best of my knowledge and from the information I secured at that time, there was nothing indicated whereby the same courtesy would be extended to the leadership of the House or the Senate. I would like to say to my colleagues who are present at any time that becomes a general practice, let me in on it, because I cannot run my car for $500 a year.

Mr. ROBSION of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Kentucky.

Mr. ROBSION of Kentucky. Maybe the automobile value on resale would be greater on an automobile used by the Secretary of Defense than by any other individual.

Mr. SHEPPARD. I may say to the gentleman if we are going to distribute the prestige on our own personality, I will participate with the gentleman.

Mr. HAYS of Ohio. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I did not have any ulterior or sinister motive in what I said at all. If the shoe is pinching some of the gentlemen on the Republican side, that is too bad. But I have a little more information for you. When I was talking about the liaison at the Pentagon—it could have gone back prior to this administration and maybe it did—I was talking about the fact that 93 percent of the non-public-works items that are purchased by the Department of Defense are not purchased by bid but are purchased by negotiation. You can make out of that whatever you like. You can boo or you can do anything else you like, but that is a fact, and I did not get that information from an unreliable source. It stands to reason that if you do not have to bid and you can negotiate the price, it would be good business to do a couple of favors for the negotiators.

Mr. McGREGOR. Mr. Chairman, will the gentleman yield?

Mr. HAYS of Ohio. I yield to the gentleman from Ohio.

Mr. McGREGOR. I am sure the gentleman wants to be fair. He is familiar with the fact that negotiations can follow the acceptance of bids. Many times bids are called for and received, then those bids are negotiated, depending on classification.

Mr. HAYS of Ohio. That is true, and I recognize that fact. You will not find any of the companies are negotiating at a loss. I do not think you will find that any of these negotiations are from, shall we say, eleemosynary motives?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. HAYS of Ohio. I yield to the gentleman from Mississippi.

Mr. WHITTEN. The record that we released today will show, as I said earlier, that the stock of the 50 major corporations that had contracts with the Defense Department in the last 5 years have increased from an average of $57 a share to $149 a share. But from that you would take it that they have been doing all right through their negotiations.

Mr. HAYS of Ohio. I think the evidence would indicate that.

Mr. PRICE. Mr. Chairman, will the gentleman yield?

Mr. HAYS of Ohio. I yield to the gentleman from Illinois.

Mr. PRICE. I would like to call attention to the fact, since the gentleman from Ohio [Mr. McGREGOR] offered a contribution, that there are two forms of com-

petitive bidding. There is the open competitive bidding, which gives everybody an opportunity to bid, and then there is competitive bidding by invitation. Most of these defense orders are by invitation, not open competitive bidding.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. HAYS of Ohio. I yield to the gentleman from New York.

Mr. ROONEY. What has all this to do with the $500 a year Cadillac?

Mr. HAYS of Ohio. Well, I will tell the gentleman what it has to do. They are giving these $500 a year Cadillacs to people with whom they are negotiating, and in addition to all of this, they are charging off the loss they take against their income tax.

Mr. HOFFMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, notwithstanding what the gentleman from Ohio [Mr. HAYS] has said, all through his talk runs the implied charge that there is something rotten and crooked in connection with the administration dealing with industrial companies. Now the gentleman asks where the administration buys its automobiles, the Cadillacs, and other cars. Well, you cannot get them in Ohio. Ohio does not make them. The aircraft industry is located in California and down in Texas. I assume that these industries want to make a little money, some money, anyway, for their stockholders. They want to give jobs to people. Millions of jobs. They do fairly well at their job. And, if the figures are correct, General Motors and some of the other automobile companies in Michigan contribute quite substantially through taxation, through the wages they pay to millions, small as they are compared to the sums that the gentleman from Ohio and I receive toward the expenses we have here. I do not know what the purpose of the gentleman's argument is—otherwise than to smear. Perhaps it is to abolish all industry if it gets to a certain size. The administration undoubtedly buys autos of General Motors and other auto dealers because they have cars for sale. If Governor Williams, of Michigan, keeps on with his tax program and puts it across, if Mr. Reuther goes along with him, perhaps General Motors, Ford, Chrysler, and every other industry in Michigan will be forced to go to some other State. Apparently that is the purpose—no, that is not the purpose of Williams and Reuther. The real purpose is to get more money, of course, for Governor Williams and for Mr. Reuther to spend to get more political power. That is the idea. And it is probable that if they succeed in their purpose they will force industry out of Michigan. Will those two bright boys then create and maintain jobs for those who lose out?

I think it does seem, though there is something strange—I cannot understand why—when they want to make all of these New Deal international ideas work, why they always go back and get some representative from industry, a conservative, a reactionary, to come into the Cabinet and save what is left. There would not be anything left if these bright fellows who have these theories and practice continued extravagance, if they operated our economy. But, when they get in power they always go back and get some businessman, and the larger the industry which he controls, the more people he employs, the greater the benefit he is to the State, the Nation and the more—wha is the word, I ask the gentleman from Indiana—the greater the vituperation heaped upon him—the more vicious is the attack from the other side; the more vicious, unfounded, and unsubstantiated is the attack which comes from a certain, a very small section on the other side. You let any decent, reputable man who has made a success in life take a position in the administration, right off the bat someone charges him with being unpatriotic, overly greedy, unscrupulous in his method. It is a difficult thing to understand. Just why some individuals cannot believe that anyone is decent, honest, sincere, patriotic, is a query not always answered. It is difficult to understand why any decent, reputable citizen wants to take a place of responsibility with any administration, Democrat or Republican, in view of what all too often follows.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. I yield to the gentleman from Indiana.

Mr. HALLECK. I just want to commend the gentleman for that statement. I have said publicly, and I say it again and stand on it, and I think the people of this country understand it, and that is that it was about time we had some able people in these high places in Government even if they have been successful somewhere else before they got there. Now, I would like to ask the gentleman who comes from Michigan, where these automobiles are made, this question. Of course, we all know that Cadillac is made by General Motors. My understanding is that heretofore four automobile companies made chauffeur driven cars or cars to be chauffeur driven: Lincoln, Chrysler, Packard, and General Motors. At the moment I am pretty sure that Chrysler does not make such a car any more. I know that Packard does not make such a car any more. The Lincoln that I used to see around the White House so often, I have not seen any of them anywhere. I do not know whether they are making such a car any more or not. But, actually, as I say, we might as well be fair about this and not try to draw implications that are not there. As the gentleman so well says, instead of doing and saying these things to discourage able people from making the sacrifices that many of them do make to come in and help out in this Government of ours, we ought so to conduct ourselves as to encourage men to give of their time and their services, patriots as they are, because, believe me, it is a good thing that we have them.

Mr. HOFFMAN. I am afraid to say anything more on the floor, along this line because I recall when we had the Department of Health bill up here and someone offered an amendment—and I ventured to support it—all those who supported the amendment were referred to by implication at least as wanting to kill people, wanting to let them die from lack of protection from the Food and Drug Administration, or something of that nature. That thought ran along all the way through the debate. According to the words of the gentleman from New York, and the implications thereof, if anyone offers an amendment—well, it is just too bad. It must be offered because of an improper motive. I have been wondering why some of the committee spokesmen bother to give us a bill under a rule which permits amendments and which we can debate; why they do not just take over the running of the universe, and let it go at that.

Mr. ROONEY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I should like to congratulate the distinguished gentleman from Indiana [Mr. HALLECK] upon his splendid defense of General Motors and Cadillac, and to report to the House that within the last 2 minutes, I have been advised by Mr. Harry Livingston, the disbursing clerk of the House of Representatives, that within the past 6 months efforts were made and negotiations were had with the Washington district manager of Cadillac, to obtain three $500-a-year automobiles for the Speaker, the majority leader, and the minority leader, but that the request was turned down. I was advised further that the Vice President, however, has one of these $42-a-month Cadillacs.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman.

Mr. GROSS. I want to commend the leadership of the House for turning them down.

Mr. ROONEY. That is not the point. The disbursing clerk did not turn them down. He was ready to take them for $42 a month. As a matter of fact, I suppose there are some others of us here who would be perfectly willing to accept $42 a month limousines if we were not placed under any undue obligation for them.

Mr. GROSS. I think they ought to all be turned down.

Mr. PILLION. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman.

Mr. PILLION. Is our Government so financially embarrassed and is it so lacking in self respect that it must accept subsidies of $2,000 or $3,000 per car in these instances?

Mr. ROONEY. I think that is a very good point, I will say to the gentleman from New York.

The Clerk read as follows:

PENALTY MAIL COSTS

For expenses necessary under section 2 of Public Law 286, 83d Congress, $2,081,000, to be available immediately.

Mr. JONES of Missouri. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise at this time to comment on this penalty mail cost which is in the amount of $2,081,000. I think many Members will recall that last year I attempted to get an amendment in the postal bill and it was, I think, misunderstood by several Members. I am not

going to offer an amendment to reduce this amount but I do propose to try to get an amendment adopted when that postage-rate bill comes up to limit some of the franking that is done by Members of the House to the districts that they represent, and in the case of the Members from the larger metropolitan areas, to limit it to the areas they serve. I am referring only to the printed matter which is sent through the mail. That will reduce this item considerably.

Another thing, to show you that we could do a lot of saving here in the House, although it is going to require some legislation to do it, I hold in my hand part I of the Department of Defense Appropriation Hearings for 1958. As was said earlier in the day, this volume, which is available to each Member of the House, represents a cost of $16. That is for this one volume. This stack of books here on the table represents the entire hearings on the Department of Defense. When we request these to mail out, I think many of us do not realize the amount of money involved.

I think it would be timely for us to consider some changes in our House rules to restrict the sending of these hearings to people who have some official use for them, and to make some charge to people who do not have use for them or who make requests for them just out of curiosity. I am not proposing that we charge $16 for a volume like this, but if we place a charge of a dollar on it that would at least exclude a lot of people who would ask for it only out of curiosity and who would only throw it away.

We all know our storerooms, not our individual storerooms but those in the Capitol, are filled with copies of reports and hearings. In the Committee on House Administration we are trying to work out some plan to restrict the amount of printing that is done. But on this particular item, if we would give more attention to limiting the mailing under the frank, and I am not referring to the first-class mail, the letters you write to your constituents, but limit the mailing to the districts you serve, and if perhaps the Members would give a little more thought to the matter before they mailed out copies like this at $16 apiece, we could bring about some economy. I hope when the proper bill is before us we will give some attention to that point.

Also, I think that we sometimes yield to people who request us to insert speeches in the CONGRESSIONAL RECORD, and when we do insert such speeches in the RECORD and mail them out through the folding room, we add the cost of the folding room, the cost of the envelopes that are furnished free, and the cost of the postage, and as a result the whole bill goes up.

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman from Texas.

Mr. POAGE. If the Members would heed the suggestions of the gentleman from Missouri we could actually save some money and not just talk about it. I commend the gentleman on suggesting something practical here today. It is one of the few practical speeches I have heard.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I think the gentleman makes a good point with reference to the charge that could be levied for these hearings and also the amount of material that goes into them. If the gentleman thinks those volumes are large, wait till we get to the volume that will be turned in by the Subcommittee on Public Works to the full Committee on Appropriations.

Mr. JONES of Missouri. I thank the gentleman.

The Clerk read as follows:

CAPITOL BUILDINGS AND GROUNDS

Capitol Buildings: For necessary expenditures for the Capitol Building and electrical substations of the Senate and House Office Buildings, under the jurisdiction of the Architect of the Capitol, including minor improvements, maintenance, repair, equipment, supplies, material, fuel, oil, waste, and appurtenances; furnishings and office equipment; special and protective clothing for workmen; uniforms or allowances therefor as authorized by the act of September 1, 1954, as amended (5 U. S. C. 2131); personal and other services; cleaning and repairing works of art, without regard to section 3709 of the Revised Statutes, as amended; purchase or exchange, maintenance and operation of passenger motor vehicle; not to exceed $300 for the purchase of necessary reference books and periodicals; not to exceed $500 for expenses of attendance, when specifically authorized by the Architect of the Capitol, at meetings or conventions in connection with subjects related to work under the Architect of the Capitol; $897,100.

Mr. HOFFMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOFFMAN: On page 14, line 18, strike out "$1,258,000" and insert "$1,250,000."

Mr. HIESTAND. Mr. Chairman, I make the point of order that we have not reached the point in the bill at which the gentleman's amendment is in order. I have an amendment to offer to page 14, line 2. I do not want to lose my right to offer that amendment.

The CHAIRMAN. The gentleman from California was on his feet.

Mr. ROONEY. Mr. Chairman, I think the point is that the Clerk had not read beyond line 2 of page 14. The amendment of the gentleman from Michigan pertains to line 18 of that page.

Mr. HOFFMAN. Mr. Chairman, I will be glad to yield. I would like to do something to please the gentleman from New York [Mr. ROONEY].

The Clerk read as follows:

Amendment offered by Mr. HIESTAND: On page 14, immediately after line 2, insert the following: *"Provided*, That no funds provided in this section and no funds heretofore appropriated shall be expended to carry out the extension, reconstruction and replacement of the central portion of the United States Capitol authorized by the paragraph of the legislative appropriation act, 1956, which is under the heading 'Capitol Buildings and Grounds' and which begins with the words 'Extension of the Capitol'."

Mr. ROONEY. Mr. Chairman, I make a point of order against the amendment on the ground that it is not germane to this bill. It refers to funds which are not included in this bill, and further it is legislation upon an appropriation bill.

Mr. HIESTAND. Mr. Chairman, will the gentleman reserve the point of order?

Mr. ROONEY I shall be glad to reserve the point of order.

The CHAIRMAN. The gentleman from New York [Mr. ROONEY] reserves the point of order against the amendment. The gentleman from California [Mr. HIESTAND] is recognized.

Mr. HIESTAND. Mr. Chairman, I appreciate the courtesy of the gentleman from New York. I would like to explain briefly what this is and what it is not, just so we can determine whether it is subject to a point of order or not. It does not have to do with the New House Office Building expenditure. It does not have anything to do with the amount in the budget for the extension of the Capitol, because there is no such amount. It does have to do, however, with the obvious intent of the committee in recommending that we do defer additional cost for the extension of the Capitol. We are all aware of the measure which went through; it has been discussed, to extend the Capitol. I respect the distinguished Speaker and the problem that he faces in the proposition he put to us. May I suggest, however, that the three main purposes for the extending of the Capitol or expanding it or facelifting it or whatever you want to call it, are first of all the great need for additional committee rooms and hearing rooms. We agree that that is needed. Second, for eating facilities, and everybody here agrees that that is needed. Third, for parking facilities, and everyone knows that we need that. May I suggest, Mr. Chairman, that these needs are being met far more rapidly than if we were to go ahead and expand and extend the Capitol itself. They are being met just as quickly as possible by the construction of a new House Office Building which will provide committee rooms and hearing rooms, and relieve the space shortage here in the Capitol.

The second need, the added eating facilities are also being supplied in that way. Third, that the added property acquisition for the House Office Building has provided much additional parking space. My purpose in introducing this amendment was, to carry out the obvious intent of the committee which would simply defer this Capitol expansion until we had a chance to utilize the new space in the House Office Building. I suggest that if we can defer this, it would be wise and it would be good economy. Much has been said about economy beginning at home. Certainly, I am sure, most of us agree. This Capitol facelifting was authorized and appropriated on the floor of the House without a hearing at that time. Yes, I know there were some hearings way back, but the Committee on Public Works did not have a chance at it. I suggest there are many architects, members of the Institute of American Architects who do not agree with the desirability of lifting the front of the Capitol at all. The fact

of the matter is that the majority would seem to be of that opinion. If we say nothing in this bill about this Capitol expansion, Mr. Chairman, the Architect will be authorized to continue to spend money and I am apprehensive and I am sure many Members may be apprehensive that before the year is out, he will have spent so much more money from the previous appropriation, that we shall be obliged to carry on and see him finish the job.

My amendment, therefore, I believe is in order, considering the circumstances.

Mr. ROONEY. Mr. Chairman, I renew my point of order.

The CHAIRMAN (Mr. WALTER). The gentleman from New York [Mr. ROONEY] makes the point of order that the amendment is not in order. The amendment very definitely relates to an appropriation heretofore made. Therefore, the Chair is of the opinion that the amendment is legislation and therefore subject to the point of order. The Chair sustains the point of order.

Mr. HIESTAND. Mr. Chairman, I offer an amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HIESTAND: On page 14, line 2, after the period, insert "None of the funds provided shall be used for prosecuting the project of lifting out the front of the Capitol."

Mr. ROONEY. Mr. Chairman, a point of order.

The Clerk has already read beyond that point.

The CHAIRMAN. The gentleman's amendment comes too late.

Mr. HIESTAND. May I suggest it is in the same section.

The CHAIRMAN. No. This is page 14, line 4.

The Clerk will again report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HIESTAND: On page 14, line 2, after the period, insert "None of the funds provided shall be used for prosecuting the project of lifting out the front of the Capitol."

Mr. ROONEY. Mr. Chairman, I renew the point of order against the amendment, that it is legislation on an appropriation bill.

The CHAIRMAN. The Chair is of the opinion that the same objection applies to this amendment as applied to the last amendment, and the Chair therefore sustains the point of order.

Mr. HIESTAND. Mr. Chairman, may I speak to that point?

May I suggest that the amendment just submitted deals with $897,100, which has just been read this morning? I submit it is in order because it could not have been applied to any other fund. The first amendment did apply to previous appropriations.

The CHAIRMAN. But the Chair would call attention to the fact that there is nothing in this paragraph, as the Chair understands it, that relates to that particular project or work.

Mr. TABER. Mr. Chairman, if the Chair will hear me just a moment.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. TABER. Beginning on line 8, page 13, it reads:

For necessary expenditures for the Capitol Building and electrical substations of the Senate and House Office Buildings, under the jurisdiction of the Architect of the Capitol.

That means that money is available for all sorts of activities of the Architect of the Capitol, relating to the entire group of buildings.

The CHAIRMAN. Of course, the gentleman conveniently stops at the comma on line 11 and did not read up to the next comma, "including minor improvements."

By no stretch of the imagination could this be considered a minor improvement.

The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

House Office Buildings: For maintenance, including equipment, waterproof wearing apparel, uniforms or allowances therefor as authorized by the act of September 1, 1954, as amended (5 U. S. C. 2131), miscellaneous items, and for all necessary services, $1,258,000.

Mr. HOFFMAN. Mr. Chairman, I offer an amendment which is at the desk.

The Clerk read as follows:

Amendment offered by Mr. HOFFMAN: On page 14, line 18, strike out "$1,258,000" and insert "$1,250,000."

Mr. HOFFMAN. Mr. Chairman, this is a very small cut. Even though it is small, it might be considered a declaration of independence, a determination to economize where it will neither cost us any votes nor do any harm. Nobody ought to vote against it because of any fear of what might happen at election time. It can be supported, because without the $8,000 we will nevertheless get all the real advantages that the $8,000 will give us.

If you will refer to page 67 of the hearings, you will see that there is the testimony that was offered to justify the appropriation to replace the revolving door at the northwest corner of the Old House Office Building at street level. The reason given is that that revolving door is in such condition that you could not get anyone out of the building if they had to be taken out on an ambulance stretcher. Well, that is a laudable purpose, all right, enough, but does it take $8,000 to make a door for that purpose? The height is not any more than 10 feet, surely; it is somewhere between 6 and 8 feet wide. We are familiar with it even though many of us are in the New House Office Building. People ought to be able to get out of that door quickly if there was an emergency. It has served very well for some 23 years. But we are told times have changed. Perhaps this is advanced because of some threat from Russia. That is the usual reason or answer for spending. Maybe they think somebody is going to die suddenly because of their vote or because the Communists might get him. But, whatever the reason may be, they want to get in and out of that door quickly.

Is there anyone here who thinks a door for that entrance or exit should cost that much money? Why, even in the old house I live in, some 50 years old, some of the doors swing both ways. Could they not put a door on one side to swing in and out and a door on the other side to swing both ways, so if they wanted to get out quickly they could just prop them back, leaving the whole 6 or 8 feet wide open?

This is just a suggestion in connection with economy. This cannot hurt or help me election day. You cannot accuse me of demogoging, so you cannot make that argument stick.

To adopt this amendment would just be a declaration of independence on our part, an indication of economy, even in the case of a few dollars where it can be saved without hurting anybody. We will not make a large cut in these bills. The cut will not cause Russia to attack us.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. GROSS. This is also supposed to be a panicproof door.

Mr. HOFFMAN. No. A door to serve the occupants in the event Russia says she is coming in, or it may be to help Congressmen get out when our constituents come here and get after us.

Mr. GROSS. That is to get away from panic-stricken taxpayers.

Mr. HOFFMAN. When they check up on us if we vote for some of these items. If we do not give them some relief from the tax burden, do not quit sending their dollars abroad.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, perhaps I ought to first say that some of us are afraid the gentleman from Michigan might not get out through that door.

Mr. HOFFMAN. Oh, I am over in the other building.

Mr. ROONEY. These are the justifications submitted by the Architect of the Capitol:

Replacement of revolving door, Old House Office Building: This is a wooden revolving door, installed in 1932, located at the northwest corner of the building, on New Jersey Avenue, at street level. Replacement parts for this door are no longer available and the door is becoming progressively hazardous. This door, being at street level, is used for wheelchairs and stretcher patients, as well as by Members, employees, and the public. The door has deteriorated to such an extent that it is now almost impossible to collapse it in order to get equipment in and out of the building. It is proposed to replace this door with a new bronze, panicproof, automatic collapsible revolving door, with bronze border lights and transoms, similar to the bronze doors installed at the main and Library corner entrances to the Old House Office Building, $8,000.

In this connection I might say that in 1951 a similar door was installed in the House Office Building at another point at a cost of $7,750. There are four such doors here in the Capitol Building. One of them is the door at the head of the steps as you go out, the east door to the House side of the Capitol on this level. Those four were installed at a cost of $27,709.

I suggest that this is a perfectly reasonable replacement item. The Architect cannot get parts for the old door. I have read you what he had to say about this and I am going to leave it to the good

judgment of the House whether or not you want to economize to the extent of $8,000 on an item such as this.

Mr. LONG. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. Yes, I yield to the gentleman from Louisiana.

Mr. LONG. I think this door could be described as being in the same fix as the Republican Party is in at the present time.

Mr. ROONEY. I hesitate to say that at this moment. I want to defeat this amendment, because I really believe this is not a good time to economize on this item.

Mr. HOFFMAN. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HOFFMAN moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken.

Mr. ROONEY. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. ROONEY. In view of the fact that the gentleman has an amendment pending, is the gentleman from Michigan entitled to offer such a motion?

The CHAIRMAN. Yes. This is a preferential motion and is in order.

Mr. HOFFMAN. Mr. Chairman, with apologies to the gentleman from New York [Mr. ROONEY], may I say it would not have been necessary to take this 5 minutes had he yielded to me for a half minute. The gentleman does not talk about the cost of the door. He says that a new door is necessary. Sure, suppose everybody concedes that. He talks about an old door, he talks about some other doors. I am speaking on why the bill should be sent back to the committee with the enacting clause stricken. To show our people we are not just talking, not voting economy when our own funds are being considered.

He talks about other doors that cost $27,000. Is that any reason why we should pay $8,000 for a door that everyone knows can be installed for far less than $8,000? Because we paid $27,000 twenty-odd years ago is no reason why we should pay $8,000 when you can get one just as serviceable though not as beautiful for $2,000 or for $1,000. That is typical of the argument the gentleman usually makes.

The point is this: Over in the northwest corner of the Old House Office Building there is an old door. Let us concede for the purpose of the argument it is no longer any good, that it ought to be replaced. Maybe just because after 23 years someone has discovered it is not up to date. All I am trying to do is to get the Committee to adopt an amendment which will at least indicate that we want to cut on something where we can cut without hurting anybody. Sure, the amount is small, but if we will not cut a small item we will pass by the large ones. The sole question is whether you can put a door in a 10 by 8 or smaller hole for less than $8,000. That is all there is to it.

Mr. Chairman, I ask unanimous consent to withdraw my motion.

Mr. ROONEY. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending preferential motion to kill the bill in order to protect the rights of my distinguished friend the gentleman from Michigan [Mr. HOFFMAN]. If the pending preferential motion were adopted, and the enacting clause stricken, the gentleman from Michigan would not get his pay check for the period beginning July 1, 1957.

Mr. Chairman, I urge defeat of the gentleman's preferential motion so that the gentleman from Michigan may get his pay check.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from Michigan [Mr. HOFFMAN].

The motion was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. HOFFMAN].

The amendment was rejected.

The Clerk read as follows:

Acquisition of property, construction, and equipment, additional House Office Building: To enable the Architect of the Capitol, under the direction of the House Office Building Commission, to continue to provide for the acquisition of property, construction, and equipment of an additional fireproof office building for the use of the House of Representatives, and other changes and improvements, authorized by the Additional House Office Building Act of 1955 (69 Stat. 41, 42), $7,500,000.

Mr. RAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAY: On page 14, line 19, strike out the paragraph beginning in line 19 on page 14 to and including line 2 on page 15.

Mr. RAY. Mr. Chairman, I think we need to get some facts straight that have been somewhat confused here today. We face a $100 million project. Eight million dollars of that involves the acquisition of property. That property has been acquired so that that $8 million is behind us.

We face $64 million for the construction of an additional office building. That, for all practical purposes, is ahead of us. We face $9 million for remodeling of the Old House Office Building. That has not been started. We face $9½ million for changes in the New House Office Building. That means that something like $82 million will be expended if plans under which estimates were made go ahead. The plans for those three projects were approved generally a year ago this month. No contracts have been let. No specifications have been put out for bids. None are ready. They have spent one-million-three-hundred-thousand-and-some-odd dollars for the new sewer under the land that is to be occupied by the proposed buildings. Specifications for the structural steel and certain foundation work will be ready next month or perhaps 2 months from now and are expected to be put out for bids immediately afterward. The other parts of the new building will have specifications and requests for bids a good many months later. But, once this step is taken, putting out bids and making a contract for the foundation work and the steel work, there will be no chance to take a serious look at the question of whether the operation should continue. That chance exists today. The purpose of my amendment is to permit, if the House adopts it, a new study by the House committees of the plans that are being proposed and of the cost.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. RAY. I yield to the gentleman from Georgia.

Mr. VINSON. What additional study? The gentleman from New York states that the purpose of his amendment is to defer further work so the Commission can make further study.

Mr. RAY. No. So the House can make other studies. There has been no study by a committee of the House. There is a continuing and indefinite authority under which the Architect of the Capitol, with the approval of the three distinguished Members of the House who are the House Office Building Commission, may make contracts to carry out plans which the Architect may provide and for which he may have the approval of the Commission. And, they are all distinguished, conscientious men. The Architect can make contracts without waiting for specific appropriations. The legislative authority is broad and covers the plans that the Architect, with the approval of the Commission, may specify.

Mr. VINSON. I wish the gentleman would try to clear up who is to make the study. Is it the House Commission or is it the legislative committee that ordinarily has control of public works matters?

Mr. RAY. That is not covered in this amendment.

Mr. VINSON. I am talking about what is running through the gentleman's mind.

Mr. RAY. I have before the Committee on Rules now a resolution asking for the appointment of a special committee, no Member of which shall be a Member of the House Office Building Commission, which shall make forthwith a study of the plans and report to the House whether the work should go ahead or should be stopped. But, that is not covered by this amendment.

Mr. VINSON. Then, the sum and substance of the gentleman's resolution before the Committee on Rules is to take complete authority away from the House commission and to give it to some other group in the House to determine whether or not a building of this character or a building at all shall be built?

Mr. RAY. If that resolution comes out, that would be the effect. It may not come out in that way.

Mr. VINSON. Will the gentleman point out wherein does he think the House commission, consisting of the Speaker, the distinguished gentleman from New Jersey [Mr. AUCHINCLOSS], and your humble servant, have in any way failed to meet our responsibility?

Mr. RAY. I do not know, sir. I think there is a great deal of concern among Members of the House who simply do

not know. No plans have been placed before the House.

Mr. VINSON. Does not the gentleman know and does not the House know that after an open debate on an appropriation bill the language was written in creating a House commission or, rather, giving authority to the House commission to do this construction and to take charge of the construction of this new office building?

Mr. RAY. I recall no such debate.

Mr. VINSON. Does not the gentleman also know that whenever legislation is offered on an appropriation bill it is subject to a point of order? And legislation of this magnitude was so thoroughly understood by every Member of the House that they had ample opportunity to object by simply making the point of order against the legislation.

Mr. RAY. I did not know enough to make that objection at that time.

Mr. VINSON. That may be true, although I doubt it. But the balance of the House knew because here in this appropriation bill for 1955, chapter 12, there is a whole chapter dealing with this subject matter and any Member of the House could have had it stricken out by simply making a point of order against it. This was strictly legislation on an appropriation bill.

Mr. RAY. Was that the $25,000 appropriation?

The CHAIRMAN. The time of the gentleman from New York [Mr. RAY] has expired.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending amendment.

I should first like it understood that the House Committee on Appropriations did not have this project from the very beginning, but this Subcommittee on Appropriations is now standing 100 percent by it after over $14,900,000 has already been either expended or obligated by law.

In the month of March—to be exact, March 18, 1955—and I am going to read from the CONGRESSIONAL RECORD, volume 101, part 3, page 3204, an amendment with regard to this project was offered on the floor of the House to a then pending supplemental appropriation bill by the distinguished gentleman from Texas, the Speaker of the House, the Honorable SAM RAYBURN. The gentleman from New York, my distinguished friend, Mr. RAY, said awhile ago that there was no debate, or any chance to discuss this matter in the House. Well, let us turn to page 3205 of the RECORD of that day and we find that one of the most distinguished Members of the House for many years, the gentleman from Michigan, Mr. Dondero, who was previously chairman of the House Committee on Public Works, had this to say at that page:

> Mr. Chairman, I should like to close my remarks by saying this. I have never been charged in this Chamber with being one who is willing to spend the people's money for nothing. I am known here as a conservative.

And parenthetically I should say that he was, as everyone knows who served with genial, courtly Charlie Dondero. He continued:

> But here is an amendment which I think we should all support in the interest of the common welfare of the American people.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I am happy to yield to the distinguished gentleman from Georgia, a member of the Commission.

Mr. VINSON. The committee of which the gentleman from Michigan, Mr. Dondero, was chairman, had jurisdiction of that kind of legislation. He felt so keenly that he had no objection to it that he was willing to permit legislation to be written on an appropriation bill covering this matter. Whenever anyone writes legislation on an appropriation bill it calls attention of the House more definitely to the matter than when it is covered merely in a general authorization bill. So the distinguished gentleman from Michigan, Mr. Dondero, when this amendment was offered by our distinguished Speaker, was calling attention of the House to the fact that he and his committee had no objection to writing this legislation into the very heart of an appropriation bill.

Every Member of the House knew every phase about it, and the amendment was so drawn it went into every detail. That is exactly what the Commission has been doing. We have been complying with what the House gave its unanimous consent for the Commission to do.

Mr. ROONEY. Mr. Chairman, I shall conclude my remarks by reading some further statements of the highly respected and conservative gentleman from Michigan, Mr. Dondero, in the debate on that date. He said:

> I happen to walk through the hallways of this Capitol Building nearly every day, and have for a good many years. I notice, and I am sure other Members have noticed, that partitions have been built setting off parts of the hallways or corridors in order to obtain more office space. The same has been done over in the new and old House Office Buildings. They have had to cut off some of the hallways in order to obtain more office space.
>
> Certainly, the people of the United States would be willing for us, as representatives of a great Nation, to have sufficient space in order to carry on the business of their Government. I do not think there will be any objection to it.

There was no objection to it although it was legislation on an appropriation bill, and it was adopted. Contrary to what the gentleman from Ohio, my distinguished friend [Mr. MCGREGOR], has said, the Committee on Appropriations had nothing to do with it except that it happened to have on the floor of the House the bill which became the vehicle for instituting the additional New House Office Building. Now, after having expended or authorized by law over $14,900,000, I do not think it is good sense. I do not think it is good economy to delay the construction of this building at this time.

Mr. RAY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from New York.

Mr. RAY. I think the remarks that have been made by the gentleman from New York and the gentleman from Georgia confirm my statement. I merely said I did not recall debating it. I do recall the two statements made by our distinguished Speaker and by Congressman Dondero, but I do not recall debates. What I am proposing is that there be a House study, and if the vote is registered in favor of this amendment I think it will mean the sentiment of the House is in favor of a House study of the merits of the projects.

Mr. GROSS. Mr. Chairman, I rise in support of the amendment, and not for the purpose of further study by a commission, committee, or anything else. I rise because I think this $65 million House Office Building ought to be stopped dead in its tracks exactly where it is today. It ought to have been stopped last year, and I tried to stop it. I am no Johnny-come-lately to the proposition of opposing this big expenditure which can easily be postponed until the condition of our taxpayers and finances of our Government are in better shape.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Georgia.

Mr. VINSON. The gentleman was here in 1955. He sat in his usual seat and contributed then just as he does now to all debate. Why did he not stop it in 1955 when we had to get unanimous approval before it could go through?

Mr. GROSS. I did not know, in the first place, that I was completely answerable to the gentleman from Georgia for all of my actions and activities here.

Mr. VINSON. Of course the gentleman is not answerable to me, but he had an opportunity in 1955 to stop it.

Mr. GROSS. Let me say to the gentleman, better late than never. I do not know where I was in 1955, but the gentleman knows I tried to stop it in 1956 before a spade of earth was turned. Does not the gentleman know that? And I did not get the votes last year.

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to my friend from Michigan.

Mr. HOFFMAN. If the gentleman had control of the votes that the gentleman from Georgia [Mr. VINSON] had, he might have succeeded.

Mr. GROSS. That is correct.

Mr. HOFFMAN. He bosses the House around every once in a while, and all for its good.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from New York.

Mr. ROONEY. I am sure the gentleman from Iowa understands and I am sure the gentleman from Michigan understands that just one Member had to get up on the floor to make the point of order that it was legislation on an appropriation bill. You did not need any votes at all.

Mr. GROSS. I am sorry, but I am not the parliamentarian that the gentleman from New York is. I am sure he can discover all the points of order on all the bills that are brought to the floor of the House.

Mr. HOFFMAN. Moreover, neither the gentleman from Iowa nor the gentleman from Michigan is the guardian of their consciences over there. They ought

to be able to act once in a while on their own.

Mr. GROSS. That is right, and I wonder why some members of the Appropriations Committee write so much legislation in appropriation bills when the rules forbid it.

Let us hold up this project until we see what is done with the foreign giveaway bill. If that is cut to the bone, and all the fat is fried out, perhaps there will be some money left for another House Office Building. The fact that there is a big hole in the ground for the basement of this building does not bother me in the least. Let that hole in the ground stand as a testimonial to the first real economy bomb that the House of Representatives has dropped in its own backyard.

Mr. AUCHINCLOSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have been a member of the House Building Commission for about 8 years. When I first became a member of the Commission we had the great problem of working out the reorganization of the different committees in the House. It was quite a problem to allocate the proper number of rooms and the proper locations for the new committees. We soon discovered that there was a lack of space and a lack of room and the condition became worse as the days and years went by. The Commission was made up of the gentleman from Massachusetts, Mr. Martin, our former and late colleague, the gentleman from Illinois, Mr. Sabath, and myself. We found that there was more activity on the part of the Congress. There was more demand on the part of the Members, and on the part of the chairmen of the subcommittees for space. That problem was constantly on our doorstep. We closed off every hallway in the Old House Office Building in order to provide additional space. Committees had to rent space downtown. We acquired space for committees in the Health, Education, and Welfare Building. Today, at a cost of about $12,000 or $15,000, I believe, the George Washington Inn has been renovated to accommodate the demand for additional space. The caucus room was divided up for additional space. It is a crucial situation. As a result of that demand, I introduced a bill which was, perhaps, the forerunner of this entire legislation. The bill called for a survey of the Old House Office Building to build additional offices on the top floor of that building and a new building in the courtyard. That bill passed the House and $25,000 was authorized for that study. Eventually, it was amended on motion of our distinguished colleague, the gentleman from Texas, Speaker RAYBURN, to enlarge its scope so that we could go ahead with the study. It was further amended when it went to the other body. It came back to the House and the amendments of the other body were agreed to. It became law. Now, we have already put about $15 million in this building which has been authorized. We are asking in this bill for $7½ million more which is to be used to purchase the steel and to start the foundations for this New House Office Building. The Commission, and I think the distinguished gentleman from Georgia will bear me out, has already deferred any action in renovating and changing the present office buildings which we now occupy.

That expense has been eliminated from the program for the time being. If we do not proceed with this building now, I can say, as a man who has had a little experience in business, and I can add from the point of view of commonsense, it will be much more expensive when we start over again, if we defer it for a year or even less. Such a policy is poor economy. I am just as much for economy as anyone is, and so are my folks back home, but there is a real reason why we should go forward with this project, because it is in the interests of our constituents, to enable us to go ahead and do our work efficiently and effectively for the benefit of the country.

It is contemplated that in this new building there will be eight of the larger committees located, with ample space for a staff and for hearings. There will be additional offices for Members, but the whole program is subject to review. I am sure I speak for the Commission, although I am only a small minority, that we welcome suggestions; we welcome criticisms; but, for the love of commonsense, do not let us stop this project which has been going on and gathering momentum and being considered and studied for the past 6 or 7 years.

Mr. HORAN. Mr. Chairman, I rise in opposition to the amendment, but mainly for the purpose of asking our subcommittee chairman that since everybody has made up his mind on this matter and the issue is before us, why can we not limit debate at this time.

Mr. ROONEY. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 10 minutes, with the last 5 minutes reserved for the distinguished gentleman from Georgia [Mr. VINSON].

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MACK of Washington. Mr. Chairman, I rise in support of the amendment, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MACK of Washington. Mr. Chairman, there is provision in this bill that the House appropriate $7,500,000 to let contracts and start work on the construction of a gigantic new House office space building project. If we vote this $7,500,000 we are in fact obligating ourselves not only to spend this $7,500,000 but, in the future, to provide $85 million more to carry out the project, as it has been outlined by the Architect of the Capitol on page 93 of the hearings. The Architect of the Capitol testified before the Appropriations Committee and said this new building project together with the remodeling of the two present office buildings will cost $100 million.

If we vote this $7,500,000 today, we will be committing ourselves to go ahead with the entire $100 million project.

Admittedly, already about $15 million has been spent or obligated, most of it for the purchase of a site. It still will require $85 million to complete this project as contemplated and outlined by the Architect of the Capitol. If we vote for this $7,500,000 we are in fact approving and giving the go-ahead signal for the entire project. It is turn back now or never. That is why I am voting against this $7,500,000 proposal. I am against obligating Congress to spend $100 million on this project.

How can any Member of the House hereafter criticize the administration for extravagant spending if we ourselves by voting for this $7,500,000 vote approval of this grandiose office space project which will cost the taxpayers $100 million.

The Architect of the Capitol in his testimony before the Appropriations Committee said that the cost of the gigantic housing project for Congressional offices would be: acquisition of site, $8 million; construction and equipment of the new office building—we already have two office buildings—$64 million; remodeling of present Old House Office Building including construction of a garage in the courtyard, $9 million; remodeling of the present New House Office Building including construction and equipment of a cafeteria in the courtyard, $9,500,000; architectural and engineering fees, $5,230,000; construction of new sewer, $1,327,000; and administration and miscellaneous, $2,943,000—a total of $100 million.

The Architect furthermore admitted that if labor or material costs increase that the building probably will cost more than the $100 million.

The new building project will include underground garage parking space for 1,600 automobiles.

Many Members of Congress are advocating economy. We ought to practice what we preach and vote against this unnecessary $100 million extravagance.

Let us of the House practice the economy many are now preaching and struggle along with the 2 to 3 office rooms each House Member has today.

The CHAIRMAN. The gentleman from Georgia [Mr. VINSON] is recognized.

Mr. VINSON. Mr. Chairman, I want to thank the gentleman from New York for obtaining time for me to make a few observations.

There is very little I can add to the statement made by the member of the Commission, the distinguished gentleman from New Jersey [Mr. AUCHINCLOSS]; but I do want to say there is no intention at this time to begin to repair and make changes in the Old House Office Building or the present New House Office Building. The Commission is of the opinion that we should concentrate on the construction of the third House Office Building.

There is no idea in the mind of the Commission that the Congressional Hotel will be torn down. It is too valuable a piece of property and there is too much use for it for any such wasteful proposal as that to be considered.

Let me remind you that in 1955 when the Speaker offered his amendment, every Member of the House knew it was

subject to a point of order. From that stage on, the Commission has been going along with the aid and assistance of the Architect, and we have mapped out a definite, concrete program.

Some $15 million has already been made available. Some $14,900,000 had already been obligated and it is being spent.

In the pending bill we are asking for $7,500,000 to carry the work forward. It would be false economy after spending $15 million to stop and say: "We are not going to do that which Congress approved 2 years ago." Where does it place Congress? Marching up the hill one day, and marching down the hill the next. Such a course would only show the American people that Congress is not thinking projects out clearly.

Mr. MEADER. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield.

Mr. MEADER. I would like to commend the gentleman for his statement and say that this expansion of the facilities of Congress, in my judgment, has been too long delayed.

Mr. VINSON. Of course it has; of course it has.

The gentleman from New York [Mr. RAY] said he had introduced a resolution which is now pending before the Rules Committee to make an investigation of this whole project. To my way of thinking that carries a little criticism of the distinguished Speaker, the distinguished gentleman from New Jersey, as well as myself.

I think we are not subject to any criticism in what we have done. We know exactly what we are doing, and we are doing it because you gave us the approval to do so.

I certainly trust that you today will not say: "We are going to stop you right in your tracks and are going to say it is in the interest of economy." I think it certainly would be in the interest of false economy; because if you delay it, then year by year the cost is going up. When the appropriation bill for the Department of Defense comes before you for consideration you will find out that one of the contributing factors to the increased budget is a constant increase in the cost of hardware and material. The longer you put this project off the more the cost will be.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. As a matter of fact, these buildings are not buildings for Members of Congress, they are buildings of the people?

Mr. VINSON. Of course, they are.

Mr. McCORMACK. In order to permit the elected officials of the people to more efficiently represent them, is that correct?

Mr. VINSON. That is correct.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman from Texas.

Mr. DIES. Will any of this $7,500,000 be used to change or renovate the Congressional Hotel?

Mr. VINSON. No. Let me read from a statement:

Plans and specifications for the excavation, sheet piling, foundation piling, and foundation for the new building are expected to be completed by August 1, 1957, and a contract awarded shortly thereafter, and work under the contract completed by the fall of 1958, at an estimated cost of $7,440,000.

This is to carry on the very next step of the program. I sincerely and respectfully request that the House reject the pending amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. RAY].

The question was taken; and on a division (demanded by Mr. RAY) there were—ayes 73, noes 132.

So the amendment was rejected.

The Clerk read as follows:

LIBRARY OF CONGRESS

Salaries and expenses: For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; $5,875,000.

Mr. BUDGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUDGE: Page 17, line 8, strike out "$5,875,000" and insert "$5,720,020."

Mr. BUDGE. Mr. Chairman, in this session of the Congress the first two appropriation bills went through the House of Representatives with additional employees. Since that time I think that the House has very well demonstrated that it does not feel that the other departments of the Government of these United States should employ additional persons at this time. In the Department of Defense appropriation bill which was reported by the Committee on Appropriations today there is a reduction in civilian employment of over 5,000 people. The bill before us today, in three separate items following down the page, and all referring to the Library of Congress, adds 50 new employees to this arm of the legislative branch of the Government. If there is anything which we should do in this august body, it should be to treat ourselves as we attempt to treat the other agencies of the Government.

When I first made inquiry as to the purpose of these 50 additional employees at a cost of $213,000 in direct salary costs, I was informed that they were spread generally throughout the Library of Congress and that a substantial portion of them were to work in the program for the blind which is carried on by the Library of Congress. I find that only one such employee is called for in this bill; only 1 out of the 51 new employees. The other 50 do not represent any critical type of employment as near as I can determine. They are simply additional people to handle a lot of things in the Library of Congress that the Library of Congress actually has no business accumulating. They not only store books over there, but you can find almost any article that is made by man that is being stored in the Library of Congress.

I think just to be consistent that we should certainly deny to an arm of our own legislative branch increased employees at this time. The purpose of this amendment is simply to retain the employment in the Library of Congress at exactly the same level which it has this year with the exception of the additional employee which is granted later in the bill for the program which is carried on for the blind. I certainly do not feel that that employee should be eliminated, but I do feel that the 50 who are called for in the general classifications should be eliminated. There was certainly no better case made by the Library of Congress for the employment of these individuals than has been made by a great many other agencies which wanted to increase their personnel over the 1957 level.

Mr. Chairman, I do not believe that the American people at this particular time want us adding additional civilian employees. I think that the subcomittee that worked on this bill was very cognizant of that fact in that throughout the bill there are very, very minor increases in personnel with this one exception of 50 new employees in general classifications for the Library of Congress. I hope that we can be consistent in our efforts of economy and economize in our own legislative branch as we have asked the executive branch to economize, and I hope that the amendment will be agreed to.

Mr. ROONEY. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Chairman, amendments drawn hastily on the floor of the House or in full committee always wind up with the creation of a distorted factual situation. The distinguished gentleman from Idaho, my good friend [Mr. BUDGE] is a member of the Interior Department Subcommittee on Appropriations.

Mr. BUDGE. Mr. Chairman, will the gentleman yield in view of his statement made just now?

Mr. ROONEY. Just a moment; please do not interrupt me at this point. The gentleman from Idaho made no objection when the Interior Department was recently allowed a substantial number of new and additional employees. A while ago I said I though the number was over 1,000, possibly 1,100 to 1,200; but I have checked since and now find that his subcommittee allowed 1,600 new and additional employees for the Interior Department in the coming fiscal year.

The gentleman's pending amendment does not concern 1,600 employees and it does not concern 50 employees. It would concern merely 35 employees at a cost of $148,980. And what grade employees are they? Why, for the most part, they are little GS–3's and 4's and 5's, like most of the people who work over there in the Library of Congress.

Please do not forget that this is the largest library in the world, and as I pointed out before it has the richest and the best collection of items in the world.

Mr. HORAN. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Washington.

Mr. HORAN. I think this is all wrapped up in the fact that in the last 10 years the collections in the Library have increased by more than 67 percent while the personnel there have increased less than 5 percent.

Mr. ROONEY. The gentleman is exactly right. I want to point out something that I did not point out awhile ago during general debate. In the Library of Congress they annually carry out about $3 million a year of work in connection with national defense. The Department of Defense depends upon the Library of Congress for many special projects and analyses. The Library of Congress is a valuable source of both materials and skills for this purpose. The collections in the Library of Congress, which are so far behind in backlog that it is deplorable, should be kept in good shape to facilitate the Department of Defense work each year, for which the Library of Congress is reimbursed to the extent of $3 million. I have already pointed out that a chronic backlog situation impairs the ability of the Library to render proper service to the Congress, including the service rendered by the Legislative Reference Service.

These are only 35 employees and, as the distinguished Speaker of the House said earlier today, this $148,000 is a mere bagatelle in President Eisenhower's huge budget.

Mr. BUDGE. Mr. Chairman, will the gentleman yield to me?

Mr. ROONEY. I now gladly yield to my distinguished friend from Idaho.

Mr. BUDGE. Mr. Chairman, I simply wanted to correct the gentleman from New York as to this amendment being drawn in haste. I thought I explained to the gentleman from New York and the membership of the Committee of the Whole House that there are 3 amendments that I had in mind, which would affect 50 employees. I resent the remark of the gentleman that the amendment was not properly drawn. It was properly drawn and the gentleman knows it.

Mr. ROONEY. Does not the gentleman understand that his amendment and the amount of money involved in it, refers not to 50 employees but to 35 employees?

Mr. BUDGE. I understand that perfectly well.

Mr. ROONEY. Then why did the gentleman tell the Committee of the Whole that his amendment referred to 50 employees?

Mr. BUDGE. I explained that I had 3 amendments, that there were 2 amendments to follow this, and that the total involved 50 employees. That is the only way you can reduce the number of employees, by individual amendments to each item. And the gentleman knows it.

Mr. ROONEY. Mr. Chairman, you are not going to appreciably reduce the President's budget by such an amendment as this which concerns only $148,000; affecting 35 minor employees over in the Library of Congress. And as was pointed out by the distinguished gentleman from Washington [Mr. HORAN], the collections there have increased, in 10 years, by 67 percent whereas the basic staff has been increased only to the extent of 4.7 percent.

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Virginia.

Mr. GARY. Is it not a fact that the books and periodicals housed in the Library of Congress are absolutely useless unless they are properly stacked and cataloged; and that you have to have an adequate force to catalog them and stack them properly?

Mr. ROONEY. That is exactly so.

Mr. Chairman, I suggest that the pending amendment be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho [Mr. BUDGE].

The question was taken; and on a division (demanded by Mr. BUDGE) there were—ayes 57, noes 89.

So the amendment was rejected.

Mr. BUDGE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I had two other amendments at the Clerk's desk which I shall not offer in view of the action on this amendment.

I do feel that it is rather unfortunate that when we offer an amendment in all seriousness and sincerity with regard to things in which we believe that there should be responses made which reflect upon either our integrity or our ability. I have studied this matter very carefully. I received the information from sources which I knew were accurate. I attempted to explain to the House that it required three amendments to reach the 50 employees that were being added by this bill to the Library of Congress. I offered this particular amendment at the only place it could be offered to reduce the initial number of employees. Had the action been favorable I would have attempted to see that the other two were adopted.

I hope that in the further consideration of appropriation bills those of us who happen to believe in economy and want economy will not be constantly impugned upon the floor of the House.

Mr. ROONEY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I do hope that I was not being given a lecture during the course of the remarks of my distinguished friend, the gentleman from Idaho. I do hope the gentleman was not trying to do that. I deal with facts and I am by nature vehement in my statements with regard to what I believe are the facts, but I never attack the integrity or standing of a Member of the House of Representatives.

Mr. BUDGE. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Idaho.

Mr. BUDGE. I distinctly heard the gentleman say that the amendment was drawn hastily on the floor of the House. The gentleman's point was that it was poorly drawn.

Mr. ROONEY. If the gentleman persists in going into that, may I say he presented a similar amendment last Thursday when this bill was before the full committee. I have the figures right here on this very copy of the bill I had at that time. The gentleman then sought to reduce this item, not by $148,000, but by $212,318. But the latter amount included not only salaries and expenses of the Library of Congress but the Legislative Reference Service, the distribution of card catalogs, and books for the blind.

Mr. BUDGE. If the gentleman will yield further, I do not want to prolong this but one reason for the failure of the original amendment was that the Members were led to believe it would affect the number of people who were to be employed and work on this program for the blind. I would ask the gentleman if it is not the fact that only 1 of the approximately 50 employees is to work on that program.

Mr. ROONEY. That is the fact, but that one employee would have been denied the books for the blind program if the gentleman's amendment had been adopted in full committee last Thursday morning. That is the point.

The Clerk concluded the reading of the bill.

Mr. NORRELL. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with an amendment with the recommendation that the amendment be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. WALTER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 7599) making appropriations for the legislative branch for the fiscal year ending June 30, 1958, and for other purposes, had directed him to report the bill back to the House with an amendment with the recommendation that the amendment be agreed to, and that the bill, as amended, do pass.

Mr. NORRELL. Mr. Speaker, I move the previous question on the bill, and the amendment thereto, to final passage.

The previous question was ordered.

The SPEAKER. The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. GROSS. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. GROSS. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion offered by the gentleman from Iowa.

The Clerk read as follows:

Mr. GROSS moves to recommit the bill, H. R. 7599, to the Committee on Appropriations with instructions that the appropriation of

$7,500,000 for the acquisition of property, construction, and equipment, additional House office building be stricken from the bill.

Mr. NORRELL. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. GROSS) there were—ayes 51, noes 117.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and I make the point of order that there is no quorum present.

Mr. McCORMACK. Mr. Speaker, we have an agreement that in case of a rollcall today the rollcall will go over until tomorrow.

I ask unanimous consent, Mr. Speaker, that further consideration of this bill be postponed until tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, reserving the right to object, does that mean there will be no rollcall tomorrow if the gentleman can head it off?

Mr. McCORMACK. I can only make one promise to the gentleman, that I will not be a party to trying to stop the gentleman from having a rollcall. I can only speak for myself.

The SPEAKER. The Chair will state this, that there can be a rollcall in the House any time a sufficient number of Members rise to ask for it.

Mr. McCORMACK. I am simply trying to carry out an agreement once made.

Mr. GAVIN. Reserving the right to object, Mr. Speaker, I think that just in the spirit of fair play, some 30 members of the Pennsylvania delegation who had to be home on account of election, should be protected. Everybody cannot be here.

Mr. GROSS. Well, who is scheduling the legislation?

Mr. GAVIN. I am only talking in behalf of the Members from Pennsylvania who could not be here.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. McCORMACK]?

Mr. BASS of New Hampshire. Mr. Speaker, I object.

ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 12 minutes p. m.), the House adjourned until tomorrow, Wednesday, May 22, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

875. A letter from the Secretary of Defense, transmitting a draft of proposed legislation entitled "A bill to provide additional facilities necessary for the administration and training of units of the Reserve components of the Armed Forces of the United States,"; to the Committee on Armed Services.

876. A letter from the Acting Secretary of the Navy, relative to the transfer of one 45-foot crash boat, hull No. C-7597, to the North Eastern Naval Cadets, Inc., Hackensack, N. J., pursuant to title 10, United States Code, section 7308; to the Committee on Armed Services.

877. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Federal home-loan banks for the fiscal year ended June 30, 1956 (H. Doc. 181); to the Committee on Government Operations and ordered to be printed.

878. A letter from the Comptroller General of the United States, transmitting a report on the review of the Richland, Wash., Appraisal Office, Federal Housing Administration, Housing and Home Finance Agency, September 1956, regarding the appraisal of commercial properties in Richland, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Banking and Currency.

879. A letter from the Acting Secretary of the Treasury, transmitting a supplemental report covering claims paid on account of correction of military records of the Coast Guard which were inadvertently omitted from previous reports, pursuant to Public Law 220, 82d Congress; to the Committee on Armed Services.

880. A letter from the Secretary of the Army, transmitting a report of the number of officers on duty with the Department of the Army and the Army General Staff on March 31, 1957, pursuant to Public Law 581, 81st Congress; to the Committee on Armed Services.

881. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, relative to the case of Mary Elizabeth Handlovitz, A-4961824, involving suspension of deportation, and requesting that it be withdrawn and returned to the jurisdiction of this Service, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

882. A letter from the Secretary of Defense, transmitting the Fourth Biennial Report of the Secretary of Defense listing all currently available authorization for military, naval, and Air Force public works projects for which adequate funds have not been appropriated as of December 31, 1956, pursuant to Public Law 564, 81st Congress; to the Committee on Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of Missouri: Committee on House Administration. House Concurrent Resolution 174. Concurrent resolution authorizing the printing of additional copies of part 1 of the hearing on the Department of Defense appropriations for 1958; without amendment (Rept. No. 467). Ordered to be printed.

Mr. JONES of Missouri: Committee on House Administration. House Resolution 229. Resolution authorizing the printing of additional copies of House Report No. 10, entitled "United States Aid Operations in Iran"; without amendment (Rept. No. 468). Ordered to be printed.

Mr. JONES of Missouri: Committee on House Administration. Senate Concurrent Resolution 24. Concurrent resolution authorizing the printing of additional copies of Senate Report 139, entitled "Technical Assistance"; without amendment (Rept. No. 469). Ordered to be printed.

Mr. JONES of Missouri: Committee on House Administration. H. R. 7234. A bill to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress; without amendment (Rept. No. 470). Ordered to be printed.

Mr. MAHON: Committee on Appropriations. H. R. 7665. A bill making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes; without amendment (Rept. No. 471). Referred to the Committee of the Whole House on the State of the Union.

Mr. COLMER: Committee on Rules. House Resolution 259. Resolution for consideration of H. R. 6127. A bill to provide means for further securing and protecting the civil rights of persons within the jurisdiction of the United States; without amendment (Rept. No. 472). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MAHON:

H. R. 7665. A bill making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes.

By Mr. ASHLEY:

H. R. 7666. A bill to amend Public Law 587 by permitting the withholding by the Federal Government from wages of employees of certain taxes imposed by municipalities; to the Committee on Ways and Means.

By Mr. BUCKLEY (by request):

H. R. 7667. A bill to amend the Public Buildings Act of 1949, to authorize the Administrator of General Services to name, rename, or otherwise designate any building under the custody and control of the General Services Administration; to the Committee on Public Works.

By Mr. DINGELL:

H. R. 7668. A bill to repeal the excise tax on the use of safe-deposit boxes; to the Committee on Ways and Means.

H. R. 7669. A bill to increase from $4,200 to $6,200 the amount of annual earnings which may be taken into account in computing benefits under title II of the Social Security Act and which are subject to social-security taxes; to the Committee on Ways and Means.

By Mr. EBERHARTER:

H. R. 7670. A bill to amend the Internal Revenue Code of 1954 to provide that clubs shall not be denied exemption from corporate income taxes if they would be exempt from such taxes as benevolent life-insurance associations but for their activities as clubs; to the Committee on Ways and Means.

By Mr. FLYNT:

H. R. 7671. A bill to amend section 116 (4) of chapter 10 of the Federal Bankruptcy Act, to make certain equipment trust provisions applicable to aircraft and aircraft equipment of air carriers; to the Committee on the Judiciary.

H. R. 7672. A bill to amend paragraph (4) of section 13 of the Interstate Commerce Act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. GUBSER:

H. R. 7673. A bill to adjust the compensation of officers and employees of the United States, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 7674. A bill to amend the Tariff Act of 1930 by placing beta-ray spectrometers on the free list; to the Committee on Ways and Means.

By Mr. LATHAM:

H. R. 7675. A bill to amend the Internal Revenue Code of 1954 to encourage the establishment of voluntary pension plans by individuals, to promote thrift, and to stimulate expansion of employment through investment; to the Committee on Ways and Means.

By Mr. LESINSKI:

H. R. 7676. A bill to provide for a program of Federal loans to assist States and local communities in building schools; to the Committee on Education and Labor.

By Mr. PORTER:

H. R. 7677. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. RAINS:

H. R. 7678. A bill to provide an annual income program for owners of small tracts of land who develop thereon approved commercial forestry, and to assist in such development; to the Committee on Agriculture.

By Mr. REUSS:

H. R. 7679. A bill to provide that for the purpose of disapproval by the President each provision of an appropriation bill shall be considered a separate bill; to the Committee on the Judiciary.

By Mr. ULLMAN:

H. R. 7680. A bill to provide for the construction by the Secretary of the Interior of the Bully Creek Dam and other facilities, Vale Federal reclamation project, Oregon; to the Committee on Interior and Insular Affairs.

By Mr. WESTLAND:

H. R. 7681. A bill to authorize the Secretary of the Interior to convey certain land with the improvements located thereon to the Lummi Indian Tribe for the use and benefit of the Lummi Tribe; to the Committee on Interior and Insular Affairs.

By Mr. ULLMAN:

H. R. 7682. A bill to amend the Federal Power Act, as amended, with respect to allowances in the cost of service and accelerated amortization and liberalized depreciation for income-tax purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. YOUNGER:

H. R. 7683. A bill to simplify payroll administration in the House of Representatives by providing that the salaries of certain employees of the House and the clerk hire allowance of Members, shall consist of aggregate annual amounts rather than basic annual amounts plus additional amounts, and for other purposes; to the Committee on House Administration.

By Mr. GUBSER:

H. J. Res. 337. Joint resolution to provide that an aircraft carrier shall be named the *Enterprise;* to the Committee on Armed Services.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL (by request):

H. R. 7684. A bill to provide that the Secretary of the Navy shall transfer to David J. Carlson and Gerald J. Geyer certain interests of the United States in an invention; to the Committee on the Judiciary.

H. R. 7685. A bill for the relief of Mrs. Eldrey L. Whaley; to the Committee on the Judiciary.

By Mr. COLLIER:

H. R. 7686. A bill for the relief of S. N. T. Fratelli Gondrand; to the Committee on the Judiciary.

By Mr. COLLIER (by request):

H. R. 7687. A bill for the relief of Ante Pavkovic; to the Committee on the Judiciary.

By Mr. DEVEREUX:

H. R. 7688. A bill for the relief of Filbert L. Moore; to the Committee on the Judiciary.

By Mr. DONOHUE:

H. R. 7689. A bill for the relief of Mrs. Angela Maria Staia-Labellarte; to the Committee on the Judiciary.

H. R. 7690. A bill for the relief of Giovanni Pagano; to the Committee on the Judiciary.

By Mr. FINO:

H. R. 7691. A bill for the relief of Fernando Del Bove; to the Committee on the Judiciary.

By Mr. HAYS of Arkansas:

H. R. 7692. A bill for the relief of Mrs. Cyrus Andrew Ashcraft; to the Committee on the Judiciary.

By Mrs. KELLY of New York:

H. R. 7693. A bill for the relief of Sofie Schneid and Carmen Delores Schneid; to the Committee on the Judiciary.

By Mr. WALTER:

H. J. Res. 338. Joint resolution for the relief of certain aliens; to the Committee on the Judiciary.

H. J. Res. 339. Joint resolution to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens; to the Committee on the Judiciary.

H. J. Res. 340. Joint resolution to facilitate the admission into the United States of certain aliens; to the Committee on the Judiciary.

By Mr. LANE:

H. Res. 260. Resolution providing for sending the bill H. R. 3320 and accompanying papers to the Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

251. By Mr. DEROUNIAN: Petition of the North Sea Mine Force Association, Inc., petitioning consideration of their resolution with reference to the action of Congressman LIPSCOMB in submitting a bill, H. R. 761, to recognize the naval service performed in sweeping the North Sea of mines in 1919 as service in World War I, these men being exposed to great danger, having suffered a high percentage of fatalities and permanent injuries, without extra pay, bonus, or other emolument; to the Committee on Veterans' Affairs.

252. By Mrs. ST. GEORGE: Petition of Middletown Chamber of Commerce, Middletown, N. Y., in support of the individual and corporate tax-reduction program of the National Association of Manufacturers; to the Committee on Ways and Means.

253. By the SPEAKER: Petition of the recording secretary-general, National Society, Daughters of the American Revolution, Washington, D. C., petitioning consideration of their resolution with reference to commending the Federal Bureau of Investigation and the service rendered by Congressional committees investigating matters pertaining to internal security; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Michigan Week

EXTENSION OF REMARKS

OF

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 21, 1957

Mr. BROOMFIELD. Mr. Speaker, I hope that our fellow Congressmen will join all of us from the Michigan delegation in our celebration of Michigan Week. Originated in 1954, Michigan Week has become an increasingly important event in our State.

The purpose of Michigan Week is best pointed up by the State legislature's resolution summoning the people of Michigan to celebrate the period in which residents of our State and of other States may become better acquainted with Michigan's boundless advantages and opportunities in industry, natural resources, agriculture, recreation, and culture.

We in Michigan could point with pride toward some of the outstanding physical features of our State: The 3,121 miles of inland seashore, the 11,000 inland lakes, the unexcelled fishing and hunting, the forest-fringed streams, all of which are unparalleled in the United States.

Or we might point out the 19 million acres of green-wooded vacation lands, the historic land of Indians, French, and furs. Or the winter wonders of skiing and tobogganing on slopes unexcelled this side of the Alps.

Instead, we want to draw your attention to the heart of a Nation. To a State whose sinews helped spell victory for the Allied Forces during World War II. To a State which has resumed its role as the top producer of automobiles once the battles were won.

I hope you will join with me in celebrating Michigan Week. In commemoration of this event, I am sending you a scale model of one of our State's projects donated by Chrysler Corp.

I agree that all of you have beautiful States to visit. Some of you have historic spots which are unrivaled in the world in their significance. But the fact remains that very few of you would ever have the pleasure of visiting these wonders if it were not for our leading item of manufacture—the automobile.

Michigan Week is a 7-day celebration by the People of Michigan proclaiming their freedom, their blessings, and their hopes for the future. It is a celebration by the people of Michigan that proclaims their togetherness through their active cooperation as members of such groups as churches, schools, business and civic associations, veterans' organizations, labor unions, and luncheon clubs. In this way Michigan Week dramatically illustrates the fact that each individual in Michigan contributes to his State and also gains something from it.

Michigan Week points up the significant fact that the place where people live is an important unifying influence in their lives, an influence which can be made more favorable through the

understanding, the will, and the action of all the people.

All of this concept is symbolized in the official Michigan Week emblem, the illustration of the proud robin chirping, "Its great to live in Michigan."

During Michigan Week the robin, official State bird, sings its message over the radio and on TV, in newspapers, in publications, and through all other forms of mass communication. Official Michigan Week banners, posters, buttons, bumper strips, and other materials, created by the State committee and produced at printing cost, are distributed to participating Michigan Week committees in every county in the State.

The Michigan flag bearing the State coat of arms, with its history dating back to 1837, is given special prominence during Michigan Week. It is proudly displayed with the American flag at meetings and events, and in public places.

The togetherness of Michigan people becomes a vibrant living fact in the events of Michigan Week celebrated in cities, towns, and villages each day throughout the State. All segments of community life take part in meetings, programs, talks, and discussions. Veterans' organizations conduct Operation Facelift to spark and to carry through community improvements; community forums consider what Michigan needs in the next 10 years to improve the livelihood of its citizens; Wolverine frontiersman awards are made to distinguished Michigan individuals for their attainment in opening new frontiers to the people of their Nation and State; and national sports figures are named to the Michigan Sports Hall of Fame.

The ideas, plans, and projects of Michigan Week which deepen the unifying belief that "its great to live in Michigan," help create the will to make Michigan even greater in the future.

Discharge Petitions

EXTENSION OF REMARKS
OF
HON. CHARLES E. CHAMBERLAIN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 21, 1957

Mr. CHAMBERLAIN. Mr. Speaker, discharge petitions have been the subject of much discussion here in the House during recent weeks. Under leave to extend my remarks, I would like to define briefly my personal position with reference to such petitions. To me, an important legislative principle is involved.

While I am not opposed to the rules of the House providing for discharge petitions, I do believe the taking of legislation from the consideration of the properly designated committee disrupts the orderly functioning of the legislative process. For this reason, I am presently of the opinion that I will adhere to a policy of not signing any discharge petitions. Mr. Speaker, I have confidence in the committees of the House. Although they may not always act the way I might wish, nor as rapidly, nevertheless, our committee system has served the legislative branch of the Government well.

Presently, discharge petitions are on the desk in connection with the civil rights bill and also a bill providing increased salaries for postal employees. I have stated publicly before, and I wish to state again, that I will support the civil rights legislation as recommended by the President. However, I do not propose to sign such a discharge petition, as I do not believe it is sound legislative policy.

Likewise, I am sympathetic with respect to the problems of the postal employees and believe there is merit in their request for a salary adjustment, in some amount. Again, I do not propose to sign the discharge petition for the reasons that I have just stated.

I make this statement in order that my position may not be misunderstood by either the supporters or the opponents of the pending legislation that I have mentioned.

A Program To Help the Depressed Poultry Industry

EXTENSION OF REMARKS
OF
HON. PERKINS BASS
OF NEW HAMPSHIRE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 21, 1957

Mr. BASS of New Hampshire. Mr. Speaker, under unanimous consent, I include in the CONGRESSIONAL RECORD a statement made by me before Subcommittee No. 6 of the Select Committee on Small Business of the House, which is investigating the present production crisis in the poultry industry. The survival of this industry is of vital importance to the people of my district in New Hampshire, and I call this problem to the attention of the Members of the House:

STATEMENT OF HON. PERKINS BASS, UNITED STATES REPRESENTATIVE, SECOND DISTRICT OF NEW HAMPSHIRE, BEFORE SUBCOMMITTEE NO. 6, SELECT COMMITTEE ON SMALL BUSINESS, HOUSE OF REPRESENTATIVES

Mr. Chairman, the poultry industry is a very important part of the economy of the Second District of New Hampshire which I am privileged to represent in Congress. Just less than 50 percent of all of our agricultural income in New Hampshire is derived from this key industry and this industry is sick. It is sick because tremendous overproduction of poultry products has brought prices in the broiler, egg, and hatchery markets down to an all time low. Scores of once healthy poultry businesses in New Hampshire have thereby been destroyed or imperiled.

For some months, I have investigated in detail this problem and I am pleased to offer to the committee for its earliest consideration and possible recommendation a seven point program of executive action. This is an emergency program dictated by the severe poultry crisis. My program attempts to provide an immediate Government assist to the poultrymen in the form of direct Government and related purchasing programs. However, at the same time it attempts to restrict other Government agencies from extending credit where such credit would expand poultry production. This degree of coordination is essential if we are to constructively attack the overproduction problem. In addition to programs of purchasing and credit restrictions, I believe we must increase our present efforts to stimulate consumption of poultry products at home and abroad.

And finally, Mr. Chairman, I believe we need a detailed investigation of integration and its effects. Integration has been charged with much of the difficulties that the poultry industry is experiencing. A detailed investigation by the Justice Department is important if we are to take constructive remedial action, and this investigation could do much to clear the air.

My program is as follows:

1. The President of the United States shall direct the various credit agencies of the Government to cease granting loans to poultrymen where such loans are for the purpose of expanding egg and broiler production. This ban to continue until the Secretary of Agriculture shall decide that present acute overproduction has ended.

2. The Congress shall direct the Attorney General to conduct an investigation of the operation, effect and possible violation of antitrust legislation of the so-called integration system of poultry production and marketing and that the Attorney General shall report his findings to the Congress by January 1, 1958, and take what other steps are required.

3. The Secretary of Agriculture shall continue and expand the present research programs to stimulate the consumption of poultry products.

4. The Secretary of Agriculture shall encourage procurement officials of the military services and other Federal agencies to expand the purchasing and use of poultry products.

5. Government purchases of poultry products to the fullest extent possible shall be made locally.

6. The Secretary of Agriculture should utilize his authority to the fullest extent possible to distribute poultry products through the school lunch program and other authorized outlets. He should also encourage the local school lunch procurement agencies to purchase and utilize poultry products.

7. The Secretary of Agriculture should utilize under Public Law 480 the authority to increase sales of poultry products in foreign markets.

Mr. Chairman, the poultrymen of New Hampshire need our help. In the past, Congress has not failed other small farmers and businessmen. Let us not fail the poultrymen.

Salute to Station WBRC–TV

EXTENSION OF REMARKS
OF
HON. GEORGE HUDDLESTON, JR.
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 21, 1957

Mr. HUDDLESTON. Mr. Speaker, the Department of Defense tonight is honoring television station WBRC–TV, at Birmingham, Ala., for its outstanding contributions to the Armed Forces Reserve program. It is significant indeed that WBRC–TV is the first television station in the United States to receive the

Defense Department's highest award for Reserve activities.

The Reserve program is, of course, vital to our national security and, therefore, needs the support of everyone. It is encouraging that the management of WBRC–TV has worked so closely with reservists and Reserve functions. As a mass communication medium, this television station has promoted the Reserve program in its news and special events programing. In addition, the station management has afforded its own employees every incentive to become reservists.

The credit for this unselfish policy is due to Mr. George B. Storer, Sr., head of the Storer Broadcasting Co., and Mr. J. Robert Kerns, vice president and managing director of WBRC–TV. They have not forgotten its obligation to the public interest. It has been their considered judgment that it is of the utmost importance and certainly in the public interest to support the Reserve activities of the various services 100 percent.

A majority of WBRC–TV's staff are members of the Reserve. When their units hold encampments or go on maneuvers, the employees are granted leave with full pay without having their vacation periods affected. This in itself is a patriotic gesture. Also, the station allows reservists use of its meeting rooms and other facilities.

WBRC–TV has furthered the Reserve program in many ways. News Director Leo Willette has regularly featured Reserve news on his news programs. Many special events, such as Armed Forces Day and Veterans' Day, have been telecast. Reservists have been invited as special guests on many shows. The Reserve story has been effectively told through the concerted efforts of the entire WBRC–TV staff.

Mr. Gary Arnold, a staff announcer, who is a technical sergeant in the Air Force Reserve, has been among the Reserve's most active boosters. It was he who first called attention to WBRC–TV's many activities in behalf of the Reserve program. His initial recommendation fast met with official approval. In notifying Mr. Kerns of the award, Secretary of Defense Wilson wrote, in part:

> The award is provided to express the Department's appreciation for the outstanding cooperation to reservists and Reserve activities achieved through the personnel policy you have established. You have thus encouraged and assisted your reservists in fulfilling their military obligations. Such patriotic foresight provides real assistance to the success of our defense effort, and the Department is deeply grateful.

Here is the text of the citation which will be formally presented to WBRC–TV tonight:

> WBRC–TV, an affiliate of the Storer Broadcasting Co., Birmingham, Ala., is cited for outstanding cooperation with reservists and Reserve activities. This organization has encouraged its employees to participate in Reserve activities by such cooperative policies as providing leave, in addition to annual vacation, for Reserve training, with the difference between civilian and military pay reimbursed; sponsoring guest radio and TV appearances of Reserve members; featuring special Armed Forces news features; telecasting military functions such as Armed Forces Day, Veterans' Day, and other special events; allowing the reservists the use of its meeting rooms, bulletin boards, and equipment; and providing company facilities for Reserve activities. This award is presented as tangible evidence of the appreciation of the Department of Defense.

WBRC–TV's patriotic policy of actively cooperating fully with reservists and Reserve activities is to be highly commended. I hope this station's outstanding contribution to the Reserve program will serve as a pattern and incentive to many other organizations.

We are proud to salute WBRC–TV for its significant contribution to our national security.

Channelization of the Ohio River

EXTENSION OF REMARKS
OF
HON. WILL E. NEAL
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 21, 1957

Mr. NEAL. Mr. Speaker, in appropriating funds for civil works when economy in Government spending is a universal watchword, due consideration should be given to those projects of proven economic value.

Channelization of the Ohio River has proven its economic soundness beyond all estimates claimed by its original sponsors. The replacement program substituting high-level dams, each of which will eliminate three or more obsolete structures, is well underway. To delay the progress of this program by failure to appropriate sufficient funds will result in substantial financial loss to the Federal Treasury as well as the huge investments along the river course for utilization of vastly increased traffic. There can be no economy in withholding funds from well-established programs that have in the past and will continue to prove their economic value.

The postwar years have witnessed an industrial and economic renaissance in the Ohio Valley. Everywhere along the main stream and its tributaries, industry is seeking new sites for plant construction. Chemicals, aluminum, iron and steel, vast new electric power plants, and other basic industries have been attracted to the valley by its excellent labor force, its boundless deposits of coal and chemical brines, and above all, by that most precious of all natural resources—water—water both for drinking and for industrial processing and for efficient low-cost transportation of bulk freight.

These new billions of investment on which the economic resurgence of this great region is based, have been drawn by the magnet of reduced transportation costs. And that enormous economic incentive has been provided by the original Ohio River canalization to a stable 9-foot depth completed in 1929. The irony is that the original project was outmoded before it was complete. Designed to handle 13 million tons of freight annually, the canalized river carried 22 million tons in 1929. In 1955 the river carried 71.5 million tons, 37 percent more than the estimated traffic for the St. Lawrence Seaway in 1965.

But that enormous traffic burden, carried in tows often more than 1,000 feet in length through 600-foot locks, has taxed the aging facilities to the utmost. Breakdowns are frequent. Many of the locks are in an advanced state of deterioration, and the threat of collapse is increasingly serious. Delays from traffic congestion impose excessive costs. And recently, the crowding has become so serious that the safety of crews, vessels, and cargoes is imperiled.

The advantages of low-cost transportation, which are the keystone in the arch of the valley's prosperity, are being eroded by the inadequacies of existing navigation facilities.

This development is particularly serious for the State of West Virginia. The position of our great State as the No. 1 coal-producing State in the Union depends upon low-cost water transportation access to distant markets. For 90 percent or more of our coal is sold outside the State. It is the literal truth that the welfare of the 46 percent of our labor force engaged in the coal industry is directly dependent upon the maintenance of efficient low-cost transportation on the Ohio River.

Not only will failure to correct the deficiencies of the Ohio River navigation systems injure our coal industry, it will soon begin to retard the development of industry which has of late years brought new life and prosperity to river communities which suffered long from poverty, stagnation, and neglect.

These are the reasons why we in West Virginia are vitally interested in the United States Army engineers' long-range modernization plan for the Ohio River. Already the Congress has wisely provided funds for a significant beginning of that program. Four great modern locks and dams are now under construction on the Ohio, which will eliminate 13 small inadequate structures. The new facilities will provide deeper, more stable pools for navigation; they will sharply reduce locking time, cut maintenance costs, and eliminate bottlenecks and the dangers of collapse of old facilities in the portions of the river which they will serve. They will augment water supply for homes and industry and they will create recreational benefits of untold value. But they are only the first steps. And no one of those under construction, nor all of them together will solve the problem until the entire job is done. For the Ohio is one river, not a series of disconnected segments. It takes only one bottleneck to impede the mounting volumes of through traffic which move not only from one end of the river to another but to remote destinations on the Mississippi, the Great Lakes, and the Gulf coast.

This great integrated modernization project must move forward with all possible dispatch to completion, if the Ohio River Basin, the industrial heart of the Nation, the atomic center of America, is to play its full part in the development of our economic potential for prosperity in peace and strength in time of war.

Every consideration of sound planning for the national welfare and security argues for orderly and efficient progress of the overall program, as a national project of the highest priority. Unnecessary delay or postponement of projects of such compelling urgency in a period of rising construction costs, is a false economy. The capabilities of the agency charged with construction responsibility and maximum efficiency of scheduling and construction should be the sole factors in determining the progress of the work. By these standards the urgently needed New Richmond locks and dam above Cincinnati should be commenced in fiscal 1958 and sufficient money appropriated for advance planning on the Pike Island project above Wheeling to permit construction on that essential project to begin in fiscal 1959.

Opinion and Comment From the Fifth District of Wisconsin

EXTENSION OF REMARKS
OF

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 21, 1957

Mr. REUSS. Mr. Speaker, my 1957 Opinion Questionnaire was recently sent out to obtain the views of my constituents on four questions. More than 1,000 replies were received, and I have just tabulated the results. I am sure that many of my colleagues will be interested in the results, and in the supplementary comments volunteered by my constituents.

1957 OPINION QUESTIONNAIRE

Question No. 1:

Congressmen have different theories on how best to serve the citizens they represent. For example:

Type A, in order to promote private or local interests of his constituents most effectively, may follow the line of least resistance and avoid fighting hard on controversial questions.

Type B may go to bat vigorously for what he believes in, even though by so doing he may antagonize other Congressmen and thus be less able to obtain his colleagues' support for measures of special concern to his own district.

If you had to make a choice, would you think it better to be a type A or type B Congressman?

Answers: Type A, 14 percent; type B, 86 percent.

"I think a fighter is always respected, even by his colleagues," was a typical comment. Another: "I dislike anyone taking a back seat—too timid to speak on issues. I believe in giving them hell."

Some persons checked type B with evident hesitation, expressing the view that the proper ground lay somewhere between A and B.

I would like to see my Congressman be firm and bat vigorously on issues where principles are involved, but a compromising give-and-take attitude may be wise in other cases—

One woman said.

It requires study, shrewd judgment and a good personality to trade votes effectively—

Commented another.

And a dentist came up with this one:

How about a type C, a vigorous diplomat?

PRESIDENTIAL LEADERSHIP

Question No. 2:

Do you feel that President Eisenhower is or is not providing adequate leadership?

Answers: Is, 33 percent; is not, 67 percent.

On the affirmative side, there were partisan comments:

Ike has given the Government back to the people after 20 years of mismanagement.

And nonpartisan ones:

I feel the President is not satisfying either party 100 percent but watching the interests of all the people, or at least he is trying to.

A number of those who thought that the President had failed in leadership expressed either their sympathy or liking for him. Some felt he faced an impossible task requiring superhuman abilities; others mentioned the handicap of ill health; a number saw him as the victim of his own party's obstructionism.

A few specific criticisms:

I think the inadequate national leadership of the present administration is indicated by the apparent confusion regarding the budget.

Ike has failed to utilize his capabilities by not getting men in his Cabinet who would implement, and not question, policies which the President calls his own; by not taking a strong, clear stand on desegregation, and by talking morals when things get rough (Hungary and Suez) and sitting idle when at least some of his principles could be given effect.

President Eisenhower should devote more time for his pay and less to his play.

REPUBLICANS COMMENT

The most bitter attacks seemingly came from members of the President's own party. For example:

Ike is wrong. He has lost his head. I have been a Republican all my life but I am sorry I voted for him. We should bring our own men back home and mind our own business.

Or this one:

The big crusade that began in 1952 has bogged down and will remain so because the real Republicans have been driven into silence by the offensive nature of much of the present administration's program.

And finally:

President Eisenhower's attitude toward inflation—his continuation of policies inaugurated by the Democrats—is appalling. He is creating untold hardships among people, especially old people, with fixed incomes. He is also eliminating the middle class which was the very backbone of this Nation. I'm looking for a new party.

REDUCE TAXES OR DEBT?

Question No. 3:

It appears that the Federal budget now under consideration cannot only be balanced, but a surplus obtained. In your opinion, for which purpose should a surplus be primarily used—for a general tax reduction, or to reduce the national debt?

Answers: Tax reduction, 48 percent; debt reduction, 52 percent.

Those favoring debt reduction argued that the surplus would be too small to give real tax relief; that the national interest calls for debt reduction in good times no matter how attractive tax relief might seem; that failure to reduce the debt merely hands it on to our children and grandchildren; and that tax cuts may be penny wise, pound foolish acts, not only leaving the debt undiminished but also, if achieved by haphazard budget slashing, jeopardizing programs such as foreign aid and defense which will determine whether our country and our children have a peaceful, independent future.

Those who argued for immediate tax reduction had equally strong reasons.

You take my take-home pay of $90.31 every 2 weeks and I cannot afford high taxes—

One person wrote.

I think there should be a general tax reduction because my husband earned $4,056.50 total income last year and we are a family of 4 so we paid in $254 in Federal taxes plus $33.96 in State taxes, and yet our minimum in order to have a decent living standard is supposed to be $5,592. With that we would be able to buy more things, and we sure need a lot of essentials, and that would put more people to work and they will pay taxes too—

Said a housewife.

One woman wrote that, although she believed in reducing debt, personal and governmental—

Psychologically we have reached a point of frustration because of hidden taxes and double and triple taxes on money earned, and it is therefore time to reduce taxes.

Some called particularly for tax reduction for the low income groups, not only on grounds of greatest personal need but also on the contention that increasing the purchasing power of those who spend the major part of their income would provide a boost to the whole economy.

ENTERTAINING DICTATORS

Question No. 4:

Do you think that the United States should invite the chiefs of other nations to be official guests of this country, even if the governments they represent are totalitarian dictatorships?

Answers: Yes, 57 percent; no, 43 percent.

Those who opposed expressed fear or pessimism concerning the results of such visits, assuming that the visitors would represent unfriendly powers.

One man said that "We Americans are so easy going and trustful" that foreign visitors would "pick up a lot of information about our country which could be of great value to them."

Others doubted that such visits would win friends or diminish antagonisms toward us. Some linked arguments against foreign visitors to their opposition to foreign aid programs in general:

It seems every time a chief from another nation is our guest all he wants is money. Let's use this money for the benefit of Americans.

Those who answered "Yes" frequently qualified their replies. They suggested that the visitors and their staffs be closely supervised and that lavish red-carpet welcomes be avoided. Many said that such visits should be carefully timed and their potential benefits weighed in terms of our country's self-interest and the development of a more peaceful world.

The conviction that international tensions can be removed only through contact and negotiation appeared in most of the comments favoring visits by foreign leaders.

"We should not be afraid to show our democracy to anyone" and "Let them see our capitalist country so they get impressed as to how much better life is here" were two typical remarks.

Many replies pointed out that totalitarian governments would not just dissolve if we ignore them. As one said:

While I am opposed to the type of government in some countries, such as China and Yugoslavia, I feel we cannot pretend they don't exist by refusing to recognize them or refusing to invite them to our country as official guests. We must begin somewhere if we want to solve our international problems.

SENATE

WEDNESDAY, MAY 22, 1957

The Chaplain, Rev. Frederick Brown HARRIS, D. D., offered the following prayer:

Eternal God, whose law is truth, and whose statutes stand forever, on each new day we lift with grateful hands the cup of our freedom, crimson with its great cost, conscious that a large part of our lives is our heritage. Thou hast commissioned us to be the trustees of a precious birthright which is our inheritance.

Strengthen the hands, we beseech Thee, of those who here by the will of the people are privileged in this day of high destiny to mold the future by what they do with the past. May the spangled flag of this free land ever be the symbol of hope for the oppressed and the coerced and exploited everywhere. In these grim days, when for power and greed, human rights are mocked and betrayed, may we still labor on with vision and valor for the enthronement on earth of Thy reign of law and love, of equity and righteousness—never doubting the final triumph of Thy redeeming purpose for all Thy children of every race, under all skies. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Monday, May 20, 1957, was approved, and its reading was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 51. An act for the relief of Mary Barme and her two minor children, Steran Barme and Dinah Barme;

S. 94. An act for the relief of Lee Chong Taik;

S. 124. An act for the relief of Josephine Suydam;

S. 162. An act for the relief of Jew Gim Gee;

S. 184. An act for the relief of Mary C. Frederick;

S. 271. An act for the relief of Johannes Sukevainen;

S. 754. An act for the relief of John (Ioannis) Legatos; and

S. 799. An act for the relief of Eldur Elia.

The message also announced that the House had passed the bill (S. 1463) to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House passed the following bills of the Senate, with amendments, in which it requested the concurrence of the Senate:

S. 247. An act for the relief of Max Mazak Terian and his wife, Maria Terian; and

S. 461. An act for the relief of Paul Yen-Hsiung Feng and his wife, Mary Stella Pao-Ching Feng, and their minor child, Joseph Shao-Ying Feng.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 24) authorizing the printing of additional copies of Senate Report 139, entitled "Technical Assistance."

The message further announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 133) for the relief of certain spouses and minor children of citizens of the United States.

The message also announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 1214. An act to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the Armed Forces of the United States during the Korean conflict;

H. R. 1376. An act for the relief of Bernard L. Phipps;

H. R. 1417. An act for the relief of Lienfu Lo, also known as Luke Lo;

H. R. 1501. An act for the relief of Beulah I. Reich;

H. R. 1552. An act for the relief of William H. Barney;

H. R. 1682. An act for the relief of Edward J. Moskot;

H. R. 1754. An act for the relief of Eleanor French Caldwell;

H. R. 1848. An act for the relief of certain aliens;

H. R. 1883. An act for the relief of Benedict M. Kordus;

H. R. 1885. An act for the relief of Edwin Matusiak;

H. R. 1987. An act to provide for an additional payment of $40,000 to the village of Highland Falls, N. Y., toward the cost of the water filtration plant constructed by such village;

H. R. 2083. An act for the relief of Carl A. Willson;

H. R. 2264. An act for the relief of Donald P. Thompson;

H. R. 2964. An act to confer jurisdiction on the United States District Court for the Eastern District of Texas, Jefferson Division, to hear, determine, and render judgment on certain claims of George W. Edwards, Jr., against the United States;

H. R. 3246. An act to authorize the exchange of lands at the United States Naval Station, San Juan, Puerto Rico, between the Commonwealth of Puerto Rico and the United States of America;

H. R. 3281. An act for the relief of Howard S. Gay;

H. R. 3370. An act to amend section 1871 of title 28, United States Code, to increase the mileage and subsistence allowances of grand and petit jurors;

H. R. 3625. An act to amend section 214 of the Interstate Commerce Act, as amended, to prevent the use of arbitrary stock par values to evade Interstate Commerce Commission jurisdiction;

H. R. 4045. An act for the relief of Mrs. Leonard O. Erickson;

H. R. 4154. An act for the relief of the legal guardian of Thomas Brainard, a minor;

H. R. 4342. An act for the relief of Mrs. Thomas L. Davidson;

H. R. 4511. An act to declare a certain portion of Back Cove at Portland, Maine, to be nonnavigable water of the United States;

H. R. 4536. An act for the relief of Martin A. McGrory;

H. R. 4851. An act for the relief of Mrs. M. E. Shelton Pruitt;

H. R. 4945. An act to provide for the conveyance of certain real property in West Palm Beach, Fla., to the Port of Palm Beach District;

H. R. 5237. An act to authorize the Secretary of the Navy to furnish supplies and services to foreign vessels and aircraft, and for other purposes;

H. R. 5341. An act for the relief of John J. Farrelly;

H. R. 5707. An act for the relief of the A. C. Israel Commodity Co., Inc.;

H. R. 5811. An act to amend subdivision b of section 14, discharges, when granted, of the Bankruptcy Act, as amended, and subdivision b of section 58, notices, the Bankruptcy Act, as amended;

H. R. 6282. An act for the relief of the former shareholders and debenture noteholders of the Goshen Veneer Co., an Indiana corporation;

H. R. 6744. An act to amend Public Law 472, 81st Congress, as amended, relative to the attendance of professional personnel of the National Advisory Committee for Aeronautics in graduate schools;

H. R. 6952. An act to authorize the transfer of naval vessels to friendly foreign countries;

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress;

H. R. 7505. An act to permit a retired officer of the Navy to be employed in a command status at Port Lyautey, Morocco;

H. J. Res. 185. Joint resolution to implement the convention between the United States of America and Norway, which entered into force on November 9, 1948, for disposition of the claim against the Government of the United States of America as-

serted by the Government of Norway on behalf of Christoffer Hannevig;

H. J. Res. 230. Joint resolution to suspend the application of certain Federal laws with respect to personnel employed by the House Committee on Ways and Means in connection with the investigations ordered by House Resolution 104, 85th Congress;

H. J. Res. 288. Joint resolution to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens;

H. J. Res. 316. Joint resolution for the relief of certain aliens;

H. J. Res. 322. Joint resolution for the relief of certain aliens;

H. J. Res. 323. Joint resolution to facilitate the admission into the United States of certain aliens; and

H. J. Res. 324. Joint resolution to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens.

The message further announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con. Res. 171. Concurrent resolution favoring the granting of the status of permanent residence to certain aliens; and

H. Con. Res. 174. Concurrent resolution authorizing the printing of additional copies of part 1 of the hearings on the Department of Defense appropriations for 1958.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Vice President:

S. 358. An act to authorize the conveyance to the State of Wyoming of about thirty-seven and seventy-five one-hundredths acres of land comprising a part of Francis E. Warren Air Force Base;

S. 1274. An act to amend the act of March 3, 1911 (36 Stat. 1077), to remove restrictions on the use of a portion of the Springfield Confederate Cemetery, Springfield, Mo., and for other purposes; and

H. J. Res. 133. Joint resolution for the relief of certain spouses and minor children of citizens of the United States.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED OR PLACED ON THE CALENDAR

The following bills and joint resolutions were severally read twice by their titles and referred, or placed on the calendar, as indicated:

H. R. 1214. An act to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the Armed Forces of the United States during the Korean conflict;

H. R. 1987. An act to provide for an additional payment of $40,000 to the village of Highland Falls, N. Y., toward the cost of the water filtration plant constructed by such village;

H. R. 3246. An act to authorize the exchange of lands at the United States Naval Station, San Juan, P. R., between the Commonwealth of Puerto Rico and the United States of America;

H. R. 5237. An act to authorize the Secretary of the Navy to furnish supplies and services to foreign vessels and aircraft, and for other purposes;

H. R. 6744. An act to amend Public Law 472, 81st Congress, as amended, relative to the attendance of professional personnel of the National Advisory Committee for Aeronautics in graduate schools;

H. R. 6952. An act to authorize the transfer of naval vessels to friendly foreign countries; and

H. R. 7505. An act to permit a retired officer of the Navy to be employed in a command status at Port Lyautey, Morocco; to the Committee on Armed Services.

H. R. 1376. An act for the relief of Bernard L. Phipps;

H. R. 1417. An act for the relief of Lien-fu Lo, also known as Luke Lo;

H. R. 1501. An act for the relief of Beulah I. Reich;

H. R. 1552. An act for the relief of William H. Barney;

H. R. 1682. An act for the relief of Edward J. Moskot;

H. R. 1754. An act for the relief of Eleanor French Caldwell;

H. R. 1848. An act for the relief of certain aliens;

H. R. 1883. An act for the relief of Benedict M. Kordus;

H. R. 1885. An act for the relief of Edwin Matusiak;

H. R. 2083. An act for the relief of Carl A. Willson;

H. R. 2264. An act for the relief of Donald F. Thompson;

H. R. 2964. An act to confer jurisdiction on the United States District Court for the Eastern District of Texas, Jefferson Division, to hear, determine, and render judgment on certain claims of George W. Edwards, Jr., against the United States;

H. R. 3281. An act for the relief of Howard S. Gay;

H. R. 3370. An act to amend section 1871 of title 28, United States Code, to increase the mileage and subsistence allowances of grand and petit jurors;

H. R. 4045. An act for the relief of Mrs. Leonard O. Erickson;

H. R. 4154. An act for the relief of the legal guardian of Thomas Brainard, a minor;

H. R. 4342. An act for the relief of Mrs. Thomas L. Davidson;

H. R. 4538. An act for the relief of Martin A. McGrory;

H. R. 4851. An act for the relief of Mrs. M. E. Shelton Pruitt;

H. R. 5707. An act for the relief of the A. C. Israel Commodity Co., Inc.;

H. R. 5811. An act to amend subdivision b of section 14—Discharges, when granted—of the Bankruptcy Act, as amended, and subdivision b of section 58—Notices—the Bankruptcy Act, as amended;

H. R. 6282. An act for the relief of the former shareholders and debenture note holders of the Goshen Veneer Co., an Indiana corporation;

H. J. Res. 230. Joint resolution to suspend the application of certain Federal laws with respect to personnel employed by the House Committee on Ways and Means in connection with the investigations ordered by H. Res. 104, 85th Congress;

H. J. Res. 288. Joint resolution to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens;

H. J. Res. 316. Joint resolution for the relief of certain aliens;

H. J. Res. 322. Joint resolution for the relief of certain aliens;

H. J. Res. 323. Joint resolution to facilitate the admission into the United States of certain aliens; and

H. J. Res. 324. Joint resolution to waive certain provisions of section 212 (a) of the Immigration and Nationality Act in behalf of certain aliens; to the Committee on the Judiciary.

H. R. 3625. An act to amend section 214 of the Interstate Commerce Act, as amended, to prevent the use of arbitrary stock par values to evade Interstate Commerce Commission jurisdiction; and

H. R. 4511. An act to declare a certain portion of Back Cove at Portland, Maine, to be nonnavigable water of the United States; to the Committee on Interstate and Foreign Commerce.

H. R. 4945. An act to provide for the conveyance of certain real property in West Palm Beach, Fla., to the Port of Palm Beach District; to the Committee on Government Operations.

H. R. 5341. An act for the relief of John J. Farrelly; to the Committee on Interior and Insular Affairs.

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress; to the Committee on Rules and Administration.

H. J. Res. 185. Joint resolution to implement the convention between the United States of America and Norway, which entered into force on November 9, 1948, for disposition of the claim against the Government of the United States of America asserted by the Government of Norway on behalf of Christoffer Hannevig; placed on the Calendar.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 171) favoring the granting of the status of permanent residence to certain aliens, was referred to the Committee on the Judiciary, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress favors the granting of the status of permanent residence in the case of each alien hereinafter named, in which case the Attorney General has determined that such alien is qualified under the provisions of section 4 of the Displaced Persons Act of 1948, as amended (62 Stat. 1011; 64 Stat. 219; 50 App. U. S. C. 1953):

COMMITTEE SERVICE

On motion of Mr. BRICKER, and by unanimous consent, it was

Ordered, That Mr. IVES be, and he is hereby, excused from further service as a member of the Committee on Banking and Currency, and assigned to service on the Committee on Appropriations.

That Mr. CAPEHART be, and he is hereby, assigned to service on the Committee on Government Operations.

That Mr. CASE of New Jersey be, and he is hereby, excused from further service, as a member of the Committee on the District of Columbia and the Committee on Post Office and Civil Service and assigned to service on the Committee on Banking and Currency and the Committee on Rules and Administration.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Interior Subcommittee of the Committee on Irrigation and Reclamation was authorized to meet today during the session of the Senate.

On request of Mr. DIRKSEN, and by unanimous consent, the Monopoly Subcommittee of the Committee on the Judiciary, holding hearings on Senate bill 1356, was authorized to meet today during the session of the Senate.

On request of Mr. JOHNSTON of South Carolina, and by unanimous consent, the Committee on Agriculture was authorized to meet during the session of the Senate today.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that on Thursday next, at 2:30 o'clock p. m., the Senate Special Committee on Disarmament of the Committee on Foreign Relations, together with members of the Senate Foreign Relations Committee and members of the leadership on both sides of the aisle, be permitted to meet in executive session with the Secretary of State and Mr. Stassen, during the session of the Senate on that day.

The VICE PRESIDENT. Without objection, it is so ordered.

PRINTING OF ADDITIONAL COPIES OF PART 1 OF HEARINGS ON DEPARTMENT OF DEFENSE APPROPRIATIONS FOR 1958

The VICE PRESIDENT. The Chair lays before the Senate a concurrent resolution of the House of Representatives, which will be read for the information of the Senate.

The concurrent resolution (H. Con. Res. 174) was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Committee on Appropriations, House of Representatives, one thousand additional copies of part 1 of the hearings held by that committee during the current session on the Department of Defense appropriations for 1958.

Mr. HAYDEN. As a courtesy to the House of Representatives, Mr. President, I ask unanimous consent that the concurrent resolution be considered and agreed to at this time.

The VICE PRESIDENT. Is there objection?

There being no objection, the concurrent resolution was considered and agreed to.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of executive business, to act on the nominations on the Executive Calendar, beginning with the new reports.

The motion was agreed to; and the Senate proceeded to consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nominations of Michael D. Eddy, Jr., and Dodd D. Weatherly, to be postmasters at Brave, Pa., and Carrollton, Tex., respectively, which nominating messages were referred to the Committee on the Judiciary.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. GREEN, from the Committee on Foreign Relations:

Harold M. Randall, of Iowa, a Foreign Service officer of class 1, to be representative to the seventh session of the Economic Commission for Latin America of the Economic and Social Council of the United Nations.

By Mr. HILL, from the Committee on Labor and Public Welfare:

James N. Winblad, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service;

Leland A. Hanchett, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service;

Emil E. Palmquist, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service, and

Henry C. Huntley, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service.

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the calendar will be stated, beginning with the new reports.

UNITED STATES ATTORNEYS

The Chief Clerk proceeded to read sundry nominations of United States attorneys.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the nominations of United States attorneys be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

UNITED STATES MARSHALS

The Chief Clerk proceeded to read sundry nominations of United States marshals.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the nominations of United States marshals be considered en bloc.

The VICE PRESIDENT. Without objection, they will be considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be immediately notified of nominations confirmed today.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

THE PRESIDENT'S MESSAGE ON MUTUAL-SECURITY PROGRAM

Mr. JOHNSON of Texas. Mr. President, I ask your indulgence while I make a few brief observations on the message

sent to the Congress by the President yesterday.

I have studied the message carefully. There are many details which remain unclear. There are some propositions which must be examined thoroughly to determine whether they have merit.

But in the course of the message, the President laid down some general principles which, in my opinion, go a long way to meet the needs of our foreign policy. I congratulate the President for some of the decisions he has made.

I address my remarks particularly to the proposal that we shift from direct grants to a loan program which will help other people to help themselves.

This is a concept which I believe will have a great deal of appeal to thoughtful citizens of our country. It is one which I have discussed many times with officials of this administration and with my colleagues in the Senate.

Mr. President, this is a nation which does not seek to create satellites and which realizes that an attempt to buy friends is foredoomed to failure. We seek only to help other countries maintain their independence and their self-respect.

I believe it is self-evident that the United States can take good care of itself in a world of free nations. We need fear only a situation in which the rest of the world is controlled by a monolithic bloc ruled by ruthless dictators.

For this reason, I have consistently favored programs which will help other people maintain independence, and have been highly skeptical of all programs which will make them the recipients of charity.

I favor the concept of loans which will be repaid, and which will lead to self-respect, rather than dependence. I favor the concept of the International Atomic Energy Agency—one of the most imaginative but sound proposals of recent years.

The latter is now before the Senate Foreign Relations Committee, and I understand that the members are now engaged in clarifying some of the language. It is my hope that it can soon be reported to the Senate for action by the Senate.

The foreign-relations authorization bill is now before the Senate Foreign Relations Committee. Hearings were started there this morning. We shall proceed with full attention to that measure until it is reported to the Senate, which I hope can be done by the end of next week.

Mr. President, the question of how much money can safely be devoted to our mutual-security projects is a matter of judgment. Congress cannot exercise its judgment until it has all the facts and all the details. The Foreign Relations Committee is now proceeding to get the facts and the details.

We will be prudent, we will be careful, we will be cautious. We will not forget the admonitions of our Nation's highest fiscal officer concerning our needs for a sound fiscal structure.

The mutual-security program is not sacrosanct, as the President himself has demonstrated by cutting $500 million from his original estimates.

But the President has helped us greatly by reexamining the principles of the program in line with our requests, and I want to assure him and the Nation that our consideration of his recommendations will be conducted in the spirit of serving the best interests of the entire Nation.

Mr. DIRKSEN. Mr. President, I listened with great interest to the observations of the majority leader and his concurrence in the general principle of foreign aid.

In addition to the work which will be done by the legislative committee, the Appropriations Committee, of course, will examine very meticulously into the matter. I apprehend that most persons, certainly, do not realize the volume of evidence, testimony, and justifications that are examined every year in connection with the foreign-aid program. When it comes to us, it is broken down country by country and item by item. Having had the experience of serving on the committee dealing with foreign aid, I can testify to the long, sustained hearings and to the laborious and painstaking work which has been done with respect to every item in the bill.

I concur in the statement made by the majority leader that the amounts and the dimensions finally must lie within the judgment of Congress. But certainly we shall be realistic about the matter in pursuing that principle, and especially so since all groups, including our military leaders and the businessmen who have gone abroad, have indicated that there must be an aid program.

It is, then, our responsibility, insofar as possible, to eliminate waste and extravagance, to inject a maximum of efficiency into the program, and to make sure that every American dollar which is expended in that field does efficient duty in behalf of our security program, for, when all is said and done, mutual security must be justified on the ground that it makes a distinct and vital contribution to the security posture of the United States.

So, Mr. President, I congratulate the majority leader on the statement he has made, and I am confident that from our various deliberations and our pursuit of the matter in the various committees of the Senate we shall contrive a satisfactory and substantial result.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. JOHNSON of Texas. I thank the Senator very much for his generous statement.

Mr. BUSH. Mr. President, will the Senator yield to me?

Mr. DIRKSEN. I yield.

Mr. BUSH. I am very much impressed by what the Senator has just said. I congratulate him on his remarks. I wonder if he will permit me to ask unanimous consent to have printed in the RECORD at this point an editorial from the New York Times dealing with the subject on which the Senator from Texas and the Senator from Illinois have spoken.

Mr. DIRKSEN. Yes.

Mr. BUSH. Mr. President, I ask unanimous consent that the editorial be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

IN DEFENSE OF FREEDOM

In a message to Congress yesterday, backed by an appeal last evening to the Nation, President Eisenhower has sought to mobilize all available political and moral forces in defense of an adequate and reformed mutual-security program which false economy and political ambition would cut to pieces only at grave risk to American safety. He solemnly warned that this program, misnamed foreign aid and sneered at by some as a giveaway, is an essential element of our own defense against an increasingly powerful Communist bloc bent upon world domination.

Without putting it in so many words, the President's messages in effect ask Congress and the Nation to choose between two alternatives. One is to live as a free nation in a free world guarded by collective defense and developed by mutual aid and trade to which every nation contributes for our common welfare and prosperity. The other is to live in Fortress America, a regimented garrison state in which an increasing share of our manpower and resources would have to be devoted to guarding the ramparts of our own frontiers. In helping free nations to prosper and to defend themselves we help ourselves to avert the second alternative, and in doing so we serve both our own best interest and our ideals.

In support of this basic thesis President Eisenhower advanced some arguments. The United States has spent $17 billion on mutual security during the last 8 years. But the recipient nations have spent $107 billion on their defense, which has also served our own. As a result, we have lined up on our side 200 divisions, 27,000 aircraft, and 2,500 naval combat vessels, and we have also many bases abroad for a forward defense. That is more defense per dollar than we could possibly get in any other way.

As the President further pointed out, our mutual-security program helped to save countries such as Greece and Turkey, Iran, Korea, Vietnam, Free China, the Middle East, Guatemala, and even Yugoslavia from Soviet domination. How much more dangerous the world would be, had these countries slid into the Soviet orbit. If we should now cripple our mutual-security program, compelling other countries to reduce their defenses and slow down their economic progress, we would be forced to compensate the loss of defensive power abroad by increasing our own defenses at many times the present cost and still court the danger of aggression and war.

After cutting his original request by $535 million for a carryover into next year, President Eisenhower now asks for a total of $3,865,000,000. This still looks like a large sum, but is only nine-tenths of 1 percent of the gross national product. What is more, nearly two-thirds of it, or $2.8 billion, is earmarked for direct or indirect military support, and it is to be welcomed that this support is henceforth to be included in our regular defense budget. That is a reform long overdue, to avert a common misunderstanding.

This leaves only about $1 billion for economic, technical, and humanitarian assistance to help free nations to withstand both the lure and the pressure of Communist totalitarianism, and such aid is to consist henceforth primarily of loans advanced by a revolving and ultimately self-replenishing loan fund that should also stimulate the flow of private investments.

We are confident that the Nation will respond to the President's appeal and that Congress will in the end act accordingly.

Mr. SMITH of New Jersey subsequently said: The President's message of yesterday to the Congress, and his challenging television broadcast to the country, present a soundly analyzed breakdown of our national mutual security program. The issue he presents is the security of our people. That security is inevitably allied to the security of the entire free world.

We cannot reject or seriously cripple the President's program without grave danger not only to our own survival as a free nation, but also the survival of civilization itself.

Mr. President, I ask unanimous consent that this statement appear in the RECORD in connection with the support earlier today by the Senator from Texas [Mr. JOHNSON] of the President's message.

The VICE PRESIDENT. Without objection, it is so ordered.

STATEMENT BY SECRETARY DULLES ON MUTUAL SECURITY PROGRAM

Mr. CAPEHART. Mr. President, I ask unanimous consent that the statement made by Mr. John Foster Dulles, Secretary of State, before the Foreign Relations Committee this morning, may be printed in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY THE HONORABLE JOHN FOSTER DULLES, SECRETARY OF STATE, BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE, WEDNESDAY, MAY 22, 1957

I have come before you to discuss the authorization which we are requesting for our future mutual security programs.

As noted by the Senate special committee, the money we spend abroad is not on a single program. So-called foreign aid is a term that is given to several quite distinct programs. Each of these is addressed to different purposes. Each employs separate means. Each must be considered on its own merits.

It is to these distinctive programs that I address myself.

I shall try, in each case, to tell what foreign policy purpose the program serves.

I shall explain how the executive branch believes that these purposes can, in the next fiscal year, be better defined and better served.

There are, in essence, four major programs.

First, the mutual defense assistance program, which provides weapons and military equipment and economic support for allied military forces and facilities;

Second, the development assistance program, which helps free countries achieve economic growth;

Third, the related technical assistance program through which we share our skills with these countries;

Fourth, the special assistance programs, through which we meet particular needs and emergencies that cannot be met by the three preceding programs.

I. MUTUAL DEFENSE ASSISTANCE

I do not have to review with you the magnitude of the Soviet and Chinese Communist military threat, or the fact that no free country can obtain adequate security through its own resources alone.

This fact has led to the creation of a collective security system which binds us and 42 other free countries in a common defense against a common peril.

Since 1950, we have provided around $17 billion in military equipment plus supporting economic assistance to our allies' military programs. During this same period, our allies have spent over $100 billion for defense, and they have provided manpower for the armed forces of the free world, and they have provided sites for highly valuable bases for our and their forces.

Without our assistance, these allies' military programs could not have been carried out. With these programs, we are enabled to spend far less on our own military programs, and to achieve far greater security, than would otherwise be the case.

Collective security is truly a case in which the whole is greater than the sum of the parts. And the instrument which creates the whole out of these parts is our mutual defense assistance program.

This program consists of two elements:

First, the provision of military equipment to friendly forces. This is what, in the past, has usually been called military aid.

Second, economic aid given to allied countries to compensate their economies for contributions made to the common defense, when these countries cannot unaided make the contribution judged necessary. Many of the less developed countries, such as Korea, Formosa, and Vietnam, cannot maintain the desired forces without some outside help, and sometimes the provision of essential facilities for the common defense involves burdens for which compensation is appropriate.

In the past, much, but not all, of this aid, has been called defense support. But the phrase has also been used to include assistance to some of these same countries for other purposes, such as economic development.

This labeling produced misunderstanding, both at home and abroad. We believe that what in the past has been called defense support should hereafter be confined to what is distinctly given to enable a country to provide an effective military contribution.

Development assistance to stimulate economic growth should be dealt with separately.

For fiscal year 1958 we are asking for $1.9 billion for the provision of weapons and military equipment, and $900 million for true defense support. This totals $2.8 billion. It is approximately three-fourths of what we are asking the Congress to appropriate for all the mutual security programs.

Both these types of defense assistance—military equipment and support—have more in common, in point of purpose, with other elements of our own defense program than they do with other types of foreign aid. They contribute to and maintain our military security just as expenditures for our own forces do.

The is why the President has recommended that defense assistance should be recognized and treated as an essential element of our own worldwide national-defense effort. To do this effectively, he requests that appropriations for military assistance and for related defense support should now be so authorized that hereafter they may be included as a separate part of the regular appropriations for the Department of Defense. Both would continue under the policy guidance of the President and the Secretary of State.

Requirements for defense are substantial, but they are necessary. We are, of course, actively seeking a sound and safeguarded basis for reciprocal reductions of armaments, which weigh heavily upon our country, the Soviet Union, and, indeed, nearly all nations.

It is not easy to reach such an agreement. Experience has demonstrated that agreements with the Communists are not dependable so long as they are merely based upon paper accords. Good faith is not a factor which can be relied on to assure continued adherence by Communists to the terms of an agreement. Therefore, the free nations cannot safely reduce their military strength merely in reliance upon promissory agreements by the Soviet rulers to reduce correspondingly. We do not, and will not, rely upon Soviet promises alone. There must be adequate means to verify performance and to gain increased protection for the free world against surprise attack. We do seek an agreement that will be in the mutual interest of the parties, an agreement that would decrease the danger of war.

We find it hard to believe that the Soviet rulers will not in their own self-interest eventually accept such mutual supervision and control as will permit of lightening the burden of armament, and will provide to both sides a better prospect for a just and durable peace.

We do not know today whether the Soviet leaders consider that the benefits of an armaments agreement justify their submitting to a system of adequate inspection.

But even on the most hopeful estimate, the first steps of armaments reductions will have to be carefully calculated and carefully taken. It would be folly now, in the absence of a safeguarded agreement for the inspected reciprocal reduction of armaments, to weaken in any manner the collective-security system which provides the greatest deterrent against aggression at the least cost.

II. ECONOMIC DEVELOPMENT

I turn now to the economic development aspect of mutual security.

We propose the establishment of a development loan fund to assist the economic development of other independent nations. The Senate special committee has found that this "is in the interest of the United States." This statement is particularly, though not exclusively, applicable to 19 new nations which have come into existence since the end of World War II. These nations contain nearly a third of the world's population. Most of them are close to the Soviet-Communist China bloc. They are nations where poverty is age-old. The per capita annual incomes of most of the peoples of these nations is well below $100 a year. Their food production is at levels of bare subsistence, inadequate for hard productive work.

It is important to us that the people of these nations should remain free, that their strategic lands should not fall under Communist control, that their resources should be available to their own people and in commerce with other free nations.

For generations these people have fatalistically accepted stagnation. But now their mood is different. Two intense emotions now grip the peoples of these new nations. The first is a desire to maintain and strengthen their newly won political freedom. The second is a determination to raise their pitifully low standards of living and get started quickly on the inevitably long road to economic betterment.

But the obstacles to growth are substantial. There is a shortage—sometimes an absence—of technicians. The governments are inexperienced. With incomes at the barest subsistence levels, very little can be saved and invested. Without outside help, the prospects of economic growth are indeed very slim.

These people are determined to move forward. If they do not succeed, there will be increasing discontent which may sweep away their moderate leaders of today and bring to power extremist leaders who will resort to extremist measures fostered by international communism.

Today hundreds of millions in these countries seek the answer to this simple question: Do political independence and freedom mean economic growth? If these peoples do not feel that in freedom they get growth, then freedom will be on its way out in much of the world.

It is in our interest to help to demonstrate that freedom and growth go hand in hand. That is the conclusion of your special committee as it is of the President.

The question then becomes what is the most economical and effective way to do this?

The recommendation of the President and the conclusion of your own special committee is that this should be done through the establishment of a development loan fund.

How should such a fund work?

For the past few months the executive branch has given lengthy and detailed study to many aspects of this question. We have had advice from many quarters. We have reached a number of conclusions. These conclusions are sufficiently firm, detailed, and well founded to make us feel that the fund should be founded now, without another year's delay.

What are some of the essentials?

First, the recognized purpose of the fund should be to assist the less-developed free countries to get economic growth underway.

Second, the fund would operate on terms of repayment. A substantial part of its activities should be in loans, but it should also be empowered to use other banking and financing arrangements, such as credits and guaranties, in carrying out its purposes. It could not, however, make grants. Its loans would be made available on repayment terms less rigid than those of existing institutions. Repayment could be in foreign currencies, as well as dollars, and interest could be waived or suspended.

The fund would primarily be an instrumentality of foreign policy, and as such take greater financial risks than those acceptable to existing institutions. The fund's expectations of repayment would be based, however, on confidence in the long-range future of the nation it is helping. If the fund achieved its object, as I believe it would, then confidence would prove justified.

Third, the fund would seek cooperation with private investors and established lending institutions. It could participate in joint financing with private investors, the World Bank, or the Export-Import Bank, adjusting its own repayment claims to those of these others. It would not loan its funds where other loans and private investment were available. Properly administered, the fund would not reduce but would increase the effective flow of activity through normal channels of finance.

Fourth, the fund could be used only for development projects and programs which seem technically and economically sound and which could be expected to contribute to the economic progress of the borrowing country and to the long-range interest of the United States in the welfare of that country. It would not be used to meet emergencies or other needs for short-term assistance. Continued financing by the fund to any country would depend upon that country's record of performance.

Fifth, a substantial part of the financing undertaken by the fund would be devoted to basic public works such as transport, communication systems, power installations, harbors, irrigation and drainage projects—the capital needed to create the economic environment in which private initiative can come into play. The fund could also use its resources to support local development banks and private enterprises engaged in developing the countries we seek to help.

Sixth, the fund should be established upon a basis of continuity with sufficient capital for several years operations. As I said here last month, economic development is a long-term process. It is not an annual event. If our assistance is to be useful at all, it should be provided on a sustained basis that is consistent with the long-term nature of the job to be done.

It is not necessary that all the capital of the fund be provided at once. But it is essential that there be initial provision for future availability. For this reason the President has asked that there be provided this year an appropriation of initial capital and the authority to borrow additional capital from the Treasury in the second and third years. Such borrowing authority has been used to capitalize other United States lending agencies. These additional funds which would be borrowed from the Treasury would not be available for obligation until such second and third year. However, the fact that they would be available will give the countries we wish to help and our own administrators the assurance they need to plan ahead.

This new approach we contemplate requires that we get away from annual authorizations or appropriations. These inevitably tend toward a system of illustrative programs as a basis for justifications. These are not compatible with the assurance of continuity essential to good planning and to the new long-term loaning concept. They are not compatible with cooperation with such organizations as the IBRD and Export-Import Bank which operate on a long-term businesslike basis with established capital.

The President has requested an appropriation of $500 million to be available for the fund in fiscal year 1958, and authority to borrow $750 million in fiscal year 1959 and the same sum in fiscal year 1960. Any unobligated balances of any year would be carried forward as part of the fund's working capital.

The sums the President has requested are conservative figures. The two reports made to your special committee which relate to a development financing program both conclude that a loan fund to be effective should be able to finance development activities at a higher rate than at present. This was also the conclusion of the International Development Advisory Board, which recommended that "the initial congressional appropriation for the fund should be sufficient for a substantial increase in capital investment and technical assistance programs." Another study, that of the Research and Policy Committee of the Committee for Economic Development, has suggested an initial 5-year program at the rate of $1 billion per year in addition to our existing level of expenditures for economic assistance.

One of the witnesses before your special committee rather aptly compared economic development with getting an airplane off the ground. You have to achieve a certain minimum rate of speed to take off. It would not be prudent to invest our resources in development programs which are too small to offer any hope of eventually achieving a self-sustaining rate of growth.

What of the future cost and direction of financing under the fund? There is a popular idea that the underdeveloped areas are a bottomless pit. In reality, as the Committee on Economic Development says in its report: "The amount that can be productively invested in the underdeveloped world is not enormous but is in fact rather strictly limited." The duration of the need for financing of the kind the fund would supply is also reasonably limited. It is not our purpose to finance the development of these nations to the level of our own economy. It is rather our purpose to help them gain a momentum of economic progress which will make it possible for them to go forward on their own capital formation, with outside assistance confined to private investment and other normal sources of financing.

We should think of the fund as a long-term operation but not as going beyond the time when it serves the enlightened self-interest of the United States. As it serves its purpose, the calls upon it should decline.

III. TECHNICAL COOPERATION

There is universal agreement that the technical cooperation program is valuable and should be continued on substantially the present basis. The executive branch so recommends.

We believe, furthermore, that this program has proved its worth as a long-term instrument of United States policy and that it should be authorized on a continuing basis.

The President has recommended an appropriation of $168,900,000 for this program next year.

This figure includes, in addition to our regular bilateral program, our contribution to the technical assistance program of both the Organization of the American States and the United Nations.

Last year the Congress recommended that our proportionate contribution to the United Nations expanded program of technical assistance should be reduced in fiscal year 1958 to 33⅓ percent from the present level of 49 percent. Since that date, the Subcommittee on Technical Assistance of the Foreign Relations Committee has recommended in its final report that this proviso be reconsidered. This report favored a reduction of the percentage of the United States contribution but urged that "precipitous action to this end should not be taken" and noted that a reduction to 33⅓ percent in 1 year might have deleterious effects on this important United Nations activity. We agree with these conclusions and believe that any reduction should be phased over several years. The President has accordingly recommended that the level of our contribution be set at 45 percent for fiscal year 1958.

IV. SPECIAL ASSISTANCE

The final category of our aid is special assistance.

There are some programs, like the malaria eradication program, that do not fit into any of the preceding categories.

There will inevitably be occasions when it will be in our national interest to furnish assistance to friendly nations which is not designed to support our common defense effort and which could not properly be handled through the development fund or technical assistance.

There are bound to be emergency situations which we cannot foresee and there are bound to be efforts we need to support without prospect of repayment.

International communism is constantly probing to discover and exploit weak points within the Free World. We cannot tell in advance where these weak points will develop or the amount of pressure which international communism will bring to bear. We must have reserve funds which can be thrown into the breach if we are to conduct successfully the "cold war" in which international communism has engaged us.

During the past few years there have been emergency situations in many places where immediate grant aid was necessary. Such situations have arisen in relation, for example, to Iran, Jordan, Hungarian refugees, and Guatemala. It can be soberly estimated that international communism would have gained spectacular victories and that freedom would have suffered tragic defeats, if the President had not had substantial discretionary funds to use to meet unpredictable emergencies. The fact that the President has had such funds has meant on net balance a vast saving to the cause of freedom to which we are dedicated.

Aid of this nature is designed to meet immediate needs, not to finance long-term programs. It is appropriate that it should be authorized anew each year.

The President has asked for the authorization of an appropriation of $300 million for special assistance.

This figure includes three separate elements. Approximately one-third of it has already been programed for firm requirements, such as our malaria eradication plan

and certain special country programs. Another third is designed to provide for recognized but unprogramed needs, including further assistance for the Middle East under the American doctrine. In addition, we need continuation of the Special Presidential Fund to meet unforeseen contingencies.

V. CONCLUSION

The total program which I outline reflects the results of the intensive study which has been given to this subject during the past year. Such study has been given by the executive branch of Government, by both Houses of Congress, and by special groups of qualified persons who have been asked by the President and by the Congress to study this problem.

These studies indicate no substantial disagreement as to the need of mutual security programs dealing both with military and nonmilitary matters. There is also, we believe, an unusual consensus as to the general order of magnitude which these programs should assume. There is also a large measure of agreement that our mutual security programs can be better organized than has been the case heretofore. The executive branch of Government shares that view and it is reflected in the President's message and the proposed legislation, and in this presentation.

Let me recall, in conclusion, that the Constitution of the United States specifies as among the basic purposes of our Government to "provide for the common defense * * * and secure the blessings of liberty to ourselves and our posterity." Under today's conditions a common defense is most effectively promoted, and the blessings of liberty most effectively secured, by the mutual security programs I have described.

We know full well that this committee has ably and conscientiously studied this whole problem. We have taken into account its views, particularly as expressed in the report of the Senate Special Committee, published on May 13. The executive branch of Government welcomes, and will seek to merit, the cooperative spirit which is manifested by this committee.

VALUE OF FLOOD CONTROL

Mr. JOHNSON of Texas. Mr. President, the heavy floods in Texas during the past 2 months have made us more conscious than ever of the tremendous value to our State of flood-control and water-conservation projects authorized by Congress and carried out cooperatively by the Federal, State, and local governments.

Among these projects are dams on the Colorado River that protect a rich farming section from the flood damage which used to come periodically.

Colorado County, named for the river, is included in this area. I have just been informed by the Honorable J. M. Rutta, county judge of Colorado County, that damage estimated at between $1.5 million and $2 million was prevented during recent floods by the dams the Government had built on the Colorado River. In the town of Columbus, the county seat, I have been told by the Honorable H. P. Meyer, mayor, that damage estimated at $700,000 was averted.

I ask unanimous consent that the telegrams from Judge Rutta and Mayor Meyer be printed in the RECORD at the conclusion of my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

(See exhibit A.)

Mr. JOHNSON of Texas. Mr. President, this information on flood damage prevented in a single Texas county emphasizes the fact that money appropriated by the Congress for necessary flood-control and water-conservation projects represents a sound investment—an investment that pays heavy dividends.

That is something we shall want to keep in mind as we proceed to consider, in the near future, the public works appropriation bill. That bill will give us an opportunity to make more of these investments.

EXHIBIT A

COLUMBUS, TEX., *May 20, 1957.*

Senator LYNDON JOHNSON,
United States Senate,
Washington, D. C.:

If present floods had matched the flood of 1935, the estimated damage to Columbus would have been near $700,000.

Mayor H. P. MEYER.

COLUMBUS, TEX., *May 20, 1957.*

Hon. LYNDON B. JOHNSON,
United States Senate,
Washington, D. C.:

The value Colorado County property saved from the recent floods by the dams on the Colorado River is estimated at one and one-half to two million dollars.

J. M. RUTTA,
County Judge, Colorado County.

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, for the presentation of petitions and memorials, the introduction of bills, and the transaction of other routine business. I ask unanimous consent that there be a limitation on statements of 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following communication and letters, which were referred as indicated:

PROPOSED SUPPLEMENTAL APPROPRIATIONS, DISTRICT OF COLUMBIA (S. Doc. No. 42)

A communication from the President of the United States, transmitting supplemental appropriations for the District of Columbia, in the amount of $2,254,900, for the fiscal year 1958, in the form of amendments to the budget for said fiscal year (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

REPORT ON CERTAIN PUBLIC WORKS BY SECRETARY OF DEFENSE

A letter from the Secretary of Defense, transmitting, pursuant to law, his report, listing all currently available authorization for military, naval, and Air Force public-works projects for which adequate funds have not been appropriated, as of December 31, 1956 (with an accompanying report); to the Committee on Armed Services.

REPORT ON NUMBER OF OFFICERS ON DUTY WITH DEPARTMENT OF ARMY AND ARMY GENERAL STAFF

A letter from the Secretary of the Army, transmitting a report of the number of officers on duty with the Department of the Army and the Army General Staff on March 31, 1957 (with accompanying papers); to the Committee on Armed Services.

PROPOSED TRANSFER OF ONE CRASH BOAT TO NORTH EASTERN NAVAL CADETS, INC., HACKENSACK, N. J.

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, that the Department of the Navy proposed to transfer to the North Eastern Naval Cadets, Inc., Hackensack, N. J., one 45-foot crash boat, hull No. C-7597, with engines; to the Committee on Armed Services.

REPORT ON EXPORT CONTROL

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on export control, covering the first quarter of 1957 (with an accompanying report); to the Committee on Banking and Currency.

CERTIFICATION OF ADEQUATE SOIL SURVEY AND LAND CLASSIFICATION, AINSWORTH UNIT, SAND HILLS DIVISION, MISSOURI RIVER BASIN PROJECT, NEBRASKA

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, that an adequate soil survey and land classification has been made of the lands in the Ainsworth unit, Sand Hills division, Missouri River Basin project, Nebraska, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation (with an accompanying paper); to the Committee on Interior and Insular Affairs.

CERTIFICATION OF ADEQUATE SOIL SURVEY AND LAND CLASSIFICATION, FARWELL UNIT, MIDDLE LOUP DIVISION, MISSOURI RIVER BASIN PROJECT, NEBRASKA

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, that an adequate soil survey and land classification has been made of the lands in the Farwell unit, middle loup division, Missouri River Basin project, Nebraska, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation (with an accompanying paper); to the Committee on Interior and Insular Affairs.

SUPPLEMENTAL REPORT ON PAYMENT OF CLAIMS ARISING FROM CORRECTION OF MILITARY RECORDS OF COAST GUARD

A letter from the Acting Secretary of the Treasury, transmitting, pursuant to law, a supplemental report on the payment of claims arising from the correction of military records of the Coast Guard (with an accompanying report); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF ALIENS—WITHDRAWAL OF NAME

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the name of Mary Elizabeth Handlovitz from a report relating to aliens whose deportation has been suspended, transmitted to the Senate on January 15, 1957 (with an accompanying paper); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Oregon; to the Committee on Armed Services.

"House Joint Memorial 17

"To the Honorable Senate and the House of Representatives of the United States of of America, in Congress Assembled:

"We, your memorialists, the 49th Legislative Assembly of the State of Oregon, in leg-

islative session assembled, most respectfully represent as follows:

"Whereas one of the most vital national defense needs is a ready reserve of experienced shipyard personnel and the preservation and development of fully equipped and operating shipbuilding facilities on both east and west coasts; and

"Whereas the Pacific coast shipbuilding industry and the people dependent upon it are in a comparative depression condition; and

"Whereas favoritism practiced by the Federal Government in the assignment of shipbuilding and repair contracts has substantially contributed to this condition; and

"Whereas current Federal allocation policies are not giving the Pacific coast shipyards enough repair and conversion work to keep their personnel resources in all skill categories up to the level of minimum needs; and

"Whereas the Nation is being placed in increasing jeopardy relative to national defense due to these allocation policies; and

"Whereas the Portland area and other important areas within the State of Oregon which are equipped and capable of conducting full scale shipbuilding and repair and conversion operations are suffering economically as a result of these policies; and

"Whereas the Navy's program of ship repair and conversion has discriminated against Pacific coast interests; and

"Whereas as an example of this discrimination, two 'mothballed' cruisers recently departed from the Pacific coast for conversion at a cost of approximately $14 million at booming east coast shipyards, while Pacific coast shipyards, which the Navy is pledged to support under legislation enacted by the Congress last July, remain relatively idle; and the Navy has acknowledged that this transfer will cost the taxpayers $426,000 in addition to the cost of the conversion of these two ships, irrespective of which yard carries out the conversion; and

"Whereas a continuation of these policies of discrimination will pyramid the competitive advantage enjoyed by the east coast shipyards at the expense of Pacific coast shipyards and will eventually threaten the existence of Pacific coast shipbuilding altogether: Now, therefore, be it

"Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein), That the President and the Congress of the United States be memorialized to see that every effort of the Federal Government be expended to cease discrimination favoring east coast shipyards as against Pacific coast shipyards in matters of shipbuilding and ship repair and conversion and that intervention by the Federal Government through the awarding of contracts and the establishment of policy be such as to encourage the continued existence and the further development of the Pacific coast shipbuilding industry; and be it further

"Resolved, That copies of this memorial be sent to the President and Vice President of the United States, and to all members of the Oregon congressional delegation.

"Adopted by house April 30, 1957.

"Adopted by senate May 8, 1957.

"EDITH BYNON LOW,
"Chief Clerk.

"PAT DOOLEY,
"Speaker of House.

"BOYD R. OVERHULSE,
"President of Senate."

A concurrent resolution of the Legislature of the State of Florida; to the Committee on Armed Services:

"House Concurrent Resolution 1083

"Whereas the property on which Tyndall Air Force Base Reservation is located in Bay County, Fla., was acquired through condemnation proceedings by the United States of America during the national emergency of World War II at a price far below the actual value; and

"Whereas that unused portion of this property, comprising some 4,000 acres, commonly referred to as Red Fish Point, was declared surplus by the United States Government in 1949 and which was withdrawn August 5, 1955; and

"Whereas the acquisition of this land was made at a sacrifice by the former owners of said land; and

"Whereas this sacrifice by said former owners contributed materially to the war effort and was made to a great degree out of patriotism and good citizenship of said former owners; and

"Whereas a portion of that land known generally as the Red Fish Point property has not been utilized by the Air Force and is not presently serving the public purpose; and

"Whereas much of the Red Fish Point property is still not being utilized by the Air Force for a public purpose; and

"Whereas, in equity and good conscience, the former owners of said land should be entitled to a preference to repurchase said property if it again is declared to be surplus: Now, therefore, be it

"Resolved by the house of representatives of the State of Florida (the Senate concurring), That the Congress of the United States is hereby requested to adopt legislation providing that the United States Air Force reevaluate the status of this property and if it is not needed for a public purpose then make the property available to the public, giving the former owners a first option to purchase said land at a value in accordance with that value as placed on it by the United States Government in 1941, adjusted to reflect any increase or decrease due to the removal of any homes or buildings by the United States Government; be it further

"Resolved, That a copy of this resolution be sent immediately to the Speaker of the House of Representatives of the United States, to the President of the Senate of the United States, and to each member of the Florida delegation in the United States Congress.

"Filed in office, secretary of state, May 16, 1957."

A resolution adopted by citizens of Newton, Mass., and vicinity, relating to improving the economic conditions of the Indians (with accompanying papers); to the Committee on Interior and Insular Affairs.

A letter, in the nature of a petition, from the Religious Freedom Committee, Inc., New York, N. Y., signed by Janice M. Roberts, Secretary, relating to the appointment of a special committee of the Senate to hear charges against the Subcommittee on Internal Security of the Judiciary Committee; to the Committee on the Judiciary.

Resolutions adopted by the 66th Continental Congress of the National Society of the Daughters of the American Revolution; to the Committee on the Judiciary.

JOINT RESOLUTION OF LEGISLATURE OF WISCONSIN ON POSTAL EMPLOYEES' SALARIES

Mr. WILEY. Mr. President, I was pleased to receive this morning a resolution which had been adopted by the State Senate and Assembly of Wisconsin, bearing upon adequate and appropriate compensation for faithful postal workers who serve each and every one of us.

I submit this joint resolution, and ask unanimous consent that it be printed in the RECORD, and be thereafter appropriately referred to the Post Office Committee on Post Office and Civil Service.

There being no objection, the joint resolution was referred to the Committee on Post Office and Civil Service, and, under the rule, ordered to be printed in the RECORD, as follows:

Senate Joint Resolution 59

A joint resolution memorializing Congress to enact H. R. 2474 and S. 27 relating to a salary schedule for postal employees commensurate with that in private industry

Whereas employees of the United States postal service have greater work loads and responsibilities than ever before; and

Whereas the work of the Post Office Department is being performed in an efficient manner and is deserving of increased compensation: Now, therefore, be it

Resolved by the senate (the assembly concurring), That the Legislature in the State of Wisconsin endorses a salary schedule for postal employees commensurate with that in private industry and which will give adequate recognition to the increased productivity of postal employees, and to that end urges the Congress of the United States to vote for and support H. R. 2474 and S. 27; and be it further

Resolved, That a copy of this resolution be sent to the Presiding Officers of the United States Senate and House of Representatives and to each Member of Congress from Wisconsin.

ROBERT G. MAROTZ,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.
W. P. KNOWLES,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.

(The VICE PRESIDENT laid before the Senate a joint resolution of the Legislature of the State of Wisconsin, identical with the foregoing, which was referred to the Committee on Post Office and Civil Service.)

RESOLUTION OF WISCONSIN LEGISLATURE ON LIFE AND SERVICES OF HON. JOSEPH R. McCARTHY

Mr. WILEY. Mr. President, this morning I received from Lawrence R. Larsen, chief clerk of the Senate of the State of Wisconsin, the text of Senate Joint Resolution 84, which was recently adopted by the Wisconsin State Legislature.

This joint resolution expresses the condolences of the assembled legislators of Wisconsin to the family and friends of my late colleague, the late junior Senator from Wisconsin, Mr. McCarthy.

The joint resolution sets forth facts in the career of my colleague.

I know this joint resolution will be of interest to my associates, and I ask that it be printed at this point in the body of the RECORD.

There being no objection, the joint resolution was ordered to lie on the table, and, under the rule, to be printed in the RECORD, as follows:

Senate Joint Resolution 84

A joint resolution relating to the life and public service of Senator Joseph R. McCarthy

The citizens of Wisconsin are shocked and grieved to learn of the untimely passing of Senator Joseph R. McCarthy at Bethesda Naval Hospital in Maryland on May 2, 1957. Few people sensed the seriousness of the Senator's last illness.

Senator McCarthy was born November 14, 1908, at Grand Chute, Wis. He received his early education in the Underhill Elementary School of his home community, the name of which school was recently changed to McCarthy School in honor of the Senator. While an elementary school student he conducted a poultry business on the farm of his father, Timothy. This farm the Senator recently purchased. In 1929 he enrolled in the Manawa High School where he completed the prescribed 4-year course in a single year, graduating in 1930. In addition to his high school work, he owned and managed a country grocery store. In 1930 after his graduation he started a similar store in Shiocton.

In the fall of 1930 he enrolled in the engineering school at Marquette University, but 2 years later he transferred to the law department, and in 1935 completed the prescribed 6-year course in 5 years. While attending Marquette he was completely self-sufficient, paying his own way by working as a boxing coach and operating a filling station at night. Six hours after his graduation from Marquette he had opened a law office in Waupaca.

In 1936 he become associated with the law office of Michael Eberlein, a prominent Shawano attorney, which association lasted about 3 years.

Senator McCarthy's political career which was to occupy the rest of his life began in 1936 when he became president of the 7th district Young Democratic Club and ran unsucessfully for the office of district attorney in Shawano county.

In 1939 the Senator entered the race for circuit judge of the 10th circuit and won a 3-cornered race. In 1945 he was reelected to the bench without opposition.

Meanwhile, early in 1942, he received a commission in the Marine Corps and served in the Pacific theater until December 1944 when he returned to the political arena. During his tour of duty he was granted leave of absence to run against the incumbent Senator, ALEXANDER WILEY in the Republican primary of 1944, but he was defeated.

Following his military career he began his campaign for the Senate seat of Robert M. La Follette whom he defeated in the primary of 1946 by a very close margin. The Senator's campaign which occupied more than a year was considered one of the best organized campaigns seen in this State. The Senator then went on to win the general election. He was reelected in 1952. His self-confidence in challenging the younger La Follette, one of the Nation's most capable legislators, was an early indication of McCarthy's aggressive conduct in a turbulent career in the years to come.

The Senator's career mounted after 1950 when he came to grips with the issue of communism. History will record him as one of the most aggressive and courageous fighters against communism among the members of the United States Senate and the man who strove to awaken the public to the dangers and immediacy of communism in our Government. Because of his continuous and courageous fight agains the threat of communism, he became the most controversial United States Senator of the century. During the peak of his career his name was before the public daily and the people followed every move he made avidly. A man of firm convictions, he had strong friends and equally firm opponents. Many who disagreed with his methods admired his devotion to the cause he espoused, and his courage of conviction. As a result of his activity he was awarded many citations from civic and patriotic organizations.

Senator McCarthy is survived by his wife, Jean, a daughter, Tierney Elizabeth, three brothers, Stephen and Howard of Appleton and William of Chicago, and two sisters, Mrs. Olive Kornely and Mrs. Anna Mae Long of Appleton.

In view of the high office to which the people of Wisconsin twice elected Senator Joseph R. McCarthy and the devotion to his country for which he did in fact lay down his life; be it

Resolved by the senate (the assembly concurring), That the legislature express its deep sorrow at the untimely passing of the Senator and express to his wife and other survivors their most heartfelt condolences for their loss; and be it further

Resolved, That this resolution be spread upon the journal and that copies be sent to each of the immediate surviving family, to the Secretary of the United States Senate, to Senator ALEXANDER P. WILEY and Congressman JOHN W. BYRNES.

ROBERT G. MAROTZ,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.
W. P. KNOWLES,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.

COMPENSATION OF POSTAL EMPLOYEES—STATEMENT

Mr. HUMPHREY. Mr. President, one of the most vital pieces of legislation currently pending in Congress is S. 27, the postal employees salary bill. As a cosponsor of this proposed legislation, I have been in close touch with interested groups in Minnesota, including the National Federation of Post Office Clerks Local No. 125, under the splendid leadership of Patrick J. Nilan.

I have recently received from local 125 a statement in support of S. 27. I ask unanimous consent that it be printed in the RECORD, and appropriately referred.

There being no objection, the statement was referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

NATIONAL FEDERATION OF
POST OFFICE CLERKS,
LOCAL NO. 125,
Minneapolis, Minn., May 13, 1957.

To Our Friends in the United States Congress:

We have taken the liberty to make a few brief statements as to the reason the post office clerks are now asking for a salary increase and hope you will find time to help us in securing the salary bills now before the committees in Congress.

Postal employees have a right to a wage that is at least fairly comparable to wages paid in private industry for people of equal skill, intelligence and training, and to conditions which the Federal Government itself requires private industry to establish and maintain for its employees. That is the core of our requests, it is the basis for the bills that have been introduced in the Congress, and it is the objective for which we strive. The salary bills are H. R. 2474 in the House and S. 27 in the Senate.

In the last 6 years, we have received one small salary raise and that came with the reclassification bill with biweekly pay periods, showing no increase in the paycheck. Our people in the postal system are required, by necessity, to work part-time jobs, have our wives work, our children are forced out of schools and colleges, all in order to provide our families with a bare minimum existence, which is not possible now with our present paychecks. The salary legislation now before Congress would recognize the inadequate salaries paid all post office employees within the service. Dollarwise, post office clerks in 1939 were the highest paid among 33 groups included in a survey from the Bureau of Labor Statistics, United States Department of Labor, Earnings and Hours Series. Today, in 1957, they rank 22d among this same group and only 11 of those included in the survey have a smaller gross weekly wage. The 33 groups referred to in this survey are a representative cross section of the working population and does not include the building trades, whose work is regarded as seasonal.

Postal workers have fallen far behind during the last 8 years in salary adjustments and now get from $1,000 to $2,000 less a year for work requiring similar skills. During the last 3 years post office personnel has been increased by only 3 percent, while the volume of work has increased 11 percent in the same period.

Recruitment of personnel has also become a major problem due to the inadequate salaries. The new man, or sub as he is referred to, comes into the post office with high regard to the caliber of position he has, and, for a while, working 11, 12 or more hours a day, earns a decent wage. However, upon being promoted from a sub to a regular clerk or carrier he no longer can work the unlimited hours as before, and he now takes a salary drop, enough to make him leave the service after he has just about become a qualified clerk or carrier. His basic salary upon becoming a regular employee is $3,600 per year, which leaves him $120 every 2 weeks for a family of 3 after deductions, not including any State taxes or bond deductions. The great turnover of postal people results from the low salary paid when a man or woman gets the regular status. Now, in many offices, it is difficult, if not impossible, to recruit the high caliber of post office employee that is desired for the safe and proper handling of the United States mail, because of the inadequate salaries.

May we bring to your attention the salary resolution approved unanimously by the Minnesota State Legislature and signed by Gov. Orville L. Freeman on March 8, 1957. To shorten this we will give you the resolves:

"Now, therefore, be it—

"*Resolved*, That the house of representatives of the State of Minnesota (with the Senate concurring) endorses a salary schedule for the postal employees commensurate with that of private industry and which will give adequate recognition of the increased productivity of postal employees; and be it further

"*Resolved*, That a copy of this resolution be transmitted to the Presiding Officers of the Senate and the House of Representatives and to each Member of Congress from the State of Minnesota."

This demonstrates our Minnesota Legislature recognizes the need for a salary adjustment to meet the increased cost of living and increased productivity of postal employees.

Also let us add from the remarks of Congressman Edwin H. May, Jr., of Connecticut, in the house of representatives on Wednesday, March 20, 1957:

"Within the memory of man now living, the postal service was a career that men entered proudly, and carried on with unflagging devotion. But times have changed. Wages have lagged and working conditions have either deteriorated or remained static. And that once splendid morale has also begun to disappear. That is the priceless ingredient that makes the difference in postal service. The Postmaster General who first recognizes this fact will be a great one."

Now, morale is a great factor in employment, be it on a beach in Normandy or in the Post Office in Minneapolis. We can tell you that we do not have that factor in our office in Minneapolis, simply because so many have regretted even entering the service and now living with an eternal struggle to try to get by. Our office in Minneapolis never

had so many complaints about unpaid debts as are coming in now, and the postal manual, section 744.434 states, "Employees shall meet their obligations promptly so there will be no cause for embarrassment or criticism." But, in the face of our present salary we have no alternative but to be subject to criticism under this article. Last month the Government reported that the cost of living had reached an alltime high for the 6th consecutive month. Postal employees are caught in the middle, on static salary and no "bargaining rights." The President requested the Heller Associates to make a survey in a large midwestern city in 1955, the purpose being to find out how much money is required for a family of four to live comfortably. The report showed the salary to be $5,440 a year. Top-grade post-office clerks, level 4, now get $4,410 or $1,000 less a year than it took 2 years ago to live comfortably.

If we may continue, we would like to illustrate a few items from the Minneapolis Star-Journal and the Minneapolis Morning Tribune that have been printed in recent weeks. These statements refute the argument that we (postal employees) are starting a new round of inflation, which some people in Washington are suggesting.

"Contractors reach accord with 8 unions." Quote, "As of yesterday, the Associated General Contractors agreement provides for a 15-cent hourly increase with additional 15-cent increases May 1, 1958 and May 1, 1959. It put the following wage scales into effect: carpenters, $3.15 an hour, cement masons $3.25 an hour, laborers, $2.40 an hour, etc."

"Pay boost averts city milk strike." Quote: "Inside workers and drivers will receive pay increases of 13 cents an hour. Rates of inside workers will go to $2.53 an hour."

"District 89 teachers get $200 hikes." District 89 is the Golden Valley Independent School District, located just west of the city of Minneapolis.

"Pay boosts of 15 cents for plasterers." Quote: "The increase effective now brings their scale to $3.25 an hour, with similar boosts of 15 cents each May 1 during the 3 years of the contract."

"Pay increase ordered for servicemen." This is a direct result of the study made by the Cordiner Committee.

"Four hundred county employees voted pay hike."

"City recommends 15 percent pay increases for laborers and truckdrivers." Quote: "Laborers affected now are making $2.25 to $2.39 an hour, drivers $2.30 an hour before this increase will take effect."

In the light of all these recent pay increases, only since May 1, 1957, in Minneapolis, how can anyone state, with any authority, that the proposed raise for postal employees will start a new round of wage increases, and start a new inflation spiral. We are barely hanging on and would like to get an increase, to bring us up to where we can pay our just debts.

Very truly yours,

PATRICK J. NILAN,
President.
RAYMOND R. MATTSON,
Legislative Chairman.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MAGNUSON, from the Committee on Appropriations, with amendments:

H. R. 5788. An act making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes; (Rept. No. 371).

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce, without amendment:

H. R. 2493. An act to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes; (Rept. No. 372).

By Mr. GREEN, from the Committee on Foreign Relations, without amendment:

S. J. Res. 64. Joint resolution to implement the convention between the United States of America and Norway, which entered into force on November 9, 1948, for the disposition of the claim against the Government of the United States of America asserted by the Government of Norway on behalf of Christoffer Hannevig; (Rept. No. 370).

GENERAL GOVERNMENT APPROPRIATIONS

Mr. JOHNSON of Texas. Mr. President, the general Government appropriation bill, which covers largely items for the White House, including the President's salary, and so forth, was reported by the senior Senator from Washington [Mr. MAGNUSON]. I am aware of no controversial features in the bill. The report is available, and the printed hearings are available. This is one of the relatively small appropriation bills.

I have talked with the Senator from Delaware [Mr. WILLIAMS] and the Senator from Illinois [Mr. DOUGLAS], who maintain constant surveillance over all appropriation bills. It is agreeable to them to consider the bill today. If we can do so, we may avoid the necessity of roll calls tomorrow and a session on Friday.

I therefore ask unanimous consent that it may be in order later in the day to proceed to the consideration of the general Government appropriation bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Texas?

Mr. SALTONSTALL. Mr. President, as a member of the subcommittee, I agree with what the Senator from Texas has said. So far as I know there is no controversial feature in the bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GREEN (for himself and Mr. WILEY) (by request):

S. 2130. A bill to amend further the Mutual Security Act of 1954, as amended, and for other purposes; to the Committee on Foreign Relations.

(See the remarks of Mr. GREEN when he introduced the above bill, which appear under a separate heading.)

By Mr. WILEY (for himself and Mr. WATKINS):

S. 2131. A bill to provide that the dates for submission of plan for future control of property and transfer of the trust property of the Menominee Tribe shall be delayed; to the Committee on Interior and Insular Affairs.

By Mr. YOUNG:

S. 2132. A bill for the relief of Leonard C. Fink; to the Committee on the Judiciary.

By Mr. SALTONSTALL:

S. 2133. A bill to authorize the appointment of citizens of Guam to the United States Military Academy, the United States Naval Academy, and the United States Air Force Academy; to the Committee on Armed Services.

By Mr. LAUSCHE:

S. 2134. A bill for the relief of Junior Yoo Luhta; to the Committee on the Judiciary.

By Mr. LAUSCHE (for himself and Mr. NEUBERGER):

S. 2135. A bill for the relief of a certain Korean war orphan; and

S. 2136. A bill for the relief of Mark Raymond Johnson (Ray Whang) and Lance Holt Johnson (Lance Whang); to the Committee on the Judiciary.

By Mr. ALLOTT:

S. 2137. A bill to provide for registration, reporting, and disclosure of certain welfare, benefit, and pension plans; to the Committee on Labor and Public Welfare.

By Mr. MAGNUSON:

S. 2138. A bill to amend the Canal Zone Code to make certain changes in the fiscal obligations of the Panama Canal Company; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of South Dakota:

S. 2139. A bill for the relief of Robert Lloyd Painter; to the Committee on the Judiciary.

By Mr. NEUBERGER (for himself and Mr. MORSE):

S. 2140. A bill to provide for the increase of the monthly rates of pension to widows and former widows of deceased veterans of the Civil War whose deaths were nonservice connected; to the Committee on Finance.

(See the remarks of Mr. NEUBERGER when he introduced the above bill, which appear under a separate heading.)

By Mr. MORSE (for himself, Mr. CLARK, and Mr. CASE of New Jersey):

S. 2141. A bill to authorize the District of Columbia to borrow from the United States Treasury not to exceed $70 million for public school construction and improvements; to the Committee on the District of Columbia.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. HOLLAND (for himself and Mr. KUCHEL):

S. 2142. A bill to amend section 8e of the Agricultural Adjustment Act (of 1933), as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, so as to provide for the extension of the restrictions on imported commodities imposed by such section to all imported citrus fruits, and to sliced figs, dried figs, and fig paste; to the Committee on Agriculture and Forestry.

By Mr. CASE of New Jersey:

S. 2143. A bill to validate the salary overpayments made to certain officers and employees incident to the salary adjustment provisions of the Federal Employees Salary Increase Act of 1955, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MORSE (for himself and Mr. NEUBERGER):

S. 2144. A bill to provide for the construction by the Secretary of the Interior of the Bully Creek Dam and other facilities, Vale Federal reclamation project, Oregon; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. MARTIN of Pennsylvania:

S. 2145. A bill to amend the Tennessee Valley Authority Act of 1933 in order to authorize the Tennessee Valley Authority to undertake certain financing activities, to require it to charge just and reasonable rates and to require certain payments to the United States, and for other purposes; to the Committee on Public Works.

(See the remarks of Mr. MARTIN of Pennsylvania when he introduced the above bill, which appear under a separate heading.)

By Mr. GOLDWATER:

S. 2146. A bill for the relief of William F. Peltier; and

S. 2147. A bill for the relief of Chong Sook Rhee; to the Committee on the Judiciary.

By Mr. IVES:

S. J. Res. 95. Joint resolution granting the consent of Congress to an agreement or compact between the State of New York and the Government of Canada providing for the continued existence of the Buffalo and Fort Erie Public Bridge Authority, and for other purposes; to the Committee on Foreign Relations.

By Mr. MAGNUSON:

S. J. Res. 96. Joint resolution to establish the U. S. S. *Enterprise* (CV–6) in the Nation's Capital as a national shrine; to the Committee on Armed Services.

(See the remarks of Mr. MAGNUSON when he introduced the above joint resolution, which appear under a separate heading.)

MUTUAL SECURITY ACT OF 1957

Mr. GREEN. Mr. President, on behalf of myself, and the senior Senator from Wisconsin [Mr. WILEY], by request, I introduce, for appropriate reference, a bill to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The bill has been prepared by the executive branch to carry out the recommendation of the President made in his message to Congress which has just been received by the Senate.

The senior Senator from Wisconsin and I are introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention.

As usual, I reserve my right to support or oppose the bill, or any part of it, as well as any suggested amendments to it, when the bill is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill may be printed at this point in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2130) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, introduced by Mr. GREEN (for himself and Mr. WILEY), by request was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this act may be cited as the "Mutual Security Act of 1957."

SEC. 2. Title I, chapter 1, of the Mutual Security Act of 1954, as amended which relates to mission assistance, is further amended as follows:

(a) Amend section 103, which relates to authorization, as follows:

(1) Strike out subsection (a) and substitute the following:

"(a) There are hereby authorized to be appropriated to the President such sums as may be necessary from time to time to carry out the purposes of this chapter, which sums shall remain available until expended."

(2) In subsection (b), strike out "and of section 124."

(3) In subsection (c), add at the end thereof the following new sentence: "When appropriations made pursuant to this section are used to furnish military assistance on terms of repayment within 3 years or earlier, dollar repayments, including dollar proceeds derived from the sale of foreign currency received hereunder to any United States Government agency or program, may be credited to the current applicable appropriation and shall be available until expended for the purposes of this chapter, and, notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, repayments in foreign currency may be used for the purposes of this chapter.".

(b) In section 104 (a), which relates to infrastructure, strike out in the first sentence the words between "Organization," and "out of funds"; strike out "$780,000,000" in the first sentence and substitute "$1,000,000,000"; strike out the second sentence; and in the last sentence strike out ", as heretofore agreed upon,".

(c) In section 105 (b) (3), which relates to conditions applicable to military assistance, strike out the words between "Asia" and ", the President."

(d) Amend section 107, which relates to waivers of law, as follows:

(1) In subsection (a), strike out "1262 (a), and title 34, United States Code, section 546 (e)" and substitute "7307 (a)."

(2) In subsection (b), strike out "Revised Statutes 1222 (10 U. S. C. 576)" and substitute "title 10, United States Code, sections 3544 (b) and 8544 (b)."

(e) Repeal section 108, which relates to transfer of military equipment to Japan.

SEC. 3. Chapter 2 of title I of the Mutual Security Act of 1954, as amended, which relates to southeast Asia and the Western Pacific, and direct forces support, is hereby repealed.

SEC. 4. Title I, chapter 3, of the Mutual Security Act of 1954, as amended, which relates to defense support, is further amended as follows:

(a) Amend section 131, which relates to General authority, as follows:

(1) In subsection (a), before "designed" in the first sentence, insert "specifically."

(2) Strike out subsection (b) and substitute the following:

"(b) There are hereby authorized to be appropriated to the President such sums as may be necessary from time to time to carry out the purposes of this chapter, which sums shall remain available until expended."

(3) Strike out subsection (c), and redesignate subsection "(d)" as subsection "(c)."

(b) Repeal section 132, which relates to the Korean program.

SEC. 5. Title I, chapter 4, of the Mutual Security Act of 1954, as amended, which relates to general provisions relating to mutual defense assistance, is further amended as follows:

(a) In section 142 (b), which relates to agreements, strike out in the first sentence "chapter 2 or" and "or under title II."

(b) Repeal section 143.

SEC. 6. Title II of the Mutual Security Act of 1954, as amended, which relates to development assistance, is further amended by striking out the heading of the title, "Development Assistance", and substituting "Development Loan Fund"; by striking out subsections (a) and (b) of section 201; by redesignating subsection (c) of section 201 as subsection (d) of section 537 and striking out therein "this title" and "411 (c)" and substituting, respectively, "section 400" and "411 (b)"; and by inserting the following new sections:

"SEC. 201. Declaration of Purpose: The Congress of the United States recognizes that the progress of free peoples in their efforts to further their economic development, and thus to strengthen their freedom, is important to the security and general welfare of the United States. The Congress further recognizes the necessity of assistance to such peoples if they are to succeed in these efforts. The Congress accordingly reaffirms that it is the policy of the United States, and declares it to be the purpose of this title, to assist, on a basis of self-help and mutual cooperation, the efforts of free peoples to develop their economic resources, increase their productive capabilities, and raise their standards of living.

"SEC. 202. General Authority: (a) There is hereby established a fund to be known as the 'Development Loan Fund' (hereinafter referred to in this title as 'the Fund') to be used by the President to finance activities and transactions carried out pursuant to authority contained in this title.

"(b) To carry out the purposes of this title, the President is hereby authorized to make loans, credits, or guaranties, or to engage in other financing activities or transactions (not to include grants or direct purchases of equity securities), to or with such nations, organizations, persons or other entities, and on such terms and conditions, as he may determine, taking into account (1) whether financing could be obtained in whole or in part from other free-world sources on reasonable terms, (2) the economic and technical soundness of the activity or transaction, and (3) whether the activity or transaction gives reasonable promise of contributing to the development of economic resources, increase of productive capacities, or improvement of standards of living in furtherance of the purposes of this title. The Fund shall be administered so as to support and encourage private investment and other private participation furthering the purposes of this title. The authority of section 401 (a) of this Act may not be used to waive the requirements of this title, nor may the authority of section 501 of this Act be used to increase or decrease the funds available under this title.

"SEC. 203. Capitalization: (a) There is hereby authorized to be appropriated to the President without fiscal-year limitation, for advances to the Fund, not to exceed $500,000,000. In addition, unless disapproved in the appropriation act appropriating funds pursuant to the authorization contained in the preceding sentence, the Secretary of the Treasury is authorized and directed to make, beginning in the fiscal year 1959, loans to the Fund in amounts needed to cover obligations incurred against the Fund. Except as provided in section 204 (b) of this act, the maximum amount of obligations incurred against the Fund during the fiscal year 1958 shall be $500,000,000, during the fiscal year 1959 shall be $750,000,000, and during the period beginning in the fiscal year 1960 shall be $750,000,000; and any unused portion of the maximum applicable to any period shall be added to the maximum applicable to the succeeding period.

"(b) For purposes of the loans provided for in this section, the Secretary of the Treasury is authorized to use the proceeds of the sale of any securities issued under the Second Liberty Bond Act as now in force or as hereafter amended, and the purposes for which securities may be issued under the Second Liberty Bond Act are hereby extended to include this purpose. The President shall determine the terms and conditions of any advances or loans made to the Fund pursuant to this section.

"SEC. 204. Fiscal Provisions: (a) All receipts from activities or transactions under this title shall be credited to the Fund and,

notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law relating to the use of foreign currencies or other receipts accruing to the United States, shall be available for use for purposes of this title.

"(b) The President is authorized to incur, in accordance with the provisions of this title, obligations against the Fund in amounts which may not at any time exceed the assets of the Fund. The amount of such obligations also may not exceed the limitations specified in section 203 (a) of this Act, except that, to the extent that assets of the fund other than capitalization provided pursuant to section 203 (a) are available, obligations may be incurred beyond such limitations. The term 'assets of the Fund' as used in this section shall mean the amount of liquid assets of the Fund at any given time, including any amount of capitalization authorized pursuant to section 203 (a) of this Act, which has not been advanced or loaned to the fund as of such time. The Fund shall be available without fiscal-year limitation for any obligations or expenditures in connection with the performance of functions under this title, including repayment of loans made to the Fund pursuant to section 203 (a) of this Act.

"(c) In the performance of and with respect to the functions, powers, and duties vested in him by this title, the President shall prepare annually and submit a budget program in accordance with the provisions of the Government Corporation Control Act, as amended; and he shall cause to be maintained an integral set of accounts which shall be audited by the General Accounting Office in accordance with principles and procedures applicable to commercial corporate transactions as provided by the Government Corporation Control Act, as amended, and no other audit shall be required.

"SEC. 205. Powers and Authorities: In carrying out the purposes of this title, any officer or agency of the United States designated to exercise authorities provided for hereunder may, in addition to other powers and authorities provided in this Act or elsewhere, and as the President may direct, enter into, perform, and modify contracts, leases, agreements, or other transactions, on such terms as may be deemed appropriate, with any agency or instrumentality of the United States, with any foreign government or foreign government agency, or with any person, partnership, association, corporation, organization, or other entity, public or private, singly or in combination; accept and use gifts or donations of services, funds, or property (real, personal or mixed, tangible or intangible); contract for the services of attorneys; determine the character of and necessity for obligations and expenditures under this title, and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations; acquire and dispose of, upon such terms and conditions and for such consideration as such officer or agency shall determine to be reasonable, through purchase, exchange, discount, rediscount, public or private sale, negotiation, assignment, exercise of option or conversion rights, or otherwise, for cash or credit, with or without endorsement or guaranty, any property, real, personal, mixed, tangible, or intangible, including, but not limited to, mortgages, bonds, debentures (including convertible debentures), liens, pledges, and other collateral or security, contracts, claims, currencies, notes, drafts, checks, bills of exchange, acceptances, including bankers' acceptances, cable transfers, and all other evidences of indebtedness or ownership (provided that equity securities may not be directly purchased, although such securities may be acquired by other means, such as by exercise of conversion rights or through enforcement of liens, pledges, or otherwise, to satisfy a previously incurred indebtedness), and guarantee payment against any instrument above specified; issue letters of credit and letters of commitment; collect or compromise any obligations assigned to or held by, and any legal or equitable rights accruing to, such officer or agency, and, as such officer or agency may determine, refer any such obligations or rights to the Attorney General for suit or collection; and otherwise take any and all actions determined by such officer or agency to be necessary or desirable in making, carrying out, servicing, compromising, liquidating, or otherwise dealing with or realizing on any transaction or activity authorized by this title."

SEC. 7. Title III of the Mutual Security Act of 1954, as amended, which relates to technical cooperation, is further amended as follows:

(a) In section 304, which relates to authorization, strike out subsections (a) and (b) and substitute the following: "There are hereby authorized to be appropriated to the President such sums as may be necessary from time to time to carry out the purposes of this title."

(b) Amend section 306, which relates to multilateral technical cooperation, as follows:

(1) Strike out the text of subsection (a) and substitute the following:

"$15,500,000 for the fiscal year 1958 for contributions to the United Nations Expanded Program of Technical assistance: *Provided*, That, notwithstanding any other provision of law, the United States contribution to this program for the calendar year 1958 may constitute as much as, but shall not exceed 45 percent of the total amount contributed to the program for that period.".

(2) Strike out the text of subsection (b) and substitute the following:

"$1,500,000 for the fiscal year 1958 for contributions to the technical cooperation program of the Organization of American States.".

SEC. 8. Title IV of the Mutual Security Act of 1954, as amended, which relates to other programs, is further amended as follows:

(a) Insert before section 401 the following new section:

"SEC. 400. Special Assistance.—There is hereby authorized to be appropriated to the President for the fiscal year 1958 not to exceed $300 million for use on such terms and conditions as he may specify for assistance designed to maintain or promote political or economic stability or for assistance in accordance with the provisions of this act applicable to the furnishing of assistance under title I, section 304, section 405, or section 407 of this act. $100 million of the funds authorized to be appropriated pursuant to this section for any fiscal year may be used in such year in accordance with the provisions of section 401 (a)."

(b) Amend section 401, which relates to special fund, as follows:

(1) Strike out the title of this section and substitute "President's Special Authority."

(2) In subsection (a), strike out "to be appropriated under subsection (b) hereof" in the first sentence and substitute "for such use by section 400 of this act"; before ", in furtherance of" in the first sentence, insert "or any act appropriating funds pursuant to authorizations contained in this act"; and strike out the second sentence.

(3) Strike out subsection (b).

(4) Redesignate subsection "(c)" as subsection "(b)."

(c) In section 402, which relates to earmarking of funds, strike out all preceding "shall be used" in the first sentence and substitute "Of the funds authorized to be made available in the fiscal year 1958 pursuant to this act (other than funds made available pursuant to title II), not less than $175 million."

(d) Amend section 403, which relates to special assistance in joint control areas, as follows:

(1) In subsection (a), strike out the subsection designation "(a)"; and in the second sentence strike out all following "the President" and substitute "for the fiscal year 1958 not to exceed $11,500,000 to carry out this section.".

(2) Strike out subsection (b).

(e) Amend section 405, which relates to migrants, refugees, and escapees, as follows:

(1) In subsection (a), strike out the words between "appropriated" and "such amounts"; and strike out the last sentence.

(2) In subsection (c), strike out the words between "appropriated" and "for contributions" and substitute "for the fiscal year 1958 not to exceed $2,233,000."

(3) In subsection (d), strike out the words between "President" and "for continuation" and substitute "for the fiscal year 1958 not to exceed $5,500,000."

(f) Amend section 406, which relates to children's welfare, as follows:

(1) In subsection (a), strike out the subsection designation "(a)"; and strike out all following "exceed" and substitute "$11 million for the fiscal year 1958 for contributions to the United Nations Children's Fund.".

(2) Strike out subsection (b).

(g) In section 407, which relates to Palestine refugees in the Near East, strike out the first two sentences in subsection (a) and substitute in lieu thereof the text of the present subsection (b); strike out the subsection designation "(a)"; and strike out subsection (b).

(h) In section 408, which relates to the North Atlantic Treaty Organization, strike out in subsection (a) the words between "appropriated" and "such amounts."

(i) Amend section 409, which relates to ocean freight charges, as follows:

(1) Strike out the text of subsection (c) and substitute "There is hereby authorized to be appropriated to the President for the fiscal year 1958 not to exceed $2,200,000 to carry out the purposes of this section.".

(2) In subsection (d), strike out all preceding "to pay" in the first sentence and substitute "In addition, any funds made available under this Act may be used, in amounts determined by the President,"; and strike out the second sentence.

(j) In section 410, which relates to Control Act expenses, strike out the words between "President" and "for carrying out" in the first sentence and substitute "for the fiscal year 1958 not to exceed $1,300,000."

(k) Amend section 411, which relates to administrative and other expenses, as follows:

(1) In subsection (b), strike out the words between "President" and "for necessary" and substitute "for the fiscal year 1958 not to exceed $35 million"; strike out "and section 124"; and before the period at the end of the subsection, insert "and functions under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U. S. C. 1691 and the following) performed by any agency or officer administering nonmilitary assistance."

(2) Strike out subsection (c), and redesignate subsections "(d)" and "(e)" as subsections "(c)" and "(d)", respectively.

(l) Repeal section 412, which relates to Chinese and Korean students.

(m) Repeal sections 419 and 421, relating, respectively, to World Health Organization and Food and Agriculture Organization, which repeals shall not be deemed to affect amendments contained in such sections to acts other than the Mutual Security Act of 1954, as amended; and add the following new sections:

"SEC. 419. Atoms for Peace: (a) The President is hereby authorized to furnish from funds made available pursuant to this section, in addition to other funds available for

such purposes, and on such terms and conditions as he may specify, assistance designed to promote the peaceful uses of atomic energy abroad. There is hereby authorized to be appropriated to the President for the fiscal year 1958 not to exceed $7 million to carry out the purposes of this section.

"(b) The United States share of the cost of any research reactor made available to another government under this section shall not exceed $350,000.

"(c) In carrying out the purposes of this section, the appropirate United States departments and agencies shall give full and continuous publicity through the press, radio, and all other available mediums, so as to inform the peoples of the participating countries regarding the assistance, including its purpose, source, and character, furnished by the United States. Such portions of any research reactor furnished under this section as may be appropriately diestamped or labeled as a product of the United States shall be so stamped or labeled.

"SEC. 420. Malaria Eradication: The Congress of the United States, recognizing that the disease of malaria, because of its widespread prevalence, debilitating effects, and heavy toll in human life, constitutes a major deterrent to the efforts of many peoples to develop their economic resources and productive capacities and to improve their living conditions, and further recognizing that it now appears technically feasible to eradicate this disease, declares it to be the policy of the United States and the purpose of this section to assist other peoples in their efforts to eradicate malaria. The President is hereby authorized to furnish to such nations, organizations, persons, or other entities as he may determine, and on such terms and conditions as he may specify, financial and other assistance to carry out the purpose of this section. Funds made available pursuant to authorizations contained in this act (other than title I, chapter 1, and title II) may be used to carry out the purpose of this section."

SEC. 9. Title V, chapter 1, of the Mutual Security Act of 1954, as amended, which relates to general provisions, is further amended as follows:

(a) Amend section 503, which relates to termination of assistance, as follows:

(1) Strike out the subsection designation "(a)"; and in the last sentence of subsection (a) strike out "subsection" and substitute "section."

(2) Strike out subsection (b).

(b) In section 504 (a), which relates to small business, strike out "chapters 2 and" and substitute "chapter."

(c) Amend section 505, which relates to loan assistance and sales, as follows:

(1) In subsection (a), strike out "Assistance" in the first sentence and substitute "Except as otherwise specifically provided in this act, assistance"; and after "commodities" both times it appears in the second sentence, insert ", equipment, materials,".

(2) In subsection (b), strike out the first sentence; and strike out "shall" both times it appears in the second sentence and substitute "may."

(d) In section 509, which relates to shipping on United States vessels, strike out the first sentence.

(e) In section 511 (c), which relates to retention and return of equipment, after "materials" the first time it appears, insert "on a grant basis"; and strike out "other than equipment or materials sold under the provisions of section 106)."

SEC. 10. Title V, chapter 2, of the Mutual Security Act of 1954, as amended, which relates to organization and administration, is further amended as follows:

(a) In section 527 (c), which relates to employment of personnel, after "shall be entitled" in paragraph (1), insert ", except to the extent that the President may specify otherwise,"; and before the period at the end of paragraph (2), insert ": *Provided, however,* That the President may by regulation make exceptions to the application of section 528."

(b) In section 534, which relates to reports, after "504,", insert "202, 400,".

(c) In section 535 (b), which relates to cooperation with nations and international organizations, before "in furtherance of" in the first sentence insert "consistent with and"; and strike out "and within the limitations" in the first sentence.

(d) Amend section 537, which relates to provisions on uses of funds, as follows:

(1) In the opening clause of subsection (a), within the parentheses, strike out "and section 124."

(2) In subsection (a), paragraph (1), strike "1957" and substitute "1958."

(3) Amend the text of subsection (a), paragraph (10), to read "rental or lease outside the continental limits of the United States of offices, buildings, grounds, and living quarters to house personnel; maintenance, furnishings, necessary repairs, improvements, and alterations to properties owned or rented by the United States Government abroad; and costs of fuel, water, and utilities for such properties;".

(4) In subsection (a), paragraph (17), strike out "or" preceding "(iii)"; and after "another", insert ", (iv) when he is temporarily absent from his post under orders, or (v) when through no fault of the employee storage costs are incurred on such furniture and effects (including automobiles) in connection with authorized travel."

(5) In subsection (c), strike out the words preceding "funds"; change "funds" to "Funds"; and strike out "in the fiscal year 1957."

(6) Add the following new subsection:

"(e) Funds available under this act may be used to pay costs of training United States citizen personnel employed or assigned pursuant to section 527 (c) (2) of this act (through interchange or otherwise) at any State or local unit of government, public or private nonprofit institution, trade, labor, agricultural, or scientific association or organization, or commercial firm; and the provisions of Public Law 918, 84th Congress, may be used to carry out the foregoing authority notwithstanding that interchange of personnel may not be involved or that the training may not take place at the institutions specified in that act. Such training shall not be considered employment or holding of office under title 5, United States Code, section 62, and any payments or contributions in connection therewith may, as deemed appropriate by the head of the United States Government agency authorizing such training, be made by private or public sources and be accepted by any trainee, or may be accepted by and credited to the current applicable appropriation of such agency: *Provided, however,* That any such payments to an employee in the nature of compensation shall be in lieu of or in reduction of compensation received from the Government of the United States."

SEC. 11. Title V, chapter 3, of the Mutual Security Act of 1954, as amended, which relates to repeal and miscellaneous provisions, is further amended as follows:

(a) In section 543, relating to saving provisions, insert the following new subsections:

"(d) Funds appropriated pursuant to provisions of this Act repealed by the Mutual Security Act of 1956 or the Mutual Security Act of 1957 shall remain available for their original purposes in accordance with the provisions of law originally applicable thereto. The repeal by the Mutual Security Act of 1957 of sections 121, 131 (c) and 132 of this act shall not be deemed to affect the authority contained in the third sentence of section 121, or the authorities contained in the last sentence of section 131 (c), that part of the first sentence of section 132 (a) which relates to payment of ocean freight charges on shipments to Korea for relief without regard to the requirements of section 409, and section 132 (d). References in any act to provisions of this act repealed or stricken out by the Mutual Security Act of 1957 are hereby stricken out; and references in any act to provisions of this act redesignated by the Mutual Security Act of 1957 are hereby amended to refer to the new designations."

(b) Amend section 544, which relates to amendments to other laws, as follows:

(1) Repeal subsections (a), (c), (d), (e), (f), (g), (h), and (i), which repeals shall not be deemed to affect amendments contained in such subsections to acts other than the Mutual Security Act of 1954, as amended; and redesignate subsection "(b)" as subsection "(a)."

(2) Add the following new subsection:

"(b) Public Law 174, 79th Congress, as amended, is hereby further amended by striking out the proviso at the end of section 2."

(c) In section 546 (b), relating to construction, strike out "Atomic Energy Act of 1946, as amended (42 U. S. C. 1801)" and substitute "Atomic Energy Act of 1954, as amended (42 U. S. C. 2011)."

(d) Repeal section 547, which relates to reduction of authorizations.

(e) In section 549, relating to special provision on availability of funds, strike out "chapter 3 of title I" and strike out the comma following "title III."

AMENDMENT OF CANAL ZONE CODE, RELATING TO FISCAL REQUIREMENTS OF PANAMA CANAL COMPANY

Mr. MAGNUSON. Mr. President, I introduce, for appropriate reference, a bill which would amend sections 246 and 249 of the Canal Code in order to adjust fiscal requirements of the Panama Canal Company. The Members of the Senate will recall that last year the Senate Interstate and Foreign Commerce Committee held lengthy hearings and ultimately reported favorably S. 2167, which, among other things, contained the fiscal adjustments incorporated in the bill now introduced. As a result of some improvements in the administrative practices, and as a result of continually changing circumstances, last year's bill has been scaled down considerably.

I ask unanimous consent that a memorandum explaining the proposed legislation be inserted in the RECORD at this point.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the memorandum will be printed in the RECORD.

The bill (S. 2138) to amend the Canal Zone Code to make certain changes in the fiscal obligations of the Panama Canal Company, introduced by Mr. MAGNUSON, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The memorandum presented by Mr. MAGNUSON is as follows:

MEMORANDUM TO ACCOMPANY DRAFT LEGISLATION AMENDING SECTIONS 246 AND 249 OF THE CANAL ZONE CODE

Section 1 of this legislation would amend section 246 of the Canal Zone Code so as to provide a statutory credit to the Canal Zone Government in its annual cost of operation for (a) the net cost of providing customs and immigration services for the Republic of

Panama; (b) of providing school services to nonresidents of the zone other than employees or dependents of employees of the Canal Zone Government or the Panama Canal Company; and (c) one-half of the Federal income taxes derived from United States employees in the Canal Zone employed by the Zone Government, the Panama Canal Company, and the military agencies.

Under present law, the net cost of operation of the Canal Zone Government approximating $10 million per year is required to be covered into the Treasury annually out of revenues from the Panama Canal Company. What the legislation would seek to accomplish is a more equitable distribution of these Zone Government costs between the Company itself and the Federal Government.

It has long been a bone of contention that the Panama Canal Company should use its revenues (derived 80 to 90 percent from tolls and 10 to 20 percent from the employees in the zone) to pay for the cost of supplying free schooling to nonresidents of the zone which free schooling has been determined to be a necessary political gesture to certain outside interests, including certain families in the Republic of Panama. There is a further bone of contention that the providing of immigration and custom services to the Republic of Panama by United States authorities is likewise a political gesture and a service not within the scope of the legislative obligations of the Panama Canal Company. This legislation would remove this annual burden from the Canal Zone Government and hence from the Panama Canal Company by providing a statutory credit for the expenses involved. It would, however, require no additional appropriations from the Federal Government.

The matter of crediting the Canal Zone Government for a portion of the Federal income taxes derived from the personnel residing in the zone is one which is not a new one for Congress to consider. The tolls payers and the employees in the zone have for a number of years supported legislation which would require the Canal Zone Government to bill back to other Federal agencies, including Defense Department, Immigration, Customs, Post Office, etc., those costs which in other jurisdiction are paid directly from Federal appropriations. In the 84th Congress, S. 2167, reported favorably by the Senate Commerce Committee, included such a provision. However, as a result of discussions between the industry and the Panama Canal Company, it is now recognized that such a scheme of billbacks could prove administratively clumsy and that a statutory credit for income taxes paid in the zone is a more logical solution to the problem.

The legislative history leading up to the passage of Public Law 841, the primary law governing canal operations, would indicate that the Company is statutorily required to pay the net cost of Canal Zone Government on the theory that it is in lieu of taxes that it would have to pay if it were a private corporation. It is entirely consistent with this theory to apply revenues in the form of appropriate credits, as well as in the form of cash revenues, in the computation of the net cost to the zone government. The legislation proposed herewith is, therefore, consistent with congressional intent and simply identifies the proportion of Federal income taxes paid which should logically be used as an offsetting credit in computing the net cost of the zone government.

At present, approximately $7.5 million is paid in private income taxes by United States citizens in the Canal Zone. None of these taxes are spent directly by the Federal Government for either the Company or the Canal Zone Government, since both of these entities are self-supporting. In effect, it may be said that local government services are being paid for twice—once by the Canal Company in meeting the net government costs, and again by the individual taxes for which no local credit is given.

Naturally, a portion of any citizen's tax goes to the tremendous Federal expenditure for national defense and security from which United States citizens in the zone directly benefit. It would, therefore, be ignoring that overall obligation to suggest that all income taxes paid by all citizens in the zone be credited to the expenses of running the local Government. But part of the income-tax revenues from United States citizens in the zone should go to pay for a portion of the cost of Federal, State, or municipal services in that area, such as police, fire, sewerage, schools, roads, as well as general Government costs. Even if 50 percent of the estimated $7.5 million paid annually in income taxes were to be credited to the zone government, it still would represent a smaller share of local contribution to local services than is true in other United States local governments.

There is indeed a clear precedent for a full 100 percent income-tax plowback. In other Territorial jurisdictions, under Guam, Puerto Rico, and the Virgin Islands, the full income taxes paid by the citizens therein are paid to the treasury of the Territory for local allocation (U. S. C., title 48, secs. 1421h, 1397, and 734). And although there are political differences between the Canal Zone and United States Territories as regards local government autonomy, the principle is sufficiently analogous as to warrant careful consideration of a tax credit in the zone. Furthermore, whatever the nature of these local government costs, that is whether they are ones which are ordinarily handled in the United States by local taxing authorities or by Federal, the fact remains that they are now borne by the Panama Canal Company in its annual reimbursement to the Treasury and they are paid in lieu of taxes. (H. Doc. No. 460, 81st Cong., p. 14.)

At the time of consideration of Public Law 841 in 1950, United States citizens in the Canal Zone were not paying Federal income taxes. Congress acted on the assumption that there were no other tax revenues from the zone and that, therefore, the Company should pay for all net Government costs without any tax credit. At about the same time, however, and by independent noncoordinated action, Congress also extended the income tax to employees in the Canal Zone, which became effective in 1951. Since that time, various suggestions have been made for legislation to provide for some form of income-tax plowback, agency reimbursement to the Company, or other devices to correct the inequitable financial burden placed upon the Company in reimbursing for necessary local government services. It has been determined that an income-tax credit is the fairest and least controversial device to accomplish this.

In seeking this tax credit, it is important to note that it will not place upon the employee customers in the zone any greater burden than they now have, and further it will not affect the income to the United States Treasury from these individuals, since the tax payments will continue to go directly to the Federal Treasury. The tax credit will not affect the prices of employee services either up or down, since the net cost of the Canal Zone Government is not reflected in the prices charged by the Company. Therefore the proposal does not harm the Canal Zone taxpayer, it merely gives realization and recognition to the fact that his taxes are in part contributing something to the Government services which he enjoys, and which he would be paying for in any other United States jurisdiction.

There is one inherent advantage in this scheme which should be mentioned finally. At present, residents in the zone have no voting franchise and often feel they have little to say about normal Government matters. It stands to reason that if 50 percent of their income taxes were to be reflected in a tax credit to the Zone Government that their interest in local government matters would be greatly increased; and it would mitigate the touchy problem of citizens in the zone being told they have no legitimate say in the local government, because they pay no taxes to the local government.

Section 2 of the proposed legislation would amend section 249 of the Canal Zone Code so as to set up an emergency borrowing authority of $10 million upon which the Company-Government could call in the event Congress is not in session and an operational emergency should arise.

The source of the $10 million fund would come from the so-called emergency fund of $10 million which is now held on the Company books derived from previous surpluses, and provided for in the statute in section 254. Simultaneous with the provision for the borrowing authority would be the abolishment of this fund and amending language requiring that it be paid into the Treasury.

Under section 254 of title 2 of the Canal Zone Code, the Panama Canal Company is already authorized to borrow for temporary periods from this $10 million emergency fund which the Company itself was required to establish in 1948. The draft legislation would simply change the authority to borrow from its own internal $10 million fund and transfer this borrowing authority to a $10 million fund held by the Treasury.

Enactment of the proposed legislation would relieve the company of the obligation to pay interest on the $10 million fund as the paying into the Treasury of this amount of money reduces the interest-bearing investment of the Company. It stands to reason in corporate accounting practice that the holding of funds in excess of normal requirements requires a heavier interest burden than to borrow the money as needed, and only pay interest on the borrowed funds. This principle has the support of the administration and on April 24 a formal request was forwarded to the Congress by the Secretary of the Panama Canal Company for introduction and enactment of legislation to accomplish this.

INCREASED PENSIONS FOR WIDOWS OF CIVIL WAR AND SPANISH-AMERICAN WAR VETERANS

Mr. NEUBERGER. Mr. President, on May 6 the House of Representatives unanimously passed H. R. 358, to increase from $54.18 to $75 the monthly pensions payable to widows and former widows of deceased veterans of the Spanish-American War, and I understand that 83,200 widows will benefit from this legislation. This is a most meritorious bill, and I hope that the proposed legislation will receive the prompt approval of the Senate Finance Committee and be reported to the Senate. The present pension of only $54.18 is wholly inadequate, and should be increased to the modest $75 a month.

I feel that it is only simple justice, however, that the pension for Civil War widows be increased to $75 a month. Certainly if the Spanish-American War widows are to receive a needed increase in their pension, the Civil War widows are equally deserving, if not more so, because of their advanced age—and thus this need for more medical care and hospitalization.

The average age of Civil War widows is now 82, and equity demands that the 4,492 Civil War widows—as of March 31, 1957—receive an increase in their extremely modest pension. At the present time, 4,241 Civil War widows receive

$54.18 monthly, the same as Spanish-American War widows. Some 107 widows are receiving additional amounts because their husbands' deaths were caused by service-connected disability, and 144 Civil War widows are receiving varying benefits under special acts.

Mr. President, on behalf of my colleague, the senior Senator from Oregon [Mr. MORSE], and myself, I introduce for appropriate reference, a bill to increase monthly pension benefits to $75 for widows of deceased veterans of the Civil War. I do not feel that the small number of Civil War widows should be overlooked.

Mr. President, Mrs. Matie V. Heller, of Glendale, Oreg., a widow of a Civil War veteran, has recently written to me and called to my attention the oversight of the House of Representatives. I hope that the Senate Finance Committee will amend the proposed legislation for Spanish-American War widows to include the widows of veterans of the Civil War. This to me seems only fair.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2140) to provide for the increase of the monthly rates of pension to widows and former widows of deceased veterans of the Civil War whose deaths were non-service connected, was received, read twice by its title, and referred to the Committee on Finance.

LOANS FOR PUBLIC SCHOOL CONSTRUCTION IN THE DISTRICT OF COLUMBIA

Mr. MORSE. Mr. President, the physical plant of the Washington school system is at a critical point today. Grammar schools with enrollments of 1,250 and 1,485 bear witness to the need for a substantial building program. The population shift to the suburbs which causes so much concern to local leaders in business is in my judgment related to the desire on the part of parents to obtain for their children education in modern schools. Schools that have the proper facilities, and schools that have a lower enrollment, thus permitting more attention to be paid each child, are in this day and age a necessity.

The situation now is at a critical point. Expensive remedies are needed. Washington, D. C., unlike most cities of comparable population in this country does not possess at present the power to borrow, or to issue bonds which would finance on a sound basis the construction of the buildings so urgently needed.

The Congress of the United States has in this matter a responsibility to the District that is unique. It was to enable the Congress to discharge this responsibility that on May 2, 1957, I introduced S. 1982. Today, it is for the same purpose that I propose to introduce a bill designed to achieve the same end, but by a variant method.

I am not wedded to the specific details of either method, but I am concerned to see that the goal is met. Which of the methods is most practical and desirable in attaining the goal can best be determined on the basis of the hearings; hearings, I might add, that should be held at an early date.

My colleagues on the Education Subcommittee of the Committee on the District of Columbia are also much concerned with this matter, and as an expression of that concern join with me today in sponsoring the bill I am introducing.

Mr. President, on behalf of myself and the distinguished and able Senator from Pennsylvania [Mr. CLARK] and the Senator from New Jersey [Mr. CASE], I send to the desk for appropriate reference a bill which contains the views of the District of Columbia Congress of Parents and Teachers on a suggested method of providing for the financing of needed school construction.

I ask unanimous consent Mr. President, that the bill be printed in the RECORD at the conclusion of my remarks, and appropriately referred.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2141) to authorize the District of Columbia to borrow from the United States Treasury not to exceed $70 million for public school construction and improvements, introduced by Mr. MORSE (for himself, Mr. CLARK, and Mr. CASE of New Jersey), was received, read twice by its title, referred to the Committee on the District of Columbia, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That (a) the Commissioners of the District of Columbia are authorized to borrow from the United States, for the exclusive purpose of financing public school capital outlay projects in the District of Columbia, including site acquisition, construction, purchase of equipment, and improvements, such sums, not exceeding in the aggregate $70 million as may be appropriated therefor pursuant to subsection (c) of this section.

(b) The Secretary of the Treasury is authorized, on behalf of the United States, to make loans to the District of Columbia, in the manner provided by section 3, out of moneys appropriated therefor pursuant to subsection (c) of this section.

(c) There are authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, for the 5 fiscal years beginning with the fiscal year ending June 30, 1959, and ending with the fiscal year ending June 30, 1963, such sums, not exceeding in the aggregate $70 million, as may be necessary for making loans to the District of Columbia authorized by this act. Funds appropriated pursuant to this subsection shall remain available until expended for the purpose of making loans to the District of Columbia for such purpose.

SEC. 2. The Commissioners of the District of Columbia shall submit, for each fiscal year beginning with the fiscal year ending June 30, 1959, and ending with the fiscal year ending June 30, 1963, in connection with their request for the appropriation for such fiscal year authorized by subsection (c) of the first section—

(1) a list of the public school capital outlay projects proposed to be commenced during such fiscal year the cost of which is to be defrayed from the proceeds of loans received under the authority of this act;

(2) a statement showing the need for each such project; and

(3) itemized cost estimates for each such project and the fiscal year or years in which such costs will be incurred.

SEC. 3. (a) The Secretary of the Treasury shall, upon request of the Commissioners of the District of Columbia, loan to the District of Columbia, out of moneys appropriated pursuant to subsection (c) of the first section, such sums as the Commissioners may request. Any such loan shall be effectuated by transferring on the books of the Treasury the amount requested to the general fund of the District of Columbia. Sums transferred pursuant to this section shall remain available, for defraying the costs of public school capital outlay projects, until expended.

(b) Interest shall be paid on any loan made pursuant to this act at such rate as would, in the opinion of the Secretary of the Treasury, be the lowest rate available to the District of Columbia on the date such loan is made, if the District of Columbia were authorized by law to issue and sell obligations to the public, at the par value thereof, in a sum equal to the amount of such loan, maturing serially over a comparable period of years in comparable installments of principal and interest, and secured by a first pledge of and lien upon all the general fund revenues of the District of Columbia. Interest shall begin to accrue, with respect to any loan, on the date on which such loan is made in the manner prescribed by subsection (a) of this section.

(c) Any loan made pursuant to this act, together with interest thereon, shall be amortized in 25 annual installments, as prescribed by the Secretary of the Treasury.

(d) There are authorized to be appropriated, out of any moneys in the Treasury to the credit of the general fund of the District of Columbia, for the fiscal year ending June 30, 1960, and for each fiscal year thereafter until all loans, together with interest thereon, made pursuant to this act have been amortized, such sums as may be necessary to amortize, in accordance with the provisions of subsection (c) of this section, all loans made pursuant to this act.

BULLY CREEK DAM, OREG.

Mr. MORSE. Mr. President, on behalf of myself and my colleague, the junior Senator from Oregon [Mr. NEUBERGER], I introduce, for appropriate reference, a bill to provide for the construction by the Secretary of the Interior of the Bully Creek Dam and other facilities, Vale Federal reclamation project, in Oregon.

All Oregon recalls with deep concern the tremendous flood damage that occurred in February of this year in eastern Oregon, in the vicinity of the Malheur and its tributaries, including Bully Creek. Bully Creek has been one of the principal causes of flood damage in the area it courses.

By way of contrast, fertile farmlands in close proximity to Bully Creek thirst for water during the growing season.

Bully Creek Dam would bring not only flood control, but supplemental irrigation water for 32,000 acres now under irrigation in the Vale project, and irrigation for 3,000 additional acres.

The bill would provide excellent multiple-purpose development of a great natural resource of eastern Oregon. I urge prompt and favorable action on this proposed legislation.

Mr. President, I ask that the bill be appropriately referred, and I ask unani-

mous consent that the bill be printed in the RECORD at this point in my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred, and, without objection, the bill will be printed in the RECORD.

The bill (S. 2144) to provide for the construction by the Secretary of the Interior of the Bully Creek Dam and other facilities, Vale Federal reclamation project, Oregon, introduced by Mr. MORSE (for himself and Mr. NEUBERGER), was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized to construct, operate, and maintain the Bully Creek Dam, Reservoir, and related minor facilities as features of the Vale Federal reclamation project, Oregon. In so doing he shall be governed by the Federal reclamation laws (act of June 17, 1902, 32 Stat. 388, and acts amendatory thereof or supplementary thereto) except as otherwise provided in this act. Said construction, however, shall not be commenced until the Vale Oregon Irrigation District shall have obligated itself, by amendment of its repayment contract approved by the act of October 27, 1949 (63 Stat. 941), or otherwise, to repay such portions of the Federal costs of constructing, operating, and maintaining the facilities herein authorized as the Secretary finds properly allocable to irrigation, such repayment to be accomplished during a period ending concurrently with completion of repayment of its existing obligation and on terms substantially similar to those on which that obligation is being repaid.

SEC. 2. (a) The Secretary is authorized, in connection with the works herein authorized, to construct basic public recreation facilities and to arrange for the operation and maintenance of the same by an appropriate State or local agency or organization. He is also authorized to acquire approximately 10 acres of land near Bully Creek Dam for recreation purposes.

(b) In addition to those costs of constructing the works authorized in this act which the Secretary finds to be properly allocable to flood control, recreation, and the preservation and propagation of fish and wildlife, those costs of operating and maintaining the works, or the reasonable capitalized value of the equivalent thereof, which are allocated by the Secretary to these purposes shall be nonreimbursable and nonreturnable under the reclamation laws. Before the works are transferred to the Vale Oregon Irrigation District for care, operation, and maintenance the district shall have agreed either to operate them in such fashion, satisfactory to the Secretary, as to achieve the benefits on which these allocations are predicated or to assume such allocations as an additional repayable and returnable obligation.

SEC. 3. There are hereby authorized to be appropriated such sums as may be required to carry out the purposes of this act.

Mr. NEUBERGER subsequently said: Mr. President, the Bully Creek Dam and Reservoir for which authorization is sought in the bill introduced today by colleague the senior Senator from Oregon [Mr. MORSE] and myself is vitally needed for the improvement of agriculture in Malheur County, Oreg.

Primary objective of the Bully Creek project is to provide supplemental water for 32,000 acres of the Vale irrigation project which now have an inadequate supply. Collateral flood control benefits from the Bully Creek unit also are of considerable significance to this eastern Oregon farm area.

In 1955 the irrigators of the Vale project suffered a serious water shortage and a consequent loss of farm income. Yet only a few weeks ago, late in February, water swept down Bully Creek in such volume that canals and other irrigation facilities, farmland, homes, roads, and utility installations were extensively damaged by flood waters. The situation was so acute that Senator MORSE; the able Congressman from the district, AL ULLMAN, and I asked the President to designate it as a disaster area. Subsequently, the President allocated emergency disaster funds for relief of the flood-stricken area.

Cycles of flood and drought have plagued this section of Malheur County for generations. Elimination of recurrent disaster from drought and disaster from flood requires the addition of storage capacity at the Bully Creek site. It is my understanding that existence of the Bully Creek Reservoir during the recent high-water period would have controlled the crest of the flood, thereby eliminating the need for Federal disaster relief and saving the residents of the area from the ravages of flash floods. Instead of floods in February, the water would be available in the crucial growing periods of July and August for the benefit of crops.

The bill authorizes the Secretary of the Interior to construct, operate, and maintain the Bully Creek Dam, reservoir and related minor facilities as features of the Vale project. Prior to construction, the bill provides that the Vale Irrigation District shall amend its present repayment contract to reimburse the Federal Treasury for the costs allocated to irrigation. This repayment is to be accomplished during the period of the existing contract on terms substantially the same as those covering present project works.

The bill also authorizes the Secretary to construct basic public recreation facilities and to arrange for the operation and maintenance of these features by an appropriate State or local agency.

Construction of the Bully Creek Dam and reservoir in Malheur County will be another forward step in full and comprehensive use of water resources. It is my hope that Congressional action on the project can be completed at an earlier date so that its benefits can be enjoyed by the people of Malheur County.

ESTABLISHMENT OF THE U. S. S. "ENTERPRISE" AS A NATIONAL SHRINE IN THE DISTRICT OF COLUMBIA

Mr. MAGNUSON. Mr. President, I introduce, for appropriate reference, a joint resolution, which I hope will, after being referred to the appropriate committee, be quickly reported to the Senate. The joint resolution is based on the effort to establish a public shrine in connection with the U. S. S. *Enterprise*.

For some months now, the establishment of such a shrine has been the object of a group of us who served in the Navy, particularly those of us who served on the well-known aircraft carrier *Enterprise*, which was the flagship of Admiral Halsey, and took part in every major engagement in the Pacific, and has been the subject of many motion pictures and many naval stories. The *Enterprise* is, of course, one of the greatest ships in the history of the entire Navy, and is fondly called the Fighting Lady, although she never was hurt very much. Let me add that the chevrons on her stack finally required so much space that sometimes we thought we might have to raise her stack a little.

But now—as happens to both men and ships—the *Enterprise* is about to be retired.

Many of us, through a citizens group headed by Admiral Halsey, have decided it would be well to have a public subscription, and it is going very well. A number of us are on the committee, which has for its purpose the endeavor to see whether an appropriate naval shrine can be established in Washington, D. C.

There was some question about where it might be placed, if sufficient funds were raised to obtain the *Enterprise* from the Navy. It has been generally decided—and the groups in many sections of the country favor this—that it might be well for the shrine to be established somewhere in Washington, D. C.

Some legislation is required for that purpose, and that is the purpose of the joint resolution which is sponsored by a large number of Senators. We have conferred with many naval officers and other prominent citizens, and there is agreement that an appropriate shrine should be established in Washington, D. C. A number of uses might be made in that connection of the hangar deck of the *Enterprise*.

However, action must be taken very quickly, before the *Enterprise* is taken to the scrap pile.

Therefore, Mr. President, I am introducing the joint resolution, which, in effect, states the intent of the Congress in that connection. The joint resolution provides that the *Enterprise* shall be released by the Navy and shall be acquired by the Enterprise Association, a nonprofit association, and its leader, Fleet Admiral Halsey, and shall be established in the Nation's Capital as a national shrine, at no expense to the United States.

Mr. President, I am hopeful that the committee to which the joint resolution is referred will report it very quickly, so as to enable the Senate to take action to have established in the city of Washington an appropriate shrine which both the present and the future citizens of the country can view and can hold in respect.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 98) to establish the U. S. S. *Enterprise* (CV–6) in the Nation's Capital as a national shrine, introduced by Mr. MAGNUSON, was received, read twice by its title, and referred to the Committee on Armed Services.

AUTHORIZATION FOR COMMITTEE ON APPROPRIATIONS TO REPORT APPROPRIATION BILLS AND JOINT RESOLUTIONS, WITH NOTICES OF MOTIONS TO SUSPEND THE RULE

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that during adjournments or recesses of the Senate during the remainder of the 1st session of the 85th Congress, the Committee on Appropriations be, and it is hereby, authorized to report appropriation bills, including joint resolutions, with accompanying notices of motions to suspend paragraph 4 of rule 16 for the purpose of offering certain amendments to such bills or joint resolutions, which proposed amendments shall be printed.

Mr. DIRKSEN. Mr. President, reserving the right to object, only for the purpose of inquiry—I believe this is the usual request which is made at about this time during a session. Insofar as I know there is no objection to it.

Mr. JOHNSON of Texas. The Parliamentarian has suggested this procedure, since the Senate has been meeting only 3 days a week. For example, yesterday the Committee on Appropriations ordered the general Government matters appropriation bill to be reported but the chairman of the committee could not file a report because the Senate was in adjournment. Normally, we present a request that the chairman be permitted to file a report notwithstanding a recess or adjournment of the Senate, but that was not done. This unanimous-consent agreement will cover the remaining appropriation bills, some 8 or 9.

Mr. President, I request action on my unanimous-consent request.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I should like to announce that the Committee on Appropriations yesterday ordered reported the general Government matters appropriation bill. I think the distinguished chairman of that committee has filed a report with the Senate. That bill, as recommended, carries appropriations approximately $11,000 under those carried in the House bill.

As all Senators know, the bill affects only the appropriations for the President and the White House. So far as the Senator from Texas is aware, there is no controversy as to the bill.

I wish to invite the attention of all Senators to this matter, however, so that in case they care to review the report or the hearings, they may do so. After they have had an opportunity to do that, we may ask, if there is no objection and no controversy, that that appropriation bill be considered by the Senate, notwithstanding the fact that it has not lain over 3 days.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, May 22, 1957, he presented to the President of the United States the following enrolled bills:

S. 358. An act to authorize the conveyance to the State of Wyoming of about 37.75 acres of land comprising a part of Francis E. Warren Air Force Base; and

S. 1274. An act to amend the act of March 3, 1911 (36 Stat. 1077), to remove restrictions on the use of a portion of the Springfield Confederate Cemetery, Springfield, Mo., and for other purposes.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. BYRD:

Address delivered by him on the occasion of the completion of the restoration of St. Luke's Church, at Smithfield, Va., on May 19, 1957.

By Mr. WILEY:

Statement prepared by him and sundry articles on the progress of Wisconsin and other States in aiding the mentally retarded.

By Mr. JAVITS:

Address entitled "A People's Call for Action," delivered by Senator THYE at a meeting of the combined Jewish Appeal of Chicago and the United Jewish Appeal, in Chicago, Ill., on May 16, 1957.

By Mr. SALTONSTALL:

Excerpts from the Salute to Ghana broadcasts on February 28 and March 4, 1957.

By Mr. CAPEHART:

Address delivered by the Secretary of Agriculture before the Republican regional conference, Cincinnati, Ohio, May 17, 1957.

By Mr. O'MAHONEY:

Article entitled "Theodore Roosevelt: His Relations With Labor."

CRITICISM OF THE PRESIDENT BY SENATOR MORSE

Mr. BRIDGES. Mr. President, I must say that it was with shock that I read in the newspapers of May 19 that the senior Senator for Oregon [Mr. MORSE] called President Eisenhower and Teamster Union President Dave Beck, "two of the same kind of immoralists." According to the press, he did this May 18, 1957, in Detroit, where he spoke at a Jefferson-Jackson Day dinner.

I believe a United States Senator is entitled to complete freedom of speech. That is why I, for one, voted against the censure of the late Senator Joseph McCarthy. But, I believe that unwarranted statements which are certainly untrue and false, both by inference and in fact, such as made by the Senator from Oregon [Mr. MORSE] are in poor taste.

The International News Service quoted Senator MORSE as saying:

The President is reaching into the pockets of working people for interest-free money to finance these private companies, just as Beck reached into the coffers of his union.

From the press accounts, the senior Senator from Oregon seems to have been referring to the development of water power in the Northwest by private companies.

Then, the senior Senator from Oregon is quoted as saying:

This is the most politically immoral administration in our history. Compared to it, Harding was a hero and Grant was a statesman.

It is a most shocking thing, in my estimation, to compare the President of the United States with a man who has pleaded the fifth amendment more than 200 times before a bipartisan Senate committee when asked about his handling of union funds for his own benefit—a man who on Monday of this week was judged by his fellow union officers as unfit to continue longer to be associated with them in the highest echelons of trade unionism.

The speech of the senior Senator from Oregon to which I am adverting was made at a Jackson-Jefferson Day dinner.

Mr. President, both Jefferson and Jackson are revered statesmen of America's great past. They are honored by both Democrats and Republicans as having made important and valuable contributions to our way of life.

It is very fitting that the Democratic Party should pay tribute annually to these two great figures. It may not be so fitting, but certainly is inevitable, that the patriotic dinners where such tribute is paid are subject to a certain amount of political speechmaking.

The idea, I suppose, is to fire loyal organization workers. Judging by the Republican victories in 1952 and 1956, they probably need all the fire they can get.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. CAPEHART. Does the Senator not feel that it was an undeserved, unwarranted, almost unbelievable, and unprecedented attack upon the President? Does the Senator not think it will hurt the able Senator from Oregon much more than it will anybody else? I cannot conceive of a man making such statements. If he made that statement on the floor of the Senate, is it not a fact that he would have been called to order?

Mr. BRIDGES. I think the Senator from Oregon certainly went further than I believe it is proper to go in criticism of the President of the United States in comparing him to a Dave Beck, who is before the bar of the Senate, or a committee of the Senate, in order to avoid testimony damaging to himself, and who invoked the fifth amendment 200 times.

Mr. CAPEHART. Does the Senator not think if the Senator from Oregon had made the statements on the floor of the Senate, he would have been called to order?

Mr. BRIDGES. I believe so.

Mr. CAPEHART. And certainly would have been censured.

Mr. BRIDGES. I do not know about that.

Mr. CAPEHART. He would have been subject to censure.

Mr. BRIDGES. I will say to the Senator from Indiana I do not believe in censuring a United States Senator.

Mr. CAPEHART. I remember that the Senator who made the statements was one of those in the forefront of those censuring our late colleague on this side of the aisle.

Mr. BRIDGES. I believe the statement of the Senator from Indiana is correct. The senior Senator from Oregon was in the forefront of those censuring the late Senator Joe McCarthy or statements he made. I opposed the censuring of Senator McCarthy, as was the Senator from Indiana recorded, but I defend the right of a Senator to make any

statement. In this instance what was said was in poor taste and went too far.

Mr. CAPEHART. There is no question about that. I think the only person harmed by it was the senior Senator from Oregon himself.

Mr. BRIDGES. My distinguished colleagues are no doubt aware that there are several ways to build political fires. Some are fair attacks designed to bring the important issues of our times before the voters. Others, regrettably, are simply assaults upon the character of honest, decent men like the President of the United States, Dwight D. Eisenhower.

I read with great dismay and sadness that the senior Senator from Oregon had seen fit to call our present Government the morally corrupt Eisenhower administration. I was further saddened by the fact that this flat assertion was apparently only backed up with innuendoes.

There must always be room on the American political scene for honest differences of opinion. Without such differences, democracy fails. But I do not believe that character attacks and personal assaults are parts of honest differences of opinion.

I think the presentation of great issues to the American people and the sharp difference of opinion on such issues are a part of America, and one of the things that have helped to make this country great. But I believe that personal assaults and character attacks create a bad political climate in the United States in which good men shy away from public office.

Character attacks are not in conformity with my ideas of honest differences of opinion.

So far as I am aware, no Member of the Senate believes in government by character assassination. This, I am sure, applies to the distinguished senior Senator from Oregon.

I could not help but make this statement, and I notified the senior Senator from Oregon that I was going to make it. I showed him that courtesy. I regret that the Senator from Oregon saw fit to use this language and to make these charges against the President of the United States.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. BUSH. I wish to compliment the distinguished senior Senator from New Hampshire for bringing this matter before the Senate. I think this is one of the most unhappy and unfortunate things that has happened since I have been a Member of this body. I feel personally offended that any colleague of mine would liken the President of the United States to Dave Beck, in view of all that has happened here within the past few weeks and all the revelations made by our own Senate committee.

Mr. President, I believe that a public apology is in order from the senior Senator from Oregon for the very offensive statements which he has made about the President of the United States. Dwight Eisenhower has devoted his entire life to the service of his country. Nobody, heretofore, has ever accused him of being dishonest or immoral in his relations of any kind with the public, with the voters, with the soldiers, or the people anywhere in the world.

I hope the distinguished Senator from Oregon, for whom I have great respect, and who has always been an advocate of fair play—and a very ardent and outspoken one—will apologize as I have suggested.

Several Senators addressed the chair.

The PRESIDING OFFICER (Mr. COTTON in the chair). Does the Senator from New Hampshire yield, and if so to whom?

Mr. BRIDGES. I yield to the Senator from New Jersey [Mr. SMITH].

Mr. SMITH of New Jersey. Mr. President, I am deeply concerned by the subject which has just been called to our attention by the distinguished senior Senator from New Hampshire [Mr. BRIDGES] and other Senators. I had noticed the item myself, and I feel compelled to join with what my colleagues have said about what seems to me to be a shocking statement about the President of the United States.

To charge that President Eisenhower and David Beck are the same kind of men and guilty of similar offenses is so preposterous that it is impossible for those of us who admire and love the President to sit in our seats and not raise a solemn protest.

I am sorry to say that this seems to be in line with what has been appearing from the Democratic opposition. In the New York Times of April 30 Mr. Arthur Krock called our attention to the following in his column:

> Under its new direction the Democratic Digest hews strictly to the party line as drawn by the national committee and publishes only material which specifically advances this line. Therefore the following from the May issue is official:
>
> "Emerging from this first 100 days of the second (Eisenhower) term is an image of an irritable, aging, and nervous President who doesn't concentrate on his work, takes many opportunities to get away from his desk, who is nettled by the criticism he is getting, who is uninformed and isolated by a 'palace guard' that feeds him only one-page memos, who is rapidly losing control of his party and has already lost around the world much of the respect which he built up during World War II."

It is shocking to me that in public life we cannot debate issues honorably and refrain from personalities, as the Senator from New Hampshire has said. I sincerely hope that my good friends on the other side of the aisle realize that these personal attacks on one of the greatest men of our day and age cannot do otherwise than either infuriate the American people, or bring into disrespect our great leader and pour contempt upon the high office of the President of the United States.

It is a source of profound regret to me to hear such thoughtless words from one of our colleagues who, although I have disagreed with him in his political views, I have always held in high personal esteem.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield to the Senator from Massachusetts.

Mr. SALTONSTALL. I thank the Senator.

Mr. President, I commend the Senator from New Hampshire for bringing this subject to the Senate floor, and for what he has said. I am proud to have had the privilege of attending meetings of the legislative leaders at the White House for the past 4 years. I can only say that if there is in public life today any man who has won the support and the franchise of our people at the polls to a greater degreee than has the President of our country I have not found him, and I have never seen a man who has been more sincere in advocating what he believes to be for the public good and in trying to do what he considers to be for the best interest of the public than has President Eisenhower. I have yet to find any such man.

President Eisenhower approaches every problem on the basis of what is for the best interest of the public, not what is going to help him politically or even what is going to help the Republican Party politically. His consideration always is, What is for the best interest of the public? That is certainly not an immoral way of approaching governmental questions.

Mr. President, there is a great difference of opinion, and a proper difference of opinion as to how to approach the subject of the conservation of waterpower. I personally have believed the subject should be approached from the point of view of individual and private enterprise and local interests, where it is possible to do so, and that the Federal Government should enter the picture when the project is too vast to be undertaken by private enterprise. That is a question of a difference of policy. It is a question of judgment.

Certainly it is not only improper but it is indecent to liken the President of the United States to a man such as Dave Beck. Certainly the President is not taking money from the hard-earned savings of people when he advocates building power dams with private capital rather than with public funds. It could be argued on the other side that there would be a waste of public funds. So there is no question involved of taking money from other persons' pockets.

Mr. President, the statement as to immorality and the statement likening the President to Dave Beck shocked me. It is inconceivable that any man could make such statements regarding the President of the United States.

Several Senators addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from New Hampshire yield?

Mr. BRIDGES. I yield to the Senator from Kansas [Mr. SCHOEPPEL].

Mr. SCHOEPPEL. Mr. President, I thank the Senator from New Hampshire.

I wish fully and completely to subscribe to and associate myself with the statement made by the distinguished senior Senator from New Hampshire.

I, too, was one of those who stood on this floor when the resolution of censure was considered by the Senate, and voted against censure. I think I have a fair regard for the doctrine of free speech, even in political arenas. But this transcended the bounds of decency and fair play.

I think the speech of the Senator from Oregon was in bad taste. It imputed to the President of the United States immoral conduct for which there is absolutely no justification. The speech was completely and totally unfounded.

I feel, as does the Senator from New Hampshire, that even in the political arenas there are ground rules which should be maintained and respected. I regret exceedingly that the Senator from Oregon [Mr. MORSE] saw fit to make that speech, if he is reported correctly.

Mr. PURTELL. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield to the Senator from Connecticut.

Mr. PURTELL. I wish to commend the senior Senator from New Hampshire for bringing this matter to the attention of this body. I regret it was necessary to do so.

I wish to associate myself with the remarks of my other colleagues, who have preceded me in discussing this incident. I wonder if the Senator who made the unfortunate remarks recognizes the aid and comfort he was giving to those who are enemies of this country. I wonder if he recognized the impact this statement would have upon the minds of youths who read the article in the press.

I wonder if he understands the harm which has been done, not only to the Office of the Presidency, but to the offices of all others in the administration.

I wish to tell the senior Senator from New Hampshire that I very greatly regret the need for discussing this subject on the floor of the Senate. I hope the Senator from Oregon will do what was suggested by my colleague from Connecticut, because I think he owes to this dedicated man, this man whose whole life shows a dedication to public service, an apology on the floor of the Senate.

Mr. MARTIN of Pennsylvania. Mr. President——

Mr. BRIDGES. I yield to the Senator from Pennsylvania.

Mr. MARTIN of Pennsylvania. Mr. President, I wish to commend the senior Senator from New Hampshire for bringing this subject to the attention of the Senate. No Member of the Senate believes more firmly in free speech and in discussing the various questions confronting our own country in a free and open way than I do.

The President of the United States is probably the foremost citizen of the world. Time after time the people of the United States have shown their great confidence in our President. In these troubled times it seems to me that it is most inopportune to have a statement made such as that made by the senior Senator from Oregon the other night.

The ancestors of the President of the United States came from the Commonwealth of Pennsylvania. They are of Pennsylvania Dutch stock. They are always loyal, true, honest, and aboveboard. The President of the United States, Dwight D. Eisenhower, has upheld the ideals of that great type of citizenship.

I wish to express on the floor of the Senate my appreciation for the words of the senior Senator from New Hampshire.

Mr. POTTER. Mr. President——

Mr. BRIDGES. I yield to the Senator from Michigan.

Mr. POTTER. Mr. President, I regret that this attempt at character assassination of a President took place in my home State of Michigan. It was a dark, black day in my State when such a statement was made.

The people of the great State of Michigan know, trust, and respect Dwight D. Eisenhower. I am sure that the attempt made by the senior Senator from Oregon will have no effect upon the respect and loyalty of the people of my State for our great President.

Mr. GOLDWATER. Mr. President——

Mr. BRIDGES. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I am surprised and not a little shocked by my good friend from Oregon. I remember, when I was serving my first year in the Senate, sitting in the chair of the Presiding Officer many a Friday afternoon for 4 or 5 hours and listening to lengthy discourses by the senior Senator from Oregon. I listened with interest to his speeches, because they were based upon study. I was always enraptured by the sense of fairness of the senior Senator from Oregon. He always objected to smears. It seems to me that following his successful campaign last year I heard him make some remarks on the floor of the Senate about smears. So I was surprised to hear that the Senator from Oregon had made such uncomplimentary and uncalled for remarks about the President of the United States, particularly when he based his charge on an act which was passed by a Democratic Congress back about 1946 or 1947, an act which the Democrats have never seen fit to repeal, but to which they now object very violently.

Therefore, I am particularly surprised at the remarks which have been attributed to the senior Senator from Oregon. I hope they were erroneously reported, because I have always noted with a great deal of interest his desire to be fair toward everyone.

Like the senior Senator from Oregon, I am well acquainted with the vicissitudes of a hard campaign. I believe that anyone who can confine himself to political objectives in a political campaign is to be commended.

I read from a reprint entitled "Morse Speaks His Mind," which was printed by Mr. Beck's union. The senior Senator from Oregon referred to—

> Perversion of the Taft-Hartley Act by the Eisenhower National Labor Relations Board—

Again:

> I know of no group in American labor that has suffered more from the present administration than the teamsters.

I do not know whether the teamsters would agree with that statement at the present time.

I have great admiration for any man who, in the heat of a strong political campaign, can confine himself to political issues, and refrain from attacking personally his adversery or the President of the United States. It comes as a complete surprise to the junior Senator from Arizona that the senior Senator from Oregon would so far depart from his frequently announced policy of fairness and squareness in political campaigns.

Mr. CARLSON. Mr. President——

Mr. BRIDGES. I yield to the Senator from Kansas.

Mr. CARLSON. Mr. President, as the junior Senator from Kansas, the home State of President Eisenhower, I feel that I would be remiss in my duty if I did not commend the Senator from New Hampshire for calling this subject to the attention of the Senate.

It is not easy for me to comment on statements made by Members of the United States Senate, either on the floor or off the floor. This is especially true when it comes to statements made by the senior Senator from Oregon [Mr. MORSE] whom I respect.

I cannot, however, sit supinely by when he, as he did in Detroit last week, calls President Eisenhower and David Beck "two of the same kind of immoralists."

I shall not discuss the record of Mr. Beck. His background and his actions in dealing with the members of his organization have been thoroughly aired by a senatorial committee.

The statement of the Senator from Oregon that the President is immoral and accusing him of immorality is not only unfair, but is, in my opinion, contrary to the fact.

The record speaks for itself, and I know personally of no one inside of Congress or out who can honestly accuse the President of any selfish, personal, or partisan motive. I challenge anyone to submit evidences of any unworthy act or underhanded activities to advance either his own finances or those of any member of his family.

Despite what some may say, in his career of public service, his sincerity, his loyalty, his truthfulness, and devotion to the welfare of all of our people are unequaled.

I sincerely regret the necessity for these remarks.

Mr. THYE. Mr. President, I have listened to the remarks of the distinguished Senator from Kansas [Mr. CARLSON], and I agree with what he has said. I agree with them because he has expressed my feelings about this matter.

I have a great admiration for the distinguished senior Senator from Oregon [Mr. MORSE], and I therefore regret exceedingly the statement attributed to him in the press criticizing President Eisenhower.

I have a strong feeling about President Eisenhower, and about his conduct of the office of President. He is a man of great sincerity, deep integrity, and he is certainly one who at all times has been mindful of the great trust which has been reposed in him by the people of this Nation. For that reason, I regret exceedingly that it is necessary for us to speak our feelings concerning the remarks which have been attributed in the press to the distinguished senior Senator from Oregon.

Mr. ALLOTT. Mr. President, we of Colorado, consider President Eisenhower our adopted son. His wife, Mamie Doud,

was born in Colorado. The President has spent much of his time in our great State. I know that when the people of Colorado read the reports in the newspapers concerning the statement attributed to the senior Senator from Oregon, they will be shocked, disappointed, and hurt.

Dave Beck has not been convicted of any crime; but the news about him printed in the newspapers has shocked the country down to its very roots. A statement comparing our beloved President, a man who has demonstrated not only leadership and intelligence, but courage throughout his lifetime, with a man of Dave Beck's character, is certainly an overstatement; and I am sure no Senator would want to make such a statement either on the floor or elsewhere.

Therefore I join the distinguished senior Senator from New Hampshire and my other colleagues in expressing my very strong disapproval of the statements attributed to the senior Senator from Oregon.

Mr. REVERCOMB. Mr. President, I desire to subscribe wholeheartedly to the remarks which have been made by the distinguished senior Senator from New Hampshire.

I have always accorded to everyone, regardless of party, the right to express his views and to differ with me or with any other official of the Government.

I feel, however, that the remarks of the senior Senator from Oregon, which have been quoted here this morning, go far beyond propriety, and are injurious and dangerous to the Nation, insofar as anyone may accept the viewpoint of the Senator from Oregon.

However, I doubt very much that the veterans of this country, who served under General Eisenhower, and the people throughout the Nation and throughout the world, who have come to know him, however much they may agree or disagree with the President and his policies, will agree with the Senator from Oregon. The people everywhere know and realize that President Eisenhower leads one of the most respectable administrations in the history of this Nation.

Comparing the President personally with one who is charged with immoral and dishonest acts goes far beyond all reason. The senior Senator from Oregon knows full well that throughout the years that we have served together in the Senate I have always accorded to him, as I have to others, the right of free expression.

But there is a limit to what is right. Like the distinguished Senator from New Hampshire, who has so eloquently expressed his feelings, I feel that that limit has been transgressed in this case.

The respected administration of President Eisenhower, and the respected position which the President has taken, will stand against any assault of this kind. Every man who respects fair play must deplore and condemn what has been said against the President in this unwarranted attack.

Mr. WILLIAMS. Mr. President, I wish to join the Senator from New Hampshire [Mr. BRIDGES] and my other colleagues in taking exception to what I consider to be an ill-considered and what I am sure, knowing the senior Senator from Oregon as I do, was an unintentional remark. Certainly no one who knows President Eisenhower questions his sincerity or his integrity or his honesty. His record needs no defense either in this country or abroad. I doubt whether ever in the history of our country we have had a man in the White House who commands as much respect, not only of our own people but of the people of the world, as does President Eisenhower.

Certainly he has done much to restore dignity and respect to the office of President of the United States. Therefore I am proud to join my colleagues in taking exception to any remark questioning his integrity.

Mr. HICKENLOOPER. Mr. President, I certainly approve of the Senator from New Hampshire bringing this matter to the attention of the Senate. In doing so, however, I am conscious of a feeling of grief and disappointment. I came into the Senate on the same day the senior Senator from Oregon entered this body. I have had personal affection for him for all these years, and in spite of the fact that we do not always find ourselves in political or ideological agreement, that personal affection has continued.

Therefore, I was profoundly shocked when I read in the newspaper the statement attributed to him, making a completely unwarranted comparison on standards of morality between Dave Beck and the President of the United States. Certainly, one thing can be said of the President, regardless of political agreement or disagreement, so far as parties are concerned, and that is that no one has successfully impugned his honesty, his motives, or his dedication.

The remark of the Senator from Oregon is very unfortunate, indeed. I certainly believe in free speech, and do not believe in inhibiting the right of public officials to express themselves in the public interest, whether I agree with them or not.

I am not certain whether I am disillusioned or not because of this circumstance, but I am grieved and shocked. I think the statement made by the Senator from Oregon was utterly out of place.

I was one who felt that facts justifying the so-called censure of Senator McCarthy had not been established, to the point of warranting a vote of censure. I said at that time that I disagreed with and criticized certain things which Senator McCarthy had said, but I could not bring myself to vote for official censure.

I submit to the Senator from New Hampshire that the statement attributed to the Senator from Oregon is far more odious, far less considerate of the President of the United States and all that his office connotes, than anything which Senator McCarthy ever said, regardless of the interpretation.

I shall make one more observation. I have watched with care the pages of certain newspapers which trumpet so loudly and so speedily every time a Member of Congress suggests that there might be subversive influence in some area of the United States; newspapers which trumpet so loudly that human and civil rights are being trampled upon by even a suggestion.

I have watched closely, but I have not seen any of those newspapers call attention to the odium which surrounds the statement made by the senior Senator from Oregon.

I regret this happening perhaps more than any other single incident in my almost 13 years in the Senate. I regret it because, as I said a moment ago, of my personal and continuing affection for the Senator from Oregon over the years, and my respect for his freedom and courage to speak out; and, yes, for his long-continued defense of persons who, it might be said, were attempting to blacken the character of other persons in times past.

I regret and I am grieved by the circumstances. I thank the Senator from New Hampshire for bringing the matter to the attention of the Senate, because I think he has done a public service.

Mr. CASE of New Jersey. Mr. President, will the Senator from New Hampshire yield?

Mr. BRIDGES. I yield.

Mr. CASE of New Jersey. I join with my colleagues in the feeling that the remark as it is reported was extremely inappropriate and altogether without justification. It is so unlike the senior Senator from Oregon and so much of a departure from the standards which all of us who know and admire him have come to expect of him that I am confident we will be advised that his statement was not intended in the way in which it was reported.

But, of course, the President needs no defense on the ground of honor from any of us. However, we are glad that it appears that the need exists to make any defense which might be appropriate.

It has occurred to me, as I have listened to these remarks, that there is a need which the President has, and a very great one, namely, for the support of the things for which he stands in the way of legislative programs, in the way of his conduct of the defense of this country and of our relations with other countries.

So at the same time as I join in this colloquy, I wish to make very strongly the point that our emphasis ought not to be diverted by a defense, which is unnecessary, of character, from a defense of his leadership of this country in its hour of great peril.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. DIRKSEN. When I was a youngster, I committed to memory a little couplet, which comes back to me today. I cannot identify its source; I think it goes like this:

> He who is noble, kind in thought and action, needs not a weapon.
>
> Though by death surrounded, virtue defends him.

The President needs no defense. The Senator from New Jersey [Mr. CASE] has well emphasized and pinpointed that fact. The President's nobility, his kindness in action, his kindness in deed and

in thought, speak for themselves. So he needs no defense from this floor.

But assuming the correctness of the statement which was ascribed to the distinguished senior Senator from Oregon, I should say that those statements pain me for quite another reason than any so far elaborated on the floor of the Senate.

I remember, in 1945, coursing around the world when some rather testy things were said in the Senate of the United States. They were promptly headlined in the newspapers in India, in Iran, in Iraq, in Tel Aviv, and in Jerusalem. Nothing detrimental is uttered affecting public service, there is no personal castigation and no demeaning of a public character, which does not find its way to the front page. So it is from that fact that false impressions are created concerning a state of disunity in our own blessed country.

I hope, as a general matter, that we can be a little more circumspect in the way in which we talk about one another. We can speak and still maintain the intensity of our political disagreements. But to do so does not call for personal castigation and reflection upon character.

I can only hope, out of a sense of pain and distress, rather than anger, that we can watch our tongues and make certain that false impression are not created abroad, impressions which can do no good to the esteem of this country, its people, and its noble and beloved leader.

Mr. CURTIS and Mr. NEUBERGER addressed the Chair.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield; and if so, to whom?

Mr. BRIDGES. I yield first to the Senator from Nebraska.

Mr. CURTIS. Mr. President, I cannot refrain from speaking out on this matter. I have a very high regard for the Senator to whom these words are attributed, and I feel a very close personal tie. I am in hope that the reports are wrong.

While it is true that the President of the United States needs no defense, it is also true that the most precious thing which any man has is his character. There is one thing which, when it is destroyed, is irreplaceable—a man's character.

To impute immorality to the President of the United States is unthinkable. I cannot let this time pass by without commenting upon the comparison made of the President of the United States with Dave Beck, a man whose insane desire for money was so great that he robbed the widow of his best friend. I would not compare my worst enemy with Dave Beck.

In the business of government under a plan of free speech, there will always be disagreements. We want that condition to prevail. We will always criticize viewpoints on policies and opinions. We would not have it otherwise.

But there is one common denominator which is essential to everyone in public life, and that is honesty and morality. Without them no man is fit to serve.

The President of the United States is one of the most exemplary citizens in our land. His public and private life, from the standpoint of character, morality, devotion, and the principles that make our country great, is sound.

Mr. NEUBERGER. Mr. President, will the Senator from New Hampshire yield, that I may ask a question of the Senator from Illinois?

Mr. BRIDGES. I yield.

Mr. NEUBERGER. First, I may say that I do not know what speech made off the Senate floor is being talked about; I have not read it or heard it. I do not know the basis of these addresses. But I was present during the full time of the brief remarks made by the able Senator from Illinois.

The Senator from Illinois spoke about the impact abroad when very sharp words are uttered by us about one another in American public life. I have no doubt there may be some validity to that statement.

But what does the distinguished Senator from Illinois think the impact is abroad when the leading Senators of the party of the President of the United States continually depart from his views on major aspects of his foreign policy?

Mr. DIRKSEN. Mr. President, that is a wholly substantive question. There would probably be no impact whatsoever. The real interest comes when there is personal vilification of some leader in this country, because somehow such statements always seem to merit huge black headlines.

Mr. NEUBERGER. In other words, is there no interest abroad when the minority leader of the Republican Party in the Senate and the ranking Republican Member of the Senate, in terms of service, team together, for example, to offer an amendment to a foreign policy bill, and the amendment is opposed by the President of the United States? Is there no interest abroad in such action?

Mr. DIRKSEN. There is interest, Mr. President; but I see no analogy there, because, after all, there can be honest and good-faith disagreement on questions of policy. But is my friend, the Senator from Oregon, intimating or implying that it must be surcharged with a great deal of fire, brimstone, epithets, vilification, and invidious comparisons?

Mr. NEUBERGER. This is certainly not what I am implying. But I have been very much interested in sitting here and listening to the many fine encomiums uttered across the aisle about the President of the United States; but I cannot help but wonder why the authors of those fine encomiums do not support the President more in the various aspects of the President's foreign policy.

Mr. DIRKSEN. In this case, we are dealing with a personal assault upon the President of the United States, if the report of the press conference in Detroit is correct. When it comes to foreign policy, I have disagreed with the President upon occasion, but in the utmost of good faith; and I think it is a testimony to the vitality of our own free system, when people abroad are able to say that Members of the Senate and Members of the House of Representatives can disagree, and disagree intensely, with the President of the United States. That is simply testimony to the virility of the American system.

Mr. NEUBERGER. In other words, the Senator from Illinois would even have us believe that it might have a favorable impression abroad to have the President's own party at times desert him on matters of foreign policy, so long as that is done in good will?

Mr. DIRKSEN. I have no way of knowing what the impression abroad might be.

Mr. NEUBERGER. But the Senator from Illinois does know the impact abroad of a statement by the senior Senator from Oregon, although he does not know what the impact is when leading members of the Republican Party in the United States Senate constantly disagree with the foreign policy of the President of the United States.

Mr. DIRKSEN. Such disagreements do not bring into focus a question of character or reputation, which is what we are dealing with in this instance. It was a personal assault on the President of the United States, when the President was compared with a man—from the State of the Senator from Oregon, incidentally——

Mr. NEUBERGER. Who is that?

Mr. DIRKSEN. Dave Beck.

Mr. NEUBERGER. He is not from my State.

Mr. DIRKSEN. He is from the area, and close enough, I think.

We are confronted, then, with a wholly personal controversy in which character and reputation are involved, and that is altogether different.

Mr. SALTONSTALL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Massachusetts will state it.

Mr. SALTONSTALL. Is the Senate still proceeding in the morning hour?

The PRESIDING OFFICER. Yes; and the Senator from New Hampshire apparently still has the floor.

Mr. BRIDGES. Mr. President, I wish to conclude my remarks by saying that I regret that the distinguished minority leader, the senior Senator from California [Mr. KNOWLAND], is not present today, because he would have liked to participate in this colloquy. But he is unavoidably out of town.

Mr. MORSE. Mr. President——

The PRESIDING OFFICER (Mr. COTTON in the chair). The Chair recognizes the Senator from Oregon.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Oregon yield?

Mr. MORSE. I shall yield in a moment. First, Mr. President, I wish to say that I rise to a question of personal privilege, to answer the statements which have been made about the senior Senator from Oregon. But first, Mr. President, if I may do so without losing my right to the floor, I shall be delighted to yield to any other Republican Senators who still may wish to pay their disrespects to me, because the complete record should be made by them before I reply.

Mr. LONG. Mr. President, will the Senator from Oregon yield for 1 minute to me?

Mr. MORSE. I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, I completely admire and respect every Member of this body. In the interest of orderly procedure, I believe that the rules of the Senate should be obeyed.

I feel it my duty to point out that much of the remarks which have been made today in the Senate, during the last half hour, have been in violation of rule XIX of the Senate, which I now read:

> No Senator in debate shall, directly or indirectly, by any form of words, impute to another Senator or to other Senators any conduct or motive unworthy or unbecoming a Senator.

Mr. President, perhaps all of us from time to time do things which might be in error or might be mistaken. But there is no rule which states that it is a violation of the rule for a Member of the Senate, when outside the Senate, to express himself in a speech in almost any way he may care to do.

However, I believe Senators should obey all the rules of the Senate; and when that is done, I believe we shall get along better with one another and shall have better procedure. I believe it is the duty of the Chair to enforce the rule I have read.

Mr. MORSE. Mr. President, I should like to comment for a moment on the observation of the Senator from Louisiana.

So far as I am concerned, I would always waive any right I may have under rule XIX, because I believe that, whenever any Member of this body feels that my course of action should be subject to criticism, that Member should have perfect freedom to stand on the floor of the Senate and express himself in regard to the Senator from Oregon.

I shall discuss, however, in the course of my major remarks, some of the parliamentary problems which have been raised by the discussion this morning.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Michigan.

Mr. McNAMARA. Mr. President, I do not rise to defend Dave Beck. However, it should be stated that he has been charged with illegal as well as unethical acts; but, in all fairness, he has not been judged guilty of violating any law. Therefore, he should be considered innocent until proven guilty. That is in the American tradition.

Now, Mr. President, is it too bad to compare one Republican with another Republican at a Democratic gathering?

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. There is one thing I am proud of. I am proud that we live in a nation where we have a right to speak out and say whatever we believe, so long as we do not commit a criminal act. I, for one, am not here condemning the Senator from Oregon, but I should like to say that, from what has been said here on the floor of the Senate this morning, I do not believe that it has been brought out that there is a distinction between Beck's activities and the activities of the President of the United States. Beck did know what he was doing. I doubt whether the President of the United States fully knows what he is doing at times when acting in behalf of the people of the United States.

I am glad this matter has been brought up, in order that we may look into the question fully and see what is taking place here in the United States. The President, we all admit, was a military man. As a military man he was, of course, one of the head military men, a general. He was used to sitting back and practically doing nothing but giving orders, and letting one general run a particular activity and letting another general run another activity.

I am sorry to say that since he became President of the United States he has been doing the same thing, and that transactions are occurring in the executive departments of which he has no knowledge. He is still running the executive department like a top general getting others to run his job. If that is good for the people of the United States, I should like to hear someone explain how it is.

Mr. MORSE. Mr. President, on the basis of personal privilege, I ask unanimous consent to take a few minutes to reply to the criticisms which have been made of the senior Senator from Oregon on the floor of the Senate today.

I realize the Senate is operating in the morning hour, and I realize there is supposedly a 3-minute rule operating in the morning hour. I shall certainly not confine myself to 3 minutes in reply to attacks made upon me, and I think Senators will agree that the nature of the discussion is such that I should be allowed to proceed in such time as I feel is necessary to reply to these attacks.

I ask unanimous consent so to do.

The PRESIDING OFFICER. The Chair desires to settle one matter. The Senator from Oregon has asked unanimous consent that he may proceed for such time as he deems necessary, without being restricted by the 3-minute rule.

The Chair desires to state to the Senator from Oregon that in the absence of objection the Chair permitted the same privilege to be extended to the senior Senator from New Hampshire [Mr. BRIDGES] for an extended period, having every intention of recognizing the Senator from Oregon immediately and according him that privilege, anyway.

The Senator from Oregon has properly asked for that privilege. Is there objection? The Chair hears none, and the Senator from Oregon is recognized.

Mr. MORSE. Mr. President, it will not be necessary for me to speak at any great length to answer the attacks which have been made upon me on the floor of the Senate this afternoon.

I first wish to thank my friend, the Senator from New Hampshire [Mr. BRIDGES], for the courtesy of notifying me in advance that this discussion was going to be held on the floor of the Senate.

I may say, facetiously, Mr. President, that it is rather interesting to note so many Republicans rallying around the President on the floor of the Senate in response to what they consider to be a personal attack upon him. I am always interested, however, in the differences in the discussions in the cloakrooms by Republicans about Eisenhower and those on the floor of the Senate.

Mr. President, in dead seriousness I turn to the subject matter itself. I think it is an interesting commentary that in our country, in our time, a United States Senator is subjected to the type of criticism which has been leveled against me today because I have expressed my serious disagreements with the President of the United States and because I have indicated that I have very little respect for the political morality of the man who is President of the United States.

I have great respect for the office of the presidency of the United States, but I thought it was pretty well known that I do not have very much respect for the present occupant of the office of President of the United States for reasons which I have expressed on and off the floor of the Senate a great many times, and some of which I shall reiterate today.

I said nothing in my Detroit speech that I have not said on the floor of the United States Senate or before the Kefauver committee, investigating the political immorality of the policy of this administration in connection with accelerated tax amortization writeoffs. I refer my colleague from New Hampshire and my other colleagues to the CONGRESSIONAL RECORD of April 29.

Next, I wish to comment on the symbolism of this discussion today. Apparently we have gone so far down the road of police-state attitudes in America that we have reached the point, in the minds of some, where a President of the United States is to be put on a pedestal, beyond personal criticism, even when an elected official of the Government believes he should be subjected to and is deserving of such criticism.

I recognize that in police states one may not criticize the head of the state. If he does, he either goes to jail or is liquidated. But I did not know that we had reached the point in America where, in the minds of many, if any Senator subjects the President of the United States to what is believed to be honest and deserved criticism, the suggestion should be made that perhaps he should be subjected to a resolution of censure in the Senate.

Let us take that issue first. I invite the Republican Policy Committee to introduce a resolution of censure against the Senator from Oregon for any comments he has made against the President, on or off the floor of the Senate. Let us try the Senator from Oregon under that resolution, in accordance with the rules of the United States Senate. I believe in calling the bluff of those who throw out such innuendoes. If there is a Senator on the other side of the aisle who believes that the Senator from Oregon should be tried in the Senate under a resolution of censure for what he has said about Dwight D. Eisenhower, let him introduce the resolution and let us get on with the trial. Let me tell Senators what I think would happen. Not one of the Senators on the other side of the aisle would vote for such a resolution when it was taken up.

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from New Hampshire.

Mr. BRIDGES. The Senator from New Hampshire very clearly stated that he felt that it was the right of a United States Senator to have complete freedom of speech, and that was one of the reasons why he voted against the censure resolution directed against the late Senator McCarthy, of Wisconsin. The Senator from New Hampshire in no way intimated that there should be formal censure of the Senator from Oregon. He merely was critical of the remarks of the Senator from Oregon, stating that he thought they were out of character.

Mr. MORSE. We will let the record speak for itself. I think the Senator from New Hampshire, when he reads the RECORD—and I trust it will not be changed—will agree that the implication was clear in the remarks of the Senator from Indiana [Mr. CAPEHART]. In fact, the Senator from Indiana [Mr. CAPEHART], suggested that the Senator from Oregon would be subject to a point of order if he repeated his Detroit speech criticisms of Eisenhower on the floor of the Senate.

Mr. President, I do not intend to be drawn in by a diversionary tactic in regard to the distinction between the charges which have been made here today against the Senator from Oregon and the charges which were made under the censure resolution involving the late Senator McCarthy, of Wisconsin.

Let us get the record perfectly straight. I have said for many months that I believed this administration is honeycombed with political immorality; and I believe it. I do not intend to remain silent and fail to express my sincere beliefs about this administration because of criticism by my colleagues in the Senate, or in any other forum.

Consider, for example, the question of accelerated tax-amortization certificates. What I said on April 29 on the floor of the Senate, what I said before the Kefauver committee last Friday, and what I said in Detroit last Saturday, I reiterate today. Let me say to the Senator from New Hampshire that the newspaper quotations he has read are not accurate. I used even stronger language in Detroit in criticism of the President than the International News Service copy indicates. I believe my speech was recorded on tape. I intend to obtain a transcript of what I actually said, and insert it in the RECORD as soon as it can be obtained.

CONGRESSIONAL POLICY ON ACCELERATED AMORTIZATION

I have pointed out, in my statements with regard to the tax amortization certificate program, that if one reads the congressional debates at the time the legislation providing for accelerated tax-amortization certificates was passed, he will find that the purpose of the legislation was to encourage American industry to build plants essential for the successful prosecution of the war, which plants, when the war was over, would be of little productive value for our civilian economy. That is why Congress enacted that legislation.

Go to the CONGRESSIONAL RECORD and read the purposes of the legislation. It was sound legislation for the purpose intended. I never was one to criticize American industry because it did not proceed to build rapidly plants which would be obsolete immediately after the war was over so far as civilian production was concerned.

CONGRESSIONAL INTENT NOT FOLLOWED

But I say that it never was the intent of the Congress that tax-amortization certificates should be used as a means of giving interest-free loans to private utilities such as the Idaho Power Co., at the expense of millions of dollars out of the pockets of the taxpayers of the country. A private utility plant such as that of the Idaho Power Co. not only is useful long after it is built, but is of such a nature that the amortization or depreciation period under the regular depreciation program is much shorter than the period of productive life of the dams and electric plants.

In fact, the latest figures I have studied show that the depreciation period ought to be increased at least from 50 to 70 years. We have reason to believe that many of these dams will be very profitable for 100 or 150 years.

But here we have a tax-benefit gimmick for big business which is used by this administration, with the full knowledge and consent of the President of the United States. It calls for tax amortization and depreciation over a 5-year period. It is agreed by economists who have written on this subject that it amounts, in fact, to an interest-free loan to the private utilities, at a great saving to the private utilities, but at a great cost to the taxpayers of the country.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. GORE. Could it possibly have been for the purpose of bringing about the construction of the project, when the project had been under construction for 6 months?

Mr. MORSE. That is one of the facets of the problem. If we go into the substantive problem connected with this particular incident, that is one of the facets. I intend to discuss the substantive features of the accelerated tax amortization program at some length at a later date. However, I wish to speak today about the issue of political morality which I raise in connection with the administration's policy with regard to the tax amortization certificates.

COMPARISON WITH BECK INTEREST-FREE LOANS

I said on April 29 on the floor of the Senate; I said before the Kefauver committee; I said in Detroit Saturday night; and I repeat today on the floor of the Senate, that in my code of ethics and political morality—and if the Senator from Indiana thinks I am subject to a point of order, let him, or any colleague of his, raise the point of order now, on the floor of the Senate, and we shall try it out under the rules of the Senate—I cannot see any distinction between Dave Beck reaching his hands into the pockets of the teamsters of his union and taking out of those pockets what amounts to an interest-free loan, and, in doing so, embezzling or stealing from the individual teamsters what amounts to interest money which would accumulate into great value, and an administration headed by Dwight D. Eisenhower putting its hands into the pockets of the taxpayers and taking out of those pockets an interest-free loan, involving millions of dollars, over the years, belonging to the taxpayers, and giving that interest saving to the Idaho Power Co.

Furthermore, I say that it constitutes a prostitution of the original intent of the tax amortization law. I stand on that statement, and I charge again today that in my book of political ethics the President of the United States is guilty of political immorality.

That is not the only act of political immorality of which I think the President is guilty. It is not the only reason why I think his administration is honeycombed with political immorality. I take my colleagues to the Dixon-Yates incident, and I point out that, as the Senator from Tennessee [Mr. GORE] well knows, the President of the United States, on the basis of the record, must be charged with personal knowledge that a man was taken from Wall Street and put into the White House itself to advise the administration in regard to the Dixon-Yates deal. In my judgment, the Dixon-Yates scandal was rotten throughout and a good example of political immorality. The Dixon-Yates scandal was so smelly that the Attorney General of the administration, Mr. Brownell, proceeded to take the necessary legal steps to set aside the Dixon-Yates contract.

I charge on the floor of the Senate today, as I charged throughout my campaign last fall, and as I have said before on the floor of the Senate, that in my judgment no one can square the acts of Dwight D. Eisenhower, as President of the United States, in connection with Dixon Yates with political morality.

Senators may disagree with me, of course. In my judgment, however, his record on Dixon Yates is not a record that is politically moral.

Let us turn now to another item in the long list of a bill of particulars that will stand to the discredit of Dwight D. Eisenhower in the pages of American history.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. GOLDWATER. Will the Senator indulge me to ask one question on a subject previously referred to by him before he gets too far away from it? I did not have the figures in front of me at the time.

Mr. MORSE. Certainly.

Mr. GOLDWATER. What the junior Senator from Arizona wishes to have made clear is this. Does the senior Senator from Oregon feel that a company that applied under the law for tax amortization, in 1952, has been illegally granted the tax amortization?

Mr. MORSE. Oh, no. I am very glad the Senator from Arizona has asked that question. The President was asked about that situation in his press conference the other day. I paraphrase his reply, because I do not have the exact quotation, but the President said, in ef-

fect, that he thought the time had come when we ought to stop granting tax amortization certificates in such cases. He went on to say, however, that he was satisfied that what was done in behalf of the Idaho Power Co. was perfectly legal.

I do not raise any question as to whether it was legal. However, let me say to the Senator from Arizona that when I taught my law students in my course on legal ethics, I taught them that staying within the letter of the law did not necessarily mean that conduct was moral.

Mr. GOLDWATER. Mr. President, will the Senator yield further?

Mr. MORSE. Let me finish this point first. The test of morality is not the test of legality. The test of whether a person is following a moral course of conduct is not the same as the test of whether a person is staying within the letter of the law.

If the President of the United States had read the debates which occurred at the time the law was passed in the first instance, he would long ago have made it clear to his Office of Defense Mobilization that he wanted no grant made to a private utility on the basis of any defense theory, namely, that a private utility ought to get this kind of giveaway handout in order to promote the defense of the United States.

When a private-utility plant is built, it constitutes a civilian-production plant which will last for years to come. It was not within the original intent of Congress in passing the law that this was the use to which the so-called accelerated tax amortization program was to be put.

Mr. GOLDWATER. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. GOLDWATER. To sum up this portion of my question, then, as I understand, the senior Senator from Oregon does not say that it was illegal. Therefore, would the Senator say that the action which was taken by the ODM was legal?

Mr. MORSE. I do not say it was illegal. I say it was immoral.

Mr. GOLDWATER. That is the point I wanted to clear up.

Mr. MORSE. I have never said it was illegal. I simply said it was immoral. This administration has taken the position, in its discussion of this whole question of water-resource development on the Snake River by the Idaho Power Co. that this will be done without cost to the taxpayers.

Some of us stated on the floor of the Senate as long as 2 years ago and more—and the CONGRESSIONAL RECORD will bear me out—that it would not be done without cost to the taxpayers. The senior Senator from Oregon as long as 2 years ago at least, warned that if we followed the course of action of the administration, the taxpayers would have to pay a substantial part of the cost of the Idaho Power Co. dams with money taken out of the taxpayers' pockets by way of an accelerated tax-amortization grant. That is what this interest-free loan amounts to. Apparently the fact is counted on that the average citizen will not take the time to figure out what the interest saving to the Idaho Power Co. amounts to.

Mr. GOLDWATER. To preface my next question I should like to make it clear to the senior Senator from Oregon that in my remarks on this subject I attempted to indicate to the Senate that I shared many of the misgivings of the senior Senator from Oregon about the tax amortization program. However, the senior Senator from Oregon has been in the Senate since, I believe, 1944 or 1946.

Mr. MORSE. Since 1945.

Mr. GOLDWATER. In the State of Oregon there have been approved, since 1951, eight of these amortization plans, amounting to $82,654,000. The junior Senator from Arizona has been a Member of the Senate since 1953. Although he may be wrong, he does not recall the senior Senator from Oregon speaking out against the immorality of giving public utilities in his State the same treatment.

Mr. MORSE. The Senator from Arizona a few minutes ago was kind enough to refer to some reports the senior Senator from Oregon made in the Senate on Friday afternoon in 1953. I refer to the reports I made for the Independent Party in 1953 and 1954.

The Senator from Arizona will find that one of my reports on behalf of the Independent Party was a major speech, of some length, in protest against this kind of giveaway of taxpayers' money. I spoke out against the misuse of tax amortization certificates then. I will get that speech for the Senator from Arizona and I will reintroduce it into the RECORD. However, he will have to wait until I get back to my office to consult the index.

Mr. GOLDWATER. I shall be glad to look it up myself. I should like to ask another question about the senior Senator from Oregon speaking out against the immorality of three such decisions which were reached prior to 1953. They amounted to, roughly, in the neighborhood of $34 million or $35 million.

Mr. MORSE. What cases did that involve?

Mr. GOLDWATER. The Pacific Power & Light Co., for $19,628,000; the Portland General Electric Co., for $14,469,000; and the Portland General Electric Co. for $1,375,000.

Mr. MORSE. I believe the Senator from Arizona will find that there is no question about the record showing that I have been opposed to this whole procedure. It may be that prior to 1953, in the middle of the Korean war when these particular cases may have arisen, the senior Senator from Oregon did not say anything about them. The point is that wartime certificates are a far different thing from tax writeoffs in peacetime for plants that are useful in normal civilian production. However, I will check into the matter and let the Senator know.

Mr. GOLDWATER. I thank the Senator from Oregon for yielding. I simply wanted to help him maintain his usual consistency. I did not want him to wander off into the lovely realms of inconsistency.

Mr. MORSE. I am always glad to have any help I can get from the Senator from Arizona.

Mr. GORE: Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. GORE. I hold in my hand the New York Times for today, in which there is published an article writen by Mr. Allen Drury. In the article, Mr. Drury reports that Mr. Gordon Gray, the Administrator of the Office of Defense Mobilization, six times on yesterday claimed what is described as the executive privilege and hereby refused to tell a committee of the United States Senate about conversations or discussions occurring between himself and members of the White House staff with respect to the rapid tax writeoff giveaway to the Idaho Power Co.

Would the Senator from Oregon mind expressing his view as to the identity of political privilege with political morality or the lack thereof, with respect to its use?

COMMENT ON CLAIMS OF EXECUTIVE PRIVILEGE

Mr. MORSE. I may say to the Senator from Tennessee, as one who has spoken many times on the matter of the separation of powers and the prerogatives of the Executive, that I have always respected the right of the Executive and its spokesmen to exercise the right of privilege. But exercising the right of privilege does not mean that once exercised, it is not subject to comment.

I would not take away from any fellow American the right to plead the fifth amendment. But when one pleads the fifth amendment his action certainly is subject to comment.

Mr. Gray, under the separation of powers doctrine, probably had the right yesterday to plead privilege. I have the right to express my suspicion as to why he pleaded privilege, because I do not think that all that went on behind the closed doors of this administration in regard to the particular matters concerning which Gray was examined would stand up under public disclosure. That is my suspicion. I think what it would disclose is more favoritism to American big business, on a discriminatory basis, against the interest of the taxpayers. It is another example, in my judgment, of what characterizes this administration in the form of political immorality.

For example, the Senator from Tennessee [Mr. GORE], made a very detailed study of campaign expenditures. In my judgment, it is very interesting to compare the contributions which were made to this administration with the benefits that certain selfish economic interests have received from the administration, and to see the close relationship between the campaign contributions and those benefits including tax amortization benefits.

I merely wish to mention a point or two more concerning what I consider to be a betrayal of the standards of political morality which I think ought to characterize any administration.

OTHER EXAMPLES OF POLITICAL IMMORALITY IN PRESENT ADMINISTRATION

I take the Senate back to Inauguration Day, 1953, when I stood up on the floor of the Senate and protested the immediate confirmation of the nominations to the Cabinet. In the days which followed, a historic debate occurred. I remember the Senator from Tennessee [Mr. KEFAUVER], and I speaking at great length against the appointment of Mr. Harold Talbott to be Secretary of the Air Force. Let the record speak for itself. In that speech, I warned the Senate that if it confirmed the nomination of Talbott, there would be trouble with him over a conflict of interests before he was out of office.

All one had to do was to read the testimony of Talbott before the committee. I read every word of it, and I was satisfied that he had not learned anything since 1918, growing out of the Charles Evans Hughes investigation of the Talbott's Aircraft Co. in regard to a conflict of interests in World War I. It was a notorious and infamous scandal of political immorality on the part of Talbott then.

There was trouble with him after his nomination had been confirmed. When some of us announced that we would speak in the Senate each day on the matter until Talbott either resigned or was fired, the record will show that, day after day, I stood up and called upon the President of the United States to dismiss him. Talbott finally resigned.

This administration then gave Talbott a medal for distinguished civilian service in the Pentagon Building. I replied, making a charge of political immorality against the administration and said that instead of giving Talbott a medal, President Eisenhower should have given him a chisel, because he was a chiseler.

Mr. President, I now wish to mention the question of political immorality when it comes to handling the Nation's natural resources. In my judgment, history will record against this administration a shocking betrayal of the rights of future generations of American boys and girls in the natural resources of the United States. This administration is following, in the field of natural resources, a program of underdevelopment of the river basins of America, when what the future generations of American boys and girls must have is the full development of our river basins. I cannot square such action with high standards of political morality.

I think this administration has a terrific trust imposed upon it by God over our natural resources. They are given to our country for our use, not for our depredation and exploitation.

That brings me to the whole attitude of this administration toward water. That is why, on the floor of the Senate the other day, I said I was convinced that the trouble with the President is that he simply does not know the facts about our national resource problems. People can suffer out of ignorance, Mr. President, even when that ignorance flows from the President of the United States.

The greatest resource our country has is water. The future civilization of America will be dependent upon water. The Senator from Illinois [Mr. DIRKSEN] made, in my judgment, a good speech before a water congress the other day, in which he recognized the importance of the preservation and the conservation of water. But the program of this administration in connection with the underdevelopment of the water resources of America constitutes, in my judgment, a great wrong against future generations of American boys and girls.

As I said in the Senate on April 29, let us remember that as the water table of a nation goes down, its civilization goes down. America's water table is going down. Dwight D. Eisenhower, in my judgment, owes it to the American people to change the course of action of his administration in the field of natural resources. He is following a course of favoritism toward the exploiting policies of monopolistic interests to such a shocking degree as to justify my charge of political immorality against the President.

As I study the wrongdoings of this administration on issue after issue, I cannot square them with political morality. That is my judgment. Let me say that no Republican is going to take my judgment away from me. Let me say that, in my opinion, the time should never come when in the Senate of the United States, or off the floor of the Senate, a United States Senator, with the obligations he owes to the people of his State, should ever be silenced to the slightest degree in expressing his opinion of a President of the United States who, in that Senator's judgment, has betrayed a great public trust.

I close by saying that it is a little amusing, too, to think of the criticisms which have been made by Republicans of past Presidents to the effect of their being soft on communism, implying that they almost engaged in a traitorous course of action. It is not very becoming, I may say respectfully, to hear criticisms made by such Republicans of one who makes the charge I make against Dwight D. Eisenhower, and documents it with the specific examples which, in my opinion, support the charge.

Of course, it does not make me happy to have a President in whom I have so little confidence. Nevertheless, I believe, Mr. President, contrary to some of the expressions made on the floor of the Senate today, that the American people are becoming wise to what is happening to them in regard to the sanctimonious and pontifical pronouncements and professings of this administration about its alleged high level of political morality. I have tested it, and, in my opinion, I have found it sorely wanting.

Mr. DIRKSEN. Mr. President, I have listened with great attention to my distinguished friend, the Senator from Oregon. He knows that I have always entertained a deep and abiding affection for him, even though our differences on public matters have been great and sharp.

But today, in seeking to defend his position, it seems to me he has been all around Robin Hood's barn, but has not finally come to grips with the issue.

The fact is that after the hearings before the McClellan committee, a certain character has been identified in the public mind with the name of Dave Beck. That has been followed by an indictment, and that can only manifest a certain impression upon the people of the United States. It is the comparison between Dave Beck and the President of the United States to which we on this side of the aisle violently object; and all the vehemence and all the eloquence of the distinguished Senator from Oregon will not wipe out the fact that it was in bad taste to say such a thing. That is where we shall leave the record.

There is no desire on my part to submit or pursue a censure resolution, and I doubt whether that is seriously entertained by any Member on this side of the aisle.

I still contend that Senators can be gentlemen one with another—regardless of whether they disagree violently over fast tax writeoffs and Hells Canyon dams; but it is not necessary for Senators to demean each other in public in a way which certainly will go to all the corners of the earth. Argue all that the Senator from Oregon will, he was still in bad taste when he said it. I am willing to leave the matter right there.

Mr. CAPEHART. Mr. President, I wish to speak briefly about this matter, particularly after listening to the Senator from Oregon.

I heard the able Senator from Oregon say he had absolutely no confidence in President Eisenhower. Mr. President, I remember being in Chicago, at the Republican National Convention, a little over 4 years ago; and I remember that on that occasion the Indiana delegation sat directly behind the Oregon delegation. In fact, if I correctly recall, the Oregon delegation had the front seats. If I also remember correctly, the chairman of the Oregon delegation was the able Senator from Oregon [Mr. MORSE].

Mr. MORSE. Mr. President, will the Senator from Indiana yield for a correction?

Mr. CAPEHART. I yield.

Mr. MORSE. The chairman of the delegation was the man I defeated last fall. [Laughter.]

Mr. CAPEHART. Very well. However, Mr. President, I remember very distinctly that the able Senator from Oregon was a Republican delegate there. I remember that the Oregon delegates wore very high hats on which appeared the words "We Want Ike." I remember that the Oregon delegates stood up and were "whooping it up" for Eisenhower—so much so, in fact, that we who were delegates from Indiana, and who sat directly behind the Oregon delegates, could not see; and I remember that the able Senator from Oregon was among the most enthusiastic supporters of Eisenhower.

Mr. MORSE. Mr. President, at this point will the Senator from Indiana yield again to me?

Mr. CAPEHART. No, Mr. President; I wish to finish my statement.

Mr. MORSE. I wish to make a fleeting comment.

Mr. CAPEHART. No, Mr. President, I wish to complete my statement.

Mr. President, at that time the Senator from Indiana was in favor of Senator Taft. At that time the able Senator from Oregon was a Republican. He sat on the Republican side; he was a Republican delegate. That was only a little more than 4 years ago.

At that time the Senator from Oregon was an enthusiastic supporter of President Eisenhower. Now he has said President Eisenhower is immoral, and the Senator from Oregon has compared President Eisenhower with Beck; and today the Senator from Oregon has said he has no confidence in President Eisenhower—and all in the short period of a little more than 4 years.

Mr. President, either the Senator from Oregon was wrong 4 years ago or he is wrong today, or, stated in the opposite way, either the Senator from Oregon was correct 4 years ago or he is correct today. But 4 years ago he was wearing one of the big hats bearing the words "We Want Ike."

Mr. President, I am not going to have too much confidence or put too much credence in the opinions and statements of a man who, in the short period of 4 years, completely, 100 percent, changes his position. I cannot understand how anything the President of the United States has done would justify such a change of position by the able Senator from Oregon, who some 4 years ago was jumping up and down and helping nominate President Eisenhower, and was for him. I think I can understand the English language fairly well. I think I can understand problems fairly well. I know of nothing the President has done in the meantime that would cause a man to change his politics and change his position and change his mind, and would make him wish to associate the name of the President of the United States, the name of the very man he was so enthusiastically in favor of, 4 years ago, with that of Dave Beck.

I would not be speaking about this matter now, and I do not think other Senators would be, if the Senator from Oregon had not compared the President of the United States with a man who is under indictment for income-tax evasion in the State of Washington.

I simply cannot forget the days when the Senator from Oregon sat on this side of the aisle. I rather liked him then, and I kind of like him now; but I simply cannot quite understand why people can follow a man who changes position so many times and so often.

Mr. GOLDWATER. Mr. President, will the Senator from Indiana yield to me?

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). Does the Senator from Indiana yield to the Senator from Arizona?

Mr. CAPEHART. I yield.

Mr. GOLDWATER. The Senator from Indiana is discussing a matter to which I referred just before he entered the Chamber, namely, the question of the consistency or inconsistency of the senior Senator from Oregon.

The junior Senator from Arizona is inclined to believe that the senior Senator from Oregon is fairly consistent, because on June 10, 1955, the Corvallis (Oreg.) Gazette-Times noted the following in an editorial it published:

> On May 9, 1952, this same Mr. MORSE stood on the platform in the Corvallis Community Center Building and said before several hundred Republicans that Mr. Truman couldn't be criticized for his intentions or his motives, but he could be for his judgment.
>
> Then he added: "The Creator didn't give him the ability to deal with the problems he has to deal with as President."

Mr. President, will the Senator from Indiana yield to me again so that I may make a further comment about the consistency or inconsistency of the senior Senator from Oregon?

Mr. CAPEHART. I yield.

Mr. GOLDWATER. The San Francisco Chronicle interviewed the senior Senator from Oregon [Mr. MORSE] and reported the following on December 12, 1951:

> "The Democratic Party," he said, "is bankrupt for leadership and the administration is honeycombed with corruption and malfeasance in office."

The only question I have is, What does it take to please the senior Senator from Oregon? He has gone through two Presidents, and he is unhappy. He has run through two parties, and he is unhappy. Perhaps the tripartisan approach suggested by a Senator on the other side of the aisle will offer him another haven in which to go and heap abuse on some other President.

Mr. CAPEHART. I can tell what it is. He loves the headlines; he loves to see his name printed in the newspapers; and that is one way to get his name there.

Mr. MORSE. Mr. President, will the Senator from Indiana yield to me?

Mr. CAPEHART. I yield.

Mr. MORSE. The Senator has commented about my original support of the present President. Of course, that was before I was disillusioned. As one of my colleagues has pointed out, it is like a woman who got into a divorce court, where she said, "You do not really know a man until you are first married to him."

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. GOLDWATER. I should like to complete this little documentation of the inconsistency of the Senator from Oregon. I should like to read from the Seattle Times of October 4, 1946. That goes away back, but, on reading it, one can look into the history of the inconsistency of the Senator from Oregon.

The article reads:

> "It is obvious," said MORSE, "that the CIO is in bed with Harry Truman and it is worried about the fact that the rank and file of American workers are becoming sick and tired of the political bargaining and political expediency of the Democratic political machine of the Missouri-Pendergast gang, of which Truman is the head."

I do not think the Senator can say the CIO is in bed with the Republican Party, so that statement, I believe, will show some of the inconsistency on that point.

THREE HUNDRED AND FIFTIETH ANNIVERSARY OF AMERICAN DAIRY INDUSTRY

Mr. AIKEN. Mr. President, on June 4 a unique ceremony commemorating the 350th anniversary of the American dairy industry will be held at historic Jamestown, Va.

It may be true that the first milk cows were brought to this continent long before the English settled at Jamestown in 1607, for it is considered likely that the early Vikings brought their own cattle with them when they came to America many years before the immortal voyage of Columbus. Jamestown, however, was the site of the first permanent colony on the North American mainland, and the birthplace of the American dairy industry.

The first settlers to arrive at Jamestown on May 14, 1607, brought with them cheese, butter, and beef, preserved in salt. These stores proved to be totally inadequate, and in that first year, the early records tell us, the colonists looked around for available meadows which might be used for pastureland.

The subsequent sufferings of the early colonists are well known. Starvation and disease brought miseries that were sharpened by the hostility of the Indians. Something had to be done to establish a fairly reliable source of essential nutrients. So it was that in 1611 the first 100 milk cows were brought to Jamestown.

Writers later in that century noted the large numbers of dairy cattle in Virginia, for even in those days cows meant fresh meat and rich milk, butter, and cheese—all basic ingredients of good health, and the keys to survival in that unfriendly wilderness.

When we realize the importance of dairying to the early colonists, not only in Virginia but all along the coast from Jamestown to the cow pasture in Boston Common, it is especially appropriate that one of the first big ceremonies of June Dairy Month is to take place at Jamestown.

While we view with deep respect the role that dairying has played in the last 350 years, it is the dairy industry of today that commands our attention at this time.

The science of animal husbandry has grown rapidly since the days of colonial America, until the dairy aspect alone boasts more than 23 million cows producing a total of some 127 billion pounds of milk this year.

Many herds now average over 10,000 pounds of milk per cow annually, while the United States average is 6,000 pounds of milk per cow per year. Only a few years ago the average was only 4,200 pounds per cow, so there has been an increase of almost 50 percent per cow in just a few years.

As for milk consumption, the per capita average is slightly under 700 pounds, compared with 807 pounds in 1940. This decline is traceable largely to the promotion efforts of competitive products and the changing diets of people.

Our dairy people unfortunately were too inclined to depend on Government

to solve their problems while this downtrend was developing.

Today they are acutely aware of the competition and the situation, and are employing the most modern promotion methods to raise per capita consumption of milk to higher levels.

Today's dairy industry, while still largely a family farm occupation, is employing the very latest techniques in milk production, packaging, and advertising.

My own State of Vermont, I am proud to say, has been one of the first to recognize the necessity for meeting competition with modern advertising and sales techniques. Through their own joint efforts our dairymen have succeeded in materially increasing the consumption of milk in their New England milksheds. At the same time they have vigorously culled their herds in the interest of more efficient production. And what has been going on in New England, Mr. President, has been going on in nearly all the dairy areas of the United States.

The results have shown that this kind of self-help has resulted in higher incomes for dairymen at a time when the American farmer is plagued by a surplus of production.

Dairying is the most important single source of agricultural income, with a capital investment estimated at more than $14.6 billion, an annual production level in excess of 127 billion pounds, giving employment to 2 million or more people, including those who work on the farms.

The dairy industry accounted for more than $4.5 billion in milk sales last year.

In addition, the dairymen supplied most of the Nation's veal and about one-fifth of the beef.

When there is included cash income from dairying, beef, and veal, dairying leads all types of agriculture in farm income.

To handle this enormous business, there are about 25,000 processing plants and factories receiving milk from America's milk-producing farms.

They convert this milk into dairy products for general sale, and trucks haul more than 300 million pounds of milk from the farm to factory or railroad siding every day.

About half of the 60 billion quarts of milk prepared for retail sale each year are delivered to the doorsteps of American homes on an every-other-day basis.

The role that has been played by cooperative dairy organizations in the development of our dairy industry is most impressive.

Between 1841 and 1851, cooperative associations developed in many areas of our country.

One of the earliest of these was a cheese factory in Connecticut. Other cheese cooperatives were started in New York State and Wisconsin.

By 1913 there were 1,187 dairy cooperative associations doing some $60 million worth of business annually.

By 1925–26 this number had grown to 2,197 dairy co-ops doing a business of $535 million annually for their 460,000 members.

By 1927–28 there were 2,479 cooperative dairy associations, the largest number on record up to that time.

The business in that year totaled only $620 million, while in 1954–55 the total number of dairy cooperatives had declined to 1,824 doing a business in excess of $3 billion.

This decline in the total number of cooperatives was, of course, due to the larger size of the plants and the greater efficiency of their management.

Today almost 96 percent of the total volume of our dairy cooperative comes from marketing dairy products.

The other 4 percent of their income comes from the marketing of other farm products, purchasing supplies, and performing special services.

In addition to the 800,000 co-op farmers working closer together to solve dairy problems, thousands more participate as nonmembers in the resulting benefits.

To illustrate further the scope of today's dairy industry, the 1954 agriculture census showed that there were 1.5 million farms selling dairy products. Five hundred and forty-seven thousand of these farms were getting more than half their income from milk, cream, or butter.

So great has been our capacity to produce dairy products that in these times of farm surpluses the dairy farmers of America have had to use aggressive methods to increase sales and decrease production.

The number of milk cows increased by some 3.3 million in the 1938–45 period and by another 4.7 million in the 1945–52 period.

Since then, there has been a decline, through vigorous culling of herds, with a resulting decrease of some 32,000 head, the lowest total herd since 1929. The large decreases have come since January 1, 1954, when there were 23,896,000 head of milking cows. This figure was cut 434,000 head by January 1, 1955, another 221,000 by January 1, 1956, and a 193,000 reduction was recorded on January 1, 1957.

A significant byproduct of this great industry is that it has played an essential role in the development of a Nation comprised of the healthiest people in the history of the world.

This achievement was not plotted on any Government planning boards, nor was it merely a matter of divine accident.

Since earliest times Americans have depended upon dairy products as a major element in their diet.

With this essential food occupying a basic place of everyday importance in their diets, Americans have increased the average length of life, and reduced mortality rates.

I recognize that there are other factors which have played a part in giving to our people such a high level of good health, but the importance of good dairy food cannot be minimized.

While there are many problems facing dairy farmers today, I know that these problems will be solved by the efforts of our self-reliant dairy farmers.

Therefore, it is with considerable pride that I join in paying homage to the American dairy industry, a pillar of strength and good health in modern America.

INVESTOR-OWNED POWER REACTOR PROJECTS

Mr. SALTONSTALL. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a tabulation on investor-owned power reactor projects, which was handed to me by William Webster, president of the New England Electric System.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Investor-owned power reactor projects

Utility	Type	Design	Construction	Completion	Kilowatts (electric)	Construction	Location
Pacific Gas & Electric Co.	Boiling water	General Electric	Bechtel Corp.	1958	3,000	$4,000,000	Vallecitos, Calif.
Yankee Atomic Electric Co.	Pressurized water	Westinghouse	Stone & Webster; Westinghouse.	1960	134,000	[1] 35,000,000	Rowe, Mass.
Power Reactor Development Co.	Fast breeder	Atomic Power Development Associations.	Commonwealth Associations Architectural Engineers; United Engineers & Constructors; Construction Engineering.	1960	100,000	43,000,000	Monroe, Mich.
Consolidated Edison Company of New York.	Pressurized water	Babcock & Wilcox		1960	275,000	70,000,000	Indian Point, N. Y.
Commonwealth Edison Co.-Nuclear Power Group	Boiling water	General Electric	Bechtel Corp.	1960	180,000	45,000,000	Dresden, Ill.
American Gas & Electric and others	High temperature prototype to be selected from 3 proposals.			1961–62	13,000	{15,000,000 / 31,000,000}	Ohio.
Florida Power Group	Gas cooled, heavy water moderated.	General Nuclear Engineering.		1962	134,000	55,000,000	Florida.
Northern States Power and others		Allis Chalmers	Pioneer Engineering & Service Co.	1962	60,000	{20,000,000 to 25,000,000}	Minnesota.

[1] Plus escalation.

Investor-owned power reactor projects—Continued

Utility	Type	Design	Construction	Completion	Kilowatts (electric)	Construction	Location
Pennsylvania Power & Light		Union Carbide Nuclear, Westinghouse CAPA.		1962	150,000	[2] $45,000,000	Pennsylvania.
Middle South Utilities	Evaluating 5 proposals.				15,000 to 30,000	[2] 15,000,000	Southeast area.
New England Electric System	Type still open.			1964	200,000	[2] 60,000,000	New England.
Pacific Gas & Electric	Advanced type pressurized or boiling water, intend for 3d round PDRP.			[3] 1962	[3] 130,000	[3] 39,000,000	California.
American Gas & Electric	Type awaits outcome of prototype.				200,000	[2] 60,000,000	Ohio Valley area.
Total					1,609,000	527,000,000	
Not included above are:							
Carolina Virginia Nuclear Power Associations.	3d round PDRP	General Nuclear Engineering.					South Atlantic area.
Pacific Power & Light and others [4]							
Texas Group [4]							
AEC—Duquesne				1957			
AEC (North American)—Pacific Gas & Electric.	Sodium-graphite			1957			
American & Foreign Power Co.							Latin America.
Manila Electric Co.—General Public Utilities.	2 boiling water and 1 organic moderated.						Philippines.

[2] Reasonable guesses.
[3] Large scale.
[4] Site purchased; no definite plans public.
[5] No plans public as yet. Announced $10 million program in May 1957, to study fusion reaction for power with General Dynamics.

CARE APPROACHING AGREEMENT WITH POLISH GOVERNMENT

Mr. WILEY. Mr. President, I was delighted to receive word today that agreement has been reached in principle between CARE—the Cooperative for American Remittances to Everywhere—and the Polish Government for a resumed CARE program in Poland.

This is welcome news to all friends of Poland throughout the world, including all Americans, for we are delighted at the opportunity of providing self-help for the Polish people through this great instrumentality—CARE.

CARE is more than a humanitarian organization to feed the hungry. It is that, and much more. I need only point out, for example, that CARE can render important service to the Polish people through its program of providing self-help, small tools, and equipment, over and above the essential food, plus the textiles and books which can be used to good advantage.

I send to the desk the text of a release being issued today, which describes the tentative results of a visit which was just made to Poland by Mr. Richard W. Reuter, executive director of this nonprofit international aid agency. I ask unanimous consent that the text of this release be printed at this point in the body of the RECORD.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

CARE PLANS TO OPEN FULL SERVICE TO POLAND JULY 1

NEW YORK, May 22.—A full-scale CARE program will be launched in Poland on completion of contractual details now being worked out with the Polish Government.

Richard W. Reuter, executive director of the nonprofit international-aid agency, who has just returned from a 10-day trip to Poland to clarify the program details with Polish Government officials, announced today that agreement in principle had been reached on all major points.

Under these tentative arrangements, CARE will open an office in Warsaw on July 1, with two of its American employees stationed in that city as resident representatives.

Prime emphasis will be placed on providing CARE self-help tools and equipment with initial distributions to vocational training centers, hospitals, and other institutions. Still under negotiation is the question of a designated program for delivery of standard CARE food and textile packages to relatives and friends named by the American donors. An institutional feeding program, using specified United States surplus agricultural commodities, is also planned.

The Polish Ministry of Labor and Social Welfare was named by the Polish Government as the liaison agency to complete negotiations. The Ministries of Health, Foreign Affairs and Foreign Trade also participated in the Warsaw discussions.

"I have been authorized to release this information to the American press," Mr. Reuter said, "with the addition that talks are continuing in an effort to work out the numerous details necessary before formal agreement is possible. I understand a similar statement is being issued to the Polish press by the Polish Government."

The designated-package program, Mr. Reuter explained, presents special problems because it involves several ministries and affects customs practices. All CARE contracts call for customs-free entry of the agency's supplies.

If the agreement is signed, as expected, it will mark the return of CARE to one of the first countries to receive postwar relief aid from the agency. From May 1946 through December 1949 over $2¼ million worth of designated CARE packages were delivered in Poland. Slated to head the reopened CARE office is Edward T. Greaves, formerly of Jersey City, N. J., an 11-year veteran of the agency's overseas staff, who accompanied Mr. Reuter to Warsaw for the negotiations.

Throughout their trip, Mr. Reuter reported, he and Mr. Greaves met nothing but friendliness from both the officials and the Polish people. They traveled freely through Warsaw, Lublin, and a half-dozen smaller cities and were taken on a tour of six institutions (hospitals, orphanages, rehabilitation centers).

In the institutions, Mr. Reuter was impressed by the high level of professional care, but he noted a discouraging lack of technical equipment, tools, and recreational material. The CARE self-help program, which provides such supplies where needed, was enthusiastically praised by the officials with whom he conferred. The ministries involved in the administration of the institutions are now drawing up lists of priority needs for CARE's consideration, he stated.

Of food and other consumer goods that might be delivered, Mr. Reuter explained:

"Though there is no starvation in Poland, and probably very little actual hunger, there are shortages of specific items. Citrus foods, for example, fresh or canned, are virtually unobtainable. Milk distribution is spotty."

Price is most likely to be a limiting factor, he added. Using the new exchange rate, monthly wages average $50 for workers and $70 for white-collar employees. But a pair of shoes costs $8; a shirt, $4; a pound of coffee, $6.

"Life is not easy for the people of Poland," he concluded. "Through CARE, the people of America could be of real assistance. The present CARE program balance, with self-help emphasis, would be particularly helpful in Poland. I expect that a satisfactory agreement will be signed shortly."

Mr. Greaves will be transferred to Warsaw from his present post as CARE mission chief in West Germany. Assisting him will be Anthony Matulewicz, of Philadelphia, Pa., former assistant in Panama and Colombia, who speaks, reads, and writes Polish.

GOVERNMENT SPENDING

Mr. ROBERTSON. Mr. President, never in my previous service in the Congress has greater concern been expressed by the rank and file of the people of this Nation over the Government's spending program which has necessitated the continuation of wartime taxation 12 years after the end of World War II. The Appropriations Committees of the House and Senate are closely scrutinizing every item in the President's budget for fiscal 1958 with a view to effecting every possible economy consistent with national safety and the general welfare.

On yesterday, the Joint Committee on Defense Production, of which I am now chairman, learned that a part of the vast spending since 1950 has been due to

losses under the Defense Production Act exceeding $850 million on materials contracted for by the Government for private as well as public use, plus a revenue loss growing out of the tax amortization program of ODM, estimated by the Secretary of the Treasury at $3 billion, but by others at a much higher figure.

The Joint Committee on Defense Production plans to continue this study of losses under the Defense Production Act, including a very large loss on a nickel-purchasing program when ODM forced the General Services Administration to contract for nickel from the Freeport Sulphur Co. at a much higher price than had been offered by Bethlehem Steel, plus another potential loss if the International Nickel Co. can substantiate its claim that the Government must give it the same type of deal that Freeport Sulphur got.

Today, Mr. President, I wish to emphasize the fact that if we are to reduce expenditures and then have a reduction of taxes, there are many phases of the present high cost of government that need to be studied.

ORDER FOR CALL OF THE CALENDAR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that at the conclusion of action on the pending business, it be in order to proceed to the consideration of unobjected-to bills on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

MUTUAL SECURITY PROGRAM—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 182)

Mr. JOHNSON of Texas. Mr. President, the message of the President of the United States on the mutual-security program, transmitted to the Senate today, was received by the House on yesterday and printed in full in the RECORD on pages 7299 to 7302.

I ask unanimous consent that the message be laid before the Senate and referred to the Committee on Foreign Relations, without being read.

There being no objection, the Presiding Officer laid before the Senate a message from the President of the United States, relating to mutual-security programs, which was referred to the Committee on Foreign Relations.

(For President's message, see House proceedings of May 21, 1957, pp. 7299–7302, CONGRESSIONAL RECORD.)

PUBLIC SUPPORT OF THE PRESIDENT'S POSITION ON THE FOREIGN-AID PROGRAM

Mr. JAVITS. Mr. President, today we have heard some interesting statements with respect to confidence in the character of the President. I yield to no one in my admiration for support of, and belief in, the character of the President; and I have shown that on many battlefields.

It is my deep conviction that right now the President is even more interested in support of his program than he is in support by means of statements of our confidence in him as a person—gratifying as they are to any man, regardless of the cause.

So, Mr. President, I am very glad to report that the reaction to the President's speech of last night on foreign aid, which he considers—and rightly so, and I think that is as patriotic a duty as any he can perform while he is in office—essential to the security of the United States, is running very well; and the communications coming from my State this morning are 10 to 1 in favor of what the President spoke about last night, when he called for support for the foreign-aid program of the United States.

Since the President of the United States has been taking this fight to the people, I have begun to note, Mr. President, a dramatic shift in public opinion on the budget; and it is tremendously encouraging to me, as a fighter on the side of the President, and for his programs, to see public opinion finally begin to crystallize in support of the programs endorsed by a huge majority of the American people, first in 1952 and again in 1956.

Mr. President, as history is written, it is these endorsements of his program which are the greatest certification of the extent to which the American people believe in the President and which will prove to be the most gratifying to him.

THE MUTUAL SECURITY PROGRAM

Mr. CASE of New Jersey. Mr. President, the President has made a forthright and unmistakably clear statement of the stakes involved in our mutual security programs. Plainly stated, the issue comes down to a choice of security or saving—spending dollars now or spending billions and endangering American boys later.

Today's budget breaking has great appeal, but there is a greater responsibility upon all of us—to continue the security of our Nation. The President, with his wealth of experience in peace and in war, has stated unequivocably that the program he is seeking is a minimum for the adequate defense of this Nation. As the President has said, "There is no waste so colossal as war itself." And the mutual security programs "are totally dedicated to the prevention of that most appalling kind of waste."

I can think of no better way to summarize my views on the budget for the mutual security programs than to repeat the conclusion of the President's statement:

> These, then, are the kinds of help and action that make up our mutual security programs, for which I have asked the Congress to appropriate less than $4 billion—one-twentieth of our national budget. This is not a mathematical guess or an arbitrary sum. It reflects economies already achieved in some aspects of military aid.
>
> It is a reasoned figure.
>
> And, considering the issues at stake, it is a minimum figure.
>
> I know of no more sound or necessary investment that our Nation can make. I know of no expenditure that can contribute so much—in the words of the Constitution—to our "common defense" and to securing the blessings of liberty for ourselves and our posterity.
>
> To see all the day-to-day results of these programs in concrete terms is not always easy. They operate in distant lands whose histories, even their names, seem remote. Often the results are not swift and dramatic, but gradual and steady. They operate in a way rather like police or fire protection in our own cities. When they are least in the news, they are really doing the most effective work.
>
> We live at a time when our plainest task is to put first things first. Of all our current domestic concerns—lower taxes, bigger dams, deeper harbors, higher pensions, better housing—not one of these will matter if our Nation is put in peril. For all that we cherish and justly desire—for ourselves or for our children—the securing of peace is the first requisite.
>
> We live in a time when the cost of peace is high.
>
> Yet the price of war is higher and is paid in different coin—with the lives of our youth and the devastation of our cities.
>
> The road to this disaster could easily be paved with the good intentions of those blindly striving to save the money that must be spent as the price of peace.
>
> It is no accident that those who have most intimately lived with the horrors of war are generally the most earnest supporters of these programs to secure peace.
>
> To cripple our programs for mutual security in the false name of economy can mean nothing less than a weakening of our Nation.
>
> To try to save money at the risk of such damage is neither conservative nor constructive.
>
> It is reckless.
>
> It could mean the loss of peace. It could mean the loss of freedom. It could mean the loss of both.
>
> I know that you would not wish your Government to take such a reckless gamble.
>
> I do not intend that your Government take that gamble.
>
> I am convinced of the necessity of these programs of mutual security—for the very safety of our Nation. For upon them critically depends all that we hold most dear—the heritage of freedom, from our fathers, the peace and well-being of the sons who will come after us.

I am happy to report that the response so far received in my office to the President's speech indicates that the great majority of the American people share the President's convictions and are wholeheartedly behind the mutual security program.

THE PRESIDENT'S FOREIGN AID REQUESTS

Mr. BYRD. Mr. President, in presenting his foreign aid appropriation requests for fiscal year 1958, the President last night omitted mention of the total amount which would be available.

He asked for $3.9 billion in new appropriations. This would be in addition to $6.2 billion of unexpended balances remaining in previous appropriations. The total available, beginning July 1, for expenditure would be $10.1 billion. This is in addition to $0.8 billion in foreign currencies available outside the budget.

It will be contended that most of these unexpended balances are obligated, but foreign aid obligations are not always

firm and they have been deobligated, reserved, transferred, time and time again.

Not only did the President, in effect, request a total of $10.1 billion to be available in foreign aid during the coming fiscal year, but he also proposed a whole new foreign loan program on a permanent basis. For this new loan program he requested $500 million in direct appropriations for the coming year and asked for authority to spend an additional $1.5 billion out of the United States debt in fiscal years 1959 and 1960 to increase the capital in this proposed new foreign loan program.

To date foreign aid has cost $63.5 billion, according to official figures compiled by the United States Department of Commerce. Most of this has been added to the Federal debt on which American taxpayers will be paying, with interest, for years to come.

Congress should have a complete blueprint of authority to spend for foreign aid. American taxpayers should be informed, without confusion, as to: First, the $6.2 billion of balances in previous appropriations available to be spent; second, the $3.9 billion in new appropriations requested; third, the $0.8 billion in foreign currencies owed to and owned by the United States available for foreign aid expenditure outside the budget in the coming year; and, fourth, the $1.5 billion requested for the new foreign loan program in future years.

ORDER FOR CONSIDERATION OF GENERAL GOVERNMENT MATTERS APPROPRIATION BILL, 1958

Mr. JOHNSON of Texas. Mr. President, I should like to announce that at the conclusion of the call of the calendar the majority leader will move the consideration of H. R. 5788, the general Government matters appropriation bill.

PRINTING OF ADDITIONAL COPIES OF THE REPORT ENTITLED "THE INTERNATIONAL PETROLEUM CARTEL"

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the concurrent resolution (S. Con. Res. 26) to print additional copies of the report entitled "The International Petroleum Cartel."

Mr. O'MAHONEY. Mr. President, the unfinished business is a concurrent resolution reported by the Committee on Rules and Administration authorizing the printing of 3,000 additional copies of the report entitled "The International Petroleum Cartel." This concurrent resolution, unanimously reported by the committee, calls for a reprint of the document, of which the Superintendent of Documents, when it was first printed, sold 5,100 copies at $1.50 each. When printed again, the reprints will be placed on sale at $2 a copy.

The Superintendent of Documents has advised us that it is his intention to order 1,500 additional copies for sale to the public. The demand is great, and I suspect it will be essential for the Superintendent of Documents to order additional copies.

I know of no objection to the adoption of the concurrent resolution, and I trust it may now be acted upon.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 26) was agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 3,000 additional copies of the report entitled "The International Petroleum Cartel," a staff report to the Federal Trade Commission submitted to the Subcommittee on Monopoly of the Senate Committee on Small Business, which was printed as a committee print during the 82d Congress, 2d session. Such additional copies shall be for the use of the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary.

ROADSIDE ADVERTISING

Mr. NEUBERGER. Mr. President, the Subcommittee on Public Roads of the Senate Committee on Public Works is currently considering legislation for the control of roadside advertising along the 41,000-mile-long Interstate Highway System to be constructed under the provisions of the Highway Act of 1956.

Two principal measures are now before the subcommittee. S. 963, which I introduced in January, provides that the Secretary of Commerce will promulgate recommended standards of billboard control. States which agree to accept these standards would be entitled to include within the highway costs, of which the Federal Government contributes 90 percent, the cost of acquiring or otherwise eliminating advertising rights within 500 feet on either side of the rights-of-way. The other proposal, drafted by Federal Highway Administrator Bertram D. Tallamy at the subcommittee's request, would award cooperating States three-fourths of 1 percent of highway costs. Both of these measures reject the philosophy of a Department of Commerce proposal to impose billboard control by penalizing those States which decline to participate.

The Senator from Tennessee [Mr. GORE], the able chairman of our subcommittee, has indicated his willingness to consider any reasonable compromise bill which may win the support of a majority of the subcommittee. I am entirely in accord with this view, but it must be a reasonable bill. I have no pride of authorship in S. 963. I am interested only in the end result—initiation of a program to protect the traveling public whose taxes will build the new highways against being made an unwilling captive audience for commercial advertisers. The Federal Government has a substantial and legitimate interest in preserving the natural view along the new interstate highways for the enjoyment of millions of motorists who will finance this great transportation development.

There is no question but that the Government, with the cooperation of the States, can accomplish this goal while fully protecting the real interests of tourist facilities and services whose business depends upon attracting travelers off the highways to their locations. The proposals which we are considering would include provisions for informational signs within a reasonable distance approaching the exits of the limited-access highways, from which the traveler would learn of resorts, motels, restaurants, garages, and other facilities available to him from the highway access point which he is approaching. There is a basic distinction between that sort of informational advertising and the customary huge billboards which proclaim the merits of some beer, automobile, cigarette, or other nationally sold product.

Mr. President, I am hopeful that the subcommittee on Public Roads will soon act on billboard-control legislation, and that the full Public Works Committee and the Senate will accept their recommendation. The wide public interest in this proposal continues to be evidenced both by the volume of letters I have received in support of my bill and by the continued attention given it in the press.

At this point, I ask unanimous consent to have printed in the RECORD, as fitting examples of this public interest, an editorial from the Portland Oregonian of May 14, an editorial from the Christian Science Monitor of May 16, an editorial from the Harvard Law Record of April 25, and an article by Mr. Henry J. Stern in the same issue of the Harvard Law Record, analyzing the issues brought before the roads subcommittee in its billboard-control hearings.

There being no objection, the editorials and article were ordered to be printed in the RECORD, as follows:

[From the Portland (Oreg.) Oregonian of May 14, 1957]

CARROT OR STICK?

The old question whether the carrot or the stick is the better inducement has been raised in Congress in connection with proposed legislation to protect the 41,000-mile Interstate Highway System against too many billboards. The carrot appears to be winning out.

Last year Senators ALBERT GORE, of Tennessee, and RICHARD L. NEUBERGER, of Oregon, attempted to apply the stick by including in the original $25 billion interstate highway bill an anti-billboard clause. This ran head-on into the States right issue and was deleted. This year Senator NEUBERGER tried the carrot. A bill introduced left co-operation up to the States and under it the Federal Government would have paid 90 percent of the cost of buying up advertising rights in 500-foot strips adjoining the superhighways.

The administration, through Secretary of Commerce Sinclair Weeks, sought to induce cooperation of the States by resorting to the stick again. States which did not agree to billboard regulation, under this plan, would receive only 85 percent of the highway construction costs from the Federal Treasury instead of 90 percent. The Senate public roads subcommittee rejected that suggestion.

Then Bertram D. Tallamy, Federal Highway Administrator, came up with another carrot. He suggested that cooperating States receive a bonus in place of penalizing noncooperators. States which agree to join in the program would receive 90¾ percent of highway construction costs instead of 90 percent.

Senator GORE thinks a compromise measure, incorporating this bonus and also some

concessions on signs "in the interest of the traveling public" for which motels and other businesses off the main highways had argued, will be approved by his subcommittee.

If the modern, new highways are to be protected from an overabundance of signs, now is the time to do it before the 13-year rebuilding program gets too far under way. Compromise and the carrot, one hopes, will result in preserving the beauty of the countryside as well as giving off-the-road businesses a fair break.

[From the Christian Science Monitor of May 16, 1957]

A BILLBOARD CARROT

Hopes for strong legislation to control billboards on the new 41,000-mile National Highway System have been trimmed almost to the vanishing point. The Senate Public Roads Subcommittee has apparently given up the attempt to goad the States into effective action by withholding 5 percent of Federal funds unless billboards were regulated. It leans rather toward the reward method.

There is much to be said for using a carrot instead of a stick to obtain State action. But the compromise bill now favored provides a very tiny carrot. It would add three-quarters of 1 percent to the 90 percent of total costs which the Federal Government now provides for the joint highway building program. This bonus may induce States to apply minimal restrictions. And Senator GORE and his colleagues on the committee must believe it is the best they can get.

But the history of this proposal is another sad commentary on the way in which concentrated private interests are able to thwart the diffuse general interest. Public opinion has been strongly and widely expressed in favor of controls. That the billboard business in this case would be created by the public funds made it all the more reasonable to control it in the public interest.

Let's hope that the little carrot now promised will prove attractive. But it looks so small that the battle will probably have to be fought all over again in each State. Even so it can be won if citizens will show that they care enough.

[From the Harvard Law Record of April 25, 1957]

BILLBOARD REGULATION

A new 41,000-mile system of interstate highways will be constructed over the next 13 years. Ninety percent of the cost of the roads will be paid by the Federal Government; the States will pay 10 percent. The money will be raised by taxes on highway users, who will pay increased levies on gasoline, diesel fuel and tires.

Whether billboards should be allowed to line the sides of these highways is a question now before Congress. Despite widespread public sentiment for regulation of billboards, it is unlikely that Congress will act.

The case for regulation has been gaining increasing acceptance in recent years. Court decisions, once hostile to State laws and city ordinances on billboards, are now almost unanimously in favor of regulations. Some States, including California and New York, have banned billboard advertising near the thruway and freeway systems.

It is beginning to be recognized that part of making a limited-access toll-road attractive to motorists is the banning of billboards.

Advocates of billboard control stress the scenic beauties of the United States. "Will motorists travel these swift economic highways with an unlimited view of the scenic grandeur of the American countryside? Or will our new transportation arteries become monotonous corridors walled with commercial signboards?" asks Senator RICHARD L. NEUBERGER, of Oregon. Will the motorist "instead of seeing stirring vistas of mountains and rivers be confronted by blatant demands that he buy a particular brand of liquor, soap or chewing gum?"

Actually, the motorist is more likely to be asked to buy automobiles, gasoline or beer than chewing gum or soap. Of the 25 companies that spent over $1 million on billboards last year, 4 sell cars, 7 sell gasoline, and 9 are breweries. But regardless of what is being sold, the billboard blots out the scenery with equal effectiveness.

SAFETY STUDIES QUOTED

Driver safety is also relied on as an argument by opponents of billboards. They cite a Minnesota Traffic Department study to show that more accidents occur on roads which have heavy billboard concentrations. The time a driver spends reading a billboard cannot be spent watching the road. If a driver spends 5 seconds reading a signboard, his car, going at 50 miles per hour, will have traveled 367 feet. Furthermore, billboards are often placed on curves where extra attention to driving is needed.

The State of New York, and other States, have gone to great expense recently to build overhead signs informing drivers about approaching intersections. These authorities believe it is safer to keep the motorist's eyes on the road.

As far as can be determined, public opinion supports regulation. In a March 1957 Trendex News poll, 65.9 percent of a nationwide sample favored billboard control, and 25.9 percent opposed regulation. A poll of 10,000 motorists taken by the Automobile Club of Maryland resulted in a 19–1 margin for billboard control.

The Neuberger bill and the administration bill proposed by Secretary of Commerce Sinclair Weeks are before the Senate Subcommittee on Public Roads. Both would encourage the States to restrict billboards on the Interstate System. The Neuberger bill uses the carrot, promising to pay 90 percent of the cost which the States would incur in buying scenic easements to prevent the construction of billboards. The Weeks bill uses the stick; it would cut off 5 percent of Federal-aid appropriations to States that do not agree to regulate billboards.

The Neuberger bill is preferable for one reason—it is the only bill with a chance of passage. The proposal to penalize the States for refusal to comply with the suggested Federal standards has run into strong opposition on States rights grounds. It is also attacked as a breach of faith, taking back money that has already been appropriated unless new conditions are met.

In theory, we can get billboard control without paying for it; either by legislation or by zoning. These methods have been upheld in some State courts and rejected in others; applied to the Interstate System, they are likely to be found valid by the United States Supreme Court. But politically speaking, such regulation would be almost impossible to achieve, since it would be opposed by farmers as well as roadside business and the billboard industry.

The cost of billboard control has been estimated at $6,000 per mile for the new roads. But this is less than 1 percent of the cost of construction. And the easements will never be cheaper to buy than at the time the road is being built.

Can the vast public that will use, and pay for, the new highways speak strongly enough to overcome the opposition of the interests who profit from billboards? It is on its success in meeting tests of this kind that our democracy will be judged.

[From the Harvard Law Record of April 25, 1957]

CONGRESS WEIGHS BILLBOARD BAN ON NEW INTERSTATE ROAD SYSTEM

(By Henry J. Stern)

The 50-year-old struggle for billboard regulation reaches a crisis this year as Congress considers plans to keep billboards off the new Federal Interstate Highway System.

Previous battles have been fought in State legislatures, city councils, zoning boards, and courts. Now Congress is involved with the question of whether advertising should be permitted along the 41,000 miles of new roads to be built in the next 13 years.

The early cases in the field struck down attempts by cities to regulate the billboard. Gradually regulation came to be accepted—first under the near-legal fiction that billboards were health hazards, later under the police power and for esthetic reasons.

Once billboards predominated among advertising mediums. But today, radio, television and periodicals take large slices of the advertiser's dollar, and billboards are not as essential to business as they once were. But the outdoor advertising industry does a $150 million a year business, and employs 20,000 people.

EUPHEMISMS EMPLOYED

One policy of the advertising industry is the outlawry of the word "billboard." Admen refer to the boards as "poster panels" or "painted bulletins." The reason for this is public aversion to the idea of a billboard. Many motorists associate the boards with police lying in wait. Others see the boards as place behind which immoral acts are performed. The result of these concepts, most of which were more prevalent 20 years ago than now, has been to leave the word "billboard" with connotations that the advertising industry wishes to avoid. But in the vernacular, "billboard" has remained strongly entrenched.

The primary antagonists of the billboard industry are a group of citizens who oppose the signboards on basically esthetic grounds. America's senior billboard fighter is Albert S. Bard, LL.B., 1892, who has been battling signboards ever since he was appointed to a special committee on the subject by New York City Mayor William J. Gaynor in 1913. For many years, Mr. Bard was counsel to the National Roadside Council, a group that is now defunct. He has filed amicus curiae briefs in cases involving billboard regulations, including the significant decision of *United Advertising Corp.* v. *Borough of Raritan* (11 N. J. 144, 93 A. 2d 362 (1952)). In that case Justice William J. Brennan, Jr., LL.B., 1931, then a member of the New Jersey Supreme Court, distinguished signs relating to the business conducted on the property from the outdoor advertising business. This distinction is important, because some regulation exempts signs advertising business conducted on the premises. Both the Neuberger bill and the administration bill now before the Senate contain this exemption.

Citing the Supreme Court's decision in *Cusack Co.* v. *Chicago* (242 U. S. 526, 37 Sup. Ct. 190, 61 L. Ed. 472 (1917)), Justice Brennan wrote:

"It has long been settled that the unique nature of outdoor advertising and nuisances fostered by billboards and similar outdoor structures located by persons in the business of outdoor advertising, justify the separate classification of such structures for the purpose of governmental restriction and regulation."

LIMITED RESTRICTIONS

But the courts have not so far allowed a fairly large city to keep out billboards. Also, it is much more difficult to get bill-

boards demolished than to prevent their erection, so many cities which have recently zoned areas to keep billboards out must continue to allow the outdoor structures already built.

In general, city and State regulation of billboards has been upheld in recent years. But these regulations usually apply to residential or retail zones. The Interstate Highway System will be built in large part through open country, where there now is no zoning.

The billboard industry's case against regulation is that it is a legitimate medium of advertising, and that the regulation in question is designed to kill the medium by preventing it from developing it along the roads which will carry the largest amounts of traffic and are therefore most suitable for its purpose.

The question Congress is now facing is whether to encourage the States to regulate billboards along the new roads. Two years ago, a plan for Federal acquisition of billboard rights for the area adjacent to the right-of-way was deleted from the bill at the insistence of Senator Walter F. George, who said that the provision in the bill violated States' rights.

This year a new effort is underway to regulate billboards. Two proposals have been introduced to accomplish this objective, by Sen. RICHARD L. NEUBERGER and by Secretary of Commerce Sinclair Weeks. The plans differ in the inducements they provide for the States to regulate billboards.

Under the Neuberger bill, the Federal Government would pay 90 percent of the cost to the States of acquiring scenic easements. Under the Weeks plan, the States would be penalized 5 percent of their Federal road building allotment if they did not agree to a program of billboard regulation.

THE NEUBERGER BILL

Under both bills, certain types of signs would be allowed. These include official road signs, notices that the property on which the sign is located is for sale or for rent, and signs advertising a business conducted on the premises. The administration bill would go further and allow billboards in areas specifically zoned for commercial and industrial purposes.

Although the exception for commercially zoned areas is reasonable in theory, it leaves open the possibility that States may zone a strip surrounding a highway for commercial purposes, thus frustrating the intent of the agreement.

Under the administration bill, States could acquire the necessary easements either by eminent domain proceedings under the police power or by purchase, at the discretion of the State. Agreements would be reached under this plan between Federal and State officials on specific State proposals for billboard regulation.

At hearings held last month in Washington, supporters and opponents of the proposed bills testified before the Senate Public Roads Subcommittee. An unusual lineup of witnesses appeared on both sides of the question, which was regarded by the Senators, at least on the surface, as a nonpartisan issue.

Testifying in favor of regulation or prohibition of billboards were conservationists, naturalists, planners, architects, the American Automobile Association and women's clubs. On the other side were roadside businessmen, advertising agencies, and labor unions.

The antibillboard speakers for the most part argued on the basis of safety and scenery. It was pointed out that highway users will pay the cost of the new roads in gasoline taxes. Billboards were assailed as the only form of advertising which utilizes public facilities, built at public expense. Since the value of the billboard is created by the presence of the road, it was argued that the State which creates the road should prevent its commercial exploitation.

THE MOSES PLAN

Park Commissioner Robert Moses, of New York, whose antibillboard article in the December issue of Harper's was reprinted and mailed to all Members of Congress, proposed a bill that would ban all advertising within 500 feet of the right-of-way by direct Federal action. Mr. Moses argued that the Federal Government is paying 90 percent of the roads' cost, and in the act of 1956, has declared them to be a "National System of Interstate and Defense Highways."

"They are instrumentalities of interstate commerce and national defense," he said. "Congress has both the moral responsibility and the legal right to protect them by Federal law against commercial billboards which would mar the scenic beauty and endanger the safety of travel." Mr. Moses opposes the Neuberger proposal to pay for the purchase of advertising rights. "The motorists who will pay billions of dollars in fuel and excise taxes for the construction of this new highway network should not be called upon to contribute additional sums to buy up the advertising rights which do not now exist," he stated.

Opponents of the proposed regulation believe that their industry is being singled out unfairly for attack. They stress advertising's contribution to the national economy, and object to the imposition of what they consider are the esthetic standards of a minority.

Existing State and local regulation provides adequate safeguards for the policing of outdoor advertising, the industry argues. Furthermore, intrusion of the Federal Government into this area—a field traditionally regarded as one of State control—would be an unwise infringement of States rights, it is maintained.

It is not State governments, however, that are raising the cry of States rights. According to W. A. Bugge, president of the American Association of State Highway Officials, who testified March 28, a total of 29 of 38 State highway departments favor regulation of outdoor advertising on Federal roads. But most of the State officials oppose the administration proposal as a breach of good faith.

Senator NEUBERGER charges that the billboard lobby is invoking States rights because it is more powerful in State legislatures and can more easily defeat regulation of billboards on the State level.

A strong presentation against the proposed bills was made by former Senator Scott W. Lucas, now representing the Roadside Business Association. He called the proposed bills extraneous to the construction and improvement of highways. Mr. Lucas forecast delays in the program if the bill was adopted because of lengthy litigation that would follow a State's attempt to use the police power for esthetic purposes.

The former Senator raised the specter of the threat to other forms of advertising. He said that under the Neuberger bill pigsties and junkyards could border the roads, but not a billboard advertising a motel. Mr. Lucas said that 100 percent of motel patronage, 82 percent of hotel business, and 33 percent of restaurant receipts come from motorists.

CONCLUSIONS

The billboard question is unique because it presents a novel lineup of interests on each side. It is not a labor-management, North-South, or internationalist-isolationist dispute. It is not a partisan political issue, yet it is a subject of very real disagreement.

It is unlikely that Congress will act on the subject of billboard regulation. The outdoor advertising business has been relatively restrained in recent years in the number and placement of signboards, and although the public is unsympathetic, it is not indignant. Although some States would ban billboards along the Interstate System on their own, a majority would allow them.

The trend of State legislation, supported by court decisions, has been in favor of strict billboard regulation on high-speed limited-access roads. Outdoor advertising, although unchallenged in industrial areas, will find it difficult in the years ahead to stay on the new Interstate System.

As public esthetics develops as a factor in legislation, this heretofore permitted medium is coming into increasing conflict with local ordinances and zoning. No matter what decision Congress reaches, the battle of the billboards is likely to be fought out on the State and local level for the next generation.

STATEMENT BY AMERICAN CIVIL LIBERTIES UNION ON JURY TRIAL AMENDMENT TO CIVIL RIGHTS LEGISLATION

Mr. CASE of New Jersey. Mr. President, I should like to call the attention of my colleagues to a statement which the American Civil Liberties Union has released today opposing the jury trial amendments to the civil rights bill.

As Senators know, the heart of the attack upon the right to vote bill (S. 83), now pending before the Senate Judiciary Committee, is the allegation by its opponents that persons cited for contempt of court under the bill's provisions would be denied the right to jury trial.

The bill in question would permit the Attorney General to bring a civil suit in the Federal district courts to enjoin State officials or others from depriving citizens of their right to vote. In the normal court case, of course, the party who is enjoined from a given course of action can be expected to comply with the court's order. Contempt cases arise only when the court's order is disobeyed.

It is in the latter kind of case that opponents of right to vote legislation now seek to impose a jury trial.

The injection of this issue into the discussion of S. 83 has engendered confusion not only in the press but in Congress as well. No supporter of constitutional rights likes to be charged with denying another's rights, particularly a right so fundamental as trial by jury. And much of the public does not understand that neither the Constitution nor prior legal precedent provides for a jury trial in contempt cases of the kind which might arise under S. 83.

It is, therefore, particularly gratifying to note the Civil Liberties Union's release today of a lucid and concise analysis of the jury trial amendment.

During its long career the Civil Liberties Union has steadfastly refused to temporize with any of our constitutional liberties. For this reason, its opposition to the jury trial amendment assumes particular significance at this time.

The jury trial is, of course, one of our most prized institutions of justice. While our Constitution does not guarantee jury trial in contempt cases, Congress has on occasion extended the right to jury trial to cases where the Constitution does not require it. I, for one, appreciate fully

the jury's value as a check upon the arbitrary exercise of governmental power. But I am convinced that it has no place in so-called civil-rights legislation.

As the ACLU's memorandum points out:

While there is always need to guard vigilantly against the misuse of Government power, including injunctions which are too broad and restrain constitutional activity (as we have recently argued is the case in the Clinton, Tenn., injunction), there is also need to prevent weakening of the power of our courts to uphold the law of the land. The right of equal treatment under law is fatally undermined when community sentiment blocks the enforcement of law.

Enforcement of the law has been undermined in some sections of the country where community sentiment has blocked effective enforcement of the right to vote. If court orders are to be respected in cases of this kind in which the Federal Government seeks to uphold public policy, the courts must be able to punish contemptuous acts. In conclusion, I quote once more from the ACLU's memorandum:

To grant jury trials in the civil-rights legislation would protect officials who are failing to do their duty in protecting the constitutional rights of citizens. Jury trials in contempt cases growing out of such legislation would give a privileged position to State officials who might defy Federal judges upholding the law of the land.

Mr. President, I ask unanimous consent that the statement from the American Civil Liberties Union be printed in the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ACLU STATEMENT ON JURY TRIAL AMENDMENT TO CIVIL RIGHTS LEGISLATION

The American Civil Liberties Union believes that all Americans are entitled to all the civil liberties guaranteed in the Constitution, free speech and association, due process and equality before the law. To advance equality before the law for all Americans, particularly the Negro citizens of the South who have been denied equal treatment, the ACLU is supporting Federal legislation toward this objective—bipartisan legislation suggested by the administration and backed by influential leaders in the Democratic Party.

The key sections in this legislation authorize the Federal Government to seek by the civil remedy of injunction a more effective protection of the right to vote and other constitutional rights, against deprivation especially by State officials. This is proposed to insure more effective protection for Negroes against intimidation, coercion and physical assault which prevent their voting and enjoying other constitutional rights. The need for this civil relief was pointed up by the Attorney General, in his testimony of February 14, 1957, before the Senate Subcommittee on Constitutional Rights:

"Criminal prosecutions of course cannot be instituted until after the harm actually has been done, yet no amount of criminal punishment can rectify the harm which the national interest suffers when citizens are illegally kept from the polls. Furthermore, criminal prosecutions are often unduly harsh in this particular field where the violators may be respected local officials."

Civil rights legislation has been blocked for years by the filibuster and other devices. This year it is being opposed especially on the ground that persons who are charged with contempt of a Federal court injunction restraining interference with the right to vote will not receive a trial by jury. Opponents of the legislation correctly state that under present law, although a person charged with criminal contempt is generally entitled to a jury trial when the enjoined acts would be a violation of the criminal law, he is not entitled to it in a case where the United States has brought the action for injunction, as would happen under the proposed civil rights legislation.

The right of trial by jury is rooted deep in our constitutional guarantees, to prevent the power of Government being used as a weapon of oppression, among other purposes. The American Civil Liberties Union has been a vigorous defender of this right, even in some areas where it is not strictly required constitutionally, because of our strong belief that the abuse of governmental power can be limited by juries, which represent a cross-section of community sentiment rather than the views of a single judge. This concern for the citizen's liberty has made us apprehensive of broadening the power of Federal courts to prohibit criminal conduct under the threat of punishment for criminal contempt, as indicated in our February 27 statement on the Clinton, Tenn., case. That case concerned John Kasper and 16 other anti-integrationists who were arrested for contempt of the court order enjoining them from interfering with the Clinton school integration program.

The Constitution guarantees jury trial only in criminal cases, and in civil suits involving more than $20; there is no such guarantee in contempt cases. Until 1914, Congress made no provision at all for jury trials in contempt proceedings. Then, in the Clayton Act, it allowed jury trials in contempt cases where the acts were also violations of Federal or State criminal laws except, in order that the Federal Government might carry out its functions and enforce the laws of the land, in cases to which the United States is a party. Another exception was made in 1932, when the Norris-La Guardia Anti-Injunction Act accorded labor unionists jury trials when they were charged with contempt of court injunctions in strike situations.

The absence of a jury trial in suits brought by the Government is not unusual. There are at least 28 other laws under which the United States is authorized to seek injunctions, without provision for jury trials; these include the antitrust laws, the Atomic Energy Act, the Fair Labor Standards Act, the Securities and Exchange Act and acts affecting the Interstate Commerce Commission and Federal Trade Commission. Moreover, jury trials in contempt proceedings are not generally required under the constitutions or laws of the States, including the Southern States.

After full and careful study of the possible need for a jury trial amendment to the proposed civil rights legislation, we are convinced that the present jury trial argument is chiefly a contrived obstruction to defeat the desperately needed civil-rights legislation. So, we are vigorously opposed to any amendment requiring a jury trial.

What are the reasons for the ACLU's opposition to the jury amendment?

1. While there is always need to guard vigilantly against the misuse of Government power, including injunctions which are too broad and restrain constitutional activity (as we have recently argued is the case in the Clinton, Tenn., injunction), there is also need to prevent weakening the power of our courts to uphold the law of the land. The right of equal treatment under law is fatally undermined when community sentiment blocks the enforcement of law. The injunction is an effective legal technique to protect constitutional rights. As the Attorney General pointed out in his testimony, this method of protection would seek to prevent State officials from committing acts violative of a criminal statute. It is far better for all concerned—including those officials—to enjoin these acts before they are committed than to prosecute after the harm has been done. The main point to be kept in mind is that the proposed legislation aims simply at providing more effective enforcement of voting and other constitutional rights for all citizens.

2. Supporters of jury-trial amendments contend that to grant power to the courts to restrain criminal conduct would circumvent due process. However, before a person is enjoined he is entitled to all the guaranties of a fair hearing, with every opportunity to prove the invalidity of the application for the order. He also has a full right to appeal to higher courts, a check on arbitrary decisions. Even temporary restraining orders are issued only if the Government's affidavits show clearly that an immediate and irreparable loss will be suffered, so that no notice can be given and a hearing held. Then hearings on temporary restraining orders are quickly scheduled; the orders are of minimal duration; preliminary injunctions cannot be issued without notice and a hearing, which gives the defendants an opportunity to be heard. Then, at the trial for a permanent injunction, the Government has to present its case that there is a threat of irreparable injury; the defendants are represented by counsel, they may confront and cross-examine witnesses and present information to show that the injunction is unwarranted. Finally, if the order is disobeyed, it must be established beyond reasonable doubt that the disobedience was willful before a person can be punished for criminal contempt. The act of disobedience is an act of contempt of court, not an act violating a criminal statute, and it is penalized in order to maintain the court's traditional and indispensable authority to uphold the law—and the due process requirements provide a safeguard against the fear that Federal judges will not administer justice impartially, because of regarding violation of their injunctions as a personal affront or because of owing loyalty to the national administration under their appointment by the President.

3. A major argument advanced for the jury-trial amendment is the alleged discriminatory treatment of persons disobeying an injunction to guarantee civil rights, as compared with the treatment of labor unionists under the Norris-La Guardia Act. But the very purpose of the Norris-La Guardia Act was to support a congressional policy, that workers should be free to organize and bargain collectively; it was passed for the very reason that judges had been going beyond the law. As Senator PAUL DOUGLAS said, in a brief submitted to Congress on the jury-trial question on April 16:

"In the decades prior to the 1932 • • • courts would issue injunctions and use their contempt power indiscriminately, not to prevent violations of law but to prevent labor organization and freedom of collective bargaining. Decades of such demonstrated hostility by the courts to labor and its interests prompted Congress to implement the growing national policy in the labor field by specifically curtailing the Federal injunctive power in many areas of labor litigation and by providing that juries rather than judges determine whether contempt had been committed."

In short, the jury trials granted under the Norris-La Guardia Act were included to protect people against oppressive government. To grant jury trials in the civil-rights legislation would protect officials who are failing to do their duty in protecting the constitutional rights of citizens. Moreover, Congress subsequently limited the Norris-La Guardia Act jury trial provision by providing in the

Taft-Hartley Act that such provision would not be applicable to injunctions sought by the United States under the new act.

The current congressional proposals to strengthen our civil-rights laws are the least dramatic and most cautious approach to the enforcement of basic constitutional rights. Their purpose is not to punish, but to prevent infringement of the right to vote. Jury trials in contempt cases growing out of such legislation would give a privileged position to State officials who might defy Federal judges upholding the law of the land.

Mr. JAVITS. Mr. President, I wish to compliment my colleague, the Senator from New Jersey, for inviting the attention of the Senate to the document he has just offered, which refers to the key question on the proposed civil-rights legislation, the right to a trial by jury on a contempt citation brought by the United States Government.

I believe the procedure mentioned is nothing but begging the question. The procedure of citation for contempt is a time-honored method of procedure, and I am very glad to see that other organizations, in addition to those which are discussing the matter here, are coming to grips with it. I compliment the Senator from New Jersey for bringing this statement of the American Civil Liberties Union to the attention of the Senate.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 7221) making supplemental appropriations for the fiscal year ending June 30, 1957, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. CANNON, Mr. THOMAS, Mr. KIRWAN, Mr. WHITTEN, Mr. ROONEY, Mr. TABER, Mr. JENSEN, Mr. H. CARL ANDERSEN, and Mr. CLEVENGER were appointed managers on the part of the House at the conference.

ONE HUNDRED AND FORTY-THIRD ANNIVERSARY OF NORWEGIAN INDEPENDENCE

Mr. HUMPHREY. Mr. President, this past weekend Norwegians and people of Norwegian descent celebrated "Syttende Mai," commemorating the 143d anniversary of Norwegian independence.

It is a great tribute to the great nation of Norway that this rugged land, washed along its cliffbound coasts by the Arctic Ocean, the North Sea, and the Atlantic Ocean, not only has withstood the forces of nature, but for a century and one-half has withstood attacks against its freedom and independence with equal courage, integrity, and perseverance.

One hundred and forty-three years ago, on May 17, 1814, a group of courageous and determined patriots met near Oslo to promulgate a liberal constitution, which has served as a guide for freedom-loving people the world over ever since.

This band of patriots showed the keen forethought that is a mark of Norwegian character.

The world was in conflict everywhere. Britain and the United States were still entangled in the War of 1812; just a few days before the British had attacked and destroyed the forts at Oswego, N. Y. Mexico was in revolt against the Spanish Government. Napoleon was sent to Elba and the Bourbon dynasty was restored. All Europe, in a reaction to Napoleon's onslaught, seemed bent toward the "days of old."

But the people of Norway, though in a state of unrest, were looking ahead. They carefully studied the recently adopted constitutions of the United States, France, and Spain, and drafted a document of their own. They declared their independence with this constitution on May 17, 1814.

Charles XIII of Sweden, recognizing that the courageous Norwegians could not be intimidated, accepted the constitution before the year was out, declaring Norway a free, independent, indivisible and inalienable state, united in brotherhood to Sweden.

Through the years, many have learned that Norwegians cannot be intimidated.

Who will forget their dramatic role in World War II? Not only did they put up courageous battle against Nazi Germany against overwhelming odds, but later fought an unrelenting underground struggle that will forever stand in relief in the annals of history.

Norway, a nation like our own, born to democracy and dedicated to peace, today has refused again to be coerced by her gigantic neighbors, and has taken a forthright stand with the West in the North Atlantic Treaty Organization and in the United Nations.

Sons and daughters of this sturdy Scandinavian country first came to the United States in 1825, bringing with them the love of hard work, a cast of individualism, a sense of craftsmanship and a devotion to the cause of democracy and freedom. More than a million Norwegians and Norwegian descendants are in the United States today, and more than one-fourth are located in my State of Minnesota. Through my mother, a native of Christiansand, Norway, I am happy to count myself among them. But all Americans, whatever their ancestry, rejoice today that Norway remains one of our greatest and most steadfast friends.

Mr. President, I desire now to advert to another subject.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

THE RISING COST OF LIVING AND CORPORATION PROFITS

Mr. HUMPHREY. Mr. President, on March 8 I made a short statement in the Senate in which I took issue with administration charges and innuendoes that rising prices were largely due to the wage demands of American workers.

Much to my surprise I soon thereafter began receiving newspaper articles from all sections of the country attacking my speech, and by coincidence all the columns were markedly similar both in terms of reporting what I said and in the criticism thereof. It was evident that the columnists who so readily and enthusiastically commented upon my speech had not taken the time to read it, for if they had they would not have written as they did.

One of the widely circulated attacks on my remarks appeared in the April monthly bulletin of the United States Chamber of Commerce Economic Intelligence. On April 26 I wrote to the editor of this bulletin in an effort to answer this editorial.

I ask unanimous consent that a press release issued on that date containing the text of my letter to the editor of Economic Intelligence be printed in the RECORD at this point in my remarks.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

SENATOR HUMPHREY REPLIES TO CHAMBER ATTACK ON PRICE-PROFIT ISSUE

Senator HUBERT H. HUMPHREY, Democrat, of Minnesota, today released a reply to a recent attack upon him as a profit-baiter which appeared in the April issue of the United States Chamber of Commerce's monthly bulletin Economic Intelligence. Continuing his discussion of the relationship between profits and recent price rises, the Minnesota legislator reasserted and amplified comments he had made on the Senate floor in recent weeks. In answering the chamber's editorial attack upon him, the Senator commented, "It is unfortunate that the name of United States Chamber of Commerce should have been associated with this careless muddying of the waters instead of with what should be our common and serious effort toward objective economic analysis."

The text of his letter, as released by Senator HUMPHREY, follows:

"DEAR MR. EDITOR: The current issue of Economic Intelligence devotes a page to an attack on profit baiting. Among those singled out for ridicule is a well-known United States Senator from the Midwest. According to your comments this Senator 'echoed the same line' as the AFL–CIO 'when he said higher prices were due to "enormous profits."'"

"About 2 months ago when the discussion of who is to blame for rising prices was being carried on, I volunteered the suggestion that perhaps those who were pinning all the blame on labor for demanding wage increases were overlooking the relationship between rising prices and the level of profits. I then cited what I believed to be enormous profits of two large corporations, as illustrations of what I had in mind.

"If you wish to call me a 'profit baiter' that is your right, Mr. Editor. However, I shall continue to recite the facts when I believe the public is being deliberately misled on an important issue of public policy—such as the relationship between wages, prices, and profits and our economic well-being.

"In this connection, I wonder if you would include in the 'profit baiter' category the First National City Bank of New York, whose March 1957 Monthly Letter on Business and Economic Conditions characterizes the 1956 profits of 2,550 leading corporations as generally high earnings.

"Rather than attempt to persuade the public that industry profits in 1956 were abnormally low for an inflation year, as your April issue does, the First National City Bank states quite candidly: 'The generally high earnings of 1956 reflected benefits flowing from the record sums invested over the past few years for expanding and modernizing plant and equipment, lowering costs, and improving efficiency.'

"Thus the First National City Bank's analysis confirms my contention that the high prices of 1956 were in fact related to the level of corporate profits. In view of the record sums invested in expanding and

modernizing plant and equipment over the past few years, and the visible results in improved efficiency and lowered costs, why was it necessary for certain large corporations to raise prices in 1956 as much as they did? Why should not the consumer have received the benefit of the reduction in costs—past as well as prospective?

"At the present time the appliance industry is in a recession. What is industry's answer? Here is the answer of one large corporation in the appliance industry. The New York Journal of Commerce, April 4, 1957, states:

"'WESTINGHOUSE PLANS PRICE HIKES

"'BALTIMORE, MD.—Westinghouse Electric Corp. hopes to widen its profit margins substantially during the second half of this year. The company plans to do this by increasing prices on apparatus and industrial products after July 1, Gwylym A. Price, president and chairman indicated at the annual meeting of stockholders.'

"The Journal of Commerce then notes that 'Mr. Price told stockholders that Westinghouse is "gearing production schedules realistically to potential market requirements. We are stressing the need for reasonable profits rather than seeking mere volume."

"'This would represent a reversal of thinking for Westinghouse which like most companies in its industry, in the past has stressed high volume operations and share competition.'

"I wonder to what extent a price and production policy, which stresses 'the need for reasonable profit rather than seeking mere volume,' conforms to the Chamber's view of how 'competitive markets' operate?

"In this connection perhaps you would wish to comment on the statement by Roger Blough, chairman of the board of the United States Steel Corp. last May at the annual stockholders meeting, that in order to meet the corporation's financial requirements for expansion and modernization there 'simply is no other course' than the 'method of raising prices from time to time * * * as circumstances require and permit.'

"This statement was made several months prior to the steel wage adjustment. It was a statement of the corporation's proposed pricing policy in the future. Prices would be raised to increase profits, so that the corporation could finance all of its modernization and expansion internally without resort to outside sources.

"Inasmuch as your publication has attacked me as a 'profit-baiter,' I believe it is fair of me to ask whether you support what Ben Fairless has called 'the historical American way and a completely appropriate means of acquiring funds for financing new facilities or expanding old ones—financing through the sale of new stock.' Or do you support what Clarence Francis appropriately named the 'costless capital way of financing,' by raising prices to the consumer?

"Surely the membership of the chamber of commerce is wise enough to recognize that it cannot have it both ways. If corporations with sufficient market power are to raise prices in order to obtain expansion capital, how can we say that the free market is allocating resources and investible funds?

"I must say in conclusion that I was frankly surprised at the level of economic literacy displayed in your April issue attacking me for suggesting that high profits were related to high prices. I doubt that you proved to many readers how uninformed I am or how ludicrous such charges are, by your meaningless statistical comparisons (such as comparing increases in compensation of employees with corporate profits, for what purpose only the chamber economist knows). I suggest that you might have asked whether the level of profits in 1955 and 1956 did not account for an unprecedented record level of investment (the most active factor in the entire inflationary picture), and whether recent profits levels did not account for earnings of stockholders and bondholders rising at a much more rapid rate than any other group in the economy.

"Had your article carefully analyzed the data so as to present reasonable conclusions regarding current levels of corporate profits, their effect on the economic stability of the Nation, and the relative positions of the various economic groups making up the Nation, you might have rendered a useful and constructive service. You might have found for example, that the level of profits in 1955 and 1956 stimulated an expansion in the rate of real investment in plant and equipment five times faster than the rate of growth of real consumption. You might have found also that the level of profits for the period 1952 to 1956 was high enough not only to support a record level of investment, but in addition to raise dividend payments to corporate stockholders 50 percent faster than the increase in total labor income over the same period. You might have found, too, that personal interest income received by bondholders since 1952 had risen at a rate 85 percent faster than the rise in total labor income.

"At a time when we can ill afford to sustain even minor economic setbacks, due to the inescapable international commitments we must carry, it is unfortunate that the name of the United States Chamber of Commerce should have been associated with this careless muddying of the waters, instead of being a part of what should be our common and serious effort toward objective economic analysis.

"Sincerely,

"HUBERT H. HUMPHREY."

Mr. HUMPHREY. Mr. President, the editorial in Economic Intelligence was typical of others which quoted me as saying that the increasing cost of living was due to the enormous profits of big corporations. As a matter of fact, nowhere in my Senate speech did I make any such statement nor did I intend to imply that such was the case. What I did say was that the administration must share responsibility for price increases and that inflation cannot be halted by pious admonitions and ineffectual monetary policies.

I am sorry that some newspaper critics misconstrued my remarks for I feel that what I said is basically sound. There is something seriously wrong with the administration's monetary policies which have brought about increased prices, financial difficulties to farmers, a serious drop in home construction, and a profit squeeze for more and more small and medium-size businesses—and even in many instances for large corporations which are in a competitive situation and do not dominate the market.

I do not object to large corporations making healthy profits. That is to be expected in an expanding economy such as ours. But I do think there is something definitely amiss with a monetary policy which permits some large corporations to make record-breaking profits while literally millions of small business firms are finding the going increasingly difficult. The responsibility for this situation must rest upon the shoulders of the administration which in its efforts to control inflation has failed miserably.

Consequently, Mr. President, I welcomed all the more the recent announcement of the distinguished chairman of the Senate Finance Committee that his committee will investigate the Nation's financial condition with special emphasis on public and private debt, taxes, and high interest rates. On April 29 I wrote to Senator BYRD and the other members of the Senate Finance Committee enclosing a memorandum in which I summarized my own views on the issue now facing us in monetary policy.

I ask unanimous consent that a news release of that date containing the text of my letter to the Senator from Virginia [Mr. BYRD] and the memorandum which I sent to the Senate Finance Committee be printed at this point in my remarks.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

SENATOR HUMPHREY SUGGESTS ISSUES FOR SENATE MONETARY STUDY

Senator HUBERT H. HUMPHREY (Democrat, Minnesota), today presented to the Senate Finance Committee his suggestions for the committee's forthcoming study of the Nation's "financial condition." In a letter to Senator HARRY FLOOD BYRD (Democrat, Virginia), Finance Committee chairman, Senator HUMPHREY pointed particularly to the need for investigating the administration's tight money policy. He expressed the hope that the contemplated study by the Finance Committee will be both "sweeping and incisive."

"A policy which was intended to bring about greater stability in the economy has thus in fact accentuated elements of instability," Senator HUMPHREY declared.

"The time has come for a realistic reappraisal of monetary policy—its role and goal in our economy. It is my earnest hope that the Senate Finance Committee will undertake that task to the full extent and scope which the situation requires."

The text of Senator HUMPHREY's letter to Senator BYRD follows:

"DEAR SENATOR BYRD: It was with considerable interest and gratification that I learned the decision of the Senate Finance Committee to investigate the Nation's financial condition with special emphasis on public and private debt, taxes, and high interest rates. The committee in general, and you in particular as its chairman, merit the highest commendation for this decision. I can think of no subject which is more deserving of careful Senate committee attention.

"No one who is at all interested in these subjects will deny their complexity. I recognize not only the complexity involved but my own amateur standing compared with the committee's experts in this field. Nevertheless I have, as you know, had a special interest in one aspect of your forthcoming study—the aspect of credit policies and interest rates.

"Consequently I am taking the liberty of sending to you and the other members of the committee my general comments on this issue in the form of the attached memorandum. I should also like to take this occasion to ask that this memorandum be printed as a part of your forthcoming hearings.

"I shall await these hearings and your committee report with the greatest interest. Meanwhile you have my thanks for your attention and my best wishes for this important study.

"Sincerely,

"HUBERT H. HUMPHREY."

The text of Senator HUMPHREY's memorandum to the Senate Finance Committee is attached:

"ISSUES IN MONETARY POLICY

"Memorandum to: Senate Finance Committee.

"From: Senator HUBERT H. HUMPHREY.

"Re: The Committee's forthcoming study of the Nation's financial conditions.

"Mr. Chairman, no recent economic issue has aroused greater interest and caused more discussion than this administration's tight-money policy.

"This policy is of the utmost importance to every citizen. Its implications are far reaching. In many respects the theory behind the tight-money policy goes right to the fundamentals of our economic system. I hope the investigation now contemplated by the finance committee will be both sweeping and incisive. With that in mind, I submit the following comments and suggestions.

"CAUSE FOR CONCERN

"The reason why there is so much interest and discussion of the tight-money policy is that a number of disturbing facts have emerged which are a cause of serious concern to the American people.

"People are disturbed over the current economic situation. They are asking how long general monetary controls, with their higher and higher interest rates and uneven impact on home building, small business, and agriculture can be maintained without causing permanent damage to the national economy.

"DANGERS OF TIGHT-MONEY POLICY

"We have heard from the inception of this policy in 1953 that it was needed to preserve the purchasing power of the dollar, to curb undue bank-credit expansion, to prevent excessive capital spending booms, and to keep our prosperity on an even keel. Those are desirable objectives. But some of us have maintained that general monetary controls and higher interest rates are no panaces.

"First we have pointed out that general credit restraint restrains only the weaker segments of our economy which do not contribute to inflationary pressure.

"Second, we have said that the policy of renouncing support of the Government bond market and of raising Federal Reserve rediscount rates would have little or no influence on the ability of commercial banks to expand their loans if they wanted to. We have said that the net result would be to raise interest sharply on the public debt and to boost bank profits.

"Third, we have said that credit restraint and higher interest rates should retard, and make more expensive, projects of a high social priority—housing, schools, hospitals, and other community facilities.

"Fourth, we have pointed out that higher borrowing costs would tend to raise consumer prices in important areas, such as utilities and housing, and not stabilize them.

"Fifth, we have said that instead of slowing down capital spending by business, the expectation of rising interest rates would encourage businessmen to speed up their programs to avoid the higher costs of borrowing.

"Sixth, we opposed the tight-credit policy because, instead of promoting economic stability and growth, we believed it would tend to accentuate instability and retard economic growth.

"After 5 years of tight money, I think we can demonstrate that it did not produce the results it was supposed to, but that, unfortunately, it has produced the opposite and harmful results we feared it would. Let us take a look at what has and what has not been accomplished.

"WEAKER SEGMENTS DISCRIMINATED AGAINST

"When credit is made scarce and costly, all groups should feel the effects of restraint equally. But such has not been the case in the past few years. The consensus is that credit restraint has worked special hardship on (1) small-business concerns, (2) home builders, most of whom are small-business men, and (3) farmers.

"Dr. Raymond Saulnier, chairman of the President's Council of Economic Advisers, testified before the Joint Economic Committee, January 28, 1957:

"'Certain aspects of that policy [tight money] seem to me to have been undesirable. Now, two in particular have been mentioned directly. One is the effect on housing, on home building, and home purchases; the other is the effect on small business.'

"Commenting further on the small-business squeeze, Dr. Saulnier stated:

"'Increasingly, small-business concerns—not concerns in trouble, but concerns of pretty good quality—were finding it difficult to meet their credit needs through the private banking system.'

"Farmers have felt the effects of the squeeze in two ways—lower prices for the things they produce and higher interest rates on money borrowed to increase farm resources and improve efficiency with new equipment.

"A recent Federal Reserve survey of farm-loan interest rates shows that the small farmer, with a net worth of under $10,000, paid an interest rate of up to 7.9 percent on a $500 loan to purchase farm real estate, a rate as high as 8.6 percent if the purpose was for intermediate investment, and a rate of 7.5 percent for a current production loan. Interest charged on installment loans to farmers averaged 10.7 percent.

"TIGHT MONEY HAS NOT REDUCED AMOUNT OF LENDING

"When the administration renounced the support of Government bonds at par and endorsed the Federal Reserve policy of raising rediscount rates from 1¾ percent in 1953 to 3 percent in 1956, it rationalized this as necessary to curb the inflationary expansion of bank credit.

"Apart from pushing interest rates to a 25-year peak, the policy had little effect on the willingness of commercial banks to make the loans they wanted to.

"From 1952 to 1956 commercial banks increased their loans by $25 billion or 40 percent. Four-fifths of this credit expansion took place in 1955–56 when Government bonds fell to new lows and when rediscount rates reached new highs.

"INTEREST ON FEDERAL, STATE, AND LOCAL DEBT INCREASED

"Higher interest rates on Treasury issues caused interest on the public debt to increase. At the end of December 1956, the increase in interest rates alone, over the rates prevailing in December 1952, caused an annual increase of $931 million in interest on the public debt. If the entire public debt were refinanced at the rates prevailing at the end of 1956, the increase would have been close to $2 billion a year in interest charges.

"Higher interest rates also boosted State and local government interest charges. In 1952 State and local interest charges amounted to $724 million. In 1955 it was $1,059 million. In 1952 the proportion of debt service to total current expenditures for State and local governments was 2.2 percent. In 1955 it was 4.6 percent, or more than double.

"Higher interest rates have seriously hampered the Treasury savings bond program. In 1956 redemptions rose at an alarming rate. In order to cover the cash drain, the Treasury Department had to step up its weekly offerings of 90-day bills. This in turn merely served to drive up the short-term rate higher and higher, until in early 1957 it threatened to force another increase in the Federal Reserve rediscount rate.

"At the present time the Treasury Department is asking Congress to approve a higher rate on savings bonds. This, of course, will further increase the interest charge on the debt.

"BANKS MAIN BENEFICIARIES OF HIGHER RATES

"Commercial banks have been the main beneficiaries of the higher interest rates. Banks have expanded both their loans and investments and are receiving higher rates of return on both. In 1955 insured commercial banks interest on Government obligations totaled $1½ billion compared to $1.1 billion in 1952. Net profits after taxes for these banks rose from $990 million in 1952 to $1,156 million in 1955.

"Further record profits were reported in 1956. For the first quarter of 1957, the New York Times reports that despite a slowdown in business loans the largest New York banks are 'chalking up operating earnings at least 10 percent greater than last year' (New York Times, Sunday, March 31, 1957).

"EFFECTS ON SCHOOLS AND HOUSING

"The community and the country have a special interest in adequate funds for schools. When a school district cannot compete in the price paid for funds with enterprises bidding for credit to be used in constructing office buildings, hotels, restaurants, and the like, it means that taxes will have to be raised or there will be no additional schools.

"Both situations have occurred. School districts have had to pay higher and higher interest rates on their issues. Between 1952 and 1955 interest on school bond issues of local school districts has increased from $94 million to $169 million, nearly double. In the same period direct general expenditures by local school districts for education has risen only 60 percent.

"Housing has been seriously curtailed by reason both of the restriction of mortgage credit and of the higher interest rates. The rate of nonfarm per capital home construction declined 25 percent in 1956 below 1955, and was 35 percent below the 1950 rate.

"With population recording its largest annual gain in history in 1956, the prospects of a housing shortage are becoming quite real. The bulk of the decline in homebuilding has been in the moderate priced housing units financed under VA and FHA.

"EFFECT ON CONSUMER PRICES

"It has been argued that the tight money policy limited spending and the competition for goods and services which bids prices up.

"The effect of higher financing costs in the prices of certain consumer cost-of-living items has been completely ignored.

"A comparison of the cost of living in 1956 with that for 1952 shows that the cost of goods was lower in 1956 than in 1952. This was particularly true of foods and reflected the decline of farm prices and incomes. It was also true of apparel, of household appliances, and of house furnishings. In these latter cases, it reflected the squeeze of tight credit on more competitive sectors of the economy including particularly the retail sector where, despite the rise in basic commodity prices such as steel, appliances have declined in price.

"In contrast to the lower prices for goods, consumers were paying substantially higher prices for services in 1956 than they paid in 1952. These increases were in large part due to higher costs of borrowed funds.

"This was particularly true of housing and utility rates.

"Mortgage interest rates are up at least 25 percent above their 1952 level. If various

discounts and fees are taken into account, the increase is even higher. The average income family wishing to buy a moderate priced home today will pay an extra $2,500 to $3,000 in financing charges, over the life of a 30-year $10,000 home mortgage, than they would have paid in 1952.

"Higher financing costs and restricted home production are reflected in higher rents. The rent index of the cost of living has risen 12.5 percent since 1952 and outside of the cost of medical care is responsible for most of the increase in the consumers price index since then. Another important service item that has gone up is the cost of gas and electricity. Since 1952 this component of the consumers price index has increased 7 percent.

"As far as the cost of utilities' borrowings are concerned here is an illustration from my own State of Minnesota. During the week of March 4, 1957, the Minnesota Power & Light Co., offered some $12 million of 30-year first mortgage securities on the market. These funds were for its construction program, needed to meet the continued increased demand for utility services. The issue carried an interest coupon of 4¾ percent whereas a similar issue sold in July 1951 carried an interest rate of only 3⅜ percent. Yet despite the higher 1⅜ percent interest yield, the issue met with only fair response. Prior to the actual bidding for these securities four investment banking groups withdrew. When the issue was finally marketed, it was at a net interest cost $3,855,600 higher over the life of the issue than it cost in 1951.

"The experience of the Minnesota Power & Light Co. has been duplicated by utilities all over the country. Electric, gas, and telephone utilities have been paying higher and higher rates on new borrowings to finance expansion. On March 13, 1957, the Wall Street Journal reported that a survey of over half the Nation's public service commissions showed the tight money market of the past 2 years is about to raise a little mischief with consumers' electricity, telephone, and gas bills.

"The utilities were all citing higher borrowing costs in filing applications for rate increases.

"These higher borrowing costs for utilities and for builders of new dwellings have shown up markedly in the cost of living already and will continue to do so.

"EFFECT ON THE BUSINESS INVESTMENT BOOM

"The Federal Reserve Bank of Philadelphia in its Business Review, December 1956 stated:

" 'A good part of the inflationary tendencies that cropped up in 1956 came from the strong surge of business spending on capital equipment. By the end of this year capital spending will probably be about 20 percent higher than in 1955.'

"This comment by the Federal Reserve Bank of Philadelphia is, to put it mildly, one of the greatest understatements of the year. The facts are that between 1954 and 1956 corporate outlays on plant and equipment, on expansion of inventories, and on financing customers' receivables, rose by $19.9 billion or 90 percent.

"Bank borrowing, mortgage loans, and the securities markets provided more than half, or $10.4 billion, of the needed new corporate financing. The remainder, or $9.5 billion, came from the resources of the corporations themselves—retained profits, depreciation and amortization, and a reduction of liquid assets.

"The effects of tight money may actually have stimulated capital expenditures rather than retarded them.

"The Department of Commerce publication, Survey of Current Business for February 1957, noted that 'bank borrowing by corporations was particularly heavy last year, the increase being about $2 billion greater than the rise of $3 billion in 1955.'

"Commenting on the reasons behind the stepped-up bank borrowing by corporations, the survey stated:

" 'To some extent this greater dependence on bank sources may reflect a tendency to rely temporarily on short term funds pending a more certain appraisal of the market for longer term borrowed funds, the cost of which was rising sharply and steadily throughout the year.'

"Contrary to the theory behind the tight money policy, high interest rates did not stop the big corporations. They avoided the higher market rates by tapping the traditional small business credit source, short term commercial bank funds. And when the small-business man came to his banker, he found that the big corporations had been there and dried the well.

"In commenting on the business investment boom of 1956, it is also pertinent to ask to what extent business pricing policies were affected by the decisions to step up investment.

"When it became obvious that the tight money policy was not effectively curbing the rise in prices as it was supposed to, we were told that labor costs were being forced up by excessive union wage demands and that this was the reason for the price increases.

"I should like to call attention to a fact that should not be overlooked. Large companies rarely go outside to finance expansion. Instead, they finance expansion through retained profits plus depreciation and amortization. And if these internal sources are deemed to be inadequate to cover expected needs, then the companies raise their prices to the consumer.

"This has been admitted by officials of both the United States Steel Corporation and the Standard Oil Company of New Jersey in connection with their recent price increases.

"The chairman of the Board of United States Steel Corp. advised the company's stockholders at the annual meeting May 7, 1956, that their financial projections showed they would be $140 million short of needed expansion capital—on the basis of 1955 reinvested profits (the largest in history); normal depreciations; plus amortization. He then proposed to the stockholders that the method to use to get expansion capital 'is by raising prices from time to time—as circumstances require and permit.'

"In the case of the Standard Oil Company of New Jersey, minutes of the board of directors meeting of December 13, 1956, disclose that projections made of future expenditures for modernization and expansion, measured against expected revenues from crude prices at current levels plus continuance of present dividend policies, indicated that 'for the first time in many years the consolidated group is faced with the prospect of being unable to generate internally sufficient cash to cover replacements, modernization, and expansion to the degree required.'

"The price increases which Standard Oil put into effect made it unnecessary for the company to go outside to make up for its earlier estimated deficiency of internal financing.

"That the price increases of 1956 were related to corporate estimates of their profit requirements in the light of 1957 expansion and dividend commitments is disclosed by two recent developments.

First, the SEC has disclosed that manufacturing firms plan to rely to a greater extent than in 1956 on internal funds to finance expansion.

Second, the New York Journal of Commerce (April 2, 1957) reports:

" 'The rising price trend is helping to sustain corporate profits in the face of a flattening out of sales and cost increases.'

"ELEMENTS OF INSTABILITY

"A policy which was intended to bring about greater stability in the economy has thus in fact accentuated elements of instability.

"One of the immediate consequences of the 1953 tight money episode was the 1954 recession. It has been estimated that the 1954 recession cost the economy about $30 billion in gross national production. This includes the actual decline of $15 billion plus the estimated increase of $15 billion which we should have expected from normal expansion in 1954.

"This setback had a number of unstabilizing consequences. First of all it led, as the Chairman of the Federal Reserve Board has testified, to a panicky reaction which eased credit far more than would have been necessary under other conditions. In the second place, it led to a decision to stimulate capital investment at a faster pace than would have been necessary if the 1954 downturn had not occurred.

"The result of the 1954 recession was first to set in motion measures that overcorrected, and then to produce the decision to clamp on even sharper restraints.

"Here we are in early 1957 faced by the fact of an emerging downturn induced by the overly restrictive monetary policies of 1956. Now we run the risk of remembering the lessons of 1954 and hesitating to ease up too soon and too fast. The danger is that we may err on the side of prolonging credit restraints too long thereby risking a recession that will be deeper and last longer than it should.

"This is one illustration of the way in which the policy designed to bring stability has instead introduced instability into the economy.

"Another example is the behavior of prices over the past 5 years. The policy of general monetary restraint is aimed at suppressing inflation by achieving average price stability. Thus, as long as the index which measures the average of all prices is stable, then it is assumed that the monetary authorities have performed their task successfully. But economic stability cannot be guaranteed by average price stability. Indeed the stability of an economy depends upon the relationships that individual commodity prices bear to one another over time, as well as the relationship of interest rates and wage rates to one another and to commodity prices. The movements of these various commodity prices, wage rates, and interest rates determine the way in which income will be distributed among the population. Most important of all, it will affect the balance between investment and consumption.

"Looking at the movement of commodity prices from 1952 to date, what do we find? Beneath the surface of average stability, we find that some prices have declined too far while others have risen too fast. For example, we find that prices received by farmers have declined 22 percent while industrial wholesale prices have increased nearly 10 percent. And among the industrial commodities we note that metals and metal-products prices have increased 20 percent and machinery prices are up 13 percent while textile products and apparel prices are down 5 percent.

"And if we look at retail prices, we note that while steel prices have advanced substantially, appliance prices have declined substantially.

"So within the overall picture of apparent price-stability trends in important segments were divergent and showed significant shifts from the overall pattern.

"Apart from these commodity price movements, there were other diverse movements. For example, while hourly wages in manufacturing went up 18 percent from 1952 to 1956; interest rates on Government-guaranteed home mortgages went up more than

25 percent; bond yields on the highest grade corporate bonds went up 26 percent; yields on 3-month Treasury bills went up 51 percent; and the SEC composite index of stock prices went up 80 percent.

"All of these diverse commodity price, wage rate, interest rate and stock price movements had an effect on the flow of income to various income groups in the economy.

"Overall national income rose 18 percent between 1952 and 1956. However, farm proprietors' income fell 23 percent over the same period. Corporate profits rose 21 percent while personal income rose only 19 percent. Wages and salaries went up 23 percent while interest income went up 42 percent and dividends rose 33 percent.

"Instead of a picture of stable economic relationships, we find a pattern of instability that has emerged over the period when tight money and rising interest rates were supposed to be bringing about greater stability. Farm proprietors incomes have dropped by about one-fourth while corporate profits have risen at a rate 10 percent faster than personal incomes and 16 percent faster than the national incomes. Moreover, dividend income has been increasing at a rate 50 percent greater than wages and salaries and interest income has been rising nearly 100 percent faster than wages and salaries.

"In short what we find is a much greater rate of gain among recipients of investment income than in other sectors of the economy. Consequently, it is not surprising to find investment outlays also showing a much greater expansion than other segments of the economy. Thus comparing the real increase in consumption from 1953 to 1956 with the real increase in private investment, the latter grew at a rate of 23 percent or almost double the 12-percent increase in the former.

"Such a relationship is highly unstable and cannot be sustained. A policy which stresses the desirability of higher and higher interest rates to encourage more and more savings to channel into capital investment will only serve to accentuate that instability.

"The time has come for a realistic reappraisal of monetary policy—its role and goal in our economy. It is my earnest hope that the Senate Finance Committee will undertake that task to the full extent and scope which the situation requires.

"April 22, 1957."

Mr. HUMPHREY. I have been pleased to note, Mr. President, certain reassurances of the relationship between profits and prices are now taking place even within the business community. I ask unanimous consent that a quotation from the May 6, 1957, issue of Time magazine in connection with this issue be printed at this point in my remarks.

There being no objection, the quotation was ordered to be printed in the RECORD, as follows:

For months Wall Street has been talking about a profit squeeze as if it were an indisputable fact for industry as a whole. Last week, as a flood of first-quarter-earnings reports poured out, the profit squeeze proved to be more fiction than fact. The firms that could not offset rising costs with increased business were far outnumbered by those that showed profits still on the upgrade. The profit squeeze did show up in the sense that earnings often failed to keep pace with the increase in sales. But overall corporate profits for 1957's first quarter were expected to tie, or even exceed, the $18.8 billion profit total reported in 1956's first quarter. Yet such is the psychology of the boom that many businessmen, accustomed to record after record, wanted nothing less than a zoom on top of the boom.

Mr. HUMPHREY. Similarly, Mr. President, an article which appeared in the May 1, 1957, Wall Street Journal indicates that there were several interesting elements contributing to the picture of last quarter's highest net earnings in history for the United States Steel Corp. The net gain in quarter earnings by United States Steel was in the face of a drop of shipments. The chairman, Mr. Roger M. Blough, announced that the improvement of profit percentage was due primarily to lower cost operations. This description hardly squares, Mr. President, with certain recent editorial outbursts attributing price rises to wage increases.

I ask unanimous consent that excerpts from the article to which I have just referred be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

UNITED STATES STEEL FIRST QUARTER NET HIT $115 MILLION, HIGHEST FOR ANY 3 MONTHS; SALES INCREASED—COSTS CUTS CITED—OUTPUT DROP TO 90 PERCENT OF CAPACITY IN SECOND PERIOD PREDICTED

NEW YORK.—United States Steel Corp., enjoyed for the first 3 months this year the highest net earnings it has ever reported for any quarterly period.

This result was achieved on an increase in sales to a record for any first calendar quarter, but in the face of a decline from a year earlier in tons of steel products shipped.

These were the highlights of the giant corporation's quarterly financial statement, issued yesterday right after directors met and declared the same dividend of 75 cents a share on the common stock as for recent previous quarters.

The new income was slightly more than $115 million, as compared with $104 million each in the preceding quarter and in the first quarter of 1956. Per share of common stock, the profit was equivalent to $2.03, against $1.83 in each of the other two periods.

Although shipments were down for the quarter to 6,600,000 tons from 6,800,000 a year earlier, production was at a new high for any first quarter. It represented 95.7 percent of present record capacity. However, the rate of output has now fallen and Roger M. Blough, chairman, estimated that for the second quarter United States Steel will operate at about 90 percent of capacity.

Asked to explain the gain in first quarter earnings in the face of a drop in shipments, Mr. Blough said the primary reason was low cost operations resulting from the efforts of the operating people to get their costs down. The net income rose to 9.9 percent of sales from 9.5 percent a year earlier. "We have had some price increase effect," he went on, explaining the gain in dollar volume, "but primarily the continuous attention to lower cost operations is the basic reason" for the improvement in profit percentage.

Mr. HUMPHREY. An effort to assess the recent campaign to blame labor for inflation has just been made by Alexander Uhl in a release entitled "More Fiction Than Fact" by Press Associates, Inc.

I ask unanimous consent that Mr. Uhl's analysis be printed at this point in my remarks.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

MORE FICTION THAN FACT—DRIVE TO BLAME LABOR FOR INFLATION STEPPED UP—REAL CAUSES PLAYED DOWN

(By Alexander Uhl)

WASHINGTON.—The drive to blame organized labor for inflation is picking up speed once again. Meanwhile, evidence is piling up that there are many vital inflationary factors that are being carefully ignored.

Only a few days ago the Nation's top Business Advisory Council of the Commerce Department met at Hot Springs, Va., to talk about the economy. Reporters do not attend the sessions, but are briefed instead. They wrote that the BAC stressed "the impact of impending wage increases on prices."

About the same time the Eisenhower administration was declaring flatly that it would not support wage boosts for Government workers because of the inflationary effect such increases might have.

Finally, there are few issues of business newspapers that do not hammer on the theme that the cost of living has increased because of "soft wage" boosts wrung from helpless corporations by a ruthless "labor monopoly."

On the other hand there is increasing evidence that the overly simplified thesis that wage increases are almost solely responsible for price increases is meeting with stiffening resistance. It is now being pointed out that there are other vital causes of inflation that are being totally ignored.

The Department of Labor, in a current study on productivity, costs, and prices, warns that it is dangerous to assume that one single factor is the cause of price boosts.

"Prices," the report says, "are subject to numerous influences of changing market conditions and costs of production and a change in price cannot be explained by reference to any single factor, even one as large as labor costs. Where the figures indicate that prices and unit costs showed about the same increase, or that one or the other showed a greater increase during a particular year or period of years, this should be taken as a description of what happened and not necessarily as an explanation of what caused the change. An increase in unit costs may lead to an increase in price, but conversely an increase in price can result in strong pressure for increases in wages."

What are some of the factors, other than wages, that are helping to cause an increase in the cost of living?

1. What about exorbitant profits?

Senator HUBERT H. HUMPHREY, Minnesota Democrat, has charged that "enormous profits have played a role in the inflation picture."

HUMPHREY has pointed out that between 1952 and 1956 profits rose so high that they stimulated an investment boom in plant and equipment five times faster than the rate of growth of real consumption; that dividend payments had gone up 50 percent faster than "the increase in total labor income over the same period" and that "personal interest income received by bondholders since 1952 had risen at a rate 86 percent faster than the rise in total labor income."

Talk of a "profit squeeze" that was supposed to be developing because of increased labor costs was deflated by the conservative news magazine Time which analyzed first quarter profits for 1957 and declared that "the profit squeeze proved to be more fiction than fact."

2. What about "administered" price boosts that have no real connection with wage boosts?

More and more evidence is being presented to show that powerful corporations have deliberately increased prices, not merely to cover added wage costs, but to pile up profits to be used in covering expansion or modernization costs.

United States Steel has been accused of using its 1955 wage boosts as an excuse to raise prices more than twice as much as the increased wage costs. Congressional committees have flatly accused the oil industry of taking advantage of the Suez crisis to boost prices with no relationship whatever

to wage increases. President Walter P. Reuther, of the United Automobile Workers, has accused the automobile industry of boosting prices without relation to wages or productivity and is demanding an investigation of the so-called cost-price squeeze.

3. What about increased interest costs? One of the results of the administration's "hard money" policy has been to boost interest rates in every sector of the economy. These higher rates are showing up in increased housing costs and higher gas, electric, and telephone utility rates.

4. Accelerated amortization also is playing its role in stimulating the inflationary boom in industrial expansion. Treasury Secretary George M. Humphrey has estimated that quick writeoffs granted business in 1956 will cost the Government roughly $3 billion in interest costs. He has warned that such writeoffs have "the stimulating effect which can temporarily add to inflation with the possibility of a lag later." Accelerated writeoffs directly raise prices by increasing charges against production.

5. Finally, examination of the Consumers Price Index shows that the largest boosts in living costs have not been confined to areas directly affected by wage increases in themselves. Rent, for example, has gone up almost 26 points since 1950, one of the largest boosts in the index. The medical care index has advanced 31 points since 1950 although the overall index has advanced only 17 points during the same period.

Some efforts are now being made in Congress to track down the whole question of wages, prices, and profits and their relationship. Organized labor for many years has been calling for such an investigation. It still is.

Only a partial attack on the problem is being made. Representative VICTOR L. ANFUSO, New York Democrat, is chairman of a subcommittee that is studying food cost trends in an effort to find out why the farmer gets so little and the housewife has to pay so much for the family groceries.

Again Senator JOSEPH C. O'MAHONEY is pressing hard on an investigation into price boosts by the oil companies and Senator BYRD is organizing an inquiry into Government fiscal policies which include the "hard money" policy.

These are not the sweeping investigations into what President Walter P. Reuther, of the United Automobile Workers, has called a rigged inflation based on prices arbitrarily set by a handful of executives of the major corporations, but they are clear evidence that the problem of inflation cannot be limited merely to putting the blame on wage boosts won at the collective-bargaining table.

Mr. HUMPHREY. Mr. President, we have just had another indication that profits are still going up. The President's Council of Economic Advisors has raised its estimate of corporate profits in the fourth quarter of last year and has just made a preliminary calculation that profits in the first quarter of 1957 remained unchanged.

I ask unanimous consent that an article which appeared in the New York Times for May 20, 1957, be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ECONOMIC COUNCIL RAISES FIGURE FOR PROFITS IN FOURTH 1956 QUARTER

WASHINGTON, May 19.—The President's Council of Economic Advisers has raised its estimate of corporate profits in the fourth quarter of last year, and has made a preliminary calculation that profits in the first quarter of this year held about unchanged.

The Council estimated profits before taxes in the fourth quarter of 1956 were at a record rate of $46,700,000,000 a year after adjustment for seasonal factors. For the first quarter of 1957, it estimated the figure was $46,500,000,000. Estimated profits after taxes showed the same degree of stability.

The Council's upward revision of its fourth-quarter estimates resulted in an increase in its estimate for the full year. The Council put 1956 profits before taxes at $43,700,000,000. Its earlier estimate was $43,400,000,000. Either way, it was a record.

The record rate of profits in the fourth quarter followed a declining trend in the three preceding quarters.

The earlier estimate for the fourth quarter was $45,800,000,000.

The Council's new figures, released by the Joint Economic Committee of Congress, give this picture of overall corporate finances in the first quarter of 1957 (all quarterly figures are annual rates, seasonally adjusted):

Profits before taxes $46,500,000,000; tax liability $23,500,000,000; profits after taxes $23 billion; dividend payments $12,300,000,000; undistributed profits $10,700,000,000.

The figures for the fourth quarter of 1956 were: Profits before taxes $46,700,000,000; tax liability $23,600,000,000; profits after taxes $23,100,000,000; dividend payments $11,900,000,000; undistributed profits $11,200,000,000.

The new full-year statement was: Profits before taxes $43,700,000,000; tax liability $22,100,000,000; profits after taxes $21,700,000,000; dividends $12 billion; undistributed profits $9,700,000,000. The after-tax profits figure was second only to the $22,100,000,000 of 1950.

Profits in the first quarter of this year were about 6½ percent higher than a year ago. The profit rate declined by almost $3 billion a year between the fourth quarter of 1955 and the first quarter of 1956, whereas they were practically stable between the comparable 1956–57 quarters.

Mr. HUMPHREY. But this profit rise, Mr. President, has not been evenly distributed. Allow me in this connection to quote from an article by one of our foremost economists, John Kenneth Galbraith, which appeared in the February issue of the Atlantic Monthly. Referring to the tight-money policy of the administration, Dr. Galbraith writes:

It would be hard to find a policy better designed to encourage the large and the strong at the expense of the small and the weak. When banks must limit credit, they are impelled to protect their oldest, strongest, and most reliable customers. These in general will be the larger firms * * *. As a result the burden of the cut falls on newer, weaker, less reliable, and smaller borrowers * * *.

But the larger and stronger firm has other advantages quite apart from its warmer reception at the bank. Its resources may make it more or less independent of loans not only for operations but also for expansion. And the market power of the large firm allows it to pass higher interest costs along to its customers in higher prices. This the farmer and smaller businessman cannot do.

The effects of monetary policy to date have accorded with these expectations. Smaller businessmen and farmers, having failed to experience the privileged treatment they are supposed to receive at the banks, have been complaining bitterly. The big corporations are evincing no similar distress. The failure rate of small-business firms is now higher than for years. Earnings of small firms are at best unexceptional. At the other extreme, earnings of very large firms are near record levels, and their share of all corporate assets has been increasing.

Dr. Galbraith goes on to warn us—

that monetary policy, as it is now being practiced, is a magnificent instrument for promoting centralization. A move at the present time to repeal the antitrust laws would, without doubt, excite considerable opposition. But it might contribute less markedly to industrial concentration than a long continuation of monetary restraints in their present form.

Not only is tight money jeopardizing small business, but it is not even accomplishing what it set out to do, namely, stop inflation. Prices keep right on going up, much to the anguish of every consumer in the land. The administration cannot escape its responsibility for this state of affairs by asserting that higher wages are to blame. This just is not the case. I want to make it clear, also, that I am not claiming that profits of big corporations are the basic cause of rising prices. But I am troubled over the fact that the Republican Party's monetary policies have enabled a segment of big business to amass record earnings while many smaller competitors find profits becoming slimmer all the time.

The distinguished former President of the United States, Mr. Harry S. Truman, devoted a major portion of his remarks to this subject at the Democratic dinner held here in Washington on May 4. President Truman's speech deserves the attention of every American, and I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM REMARKS BY FORMER PRESIDENT HARRY S. TRUMAN AT DEMOCRATIC DINNER, WASHINGTON, D. C., MAY 4, 1957

I always like to come back to Washington. I have so many friends here, and they are so good to Mrs. Truman and me that it is always a joy to be with them.

This time, however, I wanted to come to Washington not only to see my old friends, but for an additional reason. I've been reading in the papers in Missouri about some of the things that were going on in Washington, and these things are pretty hard to believe. I thought I had better come here and do a little first-hand checking.

In particular, I wanted to find out what was actually going on about the budget.

The papers said that the President had sent to the Congress the biggest peacetime budget in history. They added that the President said the budget had been carefully prepared, that it was balanced, and that it was well adapted to meet the needs of the present and future. So far, so good. I thought that was a reasonable attitude for a President to take toward a budget he was sending to the Congress. I thought it was the most natural thing in the world for a President to approve of his own budget.

I made and submitted eight budgets myself when I was in the White House. I knew what was in every one of them. When I sent a budget to the Congress and said that was what I thought it would take to run the Government of the United States, I meant it.

In my opinion, making the budget is one of the President's most important duties. Through the budget he controls the executive branch and expresses his policies. Through the budget he renders the account of his financial stewardship to the Congress and to the people. Responsible government depends on the budget. If the budget is not treated as a serious matter, the whole Federal Government is thrown into confusion and anarchy.

But in this case, the very day the President sent his budget to the Congress his Secretary of the Treasury came out against it, and said Congress ought to cut it. If

they didn't, he said, we would have a depression that would curl your hair.

From out in Independence, this looked peculiar, but I could understand it. In my time I had a Cabinet officer or two—and a general—who disagreed publicly with me on a major matter of policy—at least once. So I could believe that the Secretary of the Treasury would do such a thing, and I only wondered how long he would continue to be the Secretary of the Treasury.

Great was my surprise, therefore, when a few days later the President said he agreed with his Secretary of the Treasury, and it was the duty of the Congress to cut his budget. I found it hard to believe my eyes. I changed my glasses and tried another newspaper, but it still said the same thing.

Then I got completely confused. One day the President would say the Congress ought to cut his budget, and then a week or so later he would say that if Congress made any deep cuts it would seriously impair great programs of vital importance to the safety and welfare of the people.

After a time it dawned on me that there was a political method in this apparent madness. The purpose was to shift all the blame for the size of the budget from the President to the Congress. Then, if Congress didn't cut it, they could be condemned as wasteful spenders—and if they did cut it they could be called heartless reactionaries—but in either case the President would be above the battle, and he would still be popular with everybody.

My Democratic friends in Congress began getting carloads of propaganda mail, giving them the dickens because the budget—of a Republican President—was so big. Why didn't the Chamber of Commerce and the National Association of Manufacturers have those letters sent to the White House, where they ought to go, instead of to the Democratic Members of Congress? Well, I'll let you guess.

The Democratic leaders of Congress got mad at all this—and I don't blame them—and the House adopted a resolution asking the President to explain just where he thought the budget could be cut.

At this point the administration got tangled up in its own maneuvers. They got their signals badly mixed. On April 3 the President said there was no chance for a substantial cut such as $2 billion, while on the very same day, and at the very same hour, the Under Secretary of the Treasury said the budget should be cut about $2 billion.

Out in Independence, not being able to shake the habits of an earlier and less enlightened era, I was amazed. I thought there might even be some resignations.

But, no. I was wrong. The next day the Under Secretary of the Treasury explained—to an incredulous Senate committee—that he and the President were in perfect agreement. He said, and I quote, and, honestly, I am not making this up:

"Well, Senator, we both gave some figures. When you pull them out of the air, you can do most anything. You are dealing with a $72 billion budget. Until we get the figures actually, it is a guessing game. But I do want to say there is complete agreement between the Treasury and the President on policy."

Two weeks afterwards, they came up with some actual figures. I guess they stopped pulling them out of the air. And whose figures do you think they were? The President's? No; they were the figures of the Under Secretary of the Treasury. On April 16, the President sent a letter to Congress saying that they could cut the budget by $1,800,000,000—almost the $2 billion of cuts the Under Secretary of the Treasury had mentioned.

Some rather unkind people said this showed they had been wrong in their ideas about who runs the Government. They said it wasn't the Secretary of the Treasury after all—it was the Under Secretary.

However that may be, the figures in the President's letter of April 16, recommending cuts of $1,800,000,000 in his own budget, turn out to be illusory. They are not really cuts at all. Some are bookkeeping tricks, some are the postponement of actual needs that will have to go back into the budget next year or the year after, and some are just pious hopes. It's mostly a proposition of robbing Peter to pay Paul, and that, in my opinion, is no way to reduce a budget. But it may be a way of putting Congress on the spot, and that is what it was intended to be.

This kind of political bunk played with the budget, this sort of evasion and buckpassing, is creating an atmosphere in which it may be impossible for the Congress to deal with the budget on any rational basis. A wave of hysteria is sweeping the country in favor of budget cuts. When the President won't defend his own budget, nobody is going to defend it for him—nobody.

This imposes a heavy responsibility upon the Democratic majority in Congress. They not only have to perform the normal legislative function of the Congress. They also have to try as best they can to fill the vacuum left by the failure of Executive leadership. Thus far the Democrats in Congress have done extremely well in meeting this almost impossible situation. I commend them heartily, and express the hope that they will have the wisdom and the stamina to see us through.

For my part, I cannot tell whether the budget is too large or not. I do not have all the facts that one must have to answer that question. But I do know that this is a big country and a growing country. We have enormous resources and great productive power. We can afford to spend what it takes to provide for the welfare and safety of our people. I want us to spend wisely and efficiently, and not 1 cent more than necessary. And I want us to get our money's worth for every dollar we spend. But I want us to spend enough to do the vital jobs that have to be done. Our national economy is strong enough to support a budget of the size recommended by the President if that is what it takes to do the job, and all this talk about it bringing on a depression that will curl your hair is nonsense.

But I will tell you what can bring on a depression. It's the tight money policy and high interest rates. This is a reversion to the trickle down theory that has guided the Republican Party from the time of its inception. It is a means of transferring income from the poor who need it to the rich who don't. The results are increasing maladjustments in our economy, with danger signals rising higher on every hand.

And of course, one of the worst results of the tight money policy is that it increases the costs of the Federal Government. If the Secretary of the Treasury and the Under Secretary of the Treasury would stop trying to run the whole Government, and settle down to their own jobs, and manage the Government's debt properly, they could make a cut in the budget that would result in a surplus.

But I do not suppose they will do that. I do not expect the present members of the Cabinet to do anything as simple, obvious, and as much in the public interest as that. My visit to Washington has convinced me of that. It has confirmed all the strange things I have heard back home about the goings-on in Washington.

But it has also given me new hope and faith. I see a great showdown coming in these next few years on the most critical issues of domestic policy. On the issues of the budget, fiscal management, high interest rates, the growth of the economy, the exploitation of our resources, and the spread of monopoly. I foresee a last great onslaught by the manipulators of special privilege who work behind the propaganda smokescreen of the present administration. They are going to make a last great effort to take over the economic control of the country before they are thrown out of office in 1960. But I have hope and faith in the Democratic Party and in the Democratic leadership I have seen in Washington. I believe they are going to resist this concerted offensive of private greed, and, with the help of the people, I believe they are going to resist it successfully. The Democrats, once more, are going to preserve and expand the resources and the opportunities of the American people.

Mr. HUMPHREY. Mr. President, it was because of my concern over the issue of monetary policy that I made my March 8 statement on the Senate floor. It is because of my continuing concern over this matter that I shall continue to speak up on the issue of tight money, as long as I feel that what I have to say is in the public interest. I shall do so despite the criticism which one has to expect from certain parties in interest. I only hope that my critics in newspaper circles, trade circles, and elsewhere will endeavor to read my full statements before charging me with destroying faith in our free economy.

STATEMENT BY SENATOR ALLOTT IN CONNECTION WITH DEPARTMENT OF AGRICULTURE AWARDS

Mr. HRUSKA. Mr. President, at the request of the senior Senator from Colorado [Mr. ALLOTT], I ask unanimous consent to have printed in the RECORD at this point a statement which he made in connection with honor awards to outstanding officials and scientists of the Department of Agriculture, on yesterday.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ALLOTT

Yesterday the Secretary of Agriculture made the annual honor awards to outstanding officials and scientists of the Department of Agriculture who performed notable services during the past year.

Colorado is honored that some of these awards have gone to its citizens.

Joe H. Eiswerth of the Forest Service in Colorado Spring has received a Superior Service Award for invaluable initiative, originality and skillful direction of subordinates in operating the regional sign shop and Pike National Forest maintenance operations in a consistently superior manner.

Mr. Eiswerth, who has been with the Forest Service since 1935, has served as a planting foreman and district crew foreman. He is responsible for the regional sign shop, maintenance operations of the Pike National Forest, and the construction and prefabrication of the regional recreational facilities. He was born in Woodland Park, Colo., and attended Colorado State College of Education.

Another native son of Colorado received a Superior Service Award. George W. Sanderson, of the Soil Conservation Service, in Cavalier, N. Dak.

EDUCATIONAL TELEVISION PROJECTS

Mr. MAGNUSON. Mr. President, on Friday, May 17, I introduced S. 2119, a bill, the importance of which cannot be overestimated. On its introduction,

I inserted a very brief statement explaining the provisions and purposes of the bill.

Today I should like to amplify somewhat upon the facts which I think make such legislation of first importance in the field of proper utilization of our television medium.

S. 2119 is a modest proposal. It will initiate the use of television in our public schools and colleges and in adult training programs in each of the several States and Territories on a small scale.

The bill proposes to make grants not in excess of $1 million to each State which agrees to provide the land and buildings and the cost of operation and maintenance for television facilities. The grants are to be used exclusively for the purchase of actual equipment and facilities required in educational television projects.

Since it is estimated that such equipment and facilities will cost approximately $200,000 to $250,000 per unit, it is expected that each State will be able to establish 4 or 5 stations under the authorization of this legislation.

At the outset of the development of television in this country, 250 channels were wisely set aside for educational purposes. Most of the channels remain unused at the present time. I am convinced that unless the Federal Government takes the initiative, offers the impetus, and contributes to the cost, the great educational potential from these channels will be lost.

We have all heard many times about the existing and growing problems of public education. We know that there are serious shortages of teachers and of buildings, and that each of these shortages grows worse with each passing day. The use of television facilities in our public schools and colleges will strike directly at these existing shortages, and while this medium cannot alone eliminate them, the extent of the contribution toward the solution of these problems which television can make is tremendous.

Today we have a public-school population of 37 million students. By 1965 that school population will have increased to 41 million.

With a constantly declining number of our adults entering the teaching profession, it becomes essential that we take steps immediately to reduce our requirements for the increased teacher population that our future schoolchildren will need. Already school standards are declining. The quality of education we furnish our children is, in my judgment, more important than any other single responsibility that faces us today.

We speak of survival today too often, perhaps, in terms of military security. Equally often we neglect to think of our survival in terms of our educational level, which, in a democracy, is vital.

Education is the means through which our country achieves its highest objectives and dreams. With ever-increasing complexities in technical progress, a lack of education for all people, or inferior education to any substantial number, threatens the very perpetuation of our country.

The use of educational television will meet these needs with the least cost and in the most expeditious manner.

While educational television is in its bare infancy, we are not without knowledge of its capabilities. One educational leader has put its potential this way. Dr. Thomas Clark Pollock, of New York University, has said, "It now seems clear, however, that television offers the greatest opportunity for the advancement of education since the introduction of printing by movable type."

Television is a powerful means of communication. Its message may be transmitted live, or by the use of training films. In addition to black and white transmission, we have already observed the added educational advantages of successful color transmission.

One of the first organizations to use educational television has been our Armed Forces. All of the evidence available on the effectiveness of the Armed Forces television training programs is highly favorable.

Considerable experimentation has already taken place in scattered areas of the country by our public schools and colleges. Approximately 26 or more of the larger school systems have educational television programs, with 18 of these school systems participating in the owning and operation of television channels reserved for education.

In a recent excellent report on the subject of education, "Schools for Tomorrow: an Educator's Blueprint," Dr. Alexander D. Stoddard, who was, for 10 years, chairman of the Educational Policies Commission of the National Education Association, reported on the present status of educational television. I ask unanimous consent that the extract from Dr. Stoddard's report dealing with the status of educational television be printed in the RECORD at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PRESENT STATUS OF EDUCATIONAL TELEVISION

Let us take a look at this point as to just how far we have gone in the use of television in the educational programs of schools and colleges. The situation is about this:

1. Television has been used extensively as a means of informing the public about school and college programs and needs.

2. In many places adult education classes of various kinds are conducted over television, both with and without formal accrediting.

3. A large number of colleges are telecasting general and specific information programs for the public at large, including many of cultural as well as practical value.

4. Many colleges are giving regular on- and off-campus courses for credit, using both open and closed circuits for this purpose.

5. Numerous school systems are conducting very effectively regular telecasts of many kinds of enrichment or supplementary subject matter to be used at the option of the individual teacher.

6. Television is used to bring to the school or college live experiences of educational significance, such as a coronation, a Presidential inauguration, a political convention, or even a world series.

7. At least one large school system (Pittsburgh) experimented, during the school year 1955–56, with the teaching of elementary school subjects (reading, arithmetic, and French at the fifth-grade level) to classes of normal size in their regular classrooms. The teacher was present and participated both before and after in teaching the lesson involved in the telecast. A news release by Superintendent Dimmick on July 5, 1956, indicated that the television classes made at least a year's progress in each of the three subjects during the year of the experiment. In some cases the progress was more than that of the control groups and in some cases less. It should be remembered that the experiment involved comparison of results from old and tried teaching procedures with new and relatively unknown techniques and means of teaching.

8. In another large school system (St. Louis) 1 elementary-school subject (second-grade spelling) and 2 ninth-grade subjects (English composition and general science) were taught for the semester beginning February 8, 1956, to large groups of about 100-150 pupils each, on a self-contained basis. That is, regular teachers did not supplement the teaching done by television. This was and is a highly significant experiment. Superintendent Hickey reports, as of September 1956, that results so far indicate that in English composition and general science (the spelling experiment continues for another semester and results will not be available in this subject until next spring), "Students in large group television classes in ninth-grade English composition and ninth-grade general science showed a degree of achievement at least equal to that of control classes, taught in the conventional manner." Here again results from the old ways are compared with results from a very new means of teaching.

9. What may prove to be one of the most significant experimental studies in the educational television field is the new project at Washington County, Md. (Hagerstown). A brief description of this project is quoted from Television in Our Schools:

"Especially interesting is a 5-year experimental project just announced by Supt. William M. Brish, of the Washington County (Md.) Board of Education, to begin in September 1956. Jointly financed by the local board of education, the Radio-Electronics-Television Manufacturers Association, and Ford Foundation's Fund for the Advancement of Education, the project is directed, basically, to an experimental study of the possibilities of improving instruction, at all grade levels and in all major curriculum areas, through systematic and functionally integrated use of closed-circuit television. The experimental pattern envisages organizing present teachers and supervisors into specialized "teaching teams" employing new instructional techniques based on the findings of educational TV studies of the past few years, and utilizing techniques of visual illustration unique to television. Various presentation types will be tried in an attempt to develop optimum lesson formats for the various subject areas and for various age groups, and special attention will be directed to devising workable techniques for handling individual differences in pupil-learning rates."

10. An interesting innovation in direct teaching by television has been initiated at the University of Nebraska. About 150 students in 6 small high schools near Lincoln are being taught first-year algebra through a combination television-correspondence course taught by the University. The students watch and listen to the television program for 20 minutes daily, at 10:30 a. m. Coordinated with this is the correspondence course prepared by the University. Students send their assignments to the extension division for correction and criticism. This experiment is unique in that it involves a combination of television instruction and correspondence study in which several towns are making simultaneous use of a course.

11. There have been very few other studies of the possible direct use of television as an integral part of the school program, as contrasted with the studies being conducted somewhat generally in the colleges. However, there are a few scattered situations in which high-school sciences, some phases of music, 1 or 2 modern languages, and literature are being taught on a very limited scale. Several school systems are contemplating doing even more in the use of television in direct instruction. A very ambitious plan is under way at Pittsburgh in recording high school physics on film for use in telecasting. A project in the Chicago public schools involving the teaching of several junior college subjects through an open-circuit educational television channel is in effect at this time.

12. A reservoir of films especially made for use over television has been accumulated at the Educational Television and Radio Center at Ann Arbor. These films are available for use by educational channels and on commercial channels under educational sponsorship. They are adapted both for regular course and general usage, although they are predominantly of the former type. But the range of subject matter is extensive and, on the whole, the quality of the film substance and teaching techniques is high.

Mr. MAGNUSON. Dr. Stoddard, who is an expert educator with long years of practical experience, concludes that television will fit perfectly into the learning process at every level. From the experiments already conducted, he is convinced that, if used wisely, educational television can open an entire new vista of achievement in the field of public education.

The legislation I have introduced is intended to launch our country firmly upon the path of bringing into our educational system the tremendous advantages and opportunities afforded by the television medium. Its cost in actual dollars is modest—approximately $50 million. Its rewards, in realistically confronting one of our most difficult problems today, are so great as to be virtually unmeasurable.

I urge each of my colleagues to give careful thought and study to this bill. I intend to schedule hearings on it in the Interstate and Foreign Commerce Committee at the earliest possible date. If every Member of Congress and the public will examine this measure carefully, I know they will support it. Its purposes are both sound and essential. Its cost is low and the returns can be phenomenally high. I am hopeful the Senate will be able to act favorably upon it at a very early date.

THE CALENDAR

The PRESIDING OFFICER (Mr. COTTON in the chair). In accordance with the agreement heretofore entered into, the calendar will now be called for the consideration of measures to which there is no objection.

BILLS, ETC., PASSED OVER

The following measures were announced in order and, on objection by Mr. CLARK, were passed over:

A concurrent resolution (S. Con. Res. 2) to create a joint congressional committee to make a full and complete study and investigation of all matters connected with the election, succession, and duties of the President and Vice President.

A resolution (S. Res. 24) to amend rule XIV of the Standing Rules of the Senate.

A bill (S. 913) to provide permanent authority for the Postmaster General to establish postal stations at camps, posts, or stations of the Armed Forces, and at defense or other strategic installations and for other purposes.

A bill (H. R. 4815) to provide permanent authority for the Postmaster General to establish postal stations at camps, posts, or stations of the Armed Forces, and at defense or other strategic installations, and for other purposes.

A concurrent resolution (S. Con. Res. 20) authorizing an investigation by the Federal Trade Commission into the activities and practices of companies engaged in the production, distribution, or sale of newsprint in interstate commerce.

A bill (S. 495) to authorize the acquisition of the remaining property in square 725 in the District of Columbia and the construction thereon of additional facilities for the United States Senate.

A bill (S. 728) to authorize the acquisition of the remaining property in squares 725 and 724 in the District of Columbia for the purpose of extension of the site of the additional office building for the United States Senate.

A bill (S. 1164) to make the evaluation of recreational benefits resulting from the construction of any flood control, navigation, or reclamation project an integral part of project planning, and for other purposes.

A bill (S. 1639) to provide for the suspension of the vesting of alien property and the liquidation of vested property, under the Trading With the Enemy Act.

A bill (H. R. 2146) to amend the Small Reclamation Projects Act of 1956.

The resolution (S. Res. 126) providing additional funds for a study of juvenile delinquency in the United States was announced as next in order.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. PURTELL. Over, by request.

The PRESIDING OFFICER. The resolution will be passed over.

The bill (S. 864) to provide for the transfer of certain lands to the State of Minnesota was announced as next in order.

Mr. CLARK. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2051) to amend the Atomic Energy Act of 1954, as amended, and for other purposes, was announced as next in order.

Mr. CLARK. Over.

The PRESIDING OFFICER. The bill will be passed over.

CONSTRUCTION OR REMODELING OF VESSELS IN SHIPYARDS IN CONTINENTAL UNITED STATES

The bill (S. 534) to amend section 702 of the Merchant Marine Act, 1936, in order to authorize the construction, reconstruction, or remodeling of vessels under the provisions of such section in shipyards in continental United States was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 702 of the Merchant Marine Act, of 1936, is amended by striking out "in domestic yards, on the Atlantic and Gulf and Pacific coasts," and inserting in lieu thereof "in shipyards in the continental United States."

TRANSPORTATION ON CANADIAN VESSELS

The bill (S. 886) to provide transportation on Canadian vessels between ports in southeastern Alaska and between Hyder, Alaska, and other points in southeast Alaska or the continental United States either directly or via a foreign port, or for any part of the transportation was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, until June 30, 1958, notwithstanding the provisions of law of the United States restricting to vessels of the United States the transportation of passengers and merchandise directly or indirectly from any port in the United States to another port of the United States, passengers may be transported on Canadian vessels between ports in southeastern Alaska, and passengers and merchandise may be transported on Canadian vessels between Hyder, Alaska, and other points in southeastern Alaska or the continental United States, either directly or via a foreign port, or for any part of the transportation.

RETIREMENT OF CERTAIN FORMER MEMBERS OF THE COAST GUARD

The Senate proceeded to consider the bill (S. 1446) to amend title 14, United States Code, so as to provide for retirement of certain former members of the Coast Guard Reserve, which had been reported from the Committee on Interstate and Foreign Commerce with an amendment on page 2, line 1, after the word "training," to insert "or who had completed at least 20 years of active service other than active duty for training," so as to make the bill read:

Be it enacted, etc., That section 755 of title 14, United States Code, is amended by adding thereto a new subsection (f) to read as follows:

"(f) Any former member of the Coast Guard Reserve, other than a temporary member, honorably discharged or discharged under honorable conditions from the Coast Guard Reserve after February 18, 1941, and before January 1, 1949, who at the time of his discharge had completed at least 30 years of active service in the Armed Forces other than active duty for training, or who had completed at least 20 years of active service other than active duty for training the last 10 of which he served in the 11-year period immediately preceding his discharge, shall upon his request be placed on the retired list of the Coast Guard Reserve and shall be entitled to pay, only after being placed on the retired list, at the rate of 50 percent of his active-duty rate of pay at the time of discharge."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF SOCKEYE SALMON FISHERY ACT OF 1947

The Senate proceeded to consider the bill (S. 1806) to amend the Sockeye Salmon Fishery Act of 1947, which had been reported from the Committee on Interstate and Foreign Commerce with amendments on page 1, line 8, after the

word "salmon," to strike out "fishery" and insert "fisheries"; on page 2, line 5, after the word "The," to insert "term," and, in line 20, after the word "salmon," to strike out "fishery" and insert "fisheries"; so as to make the bill read:

Be it enacted, etc., That section 2 (a) of the Sockeye Salmon Fishery Act of 1947 (61 Stat. 511) is amended to read as follows:

"(a) Convention: The word 'convention' means the convention between the United States of America and the Dominion of Canada for the protection, preservation, and extension of the sockeye salmon fisheries of the Fraser River system, signed at Washington on the 26th day of May 1930, as amended by the protocol to the convention, signed at Ottawa on the 28th day of December 1956."

SEC. 2. Section 2 (e) of such Act is amended to read as follows:

"(e) Sockeye salmon and pink salmon: The term 'sockeye salmon' means that species of salmon known by the scientific name Oncorhynchus nerka, and the term 'pink salmon' means that species of salmon known by the scientific name Oncorhynchus gorbuscha."

SEC. 3. Such Act is further amended by striking out "sockeye salmon" wherever used in such act, except in subsections (a) and (e) of section 2, and inserting in lieu thereof "sockeye salmon or pink salmon."

SEC. 4. Section 7 (a) of such Act is amended by striking out "fishery" and inserting in lieu thereof "fisheries."

SEC. 5. The amendments made by this Act shall take effect on the date of entry into force of the protocol, signed at Ottawa on December 28, 1956, between the United States of America and Canada to the convention for the protection, preservation and extension of the sockeye salmon fisheries of the Fraser River system, signed at Washington on May 26, 1930.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

INCREASE IN RETIRED ANNUITIES OF CIVILIAN TEACHING STAFFS

The bill (H. R. 5832) to increase the retired annuities of the civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School was considered, ordered to a third reading, read the third time, and passed.

STEVEDORING AND TERMINAL SERVICES TO COMMERCIAL STEAMSHIP COMPANIES

The bill (H. R. 2797) to amend title 10, United States Code, to authorize the Secretary of a military department to furnish stevedoring and terminal services and facilities to commercial steamship companies, and for other purposes was considered, ordered to a third reading, read the third time, and passed.

ENLARGEMENT OF EXISTING WATER SUPPLY FACILITIES FOR SAN DIEGO, CALIF., AREA

The bill (H. R. 2781) to amend the act entitled "An act to authorize the Secretary of the Navy to enlarge existing water supply facilities for the San Diego, Calif., area" was considered, ordered to a third reading, read the third time, and passed.

SALE OF DEGAUSSING EQUIPMENT

The bill (H. R. 4285) to authorize the sale of degaussing equipment by the Department of the Navy to the owners or operators of privately owned merchant ships of United States registry was considered, ordered to a third reading, read the third time, and passed.

ISSUANCE OF CHECKS BY DISBURSING OFFICER OF THE POST OFFICE DEPARTMENT

The bill (S. 916) to provide for the issuance of checks and continuation of accounts when there is a vacancy in the office of the disbursing officer for the Post Office Department and for other purposes was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That in case of the death, resignation, or separation from office of the disbursing officer for the Post Office Department the accounts of such disbursing officer may be continued and payments made in his name by the assistant disbursing officers designated by the Postmaster General or designated by any official of the Post Office Department authorized by the Postmaster General to make such designation, for a period of time not to extend beyond the last day of the second month following the month in which such death, resignation, or separation shall occur. Such accounts and payments shall be allowed, audited, and settled, and the checks signed in the name of the former disbursing officer for the Post Office Department shall be honored in the same manner as if the former disbursing officer for the Post Office Department had continued in office. The former disbursing officer for the Post Office Department, his estate, or the surety on his official bond, shall not be subject to any legal liability or penalty for the official accounts and defaults of the assistant disbursing officers acting in the name or in the place of the former disbursing officer, but such assistant disbursing officers and their sureties shall be responsible therefor.

HERBERT C. HELLER

The bill (S. 1169) for the relief of Herbert C. Heller was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Civil Service Commission is authorized and directed to pay, out of the civil service retirement and disability fund, to Herbert C. Heller, of Wilton, Conn., an amount equal to interest at 3 percent per annum compounded annually, on the refund of retirement deductions which was due him upon his separation from Government service, from the date of such separation to the date of payment of such refund, such payment having been delayed for a period of approximately 11 years because of an error in the computation of the length of his allowable service.

BILL PASSED OVER

The bill (S. 1740) to authorize the payment from the employees life insurance fund of expenses incurred by the Civil Service Commission in assembling and maintaining the assets and liabilities of certain beneficial associations was announced as next in order.

Mr. CLARK. Over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF SECTION 505 OF THE CLASSIFICATION ACT OF 1949, AS AMENDED

The bill (S. 1884) to amend section 505 of the Classification Act of 1949, as amended, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 505 of the Classification Act of 1949, as amended, is amended by adding at the end thereof a new subsection as follows:

"(f) "The National Security Council is authorized, subject to the procedures prescribed by this section, to place 2 additional positions in grade 18, 1 additional position in grade 17, and 2 additional positions in grade 16 of the general schedule. Such positions shall be in addition to the number of positions authorized to be placed in such grades by subsection (b)."

EXEMPTION FROM TAXATION OF CERTAIN PROPERTY OF THE NATIONAL ASSOCIATION OF COLORED WOMEN'S CLUBS, INC., DISTRICT OF COLUMBIA

The bill (S. 105) to exempt from taxation certain property of the National Association of Colored Women's Clubs, Inc., in the District of Columbia, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the real estate described as lot No. 78 in square No. 178, situated at 1601 R Street NW., in the city of Washington, D. C., owned by the National Association of Colored Women's Clubs, Inc., is hereby exempt from all taxation so long as the same is owned and occupied by the National Association of Colored Women's Clubs, Inc., and is not used for commercial purposes, subject to the provisions of sections 2, 3, and 5 of the act entitled "An act to define the real property exempt from taxation in the District of Columbia," approved December 24, 1942 (56 Stat. 1091; D. C. Code, secs. 47–801b, 47–801c, and 47–801e).

EXEMPTION FROM DISTRICT OF COLUMBIA SALES TAX OF SALE OF MATERIALS FOR CERTAIN WAR MEMORIALS

The bill (S. 1576) to exempt the sale of materials for certain war memorials in the District of Columbia from the District of Columbia Sales Tax Act was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 128 of the District of Columbia Sales Tax Act, as amended (63 Stat. 112; D. C. Code 47–2605) is amended by adding at the end thereof the following:

"(r) Sales of material to be incorporated permanently in any war memorial authorized by Congress to be erected on public grounds of the United States."

SEC. 2. The amendment made by the first section of this Act shall be effective only with respect to sales taking place on and after January 1, 1957.

ELIMINATION OF FINANCIAL LIMITATIONS OF THE AMERICAN HISTORICAL ASSOCIATION, DISTRICT OF COLUMBIA

The bill (S. 1586) to eliminate the financial limitations on real and personal estate holdings of the American Historical Association in the District of Columbia was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the act entitled "An act to incorporate the American Historical Association," approved January 4, 1889 (25 Stat. 640), is amended by striking out in the second sentence thereof "only as may be necessary to its lawful ends to an amount not exceeding $500,000" and inserting in lieu thereof: "as may be necessary to its lawful ends."

SEC. 2. The real property situated in square 817, in the city of Washington, D. C., described as lot 23, owned, occupied, and used by the American Historical Association, is exempt from all taxation so long as the same is so owned and occupied, and not used for commercial purposes, subject to the provisions of sections 2, 3, and 5 of the act entitled "An act to define the real property exempt from taxation in the District of Columbia," approved December 24, 1942 (56 Stat. 1089; D. C. Code, secs. 47–801b, 47–801c, and 47–807e).

PURCHASE OF GUN MOUNTINGS AND CARRIAGES FOR GUNS FOR USE AT HISTORICAL SITES

The bill (H. R. 2018) to permit the purchase from the District of Columbia Reformatory at Lorton, Va., gun mountings and carriages for guns for use at historical sites and for museum display purposes was considered, ordered to a third reading, read the third time, and passed.

ADDITIONAL REVENUE FOR THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H. R. 6258) to amend the act entitled "An act to provide additional revenue for the District of Columbia," approved August 17, 1937, as amended, which had been reported from the Committee on the District of Columbia with an amendment to strike out all after the enacting clause and insert:

That subsection (b) of section 3 of title IV of the act entitled "An act to provide additional revenue for the District of Columbia, and for other purposes," approved August 17, 1937 (50 Stat. 681), as amended (sec. 40–103 (b), D. C. Code), is amended by striking class C of such subsection and inserting in lieu thereof the following:

"Class C. For each trailer, when the manufacturer's shipping weight of the chassis, plus the weight of the body, is less than 500 pounds, $3; 500 pounds or more but less than 1,000 pounds, $12; 1,000 pounds or more but less that 1,500 pounds, $20; 1,500 pounds or more but less than 2,500 pounds, $32; 2,500 pounds or more but less than 3,500 pounds, $46; 3,500 pounds or more but less than 6,000 pounds, $60; 6,000 pounds or more but less than 8,000 pounds, $74; 8,000 pounds or more but less than 10,000 pounds, $92; 10,000 pounds or more but less than 12,000 pounds, $122; 12,000 pounds or more but less than 16,000 pounds, $152; 16,000 pounds or more, $182: *Provided*, That in determining the total weight of a trailer subject to the provisions of this class C, there shall be excluded, in computing such weight, the weight of any special equipment which is subject to taxation as tangible personal property under subsection (e) of this section."

SEC. 2. Subsection (b) of section 3 of title IV of said act approved August 17, 1937 (50 Stat. 681), as amended (sec. 40–103 (b), D. C. Code), is amended by inserting between classes D and F the following:

"Class E. For each motor vehicle classified by the Commissioners or their designated agent as an antique motor vehicle on the basis of a finding that such vehicle was manufactured prior to January 1, 1930, and is owned solely as a collector's item, with its use limited to participation in club activities, exhibits, tours, parades, and similar uses, but in no event for general transportation, $5."

SEC. 3. The first proviso of paragraph (c) of section 3, chapter 6, of title 40 of the Code of Laws of the District of Columbia, 1951 edition, relating to issuance of congressional tags, is amended by inserting after the phrase "to the elective officers and disbursing clerks of the Senate and the House of Representatives" a comma and the words "the Chief Clerk of the Senate, the Parliamentarian of the Senate, the Deputy Sergeant at Arms, Auditor, and Procurement Officer of the Senate."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

RETIREMENT OF PUBLIC-SCHOOL TEACHERS IN THE DISTRICT OF COLUMBIA

The bill (S. 923) to amend the act for the retirement of public-school teachers in the District of Columbia was announced as next in order.

Mr. WILLIAMS. Mr. President, may we have an explanation of the bill?

Mr. CLARK. The bill amends the act for the retirement of District of Columbia schoolteachers, in order to give them substantially the same benefits as are now available to employees of the Federal and District Governments under the Civil Service Retirement Act. The bill is identical with Calendar No. 329, H. R. 6454, which has already been passed by the House of Representatives.

The effect of the bill is to increase annuities for school employees and widows about 25 percent, and surviving children from 50 to 100 percent.

Does the Senator desire a more elaborate explanation of the bill?

Mr. WILLIAMS. I wonder how the bill differs from the provisions of the Civil Service Retirement Act. There is no provision for an appropriation, I notice.

Mr. CLARK. The cost to the District under the bill would be small before 1959. By that time, however, an annual appropriation of $867,200 would be necessary to maintain a level financial reserve.

Mr. WILLIAMS. There is no provision in the bill for an appropriation, as I understand.

Mr. CLARK. That would be a matter for the Committee on the District of Columbia to consider when the time comes for that, as well as for the Committee on Appropriations. There is no need for an immediate appropriation.

Mr. WILLIAMS. Is this not the proper time?

Mr. CLARK. The authorization is contained in the basic retirement statute.

Mr. JOHNSTON of South Carolina. Mr. President, the Committee on Post Office and Civil Service has given this bill considerable study. It was thought at one time that it ought to be referred to our committee. However, we have studied the bill, and it is about in line with the Civil Service Retirement Act. There is only one feature that is different, and that deals with teachers paying up for time they have been out of service.

Mr. WILLIAMS. Does it use the same formula that is provided in the Civil Service Retirement Act with reference to the computation of annuities?

Mr. CLARK. Yes; it does. That is my understanding.

Mr. WILLIAMS. It uses the same formula that is contained in the Civil Service Retirement Act?

Mr. CLARK. That is my understanding.

The PRESIDING OFFICER. Does the Senator from Pennsylvania ask that the Senate proceed to the consideration of the House bill?

Mr. CLARK. I ask unanimous consent that the Senate proceed to the consideration of the House bill.

The PRESIDING OFFICER. The clerk will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 6454), to amend the act for the retirement of public school teachers in the District of Columbia, and for other purposes.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment proposed to the bill, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill (S. 923) is indefinitely postponed.

EXEMPTION FROM TAXATION OF CERTAIN PROPERTY IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 1264) to exempt from taxation certain property of the National Trust for Historic Preservation in the United States in the District of Columbia, which had been reported from the Committee on the District of Columbia with amendments on page 2, line 4, after the word "from", to insert "all", and in the same line, after the word "taxation", to strike out "national and municipal", and, in line 7, after the word "States", to insert "and is not used for commercial purposes, subject to the provisions of sections 2, 3, and 5 of the Act entitled 'An Act to define the real property exempt from taxation in the District of Columbia', approved December 24, 1942 (56 Stat. 1091; D. C. Code, secs. 47–801b, 47–801c, and 47–801e)"; so as to make the bill read:

Be it enacted, etc., That certain property in the District of Columbia described as lots No. 42, 43, 44, 45, and 46 in the subdivision of lot No. 36 in square No. 167, as

said subdivision is recorded in the office of the Surveyor of the District of Columbia in book W. B. M., at folio 293, now known as lot 46 and lot 809, in square No. 167, together with the improvements theron and the furnishings therein, being premises No. 748 Jackson Place NW., known as Decatur House, owned by the National Trust for Historic Preservation in the United States, a corporation chartered by Act of Congress, approved October 26, 1949, be exempt from all taxation, so long as the same is used in carrying on the purposes and activities of the National Trust for Historic Preservation in the United States, and is not used for commercial purposes, subject to the provisions of sections 2, 3, and 5 of the Act entitled "An Act to define the real property exempt from taxation in the District of Columbia", approved December 24, 1942 (56 Stat. 1091; D. C. Code, secs. 47–801b, 47–801c, and 47–801e). Use of the premises by agencies of the United States of America or by the Truxtun-Decatur Naval Museum of the Naval Historical Foundation for museum purposes and conference accommodations shall not affect the exemption from taxation provided for herein. Any real estate taxes, penalties or interest on the aforesaid property which may be due to the District of Columbia with respect to periods after the property was acquired by the National Trust for Historic Preservation in the United States shall be abated.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RETIREMENT OF OFFICERS AND MEMBERS OF THE METROPOLITAN POLICE FORCE AND OTHERS—BILL PASSED OVER

The bill (S. 1770) to provide for the retirement of officers and members of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, and of certain officers and members of the United States Secret Service, and for other purposes, was announced as next in order.

Mr. WILLIAMS. Mr. President, may we have an explanation of the bill?

Mr. CLARK. The purpose of this bill, which if enacted may be cited as the "Policemen and Firemen's Retirement and Disability Act Amendments of 1957," is to give the members coming under such act benefits substantially similar to benefits given by the Civil Service Retirement Act Amendments of 1956 to officers and employees covered by the Civil Service Retirement Act of May 29, 1930, as amended.

The bill provides credit for prior Federal and District Government service in computing total Police or Fire Department service for pension eligibility. It also provides credit for military service, except where such military service was subject to social security deductions.

It provides non-service-connected disability benefits of 2 percent of the basic salary at the time of retirement, but must have completed 5 years of police or fire service.

It provides for disability benefits for service-connected injuries from a permissible maximum of 50 percent to a minimum of 66⅔ percent with a maximum of 70 percent, contingent upon the required service which would determine such eligibility. This provision was the result of an attempt to equalize benefits arising from the Federal Employees Compensation Act available to civilian employees of the Federal and District Governments, but heretofore denied police and firemen.

Does the Senator desire a more elaborate explanation?

Mr. WILLIAMS. How does the formula provided in the bill for the computation of annuities compare with that prevailing under the regular Civil Service Retirement Act?

Mr. CLARK. It is my understanding that it is identical. However, I should like to check with the staff on that point.

There is one major change involved. After 20 years' service in the police and fire departments, the percentage of the annuity is computed on the basis of 3 percent, instead of 2 percent.

Mr. WILLIAMS. I may say to the Senator from Pennsylvania that I recognize there is need for adjustment in this particular system, but I wish to know just what we are doing. Under existing law, policemen and firemen draw less than is available under the regular Civil Service Retirement Act, although it should be pointed out that policemen and firemen are now paying less for retirement. However, under the bill, the amount of their contribution would be raised to 6½ percent, which is the same amount paid by regular civil service employees under the Civil Service Retirement Act. I have no objection to that phase of the bill. I have no objection to raising the benefits whereby they will get the same return. That too is only fair. However, I wonder whether the Senator is quite right when he says that the formula under the bill, if passed, will be the same as under the Civil Service Retirement Act except for the one exception he has noted. Even with that exception, I wonder whether the Senator is absolutely correct.

Mr. CLARK. The members of the staff of the Committee on the District of Columbia advise me that the policemen and the firemen in the District of Columbia under this bill would get a maximum of 70 percent of their salaries on retirement, whereas under the Civil Service Act a pensioner gets 80 percent.

Mr. WILLIAMS. With that exception are we to understand that the bill provides an identical formula with that contained in the Civil Service Retirement Act?

Mr. CLARK. That is my understanding.

Mr. WILLIAMS. Under the Civil Service Retirement Act the formula is based on 1½ percent of the salary for the first 5 years. For the second 5 years it provides 1¾ percent of the salary. Thereafter it provides for 2 percent. Under the bill, 2 percent is provided for the first 20 years and 3 percent thereafter. This appears to be a rather major change.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. WILLIAMS. I am merely asking a question of the Senator from Pennsylvania trying to get it clear what the bill does.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. CLARK. I yield.

Mr. JOHNSTON of South Carolina. We have a different rule of computation with respect to the FBI, for example, and that rate is above what the other civil service employees receive.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. CLARK. I yield.

Mr. MANSFIELD. I should like to point out that as every Senator probably knows, the Police Department in the District of Columbia has been faced with a very difficult situation because of the fact that it is in competition with the Federal Government.

The Federal Government offers more in the way of benefits, fringe and otherwise, than does the Police Department here. The District of Columbia Police Department has had to advertise over the television and radio in order to get recruits. I would be willing to wager that no other police department in the country has the problems confronting it which the District of Columbia Department has. All of us know what the department did at the time of the transit strike a year or so ago. I think that because of the attitude shown by the policemen at that time, the cheerfulness with which they gave up their vacations and their leaves of absence, favorable impression was made upon Congress and the people who live in the District.

Only last Friday there was a bus pilgrimage to Washington by a group of citizens from outside the District. On that occasion, the District of Columbia Police Department canceled all leaves. The policemen returned to duty, worked overtime, and conducted themselves admirably.

Those two examples could be multiplied scores of times to indicate the type of difficulties and the problems which confront the District of Columbia Police Department.

So I think that in passing a retirement bill of this kind, we will be giving due and proper recognition to a force which thoroughly deserves it and which has earned it on the basis of merit. I think that the passage of the bill will bring about stability and a lessening of the number of resignations which have been taking place, not only within the past year, but also within the past few weeks, when, according to my knowledge, there were 7 or 8 more resignations under consideration.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. CLARK. I will yield to the Senator from Delaware in a moment but I should like to say, for the record, that my friend from Delaware was correct when he said that initially the rate proposed in the bill is 2 percent, whereas it is only 1½ percent under the normal Civil Service Retirement Act. The reason is that the normal occupation of policemen and firemen is a hazardous one. That is the justification for having increased the pension rate to 2 percent initially, instead of having the rate of 1½ percent, which applies to the normal Civil Service Retirement Act.

Mr. WILLIAMS. If the Senator from Montana will pull down the flag, I should like to say that I have not taken any exception to the work of the police de-

partment here. I made a statement in the beginning that I think an adjustment in the retirement system in the police and fire departments is overdue. I am perfectly in accord with the plan to raise the contribution rate to 6½ percent, the same as it is under the Civil Service Retirement Act, and to pass a bill which will provide the same benefits as are accorded to employees under the Civil Service Retirement Act. I am willing to give the same benefit to law enforcement officers of the District as presently extended to Federal law enforcement officers, but I think my question is entirely proper. I asked whether the bill provides the same pension benefits as the Civil Service Retirement Act. First, we were told it does. It now develops that it does not. I am merely trying to establish what the bill does. If we want to just compliment the department let us pass a simple resolution of commendation. But Senators who are being asked to vote on a retirement bill should be in a position to know what the bill provides.

We have now agreed that there are two differences between the bill and the regular Civil Service Retirement Act. Are there any other differences? If there are, I think we ought to know about them.

Mr. MANSFIELD. The Senator from Delaware certainly misjudged the motives of the Senator from Montana when he made his statement, because I certainly was not impugning in any way the Senator's questions or his right to ask questions. I think he is doing a good job, though, as he has always done.

However, I thought there ought to be a declaration to the effect that the District of Columbia does have a fine police force, all things considered, probably one of the best, if not the best, in the entire country; that they are entitled to this kind of consideration; and that I was hopeful, on the basis of merit, that this privilege could be extended to the police department, so that in the end there could be a more permanent police force, with fewer resignations, and a greater degree of morale.

Mr. WILLIAMS. I am perfectly in accord with that statement. I said in the very beginning of my remarks that I thought there should be a retirement system comparable with that furnished to police officers on the Federal Government payroll. I am perfectly willing to vote for any bill which will bring their retirement system up to date, but I do not see how that can be done by voting for a bill when apparently the bill's sponsors do not know what the bill contains. That is the point to which I was directing my questions.

I again ask the question, are these the only other differences?

Mr. CLARK. I must say to the Senator from Delaware in all candor that I have not personally made a detailed examination of the bill. I am advised by the staff of the committee before which the testimony was taken that I have told the Senator all the substantial changes in the bill.

I have, however, a detailed, section-by-section analysis, comparing the bill with the Civil Service Retirement Act. I should be happy to read the section-by-section analysis if my friend from Delaware would care to have me do so.

Mr. WILLIAMS. I am perfectly willing to have the Senator read it into the RECORD, but I still come back to the question, because I think he should know the answer. Are there any other changes in the bill which are vastly different from the regular Civil Service Retirement Act? If we do not know, I think the bill should be passed over until we can have an answer from someone who does know.

Certainly, it is a sad state of affairs if none of the sponsors of the bill can explain what it contains. My questions can't be that complicated.

Mr. JOHNSTON of South Carolina. In studying the bill, I find its provisions to be the same as those which apply to the FBI, except in one particular. After the policemen and firemen reach the age of 50, the rate goes from 2 percent to 3 percent. To offset that, the policemen and firemen then have a ceiling of 70 percent. The FBI has a ceiling of 80 percent.

There is another feature in the bill which is a little different from the Civil Service Retirement Act.

The FBI falls under the workmen's compensation law. The bill now under consideration takes care of the policemen and firemen from the retirement fund.

Those are the differences, as I see them, from the general law. The only consideration is whether there is enough difference, with the raising of the rate from 2 percent to 3 percent, and then fixing the ceiling at 70 percent instead of 80 percent, to raise any particular question.

Mr. CLARK. I am prepared to say to my friend from Delaware, on the basis of what I have learned, that he has been told all the substantial differences between the bill and the Civil Service Retirement Act. If the Senator has any doubt, I shall be only too happy to read the exact changes between the bill and the Civil Services Retirement Act, in order that he himself may determine whether I have properly used the word "substantial."

Mr. WILLIAMS. I think it would be well to place an analysis of the bill in the RECORD, but, as I understand the situation, we now have found four major differences between this bill and the regular Civil Services Retirement Act.

Mr. CLARK. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an analysis of the bill, showing the section by section differences between S. 1770 and the Civil Service Retirement Act.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

Comparison analysis of salient features contained in the measures listed: Present Police and Firemen's Retirement and Relief Act; proposed Commissioners' Policemen and Firemen's Retirement and Disability Act, S. 1770; and the Civil Service Retirement Act

Feature	Present police and firemen retirement law	Commissioners' bill	S. 1770	Civil Service Retirement Act
Employee contribution.	5 percent of basic salary	6½ percent of basic salary	Same	Same.
Coverage	Automatic for officers and members of Metropolitan Police, Fire Department, District of Columbia, U. S. Park Police, White House Police and elective for members of U. S. Secret Service Division, after 10 years of service (other than clerical) directly related to protection of the President on so electing, all funds to individuals' credit in the civil service retirement fund must be transferred to the general revenues of District of Columbia.	Same	Same	Automatic for Federal employees generally unless employment is temporary, intermittent, or subject to another Federal retirement system.
Creditable service	No credit for prior civilian employment in Federal or District of Columbia Government.	All honorable employment of the type affording coverage.	Same	Same, except for "honorable" requirement.
		Any honorable civilian service in any branch of the Federal Government (including federally owned or controlled corporations, Gallaudet College, and municipal government of the District of Columbia) for which retirement deductions were made, performed prior to covered employment.	Same	Same, except for "honorable" requirement; allows credit also for service in Pan American Sanitary Bureau.
		Leaves of absence without pay granted during covered employment while performing military service; other leave without pay up to 6 months in any calendar year.	Same	Same, except full time is also allowed for leave without pay while receiving Federal employees' compensation benefits.

Comparison analysis of salient features contained in the measures listed—Continued

Feature	Present police and firemen retirement law	Commissioners' bill	S. 1770	Civil Service Retirement Act
Creditable service—Continued	No credit, etc—Con.	Periods of active honorable Federal military service rendered prior to separation on which title to benefits is based, unless receiving military retired pay which is not (1) based on service-connected disability incurred in enemy combat or from an instrument of war or (2) awarded under title III of Public Law 810, 80th Cong. No credit allowed for military service performed after December 1956 if social-security benefits are payable to employee, his widow, or children.	Same	Same, except no credit may be allowed for military service performed after December 1956 if social-security benefits are payable to employee, his widow, or children.
		Furlough to military service from covered position terminates after 5 years of military service, but not before Dec. 31, 1957.	Same	Same, except earliest termination date is Dec. 31, 1956.
Deposit and past service.	No provision	Deductions refunded under any Federal retirement system must be deposited before service involved may be credited.	Same	Same.
	do	No provision	No provision	Civilian service since Aug. 1, 1920, is subject to deposit of applicable deductions, plus interest. Deposit is optional. If not made, the service is credited but the annuity otherwise payable is reduced by 10 percent of the unpaid deposit.
General service requirements (annuity title).	No minimum service period	Same	Same	At least 5 years' creditable civilian service, including 1 year's covered employment out of last 2 unless separation is by death or for disability retirement.
Compulsory retirement (immediate annuity).	At or after age 60, regardless of length of service at discretion of District of Columbia Commissioners or head of employing department.		Same	At or after age 70 with 15 years' service. The President is authorized to make exemptions from this requirement if deemed in the public interest. The President has delegated this authority to the Civil Service Commission as regards non-Presidential employees.
Optional retirement (immediate annuity).	Age 55 after 25 years service, 50 percent.	Age 50, 20 years of service, 40 percent; age 55, 25 years of service, 50 percent. (Service must be police or fire service.)	Age 50, 20 years of service, 40 percent. (Service must be police or fire service.)	Age 50, 20 years of service (hazardous law enforcement duty); age 62, 5 years of service; age 60, 20 years of service; age 55, 30 years of service (reduced annuity).
		Limitations: Member must give at least 60 days' advance notice of retirement. The 50-20 option may be suspended when proper authorities determine existence of an emergency likely to endanger the public.	Limitations: Same notice but age requirement, 50. Suspension of option by chiefs of White House, Park Police, and Secret Service Division, respectively, of Commissioners in determining existence of an emergency tied in with Commissioner's determination.	Limitations: 50-20 retirement requires recommendation of department head and approval by CSC.
Conditions for disability retirement (immediate annuity).	No provision (not in line of duty)	Disability not incurred in line of duty—after 5 years' police or fire service: Disability not due to vicious habits, intemperance, or willful misconduct, precluding further service with the Department.	Same	After 5 years' civilian service. Total disability for position held, not due to vicious habits, etc., within 5 years preceding onset of disability.
	Disability incurred in line of duty after any length of service: Injury or disease acquired during performance of duty which permanently disables for such duty.	Same if disability not due to vicious habits, etc.	Same	No provision other than above. (However, similar special protection for work-connected disease or injury is provided by the Federal Employees' Compensation Act.)
		Duration of disability annuity: For life unless individual is found recovered or restored to earning capacity prior to age 55.	Same	Same, except that age 60 is the age specified for this purpose.
	No provision	Earning capacity is deemed restored if in each of 2 succeeding calendar years income from wages or self-employment is 80 percent or more of current rate of pay for position from which retired.	Same	Same.
		Annuity terminates (1) on any Federal reemployment, (2) 1 year from date of medical examination showing recovery, or (3) 1 year from date determined restored to earning capacity subject to provisions of preceding paragraph.	Same	Same.
Separation benefits.	Refund of deductions without interest prior to retirement for any reason.	Refund of deductions without interest or charge if separated before eligible to retire.	Same	Refund, or after 5 or more years' civilian service, a choice of refund or deferred annuity starting at age 62.
Computation of basic annuity.	Not to exceed 50 percent of salary at time of retirement.	Basis: Final basic salary and years (and full months) of service.	Same	Basis: Average salary for high 5 consecutive years of allowable service and years (and full months) of service. Commissioners recommendations are same as for Federal law-enforcement officers.
	No provision	Standard formula: 2 percent of final basic salary times years of service.	2 percent of final basic salary times years of service for 20 years; 3 percent of final basic salary times years of service in excess of 20 but not to exceed 70 percent.	1½ percent or $25 plus 1 percent, of high 5 salary, times years of service up to 5; plus 1¾ percent, or $25 plus 1 percent of high 5 salary, times years of service over 5 up to 10; plus 2 percent, or $25 plus 1 percent of high 5 salary times years of service over 10.

Comparison analysis of salient features contained in the measures listed—Continued

Feature	Present police and firemen retirement law	Commissioners' bill	S. 1770	Civil Service Retirement Act
Computation and so forth—Con.	Minimum disability annuity (no provision).	Nonservice connected, 40 percent of final basic salary; service connected, 66⅔ percent of final basic salary.	Same	Benefit may not be less than smaller of (a) 40 percent of high 5 salary, or (b) annuity computed under basic formula after increasing actual service by the time between separation date and date employee will attain age 60.
	Maximum annuity (all types) 50 percent of final basic salary.	70 percent of final basic salary	Same	80 percent of high 5 average salary.
Annuity reduction	No provision	No provision for reduction to provide survivor annuity to named spouse. Spouse's basic survivor annuity is provided automatically without reduction in retiree's benefit.	Same	Reduction to provide named spouse with survivor annuity of 50 percent of base amount designated (all or any part of earned annuity) is the sum of: 2½ percent of 1st $2,400 used as a base for spouse's survivor annuity plus 10 percent of any amount over $2,400 used as the survivor's annuity base.
	do	Same	Same	Reduction to provide survivor annuity of 50 percent of reduced rate to person (with insurable interest) named by unmarried retiree: 10 percent of full annuity plus 5 percent for each full 5 years the named survivor is younger than the retiree. Maximum reduction is 40 percent.
	do	Reduction to provide an increased benefit to spouse or child eligible for automatic survivor's annuity: 10 percent of full annuity. Annuity otherwise payable automatically to named survivor is increased by amount of reduction applied against the benefit of the retiree, less 5 percent for each full 5 years named survivor is younger than retiree, with maximum of 40 percent in survivor's amount.	Same	No provision.
Death benefits	Automatic survivor annuities eligibles: "Widow": Surviving wife married to member during covered employment.	Same. "Dependent widower": Surviving husband married to member during covered employment.	Same. "Dependent widower": Surviving husband married to member during covered employment.	"Widow": Surviving wife married to employee at least 2 years next prior to death, or mother of issue by their marriage. "Dependent widower": Surviving husband— (a) married to employee at least 2 years next prior to death, or the father of issue by their marriage; (b) incapable of self-support due to disability, and (c) dependent on employee for more than ½ his support.
	Child: Unmarried child, under age 18 or incapable of self-support due to disability incurred before 18; includes adopted child, stepchild, or recognized natural child who received ½ its support from member in regular parent-child relationship.	Same	Same	Essentially same.
	Basis for annuity: Death during covered employment after any length of service, or after having retired under any provision, provides basis for automatic annuity to all types of eligibles.	Same	Same	Death during covered employment after at least 5 years' civilian service provides basis for automatic annuity to all types of eligibles. Death after retirement provides basis for automatic annuity to child eligibles only. Retiree's spouse receives annuity only if named for benefit under reduced annuity election at retirement.
	Annuities provided: To widow: Not to exceed $125 per month.	To widow or dependent widower: Greater of (a) $1,800; (b) 30 percent of basic salary at death, or of basis on which retiree's annuity at death was computed.	Same. To widow or dependent widower.	To widow or dependent widower: 50 percent of employee's earned annuity—computed on high 5 salary and actual service.
	To each child (if spouse survives): Not to exceed $25 per month.	Least of (a) $600; (b) $1,800 divided by the number of children; (c) 40 percent of basic salary at death, or of basis on which retiree's annuity at death was computed divided by number of children.	Same	To each child dependent on deceased for more than half of support (where spouse also survives): (a) $600; (b) $1,800, divided by number of children; (c) 40 percent of former employee's high 5 salary divided by number of children.
	To each child (if no spouse survives): Not to exceed $25 per month.	Least of (a) $720; (b) $2,160 divided by number of children; (c) 50 percent of basic salary at death, or of basis on which retiree's annuity at death was computed, divided by number of children.	Same	To each child (if no spouse survives): Least of (a) $720; (b) $2,160 divided by number of children; (c) 50 percent of former employee's high 5 salary, divided by number of children.
	Elective survivor annuities: No provision.	Spouse or child of retiree named for on increased survivor annuity receives such benefit (equal to or less than reduction in retiree's rate) coterminous with automatic survivor annuity.	Same	No provision.
	No provision	No provision	No provision	To widow or widower designated at time of retirement: 50 percent of amount elected by the retiree as the base for spouse's survivor annuity.
	do	do	do	To named survivor (with insurable interest): 50 percent of retiree's reduced rate.

Comparison analysis of salient features contained in the measures listed—Continued

Feature	Present police and firemen retirement law	Commissioners' bill	S. 1770	Civil Service Retirement Act
Death benefit—Con.	Duration of survivor annuities: To widow: Begins 1st of month in which death of former member. Ends upon death or remarriage.	To widow or dependent widower: Same.	To widow or dependent widower: Same.	To spouse: Automatic benefit begins 1st of month following death of employee; elective benefit 1st of month in which retiree's death occurs. Ends upon death or remarriage, and, in case of dependent widower, or his becoming capable of self-support.
	To child: Begins 1st of month following death of former member. Ends at death, marriage, age 18, or (if over 18) on becoming capable of self-support.	Same	Same	Same.
	No provision	No provision	No provision	To person named (with insurable interest): Begins 1st of month in which retiree's death occurs. Ends upon death.
	Lump-sum benefits where there are no survivors; refund without interest.	Accumulated deductions are payable in a lump sum under a specified or precedence only if member dies prior to retirement leaving no survivors eligible for annuity.	Same	Similar provision made plus provision for lump-sum return of any balance of retirement account not paid out in form of annuity, upon termination of all rights to retirement and survivor annuity.
	No provision	Accrued annuity remaining unpaid at death of retiree or survivor is payable under a specified order of payment.	Same	Similar provision.
Medical, hospital service.	Member temporarily disabled by injury or disease incurred in line of duty is provided needed medical, surgical, and hospital treatment at expense of the District of Columbia, where necessity for such treatment is certified by the Commissioners of the District of Columbia.	Same	Same	No provision.
Funeral expenses	Commissioners of the District of Columbia are authorized to pay up to $250 to defray funeral expenses of a member dying in service.	Authorization increased to $300	Same	Do.

Mr. WILLIAMS. I have another question. Under the Civil Service Retirement Act, annuities are computed on the basis of the average of the 5 highest years of an employee's salary. Under the bill now before us, how are annuities computed?

Mr. CLARK. In the bill, it is computed on the basis of the last year's salary. It is my understanding that that is the same as the procedure followed for retirement from the FBI.

Mr. JOHNSTON of South Carolina. What was the Senator's question?

Mr. CLARK. On what basis is the percentage of retirement annuity computed? Under the Civil Service Retirement Act, it is on the basis of the average of the 5 highest years. In the bill, it is on the basis of the last year's salary.

Mr. JOHNSTON of South Carolina. I think that is correct.

Mr. WILLIAMS. Under the bill, as I understand, the computation will be made on the basis of the last year's salary?

Mr. CLARK. That is correct.

Mr. WILLIAMS. Is that not a substantial difference?

Mr. CLARK. It is a question of judgment.

Mr. WILLIAMS. If a person can have his annuity computed on the basis of his 5 highest years' salary, there would be a substantial difference, would there not?

Mr. CLARK. I find myself in agreement with the Senator.

Mr. WILLIAMS. So we now find another major difference between the bill and the Civil Service Retirement Act.

Another question, under the Civil Service Retirement Act, once a person is retired and his annuity has been computed, it remains constant unless Congress itself changes the annuity. It not that correct?

Mr. CLARK. That is my understanding.

Mr. WILLIAMS. Under this bill, how are annuities computed after retirement?

Mr. CLARK. It is my understanding that under the bill, if the salaries are increased, the retirement benefits also are increased.

Mr. WILLIAMS. That is different from the regular retirement act, is it not? And is not that again another substantial difference between the bill and the Civil Service Retirement Act?

Suppose salaries are raised $2,000 or $3,000, the retirement annuities will be increased automatically, which is not true under any other plan.

Mr. JOHNSTON of South Carolina. Out of fairness, it should be said that that is no change from the present law.

Mr. WILLIAMS. I am not talking about any change from the present law. This bill if enacted repeals present law and enacts a new one. I am talking about the bill before us. In the beginning, we were told that the bill was substantially the same as the present Civil Service Retirement Act.

I repeat what I said in the beginning: I am perfectly willing to support the bill, which raises the contribution rate to 6½ percent to provide benefits for these particular employees equal to the benefits provided under the Civil Service Retirement Act. But, Mr. President, in view of the fact that there seems to be such a lack of understanding of the bill in general, I feel compelled to suggest that it go over until at least the sponsors find out a little more about it. I think that should be done, in all fairness.

I ask the author of the bill whether he feels that way.

Mr. MANSFIELD. Mr. President, I am one of the cosponsors of the bill; the author of the bill is the Senator from Nevada [Mr. BIBLE], a member of the Committee on the District of Columbia, who is not in the Chamber at the moment.

I suggest that the Senator who objects move that the bill go to the foot of the calendar, so that in the meantime the Senator from Delaware will have an opportunity to examine the proposed changes, as outlined, and see whether they fit in with his ideas.

Mr. WILLIAMS. I have seen the proposed changes, and that is why I am asking questions.

What amazes me is that those who introduced or sponsored the bill and are presenting it on the floor now, know so little about it. Unquestionably we have developed here that there is a substantial difference between the provisions of the bill and the corresponding provisions of the Civil Service Retirement Act. The question puzzling me is, How many other differences are there?

Mr. MANSFIELD. Mr. President, the Senator from Delaware should not be so amazed, because after all, the bill was discussed in the Committee on the District of Columbia, after it was introduced by the Senator from Nevada [Mr. BIBLE], with the cosponsorship of some of us who felt that something should be done for these policemen and firemen. After consideration in the Committee on the Dis-

trict of Columbia, the bill was reported to the Senate and placed on the calendar. I am sure the Senator from Delaware understands that.

Mr. WILLIAMS. I understand that, but who understands the bill well enough to explain what is in it? I am willing to have this group extended the same benefits as those extended to law-enforcement officers under the Civil Service Retirement Act, and I am perfectly willing to support such a bill when it is brought into accord with that act. But at the present time it is not in accord. For instance, we now find the bill provides benefits substantially greater than those which the members of the FBI or the agents on the narcotic squad receive.

If extra benefits are to be provided the District of Columbia policemen and firemen, then let the bill be so presented with a clear statement to that effect, and then the Senate will know what it is doing when acting on the bill. But it should not be presented on the basis of providing benefits comparable to those provided under the regular Civil Service Retirement Act, when in reality the bill does nothing of the sort.

Mr. CLARK. Mr. President, we on this side of the aisle were amazed that no Member on the Republican side asked that the bill go over in the first instance.

I am happy to have had this colloquy with the Senator from Delaware, which I am sure has enlightened many Members of the Senate. I wonder whether the Senator from Delaware wishes to have the bill go over.

Mr. WILLIAMS. Mr. President, under the circumstances, I feel compelled to ask that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The next bill on the calendar will be stated.

BILLS PASSED OVER

The bill (S. 555) to authorize the construction, operation, and maintenance of the Hells Canyon Dam on the Snake River between Idaho and Oregon, and for related purposes, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 60) to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado, was announced as next in order.

Mr. CLARK. Over.

The PRESIDING OFFICER. The bill will be passed over.

CONDEMNATION OF INSANITARY BUILDINGS IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 1269) to amend the act entitled "An act to create a Board for the Condemnation of Insanitary Buildings in the District of Columbia, and for other purposes," approved May 1, 1906, as amended, which had been reported from the Committee on the District of Columbia, with amendments, on page 3, line 9, after the numerals "10," to insert "(a)"; in line 17, after the word "located," to strike out "as" and insert "at"; and, at the top of page 5, to insert:

(b) In case such notice is served by any method other than personal service, notice shall also be sent to the owner by ordinary mail.

So as to make the bill read:

Be it enacted, etc., That subsection (d) of section 2 of the act entitled "An act to create a Board for the Condemnation of Insanitary Buildings in the District of Columbia, and for other purposes," approved May 1, 1906 (34 Stat. 157; title 5, ch. 6, D. C. Code, 1951 edition), as amended, is amended by striking "same manner as general taxes are collected in the District of Columbia," and inserting in lieu thereof "manner provided in section 7 of this act."

SEC. 2. (a) Section 7 of said act, as amended, is amended (1) by striking "in the same manner as general taxes are collected in the District of Columbia," and inserting in lieu thereof "as provided in this section"; and (2) by inserting immediately before the period at the end of said section the following: *": Provided further*, That the taxes authorized to be levied and collected under this act may be paid without interest within 60 days from the date such tax was levied. Interest of one-half of 1 percent for each month or part thereof shall be charged on all unpaid amounts from the expiration of 60 days from the date such tax was levied. Any such tax may be paid in three equal installments with interest thereon. If any such tax or part thereof shall remain unpaid after the expiration of 2 years from the date such tax was levied, the property against which said tax was levied may be sold for such tax or unpaid portion thereof with interest and penalties thereon at the next ensuing annual tax sale in the same manner and under the same conditions as property sold for delinquent general real estate taxes, if said tax with interest and penalties thereon shall not have been paid in full prior to said sale."

(b) Any tax levied pursuant to such act approved May 1, 1906, as amended by the act approved August 28, 1954, which was levied after the effective date of such act of August 28, 1954, and prior to the effective date of this section, shall, for the purpose of computing interest thereon, be deemed to have been levied as of the effective date of this section.

SEC. 3. Section 10 of such act, as amended, is amended to read as follows:

"SEC. 10. (a) Any notice required by this act to be served shall be deemed to have been served when served by any of the following methods: (a) when forwarded to the last known address of the owner as recorded in the real estate assessment records of the District of Columbia by registered mail, with return receipt, and such receipt shall constitute prima facie evidence of service upon such owner if such receipt is signed either by the owner or by a person of suitable age and discretion located at such address: *Provided*, That valid service upon the owner shall be deemed effected if such notice shall be refused by the owner and not delivered for that reason; or (b) when delivered to the person to be notified; or (c) when left at the usual residence or place of business of the person to be notified, with a person of suitable age and discretion then resident or employed therein; or (d) if no such residence or place of business can be found in the District of Columbia by reasonable search, then if left with any person of suitable age and discretion employed at the office of any agent of the person to be notified, which agent has any authority or duty with reference to the land or tenement to which said notice relates; or (e) if any such notice forwarded by registered mail be returned for reasons other than refusal, or if personal service of any such notice, as hereinbefore provided, cannot be effected, then if published on three consecutive days in a daily newspaper published in the District of Columbia; or (f) if by reason of an outstanding unrecorded transfer of title the name of the owner in fact cannot be ascertained beyond a reasonable doubt, then if served on the owner of record in a manner hereinbefore provided. Any notice to a corporation shall, for the purposes of this act, be deemed to have been served on such corporation if served on the president, secretary, treasurer, general manager, or any principal officer of such corporation in the manner hereinbefore provided for the service of notices on natural persons holding property in their own right; and notices to a foreign corporation shall, for the purposes of this act, be deemed to have been served if served personally on any agent of such corporation, or if left with any person of suitable age and discretion residing at the usual residence or employed at the usual place of business of such agent in the District of Columbia."

(b) In case such notice is served by any method other than personal service, notice shall also be sent to the owner by ordinary mail.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CHILDREN BORN OUT OF WEDLOCK

The Senate proceeded to consider the bill (S. 1708) to amend the act entitled "An act relating to children born out of wedlock," approved January 11, 1951, which had been reported from the Committee on the District of Columbia, with amendments on page 2, line 6, after the word "administer", to strike out "oaths" and insert "oaths, or before any person duly authorized to administer oaths"; in line 14, after the word "words", to strike out "Health Officer" and insert "Health Officer of the District of Columbia"; and, in line 17, after the word "designated", to strike out "agent." " and insert "agent."."; so as to make the bill read:

Be it enacted, etc., That the first sentence of section 15 of the act entitled "And act relating to children born out of wedlock," approved January 11, 1951 (sec. 11–963, D. C. Code, 1951 edition) is amended to read as follows: "Whenever a certified copy of a marriage certificate is submitted to the Commissioners of the District of Columbia or their designated agent, establishing that the previously unwed parents of an illegitimate child have intermarried subsequent to the birth of said child and the paternity of the child has been judicially determined or has been acknowledged by the husband before said Commissioners or their designated agent, or has been acknowledged in an affidavit sworn to by such husband before a judge or the clerk of a court of record, or before an officer of the Armed Forces of the United States authorized to administer oaths, or before any person duly authorized to administer oaths and such affidavit is delivered to said Commissioners or their designated agent, a new certificate of birth bearing the original date of birth and the names of both parents, shall be issued and substituted for the certificate of birth then on file."

SEC. 2. That subsection (b) of section 16 of such act (sec. 11–964 (b), D. C. Code, 1951

edition) is hereby amended by striking therefrom the words "Health Officer of the District of Columbia" and inserting in lieu thereof the words "Commissioners of the District of Columbia or their designated agent".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF COMPULSORY SCHOOL ATTENDANCE AND SCHOOL CENSUS ACT RELATING TO THE DISTRICT OF COLUMBIA

The bill (S. 1842) to amend the act entitled "An act to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes," approved February 4, 1925, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the first sentence of section 1 of article II of the act entitled "An act to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes," approved February 4, 1925 (43 Stat. 807; sec. 31–208, D. C. Code, 1951 ed.), is amended by striking therefrom "all children between the ages of 3 and 18 years permanently or temporarily residing in the District of Columbia, and annually thereafter or as frequently", and inserting in lieu thereof "all children under the age of 18 years permanently or temporarily residing in the District of Columbia and as frequently thereafter."

CONFERRING OF DEGREES BY DISTRICT OF COLUMBIA TEACHERS COLLEGE

The bill (S. 1906) authorizing the conferring of appropriate degrees by the District of Columbia Teachers College on those persons who have met the requirements for such degrees, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That (a) the Board of Education of the District of Columbia is hereby authorized to make all necessary rules and regulations for the organization and government of the District of Columbia Teachers College, and to fix the terms and conditions for the admission to and graduation from such college.

(b) Upon the recommendation of the president and faculty of the District of Columbia Teachers College, the said Board of Education is further authorized to prescribe courses of study to be pursued at such college, and to provide for the conferring of appropriate degrees for work performed, in course, upon those persons who have met the requirements for such degrees.

REMOVAL FOR CAUSE OF MEMBERS OF BOARD OF EDUCATION, DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H. R. 192) to provide that members of the Board of Education of the District of Columbia may be removed for cause, which had been reported from the Committee on the District of Columbia, with an amendment, on page 1, at the beginning of line 7, to strike out, "is amended by inserting immediately after the second sentence the following new sentence: 'The judges of the United States District Court for the District of Columbia shall have power to remove any member of the Board of Education at any time for adequate cause affecting his character and efficiency as a member.'" and insert "is amended by inserting '(a)' immediately after 'SEC. 2.' and by adding at the end thereof the following new subsection: '(b) The judges of the United States District Court for the District of Columbia shall have power to remove any member of the Board of Education at any time for adequate cause affecting his character and efficiency as a member, after a public hearing on a verified complaint filed by the United States Attorney for the District of Columbia, or one of his assistants, and on issues framed by a verified answer. The United States District Court of the District of Columbia is empowered to promulgate rules to carry out the purpose of this subsection.'"

The amendment was agreed to.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

BILLS PASSED OVER

The bill (H. R. 4136) to extend the period within which the Export-Import Bank of Washington may make loans, was announced as next in order.

Mr. PURTELL. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 53) to consolidate into one act the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration, was announced as next in order.

Mr. CLARK. Over.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF SECTION 4 OF THE INTERSTATE COMMERCE ACT, AS AMENDED

The bill (S. 937) to amend section 4 of the Interstate Commerce Act, as amended, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 4 (1) of the Interstate Commerce Act, as amended (49 U. S. C. 4 (1)), is amended to read as follows:

"(1) It shall be unlawful for any common carrier subject to this part or part III to charge or receive any greater compensation in the aggregate for the transportation of passengers, or of like kind of property, for a shorter than for a longer distance over the same line or route in the same direction, the shorter being included within the longer distance, or to charge any greater compensation as a through rate than the aggregate of the intermediate rates subject to the provisions of this part or part III, but this shall not be construed as authorizing any common carrier within the terms of this part or part III to charge or receive as great compensation for a shorter as for a longer distance: *Provided*, That upon application to the Commission and after investigation, such carrier, in special cases, may be authorized by the Commission to charge less for longer than for shorter distances for the transportation of passengers or property, and the Commission may from time to time prescribe the extent to which such designated carriers may be relieved from the operation of the foregoing provisions of this section, but in exercising the authority conferred upon it in this proviso, the Commission shall not permit the establishment of any charge to or from the more distant point that is not reasonably compensatory for the service performed; and no such authorization shall be granted on account of merely potential water competition not actually in existence: *Provided further*, That any such carrier or carriers operating over a circuitous line or route may, subject only to the standards of lawfulness set forth in other provisions of this part or part III and without further authorization, meet the charges of such carrier or carriers of the same type operating over a more direct line or route, to or from the competitive points, provided that rates so established over circuitous routes shall not be evidence on the issue of the compensatory character of rates involved in other proceedings: *And provided further*, That tariffs proposing rates subject to the provisions of this paragraph requiring Commission authorization may be filed when application is made to the Commission under the provisions hereof, and in the event such application is approved, the Commission shall permit such tariffs to become effective upon 1 day's notice."

ESTABLISHMENT OF PERIODS OF LIMITATION FOR ACTIONS AT LAW UNDER INTERSTATE COMMERCE ACT, ETC.—BILL PASSED OVER

The bill (S. 377) to establish the finality of contracts between the Government and common carriers of passengers and freight subject to the Interstate Commerce Act, was announced as next in order.

Mr. PURTELL. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. MAGNUSON. Mr. President, did I correctly understand that the Senator from Connecticut asked that calendar 340, Senate bill 377, go over?

Mr. PURTELL. Yes. I did so by request. I understand that an amendment providing that the measure shall not be applicable in time of war may be proposed. I believe that at present the bill does not contain such a provision.

Mr. MAGNUSON. That is correct; it does not. Does the Senator from Connecticut know who proposes the amendment?

Mr. PURTELL. It was discussed briefly prior to the call of the calendar. There is no objection to the bill. If an amendment providing that the bill shall not apply during war is offered on the floor, I shall be glad to withdraw the objection.

Mr. MAGNUSON. We would like to have the bill passed. I see no objection to such an amendment.

Mr. PURTELL. I should be glad to propose the amendment, or perhaps the Senator from Washington wishes to propose it.

Mr. BRICKER. Mr. President, I should like to ask several questions re-

garding such an amendment. Is it the understanding of the Senator from Connecticut that, under such an amendment, the limitation would begin to run at the end of war?

Mr. PURTELL. It is my understanding that the limitation would apply only during war, and that the 2-year period would begin immediately at the end of war, and the 3-year period similarly.

Mr. BRICKER. I think the bill should go over.

Mr. PURTELL. Mr. President, the Senator from Ohio suggests that the bill go over. I believe it should go over; and if that is done, then, between today and the next call of the calendar, we can take care of the matter referred to.

Mr. MAGNUSON. Mr. President, I know the Senator from Ohio, who is the author of the bill, is anxious to have it passed.

Mr. PURTELL. I so understand. However, the Senator from Ohio agrees that we should take time to look carefully into the matter to which reference has been made.

Therefore, Mr. President, I ask that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

BILL PASSED OVER

The bill (S. 943) to amend section 218 (a) of the Interstate Commerce Act, as amended, to require contract carriers by motor vehicles to file with the Interstate Commerce Commission their actual rates or charges for transportation services, was announced as next in order.

Mr. CLARK. Over.

The PRESIDING OFFICER. The bill will be passed over.

RELIEF OF CERTAIN ALIENS

The Senate proceeded to consider the joint resolution (H. J. Res. 247) for the relief of certain aliens, which had been reported from the Committee on the Judiciary, with amendments, on page 1, line 9, after the name "Capone", to strike out "Pearl (Pik Chun) Ma, Ying Lun Ma,"; on page 2, line 22, after the word "Act", to strike out "Roger Eugene Caillaud,"; at the beginning of line 24, to strike out "Kerttu Poutiainen Mayblom,"; on page 3, after line 7, to strike out:

SEC. 3. The Attorney General is authorized and directed to cancel any outstanding orders and warrants of deportation, warrants of arrest, and bonds, which may have issued in the cases of John William Forbes Petch and Mrs. Tsuma Ueda. From and after the date of the enactment of this Act, the said John William Forbes Petch and Mrs. Tsuma Ueda shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and orders have issued.

And, after line 16, to strike out:

SEC. 4. For the purposes of the Immigration and Nationality Act, Paolina Toscano shall be held and considered to have been lawfully admitted to the United States for permanent residence as of August 18, 1925, upon payment of the required visa fee.

The amendments were agreed to.

The amendments were ordered to be engrossed, and the joint resolution to be read the third time.

The joint resolution was read the third time and passed.

GRANTING OF STATUS OF PERMANENT RESIDENCE TO CERTAIN ALIENS

The Senate proceeded to consider the concurrent resolution (H. Con. Res. 89) approving the granting of the status of permanent residence to certain aliens, which had been reported from the Committee on the Judiciary, with amendments, on page 6, after line 5, to strike out "A–6197692, Kuo, Hsiao Lan."

After line 6, to strike out "0200 86579, Kuo, Hsiao Mei nee Yen."

On page 27, after line 8, to strike out "A–6386992, Wong, Yen Leong."

And, on page 37, at the beginning of line 5, to strike out "A–8881704" and insert "A–6881704."

The amendments were agreed to.

The concurrent resolution, as amended, was agreed to.

MARIA ADELAIDE ALESSANDRONI

The bill (S. 80) for the relief of Maria Adelaide Alessandroni was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Maria Adelaide Alessandroni shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

TSUI YUNG WONG

The bill (S. 153) for the relief of Tsui Yung Wong was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Tsui Yung Wong shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

GEORGIOS IOANNOU

The bill (S. 160) for the relief of Georgios Ioannou was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Georgios Ioannou shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

JOHN G. MICHAEL

The bill (S. 164) for the relief of John G. Michael was announced as next in order.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. PURTELL. Mr. President, reserving the right to object—although I shall not object—may we have a brief explanation of the bill?

Mr. EASTLAND. Mr. President, the purpose of the bill is to enable a former naturalized United States citizen to regain his citizenship, which was lost because of residence abroad. The beneficiary of the bill is a 57-year-old native of Turkey who first entered the United States on July 4, 1919, at Lewiston, N. Y., and was admitted at that time for lawful permanent residence. On January 21, 1934, he became a naturalized citizen of the United States; and in March of the same year he returned to Greece, to marry his childhood sweetheart. For various reasons, he has remained in Greece since that date, and was held to have lost his United States citizenship under the provisions of section 404 (b) of the Nationality Act of 1940, the provisions of which became effective in October 1946.

The beneficiary has 3 children, 2 of whom are presently in the United States, attending school.

Under the provisions of section 404 (b) of the Nationality Act of 1940, a naturalized citizen of the United States lost his nationality by residing continuously for 3 years in the territory of the foreign country of which he was formerly a national. The effective date of this provision was extended several times because of World War II. Although the beneficiary had hoped to return to the United States prior to the effective date of October 14, 1946, it is my understanding that he suffered considerably at the hands of the German occupation troops in Greece, during the war years, as a United States citizen, and, as a result of his imprisonment, contracted a serious arthritic condition. Because of these circumstances, he was unable to avail himself of the privilege of returning to the United States prior to the effective date of the expatriating provision contained in section 404 (b).

It appears to me that there are sufficient equities in the case to justify permitting the beneficiary to return to the United States and resume his United States citizenship.

Mr. PURTELL. I thank the Senator from Mississippi, and I have no objection to the passage of the bill.

There being no objection, the bill (S. 164) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That John G. Michael, who lost United States citizenship under

the provisions of section 404 (b) of the Nationality Act of 1940, may be naturalized by taking, prior to 1 year after the date of the enactment of this act, before any court referred to in subsection (a) of section 310 of the Immigration and Nationality Act or before any diplomatic or consular officer of the United States abroad, an oath as prescribed by section 337 of such act. From and after naturalization under this act, the said John G. Michael shall have the same citizenship status as that which existed immediately prior to its loss.

DANIELA RENATA PATRICIA ZEI

The bill (S. 499) for the relief of Daniela Renata Patricia Zei was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, the minor child, Daniela Renata Patricia Zei, shall be held and considered to be the natural-born alien child of Mr. and Mrs. Patrick N. Dinon, citizens of the United States.

STANISLAV MAGLICA

The bill (S. 583) for the relief of Stanislav Maglica was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, the minor child, Stanislav Maglica, shall be held and considered to be the natural-born alien child of Mrs. Amelia Maglica, a citizen of the United States.

ANTON REVAK

The Senate proceeded to consider the bill (S. 592) for the relief of Anton Revak, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 7, after the word "Act", to insert "and upon compliance with such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare, may deem necessary to impose: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act. This exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provision of section 212 (a) (6) of the Immigration and Nationality Act, Anton Revak may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act and upon compliance with such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare, may deem necessary to impose: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act. This exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ATHENA NICHOLAS EUTERIADOU

The bill (S. 755) for the relief of Athena Nicholas Euteriadou was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Athena Nicholas Euteriadou shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

THELMA MARGARET HWANG

The bill (S. 788) for the relief of Thelma Margaret Hwang was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Thelma Margaret Hwang shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

GIUSEPPE BAFFO

The bill (S. 798) for the relief of Giuseppe Baffo was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Giuseppe Baffo shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

VIDA LETITIA BAKER

The bill (S. 833) for the relief of Vida Letitia Baker was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Vida Letitia Baker shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

DAVID AJUELO AND OTHERS

The bill (S. 834) for the relief of David Ajuelo, Roza Ajuelo, Victoria Ajuelo, and Lizet Ajuelo was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, David Ajuelo, Roza Ajuelo, Victoria Ajuelo, and Lizet Ajuelo shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

SYDNEY DOUGLAS CATCHPOLE

The bill (S. 849) for the relief of Sydney Douglas Catchpole was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Sydney Douglas Catchpole shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

KUO YORK CHYNN

The bill (S. 908) for the relief of Kuo York Chynn was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Kuo York Chynn shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

SATOE YAMAKAGE LANGLEY

The bill (S. 988) for the relief of Satoe Yamakage Langley was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, notwithstanding the provisions of paragraph (12) of section 212 (a) of the Immigration and Nationality Act, Satoe Yamakage Langley may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such act: *Provided*, That this act shall apply only to grounds for exclusion under such paragraph known to the Secretary of State or the Attorney General prior to the date of the enactment of this act.

MATSUE HARADA

The bill (S. 1112) for the relief of Matsue Harada was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That for the purposes of the Immigration and Nationality Act, Matsue Harada shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

KIYOSHI TAKAHASHI AND OTHERS

The bill (S. 1147) for the relief of Kiyoshi Takahashi, Kyoko Takahashi, and Nosomu Takahashi was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Kiyoshi Takahashi, Kyoko Takahashi, and Nosomu Takahashi shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct three numbers from the appropriate quota for the first year that such quota is available.

CHONG YOU HOW AND OTHERS

The bill (S. 1376) for the relief of Chong You How, his wife, Eng Lai Fong, and his child Chong Yim Keung was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Chong You How (also known as Edward Charles Yee), his wife, Eng Lai Fong, and his child, Chong Yim Keung, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

JANOS SCHREINER

The bill (S. 1833) for the relief of Janos Schreiner was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of section 101 (b) (2) of the Immigration and Nationality Act, Janos Schreiner shall be held and considered to be the natural father of Miss Maria Lukats, a citizen of the United States.

MITSUKO A. HACHITA

The bill (H. R. 1400) for the relief of Mitsuko A. Hachita was considered, ordered to a third reading, read the third time, and passed.

RHODA ELIZABETH GRAUBART

The Senate proceeded to consider the bill (S. 525) for the relief of Rhoda Elizabeth Graubart, which had been reported from the Committee on the Judiciary with an amendment in line 7, after the word "fee", to strike out "Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available," so as to make the bill read:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Rhoda Elizabeth Graubart shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TIKVA POLSKY

The Senate proceeded to consider the bill (S. 526) for the relief of Tikva Polsky, which had been reported from the Committee on the Judiciary with an amendment, in line 7, after the word "fee", to strike out "Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota control officer to deduct one number from the appropriate quota for first year that such quota is available", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Tikva Polsky shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

OLEG ANTONOWYCZ

The Senate proceeded to consider the bill (S. 553) for the relief of Oleg Antonowycz, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert:

That, notwithstanding the provision of section 212 (a) (6) of the Immigration and Nationality Act, Oleg Antonowycz may be issued a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of such act, under such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare, may deem necessary to impose: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act: *Provided further*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HELGA BINDER

The Senate proceeded to consider the bill (S. 785) for the relief of Helga Binder, which had been reported from the Committee on the Judiciary, with an amendment, on page 1, line 5, after the word "be", to insert "issued a visa and be", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provisions of paragraph 9 of section 212 (a) of the Immigration and Nationality Act, Helga Binder may be issued a visa and be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such act, and if the proposed marriage between the said Helga Binder and Sfc. James L. Benson, a citizen of the United States, occurs not later than 6 months after the date of the enactment of this act: *Provided*, That this act shall apply only to grounds for exclusion under such paragraph known to the Secretary of State or the Attorney General prior to the date of the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ALICE EIRL SCHAER

The Senate proceeded to consider the bill (S. 1035) for the relief of Alice Eirl Schaer, which had been reported from the Committee on the Judiciary, with an amendment, to strike out all after the enacting clause and insert:

That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, the minor child, Alice Eirl Schaer (Mi On Lee), shall be held and considered to be the natural-born alien child of Mr. and Mrs. Walter Paul Schaer, citizens of the United States, and notwithstanding the provisions of section 212 (a) (6) of the said act, the said Alice Eirl Schaer (Mi On Lee) may be issued a visa and be admitted to the United States under such conditions and controls which the Attorney General, after consultation with the Surgeon General of the United States Public Health Service, Department of Health, Education, and Welfare may deem necessary to impose: *Provided*, That if the said Alice Eirl Schaer (Mi On Lee) is not entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250), a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the Immigration and Nationality Act: *And provided further*, That the exemption provided herein shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SALVATORE PANTANO

The Senate proceeded to consider the bill (S. 1089) for the relief of Salvatore Pantano which had been reported from the Committee on the Judiciary, with an amendment in line 5, after the word

"be", to insert "issued a visa and be", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (9) of the Immigration and Nationality Act, Salvatore Pantano may be issued a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act: *Provided,* That this exemption shall apply only to a ground of exclusion of which the Secretary of State or the Attorney General had knowledge prior to the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ROBERTO MARIO BETTINZOLI

The Senate proceeded to consider the bill (S. 1390) for the relief of Roberto Mario Bettinzoli, which had been reported from the Committee on the Judiciary, with an amendment on page 1, line 7, after the word "fee", to strike out "Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Roberto Mario Bettinzoli shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HEUI SIK MIN AND OTHERS

The Senate proceeded to consider the bill (S. 614) for the relief of Heui Sik Min and others, which had been reported from the Committee on the Judiciary, with amendments, on page 1, line 4, after the word "Act", to strike out "Heui Sik Min and his wife,"; at the beginning of line 5, to strike out "their" and insert "her", and, in the same line, after the word "children", to strike out "David Pyong Wha Min,"; and in line 6, after the name "Min", where it appears the second time, to strike out "and daughter-in-law Gloria Yong Hiu Min" and insert "George Pyong Yu Min, and William Pyong Soo Min"; so as to make the bill read:

Be it enacted, etc., That, for the purpose of the Immigration and Nationality Act, Mary Pu Keui Min, and her children, Susan Pyong Soon Min, Sally Pyong Yun Min, George Pyong Yu Min, and William Pyong Soo Min shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill for the relief of Mary Pu Keui Min, and her children, Susan Pyong Soon Min, Sally Pyong Yun Min, George Pyong Yu Min, and William Pyong Soo Min."

LOUTFIE NOAMA

The Senate proceeded to consider the bill (S. 749) for the relief of Loutfie Noama, which had been reported from the Committee on the Judiciary, with an amendment, on page 1, line 4, after the word "Act", to strike out "Loutfie Noama" and insert "Loutfie Kalil Noma (also known as Loutfie Siemon Noma or Loutfie Noama)", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Loutfie Kalil Noma (also known as Loutfie Siemon Noma or Loutfie Noama) shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill for the relief of Loutfie Kalil Noma (also known as Loutfie Siemon Noma or Loutfie Noama)."

NINA MASLOVA GREENBERG

The Senate proceeded to consider the bill (S. 1589) for the relief of Nina Maslova Greenberg, which had been reported from the Committee on the Judiciary, with amendments, in line 3, after the word "provisions", to strike out "of paragraph (28) (c) (v)", and, in line 4, after "(a)", to insert "(28) (C) (v)", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (28) (C) (v) of the Immigration and Nationality Act, Nina Maslova Greenberg may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such act. This act shall apply only to grounds for exclusion under such paragraph known to the Secretary of State or the Attorney General prior to the date of the enactment of this act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

IMPROVEMENT OF HOUSING

The bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes was announced as next in order.

Mr. PURTELL. Over.

The PRESIDING OFFICER. The bill will be passed over.

CONVEYANCE OF THE REVERSIONARY INTEREST IN CERTAIN LANDS, STATE OF TEXAS

The bill (H. R. 1983) to provide for the conveyance of the reversionary interest of the United States in certain lands to the Clint Independent School District and the Fabens Independent School District in the State of Texas, or to either of them, and for other purposes, was announced as next in order.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MORSE. Mr. President, the bill (H. R. 1983) would authorize the Secretary of State on behalf of the United States to:

First. Waive the United States reversionary interest in 40 acres of land heretofore conveyed to certain Texas school districts by the United States for school purposes.

Second. Provide for an exchange of the 40 acres of land between the school districts and a third party, for land of not less than equivalent area and value, and

Third. Assure that the United States would receive a reversionary interest in the exchanged land.

Mr. President, I am satisfied, after studying this bill carefully, that it does not violate the Morse formula. The bill and the accompanying report make it clear that United States should receive an interest in the exchanged lands that is of equivalent value to the reversionary interest which would be given up.

My only concern is that of making absolutely certain that the implementation of the bill is handled so as to avoid any possible loss of the Government's interest in the lands to be exchanged. I assume that the language of the bill referring to a "reversionary interest," at page 2, line 25, contemplates the execution of a deed to the United States by some third party conveying the 40 acres to be received by the school districts in the exchange transaction. Therefore, I want to make this legislative history of the matter, because I think it will be all that will be necessary in order to carry out the purpose of the bill.

I assume further that the United States would then, in carrying out the intent of the bill and of the parties, execute a conveyance or conveyances through the Secretary of State to the Clint and Fabens School Districts, subject, however, to a reversionary interest of the same type as that which was held originally by the Government. The language of section 3 of H. R. 1983, when read in conjunction with the language of section 2, would appear to authorize the execution and delivery of such instrument of title.

I would hope, Mr. President, that the transaction would be handled along the lines I have outlined, because if the exchanged lands were to be deeded by the third party to the Clint and Fabens School Districts, with a contingent executory interest provided for the United States, a question would be presented as

to the possible application of the rule against perpetuities to such contingent executory interest. I would much prefer to avoid that question by having the transaction handled correctly in the first instance.

If the understanding of the acting majority leader, the Senator from Pennsylvania [Mr. CLARK], coincides with my understanding of the way in which this bill would be implemented, I am satisfied that the Federal Government would receive full compensation by way of an exchange, and that it would receive a contingent interest of a value equivalent to that which it now holds. On the basis of that understanding, the bill should be passed.

Mr. CLARK. Mr. President, my understanding is the same as that of the Senator from Oregon.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill (H. R. 1983) was ordered to a third reading, read the third time, and passed.

ATOMIC ENERGY AND THE QUEST FOR PEACE—ADDRESS BY HON. FRANCIS O. WILCOX

Mr. SMITH of New Jersey. Mr. President, on Saturday, May 18, before the National General Assembly of the United World Federalists in Boston, Mass., the Honorable Francis O. Wilcox, Assistant Secretary of State, delivered a notable and very pertinent address on the subject Atomic Energy and the Quest for Peace. It will be recalled that Assistant Secretary Wilcox was for some years chief of staff of the Foreign Relations Committee, and he is one of the best informed men in Washington on world affairs.

I ask unanimous consent that the address to which I have referred be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE FRANCIS O. WILCOX, ASSISTANT SECRETARY OF STATE FOR INTERNATIONAL ORGANIZATION AFFAIRS, BEFORE THE NATIONAL GENERAL ASSEMBLY OF THE UNITED WORLD FEDERALISTS, SOMERSET HOTEL, BOSTON, MASS., MAY 18, 1957

ATOMIC ENERGY AND THE QUEST FOR PEACE

Introduction

The Department of State has for years watched with interest the activities of your organization. We have come to know it as an effective proponent of a point of view which is not identical with our own, but whose general direction and purpose stir a deep moral response among men of good will.

As you know, we have honest differences of opinion as to the practicability and desirability of some of your ultimate objectives. But we do appreciate the responsible way in which your officers seek to develop a better understanding among the American public within your field of activity. We appreciate, too, the distinction you draw between your ultimate aims, on the one hand, and what can be done today and tomorrow, on the other, to move toward a better organized international life.

Tonight, I shall discuss what I believe is a very important step toward this goal, one that has gone too largely unnoticed. I refer to the establishment of an International Atomic Energy Agency, which is now far advanced toward realization. My intention is to review briefly what this new Agency is, how it came about, why those who have dealt with it consider it of such great importance to the United States. I want also to touch on the principal objections which critics of the Agency are making. Every now and again in the course of world history, mankind is confronted with a vision, a great challenge, which may substantially alter the course of human affairs. I believe we are now confronted with such a challenge.

Evolution of the peaceful uses proposal

This is a timely topic. This week in Washington, the United States Senate is considering the Statute of this Agency, as a treaty, which President Eisenhower has submitted for approval and consent to ratification. The Statute has been signed by the United States and 79 other countries. The decision facing the Senate is an urgent and momentous one. Ratifications have already been deposited by Guatemala, the Soviet Union, Switzerland, Byelorussia, Rumania, Pakistan and Austria. When the United States ratifies, we shall be one step closer to the objectives declared by President Eisenhower in his Atoms for Peace Proposal before the United Nations General Assembly, in December 1953, to "find a way by which the miraculous inventiveness of man shall not be dedicated to his death, but consecrated to his life."

The true significance of this proposal becomes apparent when it is seen against the background of this atomic era which we have entered.

It was in December of 1942, under the stadium at the University of Chicago, that we first proved that our theories about the nature of the atom and the relationship of mass and energy were accurate. For it was there that the first controlled nuclear chain reaction took place, and it was then that the scientists presented society with both a great blessing and an awesome problem.

The forces of nature recognize no moral code. If unleashed as an uncontrollable weapon of war, this miraculous force could destroy mankind and leave the earth barren and uninhabitable. If used for peaceful purposes, it could bring an unprecedented era of progress and advancement. Remember that locked in a single pound of uranium is the potential energy equivalent to nearly 3 million pounds of coal. Remember, too, that the horizons for improvement in agriculture and industry, with the help of the atom, are unlimited.

The United States realized early that it could not expect to have a monopoly on nuclear energy forever. It would be vital to the world that there be some form of international control over such a potentially destructible force. To this end, the United States, in 1946, submitted the Baruch plan to the United Nations. This called for the creation of an International Atomic Development Authority within the framework of the United Nations. The organization would have had the exclusive power to manufacture and control the use of all atomic materials and make sure that no nation could come into the possession of atomic weapons.

Fulfillment of this unprecedented offer to abandon atomic weapons, made by the only nation possessing them, was denied to the world by the Soviet Union which refused to agree to any effective system of inspection and control. The reason soon became clear. While long and frustrating negotiations were being carried on in the United Nations, the Soviet Union was working feverishly to perfect its own atomic capability.

On the 29th of September 1949, President Truman announced that the U. S. S. R. had successfully detonated an atomic device. The atomic monopoly was broken. The atomic weapons race was on. The needy world awaiting the benefits inherent in the atom would have to bide its time.

However, we never gave up our hope for the eventual harnessing of atomic energy for peaceful uses. The primary question was whether or not this could be done on an international scale without an overall disarmament agreement between the Free World and the Soviet bloc.

But by the fall of 1953 President Eisenhower decided that international cooperation in the development of atomic energy for peaceful uses need not wait upon settlement of the more complex problem of a comprehensive system of disarmament.

On December 8, 1953, he delivered his now historic address before the United Nations and declared that the benefits of the atom should no longer be withheld from a waiting world. He proposed the pooling of fissionable materials from the world's atomic stockpiles, and the pooling of world technology and scientific manpower in an International Atomic Energy Agency.

There was an electric response from the members of the United Nations in support of the President's proposal—from all but the Soviet Union. It rejected the United States proposal and repeated its insistence on a ban—in fact unenforcible—on the use of nuclear weapons as a prior condition to the formation of a worldwide atoms-for-peace program.

What followed is an excellent example of the moral suasion which can be exerted by the members of the United Nations on important issues. The United States pressed forward in negotiations without the Soviet Union, but with seven other states advanced in atomic energy. This group produced the initial draft statute for the International Atomic Energy Agency. In a new departure in international treatymaking, it was circulated to the 84 members of the United Nations and the specialized agencies for suggestions and comments.

The negotiating group was expanded in the fall of 1955 to include the Soviet Union, which had now finally decided to join. They seemed to recognize the wisdom of the old maxim—"if you can't lick 'em, join 'em." This was an essential forward step. The Soviet Union obviously saw only disadvantage in continued opposition to an idea of such worldwide appeal.

By the summer of 1956, the enlarged group had produced and unanimously accepted a revised draft. In September 1956, representatives of 81 governments and 7 specialized agencies met in New York at the United Nations headquarters. It was the largest international conference ever held. The statute was put under the microscope and reviewed, article by article. Over 100 proposed amendments were introduced. The amendments that were adopted, all of which were acceptable to the United States, clarified and broadened some provisions of the statute and made it stronger and more representative.

Ten critical years had elapsed since the United States first proposed to turn its atomic monopoly to the benefits of the world. Now the first positive step had been taken. Through our efforts and the growing pressure of world opinion, the Soviet Union had been induced to enter into serious negotiations on the peaceful uses of atomic energy.

The concept of this Agency represents the ideas and ideals of the United States as stated by President Eisenhower in his December 1953 speech. It is not only a bold and imaginative new step toward the harnessing of atomic energy for the benefit of mankind; it is also a means whereby nuclear materials for weapons may be limited, reduced, and diverted from destructive purposes. It could become the keystone of a new era of atomic energy development free from the terrible fears of an unlimited arms race.

Functions and responsibilities of the International Atomic Energy Agency

The Agency of which I speak is within our grasp but it has not yet come into being. Whether it is established and, more important, whether the United States plays a full and constructive role in its operation and development, depends in no small part on the understanding and support given to it, now and in the future, by individuals like yourselves and the organization you represent.

Organizationally, the Agency will be made up of a general conference of all members of the United Nations, a board of governors numbering 23, and a director general. Power will reside primarily in the board of governors representing the more advanced countries in nuclear development plus a balanced geographical distribution. The general conference in which every nation has an equal voice, will have important powers of review, recommendation, and approval. A director general will be the chief executive officer of the Agency, selected by and responsible to the board. He will appoint and direct the staff of the Agency which will carry on day-to-day operations.

So much for the structure of the Agency. Once organized, what will it do? By the terms of its statute, the International Atomic Energy Agency is to "seek to accelerate and enlarge the contribution of atomic energy to peace, health, and prosperity throughout the world." The Agency is also to insure that its assistance is not used to further any military purpose.

The first job of the Agency is to accelerate the spread of atomic knowledge. At present, this knowledge is confined to a few countries. This siutation must be changed if the full promise of atomic energy is to be realized. The Agency will be a clearinghouse for information on atomic energy. It will stimulate the interchange of ideas, of scientists and experts. It will have a crucial role to play in the all-important task of training new cadres of scientists and technicians throughout the world. It will develop worldwide standards for protection of health and safety, and for the problem of waste disposal which looms large in the atomic age. These activities have great value in themselves, and will also encourage the search for new knowledge through research.

In addition to assisting the flow of ideas, the Agency will promote the application of atomic energy to basic human needs. Most important is the nuclear research reactor and the nuclear power reactor, which holds vast potential for countries with little or only high cost conventional fuel. Almost as dramatic is the multitude of uses of radioactive isotopes in medicine, agriculture, and industry. We estimate that American industry alone will soon save nearly $5 billion a year through the use of spectacular isotope techniques. It would be impossible now to place a dollar amount on the value of isotopes in reserach and medicine in the treatment of cancer, leukemia, and other dread diseases.

To do these jobs, the Agency will act as a pool for fissionable materials and as a channel for delivering them to the user country. These materials are to be supplied by member states on a reimbursable basis, unless otherwise agreed.

The United States has already announced that it will provide 5,000 kilograms of uranium 235 on terms to be agreed upon. In addition, we will match the sum total of all other contributions made until July 1960. The United Kingdom and the Soviet Union have also made small offers of fissionable materials to the Agency.

The Agency's most important responsibility begins when an allocation of fissionable material has been made. The safeguards system written into the statute is, I believe, one of the most significant developments in international relations in our time. I will not attempt to describe these controls in detail here, but I would emphasize that they will insure that one of the primary objectives of the Agency—that the assistance it makes available is not used for military purposes—is met. As laymen, we are aware of the double-edged nature of atomic energy, that the material which fuels a reactor is potentially fuel for a bomb.

Great pains have been taken to guard against wrongful use of the materials intended for peaceful use. These far-reaching controls, although they will apply only to projects developed with Agency help, have been unanimously accepted by the nations which will participate in the Agency.

Peaceful uses and disarmament

I wish to devote a few minutes to what I would like to call the submerged assets of the proposed Agency. There is in the International Atomic Energy Agency a potential for peace which you will not find in its statute. It has been very little heralded and largely overlooked. This is the very positive relationship the Agency may have to the solution of disarmament and international security problems.

In his Atoms for Peace speech before the General Assembly in 1953, President Eisenhower made this expectation clear. He expressed the hope that his proposal would help "to open up a new channel for peaceful discussions, and initiate at least a new approach to the many difficult problems that must be solved * * * if the world is to shake off the inertia imposed by fear, and is to make positive progress toward peace."

This hope has been borne out. The negotiations for the establishment of the International Atomic Energy Agency have so far been notably successful in opening this new channel for peaceful cooperation between the East and the West in a field of vital importance and symbolic significance for world peace. I am convinced that the very existence and successful functioning of the Agency may in time help to improve other aspects of international relations.

For example, the Agency may ease the way toward solution of some of the most difficult problems in the disarmament field. Specifically, the Agency can help in moving toward international control over nuclear weapons. In our disarmament discussions with the Soviet Union on this subject, the major area of disagreement has been the problem of controls.

However, the inspection and controls provided in the statute of the Agency have won worldwide approval, including that of the U. S. S. R. It is possible that the establishment and operation of such a system under Agency auspices would demonstrate the workability of international control and accustom the international community to the procedures involved. The confidence bred of experience is transferable. Our hope is that it will be easier to develop disarmament controls as a result of our experience with peaceful uses control.

The specter of nuclear war is at present held at arms length by the equilibrium that has developed between the atomic forces of East and West. If the possession of nuclear weapons spreads much beyond the United States, the United Kingdom, and the U. S. S. R., this equilibrium will be upset. If a fourth country, and a fifth, and perhaps half a dozen others, should obtain such weapons, the control problem would become infinitely more complicated.

The establishment of the Agency, and with it an internationally accepted system of controls, is urgent. Peaceful development of the atom throughout the world cannot be stopped. The question is, will it be done in safety or will it be done in chaos. The time we have is dangerously short. With the Agency system, other countries can be supplied with nuclear materials without simultaneously spreading the nuclear weapons threat. Peaceful development of the atom will proceed in the open, in the full light of day. Governments will become assured that their neighbors will not secretly produce nuclear weapons out of peaceful uses assistance. There will be a reduced temptation to produce their own in self-defense.

Anything other than international control would be both wasteful and dangerous. Each supplier nation would then have to establish its own control standards. Such unilateral standards, however good to begin with, would be eroded away in the process of economic and political competition between the suppliers of fissionable materials.

Answering the Agency's critics

During the past week I have spent considerable time at the Senate hearings on the proposed Agency. Both inside and outside Congress legitimate questions are being raised. People want to know whether the creation of this Agency and our membership in it is consistent with our foreign policy objectives and in the interests of the United States and its security.

"How can we be sure," it is asked, "that the nuclear materials to be provided on a worldwide scale for peaceful purposes won't be diverted and made into atomic bombs?" In answering this question I might point out that we would not be asking the Senate to ratify this treaty if we were not satisfied on this all-important matter.

Throughout the negotiations leading to the statute, the United States has emphasized the importance, indeed the absolute necessity of sound safeguard provisions. The United States position was sustained by the overwhelming majority of nations, and firm, thorough procedures are provided for.

Article XII of the statute sets out in detail the rights and responsibilities of the Agency in this field. The design of specialized equipment such as reactors is to be examined and approved to assure that effective safeguards can be applied. Complete records must be kept by receiving nations and progress reports made to the Agency. The Agency must also approve the means by which used nuclear fuels are processed. Materials produced as a byproduct must either be used for peaceful purposes under continuing Agency safeguards, or must be stored in Agency facilities. To verify all of these procedures and commitments, international inspectors will have free access at all times to all places, data, and persons involved with Agency projects.

This is the heart of the statute. For the first time in history a large number of states have declared their willingness to admit international inspectors within their boundaries, in the larger interests of international peace and security. This is a breakthrough of significance for the future.

In addition, there are other almost automatic safeguards which are inherent in the materials and equipment involved. For example, fuels for reactors supplied through the Agency will not be of the quality required for making weapons. Any nation which seized this material would not be able to make bombs out of it for months, and then only with expensive and complicated equipment and advanced technical knowledge.

The state thus attempting to violate the statute would be subject to immediate action. Further Agency assistance would be stopped, and the multi-million dollar facilities the country had built before receiving the materials would be useless. Meantime the international community would take whatever other measures might be necessary.

I consider that it is extremely unlikely that any member receiving Agency assistance would attempt deliberately to misuse it, and if they did miscalculate and take such reprehensible steps, they would gain no net military advantage.

The possibility has also been raised that an effort might be made secretly to siphon off material of military value and perhaps to hide it away in some remote place. There are natural, as well as manmade, safeguards against even this eventuality. For example, material taken from the core of reactors is highly radioactive, and would be immediately lethal unless handled with great care by heavy, complex machinery from behind massive concrete and metal shielding. Such activity could not in any case go unnoticed.

From all these factors I think it is apparent that man and nature conspiring together can provide a system which will assure adequate safeguards for all assistance given through the Agency and which will foster man's welfare rather than encourage any sinister intentions he might have.

Questions of a political nature, too, have been raised. For instance, it is asked, "Will United States materials and assistance go to Communist countries, perhaps eventually to be used against us?"

One of the most important services this agency can perform is to stimulate East and West to cooperate in a field of great mutual interest. Membership is open to all members of the United Nations and the specialized agencies, regardless of political orientation.

It is therefore true that United States materials furnished to the Agency could go to Communist countries. But with it will go the safeguards and controls I have described. In effect, this means that any satellite country, precisely like any other country receiving assistance, would have to open itself to continuing international inspection.

The American people have a legitimate concern as to what our part in the Agency will cost. "Does this mean," you may ask, "that the United States will be giving away vast quantities of nuclear materials or perhaps picking up the tab for the entire program?"

I hasten to assure you that this is not a so-called give away program. The statute is crystal clear on this point. Countries that furnish materials, services, equipment or facilities to the Agency are reimbursed unless they specifically agree to make a gift. The board of the Agency is to establish a scale of charges for the assistance it renders.

The United States offer of 5,000 kilograms of uranium 235 to the Agency is not an outright gift. It is banked by us and made available on terms to be agreed upon after the Agency comes into existence. There will, of course, be administrative expenses for the Agency, such as salaries and office expenses. It is estimated that the budget for these items for the first year will be in the neighborhood of $6 million. If the United States contributes one-third, which is the maximum allowed by Congress without specific authorization, our bill would be about $2 million. This is a relatively modest investment in an organization of such great promise.

It has been stated that the United States participation in the Agency could result in our giving away secret information. This, of course, is not true. Member states which provide materials and knowledge decide themselves what information they wish to make available to the Agency, while receiving states are obliged by the statute to inform the Agency of any discoveries made with Agency help. Clearly, we stand to add to our atomic information, not dissipate it.

I think you know that the United States has already developed an extensive bilateral atoms for peace program. We already have agreements with over 40 individual nations. "Why is it necessary," it might be asked, "to establish an international organization in this field? Won't the Agency duplicate what is already being done?"

I have tried to show that the Agency approach offers important advantages which are impossible to obtain through bilateral agreements alone. Nations will not always be willing to accept unilateral inspection by another state. Political and commercial competition among supplying countries could result in diluting and weakening the safeguards standards if we were to follow the road of bilaterals alone. I have touched on the relationship between the Agency and disarmament, and the avenue it opens for East-West cooperation. In addition, the Agency will make possible more economic use of nuclear materials and trained manpower which is scarce. Also, there will be a pooling of new discoveries made with Agency assistance by its recipients.

We all realize that the exact pattern of future scientific development is not always predictable and will not necessarily be restricted to those states with which we have bilateral relationships. The United States itself, therefore, may gain, in ways not now known, from research conducted with Agency help.

In some quarters there have been expressions of concern that the new Agency might provide an opportunity for Red China to seek international recognition. Is it possible for Red China to become a member of the Agency?

In all stages of development of the Agency to the present, it has been the government of the Republic of China that has represented China. It is this government that attended the conference which drafted the statute and that signed the statute. It is the government that will represent China in the Agency.

The only way the Red Chinese can be seated in any United Nations Agency is to challenge successfully the credentials of the representatives of the Republic of China. Our experience in the United Nations over a number of years makes us fully confident that this challenge, if made, will be soundly defeated. The prospective membership of the Agency should not differ substantially from that of the 11th General Assembly of the United Nations which, in November of last year, voted 47 to 24 to support the United States position on the question of Chinese representation.

Finally, the question is asked: "How can this Agency really work, since it has no final authority to enforce its rules and decisions?"

I know that the problem of sanctions is one of particular interest to the American people. As long as we are in a world of nation states, we will have to live with this question. However, the International Atomic Energy Agency has at its disposal a type of sanction not available to other international organizations except the United Nations itself. There the use of sanctions is often inhibited by the veto.

The Agency will be empowered, by a simple majority vote of its Board of Governors, to cut off further assistance in cases of violation. It can also demand return of fissionable and other materials already provided. This would affect not only new projects but the continuance of old ones.

If the Agency develops as an important instrument of international cooperation in this field, it is highly unlikely that any state which relied upon it for assistance would want to cut itself off from such a source of assistance, information, and supply.

There is always the remote hazard that an irresponsible government might suddenly seize plants and materials located in its territory. This could only be done by overt action. It would immediately become known to all the world and would invite rapid retaliation. The incident would then become a matter for collective political action by states whose security might be endangered, or by the United Nations. The Agency system, however, will reduce this possibility by lessening the advantages which would be gained by seizure and by insuring an early warning of aggressive intent.

Conclusion

As I mentioned at the outset, the statute of this Agency is before the United States Senate for its ratification. We are presented with a rare challenge to reaffirm our leadership in the fight to bring the energy of the atom to the benefit of all mankind. We must not fail to meet this challenge. It is theoretically possible, by the terms of the statute, for the Agency to come into being without the United States. Such a turn of events to me is unthinkable. It would have disastrous implications for our leadership in this field.

The vast potentialities for good in the atomic energy field can scarcely be conceived. The greatest need today is for knowledge. As the demand grows for nuclear power, for research, for isotopes, for the many varied applications of the atom, the International Atomic Energy Agency will become the means whereby the nations of the world can work in peace and harmony toward mutual development.

The world has grown too small to keep the wonders of atomic energy the exclusive property of a few states. If the spread of atomic knowledge is to be, then let it be done in a controlled and safeguarded way. This the Agency would assure.

The negative aspects of man's greatest discovery have so far dominated the atomic age. We have become beset with fears of the disaster that would result by the misuse of this awesome power. Now we have the opportunity to turn with equal energy and hope to the constructive side.

In this Agency one means is at hand.

It is for these overriding reasons that we have given such unyielding support to the creation of this Agency. We visualize it as a means whereby mankind can reach new heights of understanding, cooperation and welfare. With the proposed Agency we hold the key that can, in time, open the wonders of the atom to the benefit of all. We can hope in the words of Secretary Dulles that, "the splitting of the atom might conceivably lead to a unifying of the now divided world."

APPROPRIATIONS FOR THE EXECUTIVE OFFICE OF THE PRESIDENT AND SUNDRY GENERAL GOVERNMENT AGENCIES FOR FISCAL YEAR 1958

Mr. MAGNUSON. Mr. President, I move that the Senate proceed to the immediate consideration of H. R. 5788.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 5788) making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Washington.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

AMENDMENT OF TENNESSEE VALLEY AUTHORITY ACT OF 1933—BILL INTRODUCED

Mr. MARTIN of Pennsylvania. Mr. President, I introduce for appropriate reference a bill to amend the Tennessee Valley Authority Act of 1933 in order to

authorize the Tennessee Valley Authority to undertake certain financing activities, to require it to charge just and reasonable rates, to require it to make certain payments to the United States, and for other purposes.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2145) to amend the Tennessee Valley Authority Act of 1933 in order to authorize the Tennessee Valley Authority to undertake certain financing activities, to require it to charge just and reasonable rates and to require certain payments to the United States, and for other purposes, introduced by Mr. MARTIN of Pennsylvania was received, read twice by its title, and referred to the Committee on Public Works.

Mr. MARTIN of Pennsylvania. Mr. President, before explaining the purposes of the bill I should like to touch briefly on the most serious situation which confronts the American people today, namely, the astronomical size of the Federal budget, and the unbearable burden of taxes necessary to support it.

Our people are greatly disturbed about this grave matter. I am convinced that the only way the tremendous burden of taxes can be lightened and the budget reduced with safety to our national security is to consider the various spending agencies one by one, and examine their every aspect with care and good judgment. The purpose of this study should be to devise ways and means of getting these activities off the backs of the taxpayers and at the same time advance the worthy purposes of the agencies.

In like manner, the various sources of tax and other revenues of the Treasury should be examined with equal care and good judgment. The Treasury secures its funds from three major sources—taxes, borrowings through sale of securities to the public, and payments into the Treasury from the various agencies that are conducting business and quasi-business operations.

We have had before the Congress, and still have, an example of a Federal undertaking that should be examined in the manner I have described, to see what adjustments can be made for the benefit of both the taxpayers and the section of the country directly affected by the Agency. I refer to the Tennessee Valley Authority.

The annual report of the Tennessee Valley Authority for the fiscal year 1956 shows that the total assets of the Agency on June 30, 1956, were in excess of $2 billion. The funds which have been appropriated by Congress, plus the transfers of property, as of the same date, total slightly under $2 billion. I have had a tabulation prepared to show the proportionate share of the latter figure borne by the people of each State of the Union.

It shows that the people of my State, Pennsylvania, have furnished more than $147 million of the total—which is almost six times as much as Tennessee's share of less than $25 million. I think each Senator will be equally interested to see the share which the people of his State have contributed to this undertaking.

Mr. President, I shall not take the time of the Senate to read the tabulation to which I have referred, but I ask unanimous consent that it be printed in the RECORD at this point in my remarks.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Proportionate share of States in TVA appropriations of $1,977,500,000 (includes $45,200,000 of transfers of property from beginning) in fiscal year 1934 through fiscal year 1956.

	Millions of dollars
Alabama	20.4
Arizona	7.7
Arkansas	11.3
California	172.8
Colorado	18.6
Connecticut	35.0
Delaware	9.1
Florida	27.9
Georgia	26.9
Idaho	5.7
Illinois	150.9
Indiana	46.5
Iowa	27.5
Kansas	21.2
Kentucky	21.6
Louisiana	22.3
Maine	8.1
Maryland	36.8
Massachusetts	66.2
Michigan	102.0
Minnesota	34.8
Mississippi	11.1
Missouri	52.0
Montana	6.5
Nebraska	16.0
Nevada	2.8
New Hampshire	5.5
New Jersey	67.8
New Mexico	5.9
New York	294.1
North Carolina	29.7
North Dakota	5.3
Ohio	120.0
Oklahoma	21.0
Oregon	19.6
Pennsylvania	147.3
Rhode Island	10.7
South Carolina	13.6
South Dakota	5.7
Tennessee	24.7
Texas	84.0
Utah	6.7
Vermont	3.4
Virginia	29.3
Washington	31.8
West Virginia	15.6
Wisconsin	40.8
Wyoming	3.4
District of Columbia and possessions	29.0
Total TVA appropriations including transfers of property, fiscal year 1934 through fiscal year 1956	1,977.5

NOTE.—Proportionate shares borne by each State based on allocation of the Federal tax burden among the States and possessions as calculated by the Council of the State Chambers of Commerce and averaged for the fiscal years 1949 through 1956.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MARTIN of Pennsylvania. I am happy to yield.

Mr. GORE. The distinguished and able senior Senator from Pennsylvania a few moments ago cited from the record that the TVA has assets of $2 billion. The able Senator now refers to the contribution of his State and other States to the TVA.

Would the Senator not think it would be more accurate to describe these amounts as portions of investment in the TVA, or Pennsylvania's share in the assets of the TVA?

I raise this question because under our budgetary system—which I think is fallacious—a capital investment in a dam, which has an earning capacity and will have an earning capacity for perhaps 50 years or even longer, is treated in the self-same way as are expenditures for Government salaries, foreign aid, the building of a battleship, research and development, or expenditures of some other temporary or transitory nature. For that matter, expenditures for acquisition of valuable capital assets are accounted for in the budget in the same way as is some expenditure which is completely wasteful.

Here $2 billion has been invested in the TVA. Certainly it has, in the opinion of the junior Senator from Tennessee, proved to be a very sound and very profitable investment, because the net profits from the power operations of TVA last year amounted to more than $53 million.

Here is an investment in the development of a great river valley of the United States. It is not treated in exactly the same way as are projects for the development of the Ohio Valley, the Monongahela Valley, or other projects in the region represented by the able Senator, but all such projects are capital investments for the improvement and development of the country.

I suggest to the able Senator that the people of his State, through the payment of taxes to the Federal Treasury, have assisted the Federal Government in making this wise and sound investment. I am delighted that the able Senator has called attention to the enormous assets, of more than $2 billion, which are real assets of the United States Government, the United States Treasury, and the people of the United States.

Mr. MARTIN of Pennsylvania. I appreciate very much the fine and sensible comments of the junior Senator from Tennessee. I wish that all the money which the United States has invested could have been invested in projects which would make a return. All I am trying to do in this bill is to make the program equitable for all areas of the United States. I do not wish to see one section of the United States have an advantage over another section when it comes to inviting industry into that particular section. I am sure that the junior Senator from Tennessee, with his great fairness and patriotism, will, when he studies the bill which I have introduced, be very much in accord with what I am suggesting.

Mr. GORE. Mr. President, will the Senator further yield?

Mr. MARTIN of Pennsylvania. I yield.

Mr. GORE. I wish to express to the able Senator my appreciation for the pleasant association which I have enjoyed with him. He and I serve on the Senate Committee on Public Works. Although I have served on several commit-

tees in both Houses of Congress, it has not been my privilege as yet to serve on any committee on which the personal equation is so pleasant, or which affords opportunity for such joyful association among the membership of the committee as that enjoyed by the members of our committee. I have always found the able Senator from Pennsylvania tolerant, understanding, and very generous toward his colleagues. I shall look forward with a great deal of interest to reading and studying his bill.

Mr. MARTIN of Pennsylvania. The junior Senator from Tennessee is very kind. We have enjoyed a very fine and close association in our work on the Public Works Committee. I frankly confess that when I came to the Senate I did not feel that a great deal of importance attached to the Committee on Public Works. I now find it to be an extremely important committee. I have changed my opinion with respect to a great number of projects throughout the United States.

The very able and distinguished Senator from Tennessee has been extremely helpful in trying to prepare a program which will make for a better, stronger, and greater United States. The time has come when we must put in more time studying these various projects.

Many persons have said to me, "You are going back to the horse-and-buggy days, because you are advocating navigation on our rivers." Traffic has become so heavy that it is necessary to improve our rivers whenever it is possible to do so.

Mr. President, the problem of financing the continued expansion of TVA's electric operation assumes alarming proportions when viewed against a backdrop of congressional appropriations and transfers of property over the years, now aggregating nearly $2 billion. An extensive construction program, reaching indefinitely into the future, threatens to eat up more and more funds supplied by our citizens everywhere by way of the Federal tax route.

Today, with the urgent budget situation confronting us, it is even more essential to resolve the problem in the best interest of all of our citizens.

Let me hasten to point out that this does not mean that TVA is to be done away with or that I am here advocating such a step. But it does seem to me that we must all agree that TVA as it stands today has developed far beyond expectations and in many respects has become quite a different undertaking than what was originally contemplated when the TVA Act was passed almost a quarter century ago. I think, too, that we must give practical consideration to the facts as they presently exist and find a sound and realistic solution to the problem of supplying the power needs of the TVA area, in terms of adequate service to the people within the TVA area as it now stands; in terms of necessary facilities to provide such service; and in terms of financing the required facilities by appropriate measures under congressional control so as to take care fairly of the beneficiaries of TVA service and, at the same time, to protect fully the taxpayers of the country.

Any bill affecting TVA should continue and strengthen the control of the Congress over this vast business undertaking; not lessen or surrender it. The people of the United States have every right to expect the Congress to safeguard their interests in this matter.

Customers of TVA should contribute, through their bills for electric service, their fair share of taxes, not only at the State and local level, but at the Federal level as well. To the extent that, as a part of the business operations of the Nation, TVA escapes contributing its fair share, its customers are being subsidized and the taxpayers of the country are making up the deficiency in addition to their proper share.

Another serious defect in the TVA Act as it now stands has become increasingly apparent in recent years. Under the act, the Authority is not required to pay interest on any part of the investment of Federal funds in the TVA project.

In my judgment, there should be a study of the rates, contracts, and allocations of TVA, and the responsibility for this study should be placed in the Federal Power Commission. The Commission is qualified. It is the only agency of the Federal Government having complete and continuing records and information from which sound conclusions can be reached consistent with the directives of Congress.

For the reasons I have outlined, I have prepared a bill which will take the TVA off of the backs of the taxpayers, and provide a means by which the future power needs of the area can be fully met without undue burdens being imposed on local power users. This bill would:

First. Strengthen the control of the Congress over TVA and its operations;

Second. Limit the TVA to its present service area;

Third. Bring badly needed revenues to the United States Treasury and to local taxing bodies;

Fourth. Protect the interest which the Federal taxpayers now have in the undertaking;

Fifth. Remove TVA from the political arena;

Sixth. Permit TVA, under strict regulation by the Congress, to issue bonds to provide new facilities, thus giving to the TVA area an assured means of carrying out needed expansion programs without appropriations by the Congress;

Seventh. Leave TVA in an extremely favorable competitive position;

Eighth. Give to TVA's customers the protection of Federal Power Commission regulation;

Ninth. Take an important and constructive step toward meeting the present critical budget and tax situation that confronts us.

I believe that the bill I have introduced will, if enacted, accomplish these purposes.

Mr. President, I now ask unanimous consent to have printed in the RECORD at this point in my remarks a statement and supporting data in further explanation of this bill.

There being no objection, the statement and supporting data were ordered to be printed in the RECORD, as follows:

FINANCING TVA ON A BUSINESS BASIS

The taxpayers of this country are entitled to fair treatment in respect to every one of the taxes paid to the Federal Government—personal income taxes, Federal income taxes on business, and excise taxes. Each one of these taxes is paid by individual citizens. Many citizens believe that income taxes on business are paid out of profits, but that is not so. The businesses are collecting agencies only. Federal income taxes on business are an operating expense, and are so considered in the regulations prescribed by the Federal Government itself. The businesses and industries that pay them must include them in the price of the goods or services they sell, for there is no other source of the money if the business is to continue in existence.

I know of no more unfair and un-American situation for one man to be taxed, and another man in the same situation not to be taxed. The perpetuation of such unfairness can only lead to serious disaster.

No interest payments have been made on the hard-earned dollars that the people of my State have invested in TVA over the nearly 25-year period it has been in existence. I believe that it is only fair to them that some provision be made for the use of this tax money and for its eventual repayment.

In this the rights of the people of Pennsylvania are no different than the rights of every other homeowner, farmer, and businessman, small and large throughout the country, whose tax moneys have developed and supported this Federal venture for many years.

Now consider for a moment what has been taking place in the TVA area. The Tennessee Valley Authority was created by the Congress in 1933. It had for its main purpose, improving navigation and providing for flood control on the Tennessee River and its tributaries; providing for reforestation and the use of marginal lands; developing the area agriculturally and industrially; and operating Government properties at and near Muscle Shoals, Ala. The generation of electric power was to be incidental.

TVA is now of age. We may say that all of the primary purposes for which it was presumably established have been accomplished—navigation has been provided over the entire course of the Tennessee River from Knoxville to the river's mouth; all the dam and reservoir sites have been developed and the maximum degree of flood control achieved; substantial agricultural and industrial development has taken place and the Federal Government has located certain of its more important atomic energy projects in the TVA area.

But what about the incidental generation of electric power? The TVA itself in its latest report points out that all the major hydroelectric sites have long since been developed. Over the past few years, power construction has been largely devoted to steam plants, with the result that steam electric generation in fiscal 1956 totaled 43.1 billions of kilowatt-hours, almost three times the 14.4 billions of kilowatt-hours produced in the hydro plants of TVA's integrated system. Today this agency of the Federal Government has constructed in the Tennessee Valley region the largest single electric power system in the United States.

The problem of financing the continued expansion of TVA's electric operation assumes alarming proportions when viewed against a backdrop of congressional appropriations and transfers of property over the years, now aggregating nearly $2 billion.

An extensive construction program, reaching indefinitely into the future, threatens

to eat up more and more funds supplied by our citizens everywhere by way of the Federal tax route. In the previous session of Congress and again in this session, bills have been introduced to amend the TVA act. A number of major changes are proposed, including one purporting to remove TVA from being a public burden and an ever-present congressional fiscal problem—proposals which in my judgment, however, involve the fiscal responsibilities of the United States Government and, in the same instance, the integrity of the Congress.

It does not seem necessary to engage in lengthy discussion of the questionable features of the legislation submitted during the 84th Congress to permit TVA to issue so-called revenue bonds to finance capital additions to its power system. The frailties and harmful effects of such legislation were adequately covered by the analysis which I submitted at the time. For the most part, the legislation now before the Congress repeats the shortcomings of the earlier proposals; and so the whole problem of what to do about TVA remains.

Today, with the urgent budget situation confronting us, it is even more essential to resolve the problem in the best interest of all of our citizens.

Let me hasten to point out that this does not mean that TVA is to be done away with or that I am here advocating such a step. But it does seem to me that we must all agree that TVA as it stands today has developed far beyond and in many respects has become quite a different undertaking than what was originally contemplated when the TVA Act was passed almost a quarter century ago. I think, too, that we must give practical consideration to the facts as they presently exist and find a sound and realistic solution to the problem of supplying the power needs of the TVA area—in terms of adequate service to the people within the TVA area as it now stands; in terms of necessary facilities to provide such service; and in terms of financing the required facilities by appropriate measures under congressional control so as to take care of fairly the beneficiaries of TVA service and, at the same time, to protect fully the taxpayers of the country.

There are many phases of the problem, not the least of which has to do with the financial operations of the Authority.

In the light of the heavy financial burden imposed by National, State, and municipal budgets of recent years, considerable attention has been given to finding a way for TVA to finance its own future and thus avoid, if possible, the continuance of substantial appropriations and endless debate by the Congress. The Directors of TVA point out that available funds from TVA's operations are insufficient to meet their capital needs. In recognition of this inadequacy of funds, it has been suggested that TVA be empowered to issue bonds secured by power revenues.

There are real dangers lurking behind so-called revenue bonds, if they should be issued without the strictest kind of control by the Congress and the Federal agencies that are qualified to regulate such matters.

Any bill affecting TVA should continue and strengthen the control of the Congress over this vast business undertaking; not lessen or surrender it. The people of this country have every right to expect the Congress to safeguard their interests in this matter. They have no other protection.

Furthermore, the public has every right to expect the Congress so to direct TVA's business operations under the same rules that it makes and enforces for private business and without preferential treatment in the process. Let me call to your attention several of the rules that private business must meet, but that do not apply to TVA. These are most serious defects in the present situation, and which for the most part would be continued if any of the pending bills should become law.

For example, customers of TVA should contribute, through their bills for electric service, their fair share of taxes, not only at the State and local level but at the Federal level as well. To the extent that, as a part of the business operations of the Nation, TVA escapes contributing its fair share, its customers are being subsidized and the taxpayers of the country are making up the deficiency in addition to their proper share.

Obviously here is a situation where the users of TVA power—and I am speaking here particularly about the large industrial power consumers—are not paying through their power rates any amounts for Federal taxes, and entirely inadequate amounts for State and local taxes.

I do not have to tell you how necessary it is to plug tax loopholes of this kind that now exist to the detriment of the present Federal taxpayers. State and local bodies are also in a tight tax situation, and a fair and equitable payment in lieu of taxes to them would be most helpful in building new schools and in other ways helping them meet other urgent community needs.

Another serious defect in the TVA Act as it now stands has become increasingly apparent in recent years. Under the act, the Authority is not required to pay interest on any part of the investment of Federal funds in the TVA project.

The Comptroller General has consistently called the inequity in this situation to the attention of Congress and repeatedly recommended that the Authority be directed to pay interest on the Government's investment in the power program.

I agree with that contention and in my opinion the interest rate on the taxpayers' investment in TVA should be the same as that provided for the public in the purchase of revenue bonds. The public investor in TVA and the taxpayer investor in TVA should be treated on the same basis.

Moreover, the interest payments should be based not only on the appropriation investment, but also on the more than $355 million of accumulated net income, which instead of being paid to the Treasury, has been held out by TVA and used to build power facilities. Under the present law none of the $355 million of accumulated net income would be returned to the Treasury, although it constitutes just as real a contribution on the part of the taxpayers as the appropriations made by the Congress.

Furthermore, I feel very strongly that the present obligation of TVA to repay the taxpayers' investment in its power operations should be preserved.

Now, I direct your attention to the sale of power by TVA to its customers. The TVA report for fiscal 1956 indicates that over 57 percent of the power sold went to Federal agencies, with about 14 percent going to large industries. Some 29 percent was sold to four large municipalities and co-ops and if you were to analyze the disposition of this segment, you would find something less than 15 percent of TVA power goes to the farmers and residences of the region. So in spite of the clamor often raised, the small consumer is not the principal beneficiary of TVA.

Further, TVA's report shows the average rate paid by the Federal agencies in fiscal 1956 for the huge block of power they take to be 4.09 mills per kilowatt-hour. This is substantially more than the average of 3.85 mills charged by TVA to private industry, with some of its power sales to the big private industries being at an average rate as low as 3.03 mills per kilowatt-hour. On the other hand, the power furnished to Federal agencies is mainly at high-load factor and includes a large amount of non-firm service, so that it should logically be at a very low average rate. Thus it would appear highly possibly that because of this questionable rate differential, taxpayers' money used to pay the TVA power bills of the Government agencies is in effect providing a further subsidy for other customers of TVA.

This whole matter of the propriety of TVA's rates has been given serious attention by the Comptroller General in his various audits and he has indicated the need for a thorough investigation.

There is great lack of uniformity in the responsibility for approval of rates for the sale of power from Federal projects. Just recently, there was submitted to the members of the Interior and Insular Affairs and Public Works Committees of this body a memorandum dated January 4, 1957, in connection with Senate Resolution 281 to evaluate land and water resources conservation and development. In connection therewith, the several Federal and State agencies and others were asked to submit their views and suggestions. In responding to this request, the Federal Power Commission pointed out that under the Bonneville and Fort Peck Acts and the Flood Control Act of 1944, the Commission has been given responsibility generally for the approval of rates for the sale of power produced by projects constructed by the Corps of Engineers. The Congress has given the Commission no such general authority with respect to the rates charged by TVA. The Commission's statement urges, and I find much to commend its position which I believe soundly conceived, that the Congress should give the Commission complete authority to regulate rates for the sale of power from all Federal projects, including authority to initiate rate changes. In my judgment, there should be a study of the rates, contracts, and allocations of TVA, and the responsibility should be placed in the Federal Power Commission. The Commission is qualified and is the only agency of the Federal Government having complete and continuing records, from which sound conclusions can be reached consistent with the statutory directives of Congress.

In the sale of this power, TVA has entered into numerous contracts, the details of which cannot help having a significant bearing on its future commitments. As the load continues to grow throughout the TVA system, the extent to which TVA has obligated itself contractually becomes a highly important factor in the construction of new plants and facilities. This is directly related to the fact that in fiscal 1956, as TVA's report shows, it became necessary to add 1,469,500 kilowatts of installed capacity, an increment, as the report says, "second in size only to the 1,734,300 kilowatts added in fiscal 1955." And I might add that here is the primary reason for the very great demand for more and more money to support this huge Federal venture.

I can find nothing in the TVA Act which specifically commits the Federal Government or TVA to insure in perpetuity the future power needs of any industry, or, indeed, the region. Nevertheless, you will find in the latest annual report an attempt by TVA to rationalize the thesis that it seems to have adopted, that the Federal Government has accepted responsibility for supplying the power needs of the region without limit. Proceeding on this theory, TVA, by action of its Directors, embarked on an extensive and costly program of steam-generating capacity additions. This was revealed last year during the deliberations over the second supplemental appropriations bill in which TVA requested funds to build an additional generating unit at the John Sevier

plant. It developed that letters of intent had been issued on the basis of an opinion of TVA's general counsel covering the acquisition of the equipment for this new unit with the expectation of financing the costs in 1956 from power proceeds without additional congressional approval. Subsequent to this disclosure, and at the request of the Honorable JOHN TABER, the Comptroller General submitted a statement in the form of a letter dated March 26, 1956. Among other things, the letter disclosed that the TVA Directors had, on January 17, 1956, authorized the awarding of other letters of intent covering the acquisition of major equipment for six other steam-electric generating units.

The Comptroller General pointed out that, "in effect, the TVA board of directors has authorized the initiation of a major expansion program which will add 1,170,000 kilowatts of installed capacity to its system and will cost an estimated $178 million." The Comptroller General also pointed out that this expansion program had not been reviewed or approved by the Congress.

It seems to me that past events emphasize the need for the Congress to take steps to prevent their happening in the future. More, not less, control is needed if we are to meet our responsibilities to the people of this country.

For the reasons I have just outlined, I have prepared a bill which will take the TVA off of the backs of the taxpayers, and provide a means by which the future power needs of the area can be fully met without undue burdens being imposed on local power users. This bill would:

1. Strengthen the control of the Congress over TVA and its operations;

2. Limit the TVA to its present service area;

3. Bring badly needed revenues to the United States Treasury and to local taxing bodies;

4. Protect the interest which the Federal taxpayers now have in the undertaking;

5. Remove TVA from the political arena;

6. Permit TVA, under strict regulation by the Congress, to issue bonds to provide new facilities, thus giving to the TVA area an assured means of carrying out needed expansion programs without appropriations by the Congress;

7. Leave TVA in an extremely favorable competitive position;

8. Give to TVA's customers the protection of Federal Power Commission regulation;

9. Take an important and constructive step toward meeting the present critical budget and tax situation that confronts us.

We are nearing the end of a quarter of a century operation of TVA. As it has developed, the primary objectives for which it was conceived have largely been accomplished. As it has grown, its character has altered. What was originally looked upon as a relatively minor part has since become the dominant element. The present TVA act does not, in my opinion, result in effective control by the Congress over many of TVA's activities. The problems inherent in TVA's future are assuming startling proportions. The time would seem to have arrived for the Congress to solve these problems, not only from the standpoint of the people in the Tennessee region, but also in the interest of the taxpayers in all the States who, over the years, have borne the financial burden of building up this mighty enterprise.

I believe that the bill I have prepared will accomplish these purposes.

SUBSTANTIATING DATA

The electric operations of TVA, originally confined to marketing the output of hydro-generating stations at multiple-purpose dams, are now the major operation of the Authority. The main reliance for the generation of energy is its steam-electric stations. At the present time, 70 percent of the generating capacity owned by TVA, is steam-electric.

In order to meet the future power needs of the TVA area, large additional sums of money will be required. The Congress is showing increasing concern over requiring the taxpayers to finance the necessary program, especially in view of the fact that it will continue indefinitely.

Thus, it becomes important to the people of the country, as well as those living in the TVA area, that the Congress give searching attention to the need for adequate Congressional control over TVA's activities and the nature and extent to which public funds should continue to be furnished to an agency which has already realized the stated primary objectives of the legislation which established the agency.

The TVA Act of 1933 gave no indication that the Federal Government was contemplating an extensive business operation. Over the years, however, the power operations of the Authority, except for methods of financing and certain special privileges not available to ordinary business concerns, have become identical in character and methods of operation with those of the electric companies which serve the greater part of the Nation.

For example, the TVA Act of 1933 gave no indication that the incidental power operations of the Authority would extend outside the confines of the valley. Section 4 (j) of the act says "The Corporation * * * shall have power to construct dams, reservoirs, powerhouses, power structures, transmission lines, navigation projects, and incidental works in the Tennessee River and its tributaries and to unite the various power installations into one or more systems by transmission lines."

Despite this provision, the TVA system was expanded by expropriation of existing utilities until its service areas cover about 80,000 square miles, about half of which are outside the Tennessee River Basin. But in recent years the service area has remained the same. The geographic size of the TVA electric system has become stabilized at the present boundaries. This should be confirmed by the Congress to prevent further and unwarranted expansion.

The Federal taxpayers have financed TVA. To June 30, 1956, appropriations by the Congress and transfers of property previously built by means of appropriations, total $1,977,504,277.

The Federal appropriations are only a part of the contribution which the Federal taxpayers have made to TVA.

TVA has made a profit on its power operations which to June 30, 1956, had totaled $355,286,690. This project belongs to the Federal taxpayers who have financed the project. The money, however, has never been paid into the Treasury. It has been used to expand the property and operations. Therefore, the Federal taxpayers have an additional amount of $355,286,690 invested in the project.

TVA has, however, made certain repayments into the United States Treasury. Exclusive of the repayment of $65,072,500 of bonded indebtedness (which has all been paid off), they total $179,827,284.

Thus the Federal taxpayers have made direct contributions to TVA as follows:

Appropriations and property transfers	$1,977,504,277
Retained earnings	355,286,690
Grand total	2,332,790,967
Less repayments	179,827,284
Remainder outstanding, June 30, 1956	2,152,963,683

TVA has divided the above sums as follows:

	Power	Other	Total
Appropriations	$1,345,193,221	$587,074,360	$1,932,267,581
Transfers of property	19,365,266	25,871,430	45,236,696
Retained earnings	355,286,690		355,286,690
Total	1,719,845,177	612,945,790	2,332,790,967
Repayments	145,059,019	34,768,265	179,827,284
Remainder	1,574,786,158	578,177,525	2,152,963,683
Prepaid rents and contributions in aid of construction	774,362		
Total assets in power program (see p. A-4, 1956 TVA report)	1,575,560,520		

The above figures represent what appears on the books of TVA. There are additional items, however, which should be considered.

Early in the history of TVA, certain writeoffs were made in respect to a portion of the Government properties that were turned over to the Authority which totaled over $92,500,000. This was a direct loss to the Federal taxpayers. One of the results of the writeoff was that the 64,000-kilowatt Wilson steam-electric station was taken on the TVA books at zero dollars. It has been in operation ever since. While a portion of the writeoff may have been justified, it seems evident that a substantial part, especially that applying to Wilson Dam and Wilson steam-electric station, was greater than indicated by the facts.

The Comptroller's audits have not covered certain work done for TVA by other governmental agencies in the early years of the Authority's existence, and which has not appeared on TVA's books. For example, the CCC furnished labor on the reservoirs, rights-of-way, and pole setting for transmission lines, office buildings, and on the streets and sewer system at Norris town. The WPA also did work on the project, and so did the Army engineers.

No estimate of the value of the work done for TVA by other departments of the Government is available.

Interest at 3 percent on the funds employed by TVA in its power operations per TVA books would have totaled as follows:

Total interest at 3 percent	$337,011,775
Interest paid on funded debt	10,679,703
Remainder not paid	326,332,072

In respect to the payment of interest, the Comptroller General said in the 1956 audit of TVA:

"We have consistently recommended that the Authority be directed to pay interest on the investment in the power program and, if necessary for this purpose, that the rate of repayment to the Treasury of the investment as fixed by law, be modified."

The task force of the Hoover Commission computed the total taxes that TVA should have paid to June 30, 1953. Extending this estimate to June 30, 1956, gives a grand total of all taxes of $345,300,000. Based on

utility company experience over the same years the estimate works out as follows:

Federal taxes	$209,000,000
State and local taxes	136,300,000
Total taxes that should have been paid	345,300,000
Less payments in lieu of State and local taxes	41,400,000
Total deficiency in payments of Federal, State, and local taxes by TVA	303,900,000

However, TVA does not pay any Federal taxes. This means that the burden of the Federal taxpayers is heavier than it would be if TVA paid its full share of taxes like any other business does.

Thus the burden of the Federal taxpayers in respect to TVA is in two parts. The first is the visible part, which can be identified upon the books of the Authority, and the second is the invisible part, which while it is ignored by TVA and does not appear on its books, is nevertheless very real in respect to the taxpayers who put up the money to build the facilities for the TVA's power business.

Federal taxpayers' burden in TVA

Visible per TVA books:	
Appropriations and property transfers	$1,977,504,277
Retained earnings	355,286,690
Total per books	2,332,790,967
Hidden (estimated) and not on books:	
Lost Federal taxes on power operations	209,000,000
Interest (net) on taxpayers' investment in power	326,332,072
Writeoffs	92,500,000
Total hidden costs	627,832,072
Total taxpayers' burden before repayments	2,960,623,039
Repayments to U. S. Treasury	179,827,284
Total taxpayers' burden as of June 30, 1956	2,780,795,755

TVA's operations can be divided into those that produce income, and those that do not. For the fiscal year 1956, the TVA reported as follows:

Operation	Revenues from services	
	Amount	Percent of total
Power	$221,642,216	89.24
Fertilizer and munitions	[1] 17,018,280	6.85
Work for other departments and agencies	[2] 9,705,405	3.91
Total	248,365,901	100.00

[1] Operated at a loss in 1956.
[2] Done on a reimbursable basis.

In the same fiscal year, TVA carried on operations from which it received no revenue, as follows:

Operation:	*Expense for fiscal year 1956*
Navigation	$2,681,430
Flood control	2,512,574
Resource development	1,018,807
Loss on fertilizer and munitions in 1956	1,127,746
Total	7,340,557

TVA divides its property and operating expenses between power, which makes a profit under the Authority's accounting practices, and the other operations, which produce no revenue or operation at a loss.

This practice requires allocations of a substantial part of the property and expenses, which have been questioned from time to time.

Unless a change is made in the TVA setup, it is evident that the Authority will continue to be a growing burden on the Federal taxpayers in perpetuity.

The future administration of TVA should meet the following requirements:

1. There should be firm congressional control in keeping with the recommendations of the Comptroller General in his 1955 audit of TVA.

2. Its service area should be limited to the service area of its present resale customers. TVA should be prohibited from serving any additional direct consumers, without specific legislative approval. These new requirements, however, should be so worded as to permit TVA to exchange power and energy with other utilities.

3. The Federal Power Commission should supervise the accounts, rates, conditions of service and related matters of TVA. Congress has set up this agency to assume the burden of control over electric utilities, and its authority should be extended to cover TVA, which is the largest electric system in the United States.

4. Future operations and financing should be on a basis which would avoid any burden on Federal and local taxpayers.

The territorial limits of TVA have never been set forth. The TVA system has expanded and grown over the years with the result that, at the present time, nearly half of the area served with TVA power and a number of its plants, now lie outside the Tennessee River Basin. With no prescribed geographical area, TVA could continue to widen its operations limited only by its ability to finance. If there is to be further expansion of TVA, it should have the considered attention and specific approval of the Congress.

The first step in establishing a sound financing plan which would relieve the burden of TVA on the Federal taxpayers to the greatest possible extent, would be to allow TVA to issue bonds up to an amount not to exceed $750 million at any one time, to be secured only by power revenues of TVA. The term of such bonds should not be more than 50 years, but a shorter period should be permissible if better terms could be so obtained. To prevent any possible misunderstanding it should be made plain that the bonds would not be obligations of the Federal Government, would be fully taxable in respect to principal and interest at the Federal, State, and local level, could be used only to finance facilities to be owned and operated by TVA, and would be issued only with the consent of the Congress and with the approval of other Federal agencies having jurisdiction.

As the second step in establishing a sound financing plan, TVA should be required to charge rates sufficient to:

1. Pay all operating expenses, including services of other agencies and departments in its behalf.

2. Set aside annually an appropriate amount for depreciation.

3. Pay to the taxing authorities—Federal, State, and local—taxes consistent with those paid by other taxpaying businesses.

4. Pay all service charges on the bonds.

5. Pay into the Treasury an appropriate return on the taxpayers' equity in TVA's power assets.

6. Repay over their remaining life—say over a period of 40 years—the taxpayers' investment in existing power facilities.

TVA should pay its full share of all taxes including Federal taxes, just as all taxpaying businesses in the United States are required to do. The determination of the amount of Federal taxes which the TVA should pay should be delegated to the Federal Power Commission. This agency is fully qualified for the task and would be able to establish fairly and accurately the amount of Federal taxes which TVA should bear.

In fairness to the taxpayers of the States and the communities in which TVA operates, the properties and operations of TVA should be subject to taxation at State and local levels on the same basis as any other citizen. This would protect and strengthen the financial position of the local taxing bodies within the TVA area. It would provide more complete local control over their tax resources. In making such a provision, Congress would be helping the States and their political subdivisions to meet better their own fiscal problems by providing new sources of funds for the construction and operation of schools, hospitals, highways, and similar functions.

TVA has never paid any return or interest into the United States Treasury. It should do so at a rate identical with the average interest rate of the bonds issued by TVA. This insures that the "return" on the taxpayers' investment will be treated on the same basis as investment made by public bondholders of TVA.

The taxpayers' investment in TVA for fiscal year 1956 was as follows:

	At end of fiscal year—	
	1955	1956
Net U. S. Treasury funds exclusive of bonds outstanding	$1,217,387,039	$1,219,490,408
Accumulated net income	301,427,523	355,286,690
Total	1,518,814,562	1,574,786,158
Average for year	$1,546,800,360	

At an interest rate of 3¼ percent, the annual return on the taxpayers' investment in TVA's power facilities would amount to $50,271,000.

The effect of the changes proposed by the plan outlined herein is illustrated by comparing TVA's income statement for fiscal year 1956 with an income statement for the same year after the necessary adjustments have been made to conform with the requirements of the plan.

Power operations, fiscal year 1956, revenues and expenses

	Millions of dollars	
	Actual	Adjusted
Revenues from the sale of electric energy	$221	$274
Rents and other revenues	1	1
Total operating revenues	222	275
Operating expenses, exclusive of depreciation and payments in lieu of taxes	126	126
Depreciation	38	38
Payments in lieu of taxes:		
Federal income	0	[1] 37
Other than Federal income	4	[1] 23
Total operating expenses	168	224
Net revenue from operations	54	[2] 51

[1] Payments in lieu of taxes foregone for the purposes of this comparison have been based on the study of the Hoover Commission. It seems probable that the findings of the FPC would approximate the figures shown.
[2] Requirement for interest (return) on taxpayers' investment in TVA's power facilities would be about $50 million.

The comparative cash position for fiscal year 1956 is outlined in the following table:

Power operations, fiscal year 1956, cash requirements exclusive of construction

	Millions of dollars	
	Actual	Adjusted
Operating expenses, exclusive of depreciation and payments in lieu of taxes	126	126
Payments in lieu of taxes:		
Federal income	0	37
Other than Federal income	4	23
Interest, 3¼ percent	0	0
Sinking fund	0	0
Repayment of appropriation investment	59	[1] 39
Return on average appropriation investment at 3¼ percent	0	50
Cash surplus	33	0
Total	222	275

[1] Minimum payment under proposed plan.

It should be noted that an increase of only 24 percent in the revenue from the sale of power would be ample to meet the requirements of this plan. This would not be as drastic as it might appear at first glance.

For example, municipalities and co-ops served by TVA purchased $65.9 million worth of power in fiscal year 1956. During that period their combined net income was $26.9 million. Thus, taken as a whole, these municipal retail bodies could stand a TVA rate increase of 39 percent without raising rates to their ultimate consumers.

The direct industrial customers of TVA, other than Federal agencies, during fiscal year 1956 paid an average of 3.85 mills per kilowatt-hour for their energy. This compares with 6.98 mills paid by the large lighting and power sales of the distributors of TVA power, and 9.13 mills for large light and power sales for the entire utility industry.

Of course, any increase in rates charged by TVA to its customers would not necessarily be an across-the-board adjustment but could be distributed so as not to impose an unreasonable burden on any of them in accordance with a fair determination by the Federal Power Commission made after public hearings.

Any adjustments in TVA's charges for power that might be required call not only for technical competence but a high degree of impartiality in the treatment of the problem. The TVA board and staff, though competent, should not in fairness be put in the position of making the final determination of the propriety of its charges to TVA power users. The best interests of both TVA and its customers can be served by placing the responsibility for regulation of TVA's rates in the Federal Power Commission. The Commission itself has suggested such action to the members of the Senate Committees on Interior and Insular Affairs and on Public Works in connection with Senate Resolution 281 as recently as January 4, 1957. The Federal Power Commission, as an agency of the Congress, is eminently qualified by experience and knowledge to undertake this task and, furthermore, has expressed its willingness to do so. Making the Commission responsible for equitable charges to TVA's customers consistent with fair treatment of the taxpayers would seem to be a sound solution.

It seems evident that TVA will get through the fiscal year 1957 without experiencing any financial difficulty.

Examination of the 1958 budget of the United States indicates that under the present rates and methods of operation, TVA can carry forward its construction program through fiscal 1958 without substantially affecting its cash position. The budget shows the following figures:

	Thousands of dollars			
	1956	1957	1958	1958 [1]
Cash requirements:				
Operating expenses (excluding depreciation)	128,024	137,965	153,182	153,182
Payments to general fund of U. S. Treasury	45,000	30,000	10,000	10,000
Retirement of bonds held by U. S. Treasury	14,000	----------	----------	----------
Total	187,024	167,965	163,182	163,182
New construction	64,270	82,626	104,919	104,919
Total	251,294	250,591	268,101	268,101
Net change in assets and liabilities	(915)	3,747	873	873
Total	250,379	254,338	268,974	268,974
Cash resources:				
Operating revenues	219,979	236,684	257,046	257,046
Less liquidation of advance collection of revenues	250	220	209	209
Balance	219,729	236,464	256,837	256,837
Appropriations by Congress	47,112	27,418	8,224	----------
Appropriations by Congress rescinded	----------	(6,500)	----------	----------
Total	266,841	257,382	265,061	256,837
Balance	16,462	3,044	(3,913)	(12,137)
Cash:				
Beginning of period	42,919	59,381	62,425	62,425
End of period	59,381	62,425	58,512	50,288

[1] Excluding appropriations.

The figures speak for themselves. They show that in fiscal 1958 with a nominal appropriation by Congress of $8,224,000 new construction requirements of $104,919,000 can be met while the cash at the end of 1958 is maintained at $58,512,000 only $3,913,000 below that shown for the end of fiscal 1957. The last column indicates that even if Congress made no appropriation for TVA in fiscal 1958 cash remaining would still be substantial, amounting to more than $50 million. Thus it would appear that under present conditions TVA can undertake new construction of between $95 million and $100 million without the necessity of obtaining additional appropriations from Congress or other funds from outside sources.

The consummation of the proposals made herein would be advantageous to:

1. The TVA area and its people.
2. The taxpayers of the Nation.
3. The Congress of the United States.

TVA and the people it serves, would in the end receive the greatest benefit. For the first time since 1933 the Authority would stand on its own feet, and pay its way like any sound business should. It could no longer be charged with luring industries away from other areas by the offer of low-cost subsidized power, and prospering at the expense of other portions of the Nation through subsidy and special privilege.

For the first time, TVA would have a sound, forward-looking financial program. By proper handling of its rates, TVA could generate enough cash which, when combined with the right to issue bonds, would enable TVA to carry forward an extensive construction program without the need for appropriations by the Congress.

GENERAL GOVERNMENT MATTERS APPROPRIATIONS, 1958

The Senate resumed the consideration of the bill (H. R. 5788) making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes.

Mr. MAGNUSON. Mr. President, the bill under consideration covers funds for the various divisions or subdivisions of the Executive Office of the President, the Emergency Fund for National Defense, American Battle Monuments Commission, Foreign Claims Settlement Commission, and Subversive Activities Control Board, for fiscal year 1958.

The amount of the bill is $16,010,370, which is $11,000 less than the House bill, and $4,911,500 less than the budget estimates.

The committee recommends a reduction for special projects in the Executive Office of $125,000, and an increase is recommended for the office of Defense Mobilization of $114,000, which is a fixed charge on the retirement fund.

The unobligated balance is added to the emergency fund of the President, for which we have appropriated $1 million each year. For the next fiscal year we also recommend an appropriation of $1 million for the Emergency Fund. However, there is on hand $900,000 as an unexpended balance, which will carry over. Therefore, there will be available $1,900,000.

In the House version of the bill there is language which would transfer five supergrades to the National Security Council. It is recommended that this language be stricken in view of the fact that there is a bill on this subject pending before the Committee on Post Office and Civil Service.

A proviso is added to the general provision fixing the maximum amount allowable for purchase of automobiles, to allow for special equipment for law enforcement and intelligence agencies. That includes also police cars and fire cars, and equipment of that kind.

Before we discuss the bill, Mr. President, if there is to be any discussion of it, I ask unanimous consent that the committee amendments be agreed to en bloc, that the bill as thus amended be regarded for the purpose of amendment as original text, and that no points of order be waived.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendments agreed to en bloc are as follows:

Under the heading "Title I—Executive Office of the President—Special Projects," on page 3, line 2, after the word "specify", to strike out "$1,500,000" and insert "$1,375,000."

Under the subhead "National Security Council—Salaries and Expenses," on page 4, line 18, after the figures "$700,000", to strike out the colon and *"Provided,* That, in accordance with section 505 of the Classification Act of 1949, as amended, but without regard to the numerical limitations contained therein, the National Security Council is hereafter authorized to place two additional positions in grade GS–18, 1 additional position in grade GS–17, and 2 additional positions in grade GS–16 of the general schedule established by said act."

Under the subhead "Office of Defense Mobilization—Salaries and Expenses," on page 5, line 8, after the word "appropriation", to

strike out "$2,100,000" and insert "$2,214,000", and, in line 9, after the word "which", to strike out "$150,000" and insert "$182,000."

Under the heading "Funds Appropriated to the President—Emergency Fund for the President, National Defense," on page 6, line 14, after the figures "$1,000,000", to insert a comma and "together with the unobligated balance on June 30, 1957, of the appropriation granted under this head for the fiscal year 1957."

Under the heading "Foreign Claims Settlement Commission—Salaries and expenses," on page 9, at the beginning of line 4, to strike out "$15,000" and insert "$18,500."

Under the heading "Subversive Activities Control Board—Salaries and expenses," on page 9, line 18, after the word "exceed," to strike out "$20,000" and insert "$30,000."

Under the heading "Title II—General Provisions—Departments, Agencies, and Corporations," on page 10, line 4, after the figures "$1,950," to insert a colon and *"Provided,* That the cost of any special feature or equipment required for the use of the vehicle in carrying out investigative, law enforcement, or intelligence duties shall be in addition thereto."

Mr. DOUGLAS. Mr. President, I wonder whether the Senator from Washington will yield so that I may ask him some questions.

Mr. MAGNUSON. I yield to the Senator from Illinois.

Mr. DOUGLAS. I congratulate the Senator from Washington on the work he has done on this appropriation bill. Am I correct in understanding that during the past 5 years the amount which the President has been asking for the conduct of the Executive Office has greatly increased?

Mr. MAGNUSON. It has greatly increased. The grand total for the Executive Office, which includes the Executive Mansion, the National Security Council, the Office of Defense Mobilization, the emergency fund for the President, special projects, the Bureau of the Budget, the Council of Economic Advisers, the Office of Defense Mobilization, and the President's Advisory Committee on Government Organizations has increased in this way: In 1952 the grand total was $13,746,000.

Mr. DOUGLAS. That figure included funds appropriated for emergency national defense expenses.

Mr. MAGNUSON. I will give the subtotals for the Executive Office during each year.

For 1952, for the Executive Office, the amount was $8,166,000. In 1953, it was $8,725,000. In 1954, the amount was $9,050,000. In 1955 it was $8,532,000. In 1956 it was $10,395,000. In 1957 it is $10,715,000. The estimate for 1958 is $12,047,000.

Mr. DOUGLAS. The President wanted to get an increase in the cost of running the Executive Office of almost 50 percent from 1952. Is that correct?

Mr. MAGNUSON. The Senator is correct. For the White House Office proper—and this is a little amusing, of course, in light of some statements which were made in 1952, but I am not one who wants to deny any President what he thinks he needs—in 1948, which was the year when Mr. Truman was elected, and in 1949, when he took office as a result of the election, the White House estimates were $969,000. In 1952, they went up to $1,883,000. In 1953 they were $1,953,000. In 1954, they were $1,800,000. In 1955, the figure was $1,895,000 or $1,900,000, practically. In 1956, the figure was $1,882,000. In 1957 it was $1,875,000. For 1958, the figure is $2,051,000.

Mr. DOUGLAS. Am I correct in understanding that for the White House Office the President is asking for a figure which is twice as great as it was in 1948?

Mr. MAGNUSON. The Senator is correct. Those are the figures. I remember that in 1952, a great many statements were made to the effect that Mr. Truman was spending too much money. It was suggested that the yacht *Williamsburg* be withdrawn from service because it cost too much to operate. There was a great deal of talk about that line. I do not believe that any President should be denied what he thinks he needs.

Therefore, we have not cut the amount. However, I am glad that the Senator from Illinois has brought this matter to the attention of the Senate. There has been a great deal of what might be called the pot calling the kettle black.

Mr. DOUGLAS. Mr. President, do I understand correctly that, according to the House hearings, at pages 210 and 211, the White House has 72 mechanical, maintenance, and domestic employees; and that the President has 272 employees in the White House Office?

Mr. MAGNUSON. The Senator is correct. The hearings before the House committee show the number of employees in the White House. They are broken down also as to mechanical and maintenance employees.

Mr. DOUGLAS. On page 210 of the hearings the number of mechanical, maintenance, and domestic force employees is shown as 72. On page 211 the number of employees, shown in the third column, is 272.

Mr. MAGNUSON. The Senator is correct.

Mr. DOUGLAS. That makes a total of 344. Is that correct?

Mr. MAGNUSON. The Senator is correct.

Mr. DOUGLAS. In addition to that, there is the Secret Service, which is carried in the Treasury Department budget. The duties of the Secret Service are largely confined to the protection of the President. Therefore the figure before us does not include the cost of the Secret Service or the White House Police. Is that correct?

Mr. MAGNUSON. The Senator is correct.

Mr. DOUGLAS. May I ask if the naval aide, the military aide, and the air aide are included in this budget, or whether they are carried under the appropriations for the Department of Defense?

Mr. MAGNUSON. They are not included. They are under the appropriations for the Department of Defense.

Mr. DOUGLAS. And any assistants they may have are also provided for in the Department of Defense appropriations. Is that correct?

Mr. MAGNUSON. The Senator is correct.

Mr. DOUGLAS. May I ask about the helicopters? There has been some publicity to the effect that two helicopters have been ordered for the President's use. I understand they will cost approximately $201,000 each. May I ask if they are included in the President's budget, or whether they are going to be in the budget of the Department of Defense?

Mr. MAGNUSON. They are in the Department of Defense budget. They are to be furnished to the President by the Department of Defense. The maintenance, of course, and personnel, will be under the Department of Defense.

Mr. DOUGLAS. Then, am I to understand also that the cost of the airplane used by the President and aircrew are not included in the President's budget, but are carried in the appropriations for the Air Force?

Mr. MAGNUSON. The Senator is correct.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. GORE. It seems to me I recall someone said that any further reduction in the national defense budget would impair the security of the country and the peace of the world. Would that be true of the two helicopters?

Mr. MAGNUSON. The two helicopters are in the Defense budget. I imagine any curtailment would hit the helicopter division as well as other divisions.

Mr. DOUGLAS. According to newspaper reports, the two helicopters have been ordered. Can the Senator from Washington inform me whether they have been authorized by Congress?

Mr. MAGNUSON. I cannot answer that question. It is my best impression that as such they have not been authorized by Congress, but that the Department of Defense, in its general authorization, has the authority to order helicopters and then to assign them to this particular tour of duty.

Mr. DOUGLAS. To what degree does Congress, the legislative body of the country, have any control over the budget of the executive department, if the executive department is always able to get personnel expenditures charged to other departments without specific authorizations by Congress?

Mr. MAGNUSON. Congress has very little control over it. Of course, the President of the United States is the Commander in Chief of the Armed Forces, and it devolves upon the Armed Forces to furnish him with what he thinks he may need.

I suppose, as to helicopters for use at the White House, the only thing the Committee on Appropriations can do is to state in the report that none of these billions of dollars for defense shall be used for the purchase of helicopters for use at the White House. Such a statement could be placed in the report. Whether Mr. Wilson would abide by such a direction, I do not know.

But Congress has never passed upon this matter; and as the Senator from Illinois well points out, it is not included in this budget.

The budget provides for a mechanical and maintenance force, and a domestic force consisting of a maitre d'hôtel, housekeeper, assistant housekeeper, first butler, second butler, a third butler, head chef, second cook, 4 cooks, valet, 5 doormen, 5 housemen, head laundress, pantrywoman, and 8 maids.

Mr. DOUGLAS. I think the Senator has made an error. I think there are four butlers. There is a first butler and a second butler, and then there are two other butlers. So that would be a third and a fourth butler.

Mr. GORE. Is this Republican economy?

Mr. DOUGLAS. Is it Republican simplicity?

Mr. MAGNUSON. Provision is made for a mechanical and maintenance force, which includes a foreman gardner and 13 gardners—men who work around the White House and who are necessary for its maintenance.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. DIRKSEN. Once upon a time there was a President of the United States by the name of Franklin Delano Roosevelt. He loved nothing so much as to get aboard a Navy yacht and get himself away from the cares and fevers of his official chores for a little while. Nobody ever quarreled about that.

Mr. Roosevelt's successor was a President by the name of Harry Truman, of Missouri. He also loved to get out on a yacht now and then and steam up and down the Potomac River and Chesapeake Bay.

That yacht was charged to Navy appropriations, not to the executive branch. I am advised that the maintenance and care of the yacht, and all that went with it, every year far exceeded the entire budget for the two helicopters which are being so abundantly discussed on the Senate floor at present.

So we cannot have it both ways. The cost of maintaining the yacht was charged to defense appropriations. In this instance, we are asked to supply two helicopters, so that the President can more expeditiously pursue his duties. If my friends can make any political capital out of that, let them do so.

Mr. MAGNUSON. I do not think either the Senator from Illinois or the Senator from Washington are trying to make political capital out of this. If we were, we would not have approved the item. If helicopters are what the executive branch needs, I think it should have them. But in 1952, the Republican administration was yelling to high heaven about the high cost of Government.

In this instance, the President is asking for the amount which he thinks is needed. I think the President of the United States should be entitled to what he thinks he needs to maintain the dignity of the White House and for the incidental duties which are necessary for its operation.

All I am saying is that this is somewhat amusing, because I remember reading in 1953, immediately after the inauguration, that the first task of this businesslike administration would be to stop the reckless spending of money, including the spending at the White House, and that the administration was going to abandon the yacht *Williamsburg.*

President Truman used the *Williamsburg;* of course, he did. I was a guest on that yacht frequently, as the Senator from Illinois knows. That was President Truman's only recreation. Harry Truman did not play golf. He did not play bridge. He plays another form of cards. [Laughter.] But cruising on the *Williamsburg* was his only recreation. No one objected to the President of the United States cruising up and down the Potomac if he wanted to. He was in close touch with the affairs of the Government, as is the present President when he is playing golf or wherever he may be.

What the Senator from Illinois and I are trying to point out is that it is somewhat amusing to read the statements about what the present administration is doing, and then to recall the appropriation of $900,000 which Mr. Truman had in the years he was in office. Now it is over $2 million—more than double the amount in Mr. Truman's administration.

I think the public are entitled to know this and to make some comparisons. We are not objecting to the amount. We did not cut it one dollar. We never have. We did not cut the appropriaton for the White House in either Mr. Truman's or Mr. Roosevelt's administration. I do not know what the Roosevelt budget was, but I suppose it was around $900,000. But now it is more than $2 million. That is all right, but I do not like someone who asks for $2 million, and who is going to get it, to point his finger at the man who ran the White House with $900,000, and who happened to use a yacht in which to cruise up and down the river.

It was said at the beginning of this administration that it would be a businesslike administration, and that all frills would be eliminated. I do not know about the helicopters. Someone said the other day that we should recommend 3 or 4 helicopters, because it was stated in the press that if the President could save 10 minutes time in getting to the airport by using a helicopter, he should have a helicopter for all of his travels, because that would mean that he could spend twice as much time in the White House as he spends there now. So helicopters were highly recommended. I think that if the President can save time with them, he ought to have them.

I have watched the appropriations for the past 6 or 7 years in 2 administrations. Now the amount is doubled. In 1952, Mr. Truman was severely criticized because he cruised on the river in the *Williamsburg.* But his budget for the White House was less than half what the present budget calls for.

Mr. DOUGLAS. Mr. President, will the Senator further yield?

Mr. MAGNUSON. I yield.

Mr. DOUGLAS. Did the Senator from Washington notice the appropriations for the Bureau of the Budget?

Mr. MAGNUSON. Yes; they are included in the bill.

Mr. DOUGLAS. That is the agency which rides herd on other Government agencies; is it not?

Mr. MAGNUSON. Yes.

Mr. DOUGLAS. I find that in 1952 the Bureau of the Budget spent $3,608,000. For 1958, the President has asked for $4,400,000, an increase of $800,000, or almost 25 percent. Does not the Senator think that some good advice to the Bureau of the Budget would be: "Physician, heal thyself"?

Mr. MAGNUSON. I think that would be appropriate. The House allowed $4,200,000, which is $270,000 more than last year's figure. No appeal was made, so we have left the amount the same as the House figure.

Mr. DOUGLAS. But does not the Senator think it a good principle that the Bureau of the Budget should practice what it preaches?

Mr. MAGNUSON. I think that is what they should do. But the amounts for all the executive departments are up—Executive Mansion and Grounds, Council of Economic Advisers, Office of Defense Mobilization; in fact, all of them are up, except the amount for special projects, from which we cut $125,000. All the others are up in varying percentages.

Mr. DOUGLAS. Does the Senator from Washington have any estimate of the total cost of running the White House and the Executive Office of the President? If we include helicopters, special airplanes, and other capital expenditures chargeable to other departments; if we include personnel, guards, and police for the President; if we include naval aides; if we include all the other items, does the Senator from Washington have any idea of what the total cost to the taxpayers is?

Mr. MAGNUSON. I do not have that information, Mr. President, but I think it probably would be from 70 percent to 80 percent more than the amount requested here, and perhaps more than that. It might be double, if salaries were included.

Mr. DOUGLAS. The Senator from Washington is very careful in his statements, and what he is saying is that it probably amounts to a total of $3,500,000 or $4 million. How far we have come from the days of Thomas Jefferson, who greeted the people while he was wearing wool stockings, and acted as his own butler; and how far we have come from the days of Grover Cleveland, who had only one secretary in the White House, and who answered the telephone himself.

Mr. MAGNUSON. I rather wish Mr. Eisenhower would answer the telephone himself, at the White House, it might be very helpful.

Mr. DOUGLAS. Of course that would be impossible, these days.

Mr. MAGNUSON. Of course the office has grown.

Mr. DOUGLAS. I do not desire to be critical of the President, whoever he may be. I desire to let the President have whatever he wishes within some limits.

However, there is no check except by means of public opinion, on these expenditures. If Members of Congress are critical of the President, they are said to be attacking him improperly. As a result, criticism tends to be stifled, and Members of Congress hesitate to move to make cuts in the budget.

However, the corollary of that situation should be that the President must exercise self-restraint; is that not correct?

Mr. MAGNUSON. Yes. Of course, today the White House has to make many more expenditures than it had to make in the past. But the Senator from Illinois is correct; and one who occupies the White House is pretty much on his own honor in dealing with such matters, which are the requirements of the job.

Mr. DOUGLAS. We do not wish to be carping as regards the President's expenditures; instead, we wish to be generous to him. So we say, in effect, "Take whatever you wish." Is that an approximately correct statement of our position? But should he not restrain his desires?

Mr. MAGNUSON. Yes.

Mr. GORE. And he wishes to have about twice as much as the previous President wished to have; is that correct?

Mr. MAGNUSON. That is correct.

Mr. DIRKSEN. Mr. President, I wish to be sure that the RECORD in this case is correct.

In 1952, the appropriations for the White House amounted to $1,883,615. In 1957, they were $1,875,000. There is a very substantial difference between those two figures and the estimates for 1958. But I point out that during the past 5 years there have been quite a number of pay increases; and inasmuch as 80 percent of the White House budget is devoted to salaries for personal services, I think the present budget, under the Presidency of Dwight David Eisenhower, compares very favorably, if not better than that, with previous ones. On that basis, Mr. President, I am quite content to let the RECORD stand.

Mr. MAGNUSON. Yes, Mr. President; and I wish to add that there has never been any cloak over this matter. The White House submits its budget, based on what it needs. The House of Representatives happened to put the comparison in the RECORD; and I read the House figure.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H. R. 5788) was passed.

Mr. MAGNUSON. Mr. President, I move that the Senate insist upon its amendments, request a conference thereon with the House of Representatives, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MAGNUSON, Mr. HILL, Mr. ELLENDER, Mr. ROBERTSON, Mr. DIRKSEN, Mr. SALTONSTALL, and Mr. MUNDT the conferees on the part of the Senate.

AMENDMENT OF MEDALS OF HONOR ACT

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1463) to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle, which was, in lines 9 and 10 strike out "'Appropriations" and insert "SEC. 3. Appropriations."

Mr. MAGNUSON. Mr. President, the House amendment is a technical one; it merely adds a section number and heading.

I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

AMENDMENT OF THE SMALL RECLAMATION PROJECTS ACT, 1956

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 293, House bill 2146, to amend the Small Reclamation Projects Act of 1956. Our purpose is to have the bill made the unfinished business.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 2146) to amend the Small Reclamation Projects Act of 1956.

ORDER FOR ADJOURNMENT TO TOMORROW, AT NOON

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until tomorrow, at 12 o'clock noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAY, RETIREMENT BENEFITS, AND WORKING CONDITIONS OF FEDERAL GOVERNMENT EMPLOYEES

Mr. NEUBERGER. Mr. President, for the past few days I have been presiding, as subcommittee chairman, over the subcommittee charged with looking into the pay, retirement benefits, and working conditions of employees of the Federal Government. This is a subcommittee of the Senate Committee on Post Office and Civil Service. I must confess that I have been extremely disturbed—both as a citizen and as a Senator—regarding what we have found.

We have discovered that in numerous instances, particularly in the Post Office Department, the men and women who are employed by the United States Government are working for pay which does not permit an American standard of living.

Employment by the United States Government was once considered a blue-ribbon opportunity. But, by contrast, our committee is learning that now nearly all other types of employment pay far more generous and far more rewarding salaries than those paid to Federal Government workers, especially to employees of the Post Office Department.

We are discovering that the Post Office Department employees, at a wide variety of levels, earn an average of approximately $4,400 a year, as compared with salaries of from $5,000 to nearly $7,000 in many trades which formerly paid their practitioners less than the salaries earned by United States Government employees. It does seem to me that the citizens who handle the mail, who sort the mail, who protect the mail, who process the mail, and who deliver the mail, for the greatest Government of the free world, should at least be able to earn salaries which would enable them to have an American standard of living.

Our subcommittee has discovered thus far that, in many instances, letter carriers and postal clerks cannot take their vacations because they must use their vacation time to go to work at extra jobs in order to meet outstanding bills. In addition, many of these men must undertake other jobs even while they are working for the Post Office Department.

I received a letter from a postal worker in Salem, Oreg., who said that, in addition to his 40-hour week in the Post Office Department, he had to work at pumping gas in a filling station for an additional 30 hours a week. Unless he did that, he could not live off his postal pay. Do we desire such conditions in America?

I have communicated with Mr. Everett E. Mallon, a secretary of a branch of the National Association of Letter Carriers, at Portland, Oreg., asking him to obtain for me family budgets from some of his members. Mr. Mallon has sent to my office some letters from men who are carrying mail in Portland, Oreg., and from their wives. I think these family budgets and family-expense figures speak for themselves. There is very little I can add to embellish them. They tell a human story and a dramatic story. It is a story which I, as a Senator, am not too proud of. I regret that such difficulties are foisted on employees of our Government.

I believe Members of the Senate should see these letters, because ultimately it is my hope that the subcommittee and later the full Committee on Post Office and Civil Service will report a postal-pay bill to the Senate for action. It is my opinion that an examination of these letters will convince the Members of the Senate that some upward adjustment must be made in postal pay, in order to be fair and equitable to these men and women who are giving so much loyal and efficient service to the United States Post Office Department in particular, and to the United States Government in general.

In conclusion, I ask unanimous consent that these letters, which have been obtained for me by Mr. Everett E. Mallon, of the National Association of Letter Carriers, be printed in the body of the RECORD at the conclusion of these brief remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF LETTER CARRIERS,
Portland, Oreg., May 20, 1957.

Hon. RICHARD L. NEUBERGER,
Senator from the State of Oregon,
Senate Office Building,
Washington, D. C.

HONORABLE SIR: Please find enclosed two more budgets of letter carriers here in Portland, Oreg.

Please advise me if there should be any other way that I may be of assistance to you.

Thank you again for your fine work in behalf of the letter carrier.

Respectfully yours,

EVERETT E. MALLON,
Secretary, Multnomah Branch, No. 82, NALC.

PORTLAND, OREG., *May 17, 1957.*

Hon. Senator NEUBERGER: Mr. Mallon asked me to write you concerning our need for a postal-pay increase.

My husband has been carrying mail for 11½ years, since his discharge from the Air Corps, and expects to make it his career.

His take-home pay is now $151.55 every 2 weeks. We have four children. Two of them are preschoolers, making it almost impossible for me to go to work to supplement our income and still be fair to my children.

I shall endeavor to give you our approximate monthly expenses. As you can see we could surely use a pay increase so we could allot more for food and be able to save some regularly. At the present our life insurance is our only savings. My husband and I each have a policy and we have $500 endowments for each of the children.

Food	$80.00
Home mortgage payment	65.00
Gas heat	15.00
Electricity	10.00
Telephone	5.50
Garbage	1.50
Water	1.50
Clothing—includes shoes and repair	7.50
Life insurance	28.50
Hospital insurance	10.00
Medical and dental	10.00
Church and charities	10.00
Auto expense (includes insurance)	25.00
Gifts	5.00
Credit Union (loan to pay for washing machine)	17.00
Miscellaneous	12.00
Total expense	303.50
Monthly income	$303.10

We hope that these figures may be some help to you in securing us a pay increase.

At the present time we do not feel that the postal pay is equal to other workers in the same class of people.

Yours truly,

Mrs. TRAVERS ALBRECHT.

Letter carrier, 7A grade, 14 years' service, $4,510 annual pay, $3,652.48 take-home pay

Monthly budget for three, no other income:	
Monthly pay	$375.83
Take-home pay	304.37
Water (bill bigger in summer so this is average)	2.00
Telephone	4.29
Garbage	1.50
Electric (electric heat, too), 5-year average	11.00
Daily paper (30-cent tip to boy for good service)	2.25

Letter carrier, 7A grade, 14 years' service, $4,510 annual pay, $3,652.48 take-home pay—Continued

Doctor and dentist	$10.00
Miscellaneous (as family clothing, gifts, household needs)	20.00
Home loan payments (includes property tax), 10 years old, $3,286.98 balance due	50.00
Loan from credit union ($394 balance; this is our cushion, like washing-machine repair, auto repair, replace refrigerator, or pay too big doctor or dentist bill)	30.00
Food (staples as sugar, flour, coffee, tea, etc.)	40.00
My allowance (busfare, meat, fresh vegetables, etc.)	40.00
Son's allowance (for needed school supplies)	4.00
Insurance (includes fire, mortgage, hospital family plan, auto license, auto insurance, and life)	39.97
Monthly expenses	255.01
Dad's pocket money (for upkeep of car, gas, fishing, bowling, lodge dues, union dues, and family entertainment. When something comes up or we are too far behind, we go to the credit union. It has been slowly increasing)—gives him $12.14 a week	49.36

At one time we planned to bank $10 a month and did. We closed the account over 3 years ago.

Our son is ready for college this fall. I believe it our duty as parents to give him some financial help, but how?

Sincerely,

ALMA K. OTTMAN.
C. A. OTTMAN.

MAY 18, 1957.

NATIONAL ASSOCIATION OF LETTER CARRIERS,
Portland, Oreg., May 19, 1957.

Hon. RICHARD L. NEUBERGER,
Senate Office Building,
Washintgon, D. C.

HONORABLE SIR: Please find enclosed some of the material you requested of me on my recent visit to your office.

I regret that I was unable to get all of this material together at this mailing, but the rest will follow tomorrow. I will have some additional budgets that will give you a better cross section of our people, and their financial problems.

May I express the sincere thanks of our membership for your keen interest in their welfare, and of your kind attention in this matter.

With every good wish, I am,

Respectfully yours,

EVERETT E. MALLON,
Secretary,
Multnomah Branch No. 82, NALC.

UNITED STATES POST OFFICE DEPARTMENT, REGIONAL OFFICE, STATEMENT OF EARNINGS AND DEDUCTIONS

E. E. Mallon, 17 years. Note: 2 meritorious grades, $4,610 annual pay; biweekly take-home pay $134.74 plus $3.75 for bond.

Payroll No. 544000; hours, 80; gross pay, $177.31; taxes: Federal, $22.50; State, $3.54; deductions: retirement, $11.53; life insurance, $1.25; bonds, $3.75; net pay, $134.74.

[From the Portland Oregonian of May 16, 1957]

SALARY HIKES ACHIEVED IN TIGHT BUDGET BY CUTTING CITY SERVICES

A $15,914,955 general fund budget which will go before the city council Wednesday for acceptance comes within $30,000 of an estimate made 6 weeks ago.

That figure was approximately $15,888,000. And the council, working as a working committee since April 2, has managed to keep its cake and eat it, too.

Wage adjustments for nearly all of the three-thousand-one-hundred-odd employees on the city payroll have been offered when there was no new revenue.

The council promised to include the salary hikes last November. Two attempts to win voter approval of them failed.

It was accomplished by chopping some $700,000 out of city services. New purchases were scratched, programs were cut, and about 140 jobs were done away with.

Though jobs cuts will reflect in totals, only a few regular municipal employees were let go. In most cases, temporary, seasonal, and vacant positions were unfilled.

Included in the wage adjustments are raises for the councilmen, mayor, and almost 50 other council-appointed positions.

That increase amounts to approximately $21,000. The mayor's salary will go up to $12,880 and the commissioners to $11,080.

Some others slated to benefit by more pay are:

City attorney, $9,840 to $10,840; chief deputy city attorney, $9,000 to $10,600; top engineers, health officer, police, and fire chiefs, $9,840 to $10,840.

Thirteen hundred firefighters and policemen will get 3-step wage boosts amounting to from $48 to $60 a month. Only 14 percent of the employees, generally clerical and administrative positions, will get no increase.

The big cuts show clearly in appropriations for new equipment, from $700,000 to $213,000 in the new budget. Money to be allowed for operation and maintenance is $250,000 less than the approximate $3 million which was budgeted last year.

The budget was wrapped up late Tuesday night and readied for council acceptance at the regular Wednesday meeting. Later in the day it will go to the county tax supervising and conservation commission for review.

"As budgets go," commented Commissioner Bean, "this is without doubt the tightest I've seen in my 8 years as finance commissioner."

Mayor Terry Schrunk, a newcomer to city financial problems, made this prophetic observation after he scanned the bone-clean departmental allowances:

"The public must realize that most of our equipment and maintenance needs have only been deferred. It will mean additional expenses in later years."

[From the Portland Oregonian of May 17, 1957]

JUDGES, POLICE PAY HIKE VOTED

STATE HOUSE, SALEM.—Three bills granting pay raises to supreme court justices, circuit court judges, and State police cleared the senate Wednesday and went to the house.

Supreme court justices' salaries would be increased by $2,500 a year, from the $13,500 they get now to $16,000.

Circuit court judges would be raised $2,000, from $11,000 to $13,000.

State police would get their pay increase in two steps, the first on July 1 this year and the next on January 1 next year.

The police raises would range from $540 a year for privates to $780 a year for lieutenants and captains.

HON. SENATOR NEUBERGER: At the request of Mr. Mallon, I have drawn up a monthly budget plan to show what the average income of a United States postal employee is after 2½ years' service and what the monthly expenses of our family of 5 are. Our take-home pay every 2 weeks is $112.

House payment	$75.00
Household expenses	17.60
Fuel	15.00
Grocery bill	80.00
Car expenses	20.00
Hospital bill	15.00
Doctor bill	10.00
Total	$232.60

Left off my list are the items like cleaning bill, clothing the family, union dues, and life insurance fees. This is taken out of whatever we might have left over at the end of the month.

MRS. CARL E. LEHUR.

PORTLAND, OREG.

PORTLAND, OREG., *May 17, 1957.*

Hon. RICHARD NEUBERGER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR NEUBERGER: Having been informed by Secretary Mallon, of Branch 82, National Association of Letter Carriers, of your desire to secure information relative to the adequacy of current postal wage levels, I herein submit a statement of my personal financial status.

As the father of two children, and with my wife expecting another in September of this year, I am constantly aware of the difficulty involved in providing the necessities of life for my family on my present wage. I am earnestly seeking, if possible, to avoid following the example of many postal employees who have given up their careers in the service to find work which was more nearly capable of providing sufficient income with which to meet the present high cost of living.

My monthly take-home pay as a regular carrier with 2 years of service is $250.

Here are the items in our monthly budget:

House payment	$64.00
Mortgage insurance	11.03
Life insurance	5.79
Hospital insurance	6.85
Electricity	8.00
Telephone	7.00
Water, garbage disposal, and daily newspaper	5.00
Fuel	15.00
Transportation	15.00
Food	70.00
Credit union	40.00
Total	247.67

The credit union payment is for our car (1949 Pontiac), our stove, and medical bills.

Outside of our hospital insurance we have no allowance for medical or dental expenses, or drugs. We have no way of providing in our budget for clothing, recreation, or incidentals. For these items that arise from time to time we are forced to divert money allowed for food or some other necessary expense.

I served during World War II and the Korean crisis in the Air Force and am now a member of the Air National Guard for which I receive a small check quarterly. Other than that I have no outside income. I receive a great deal of satisfaction in acting as chairman of our local blood donor committee, but find that between the time required in fulfilling my obligations to our regional blood program and to the Guard, as well as to my family, it is virtually impossible for me to earn a significant amount of extra money off the job to supplement my regular income.

I am aware of your interest and appreciate your splendid efforts, both past and present, in our behalf.

Respectfully,

DONALD L. SMITH.

MONTHY AND YEARLY BUDGET

Louis L. Stone, 32, letter carrier, 8½ years' service; Beverly J. Stone, 29, housewife; Janis, 6; Leslie, 5; Michael, 2.

1956 income	$4,406.75
Federal income tax	183.60
State income tax	88.02
Withheld	271.62
Retirement and life insurance	319.28
Total income	3,815.85

Expenses

	Monthly	Yearly
Food and milk	$90.00	$1,080.00
House payment, insurance and taxes	50.00	600.00
Car payment	30.00	360.00
Furnace payment	30.00	360.00
Insurance:		
(1) Furniture (every 3 years)	26.00	
(2) G. I.	10.00	120.00
(2) Life insurance for boys	4.00	48.00
(4) Hospital (Blue Cross)	8.95	107.40
Utilities: Water, electricity, and garbage	13.00	156.00
Fuel oil	13.40	160.00
Taxes (property)	1.50	18.00
Church and charities	4.00	48.00
Car expense: Gas, oil, and license	30.00	360.00
Medical and dental	10.00	120.00
Phone	4.30	51.60
Clothing	5.00	60.00
Newspaper	2.00	24.00
Club dues and union dues	3.00	36.00
Vacation		20.00
Dry cleaning and shoe repair	2.00	24.00
Total	311.15	3,753.80

This budget does not account for gifts, amusements, household repairs or replacement of furniture or emergencies. When the income does not meet the current expenses the food and car expenses are cut to meet the payment.

Our only savings have been through our share account with the Postal Credit Union from loans made with them. We would like to be able to save for our children's future education, but so far have been unable to, except for the two boys' insurance.

Most of our entertainment is in our home with friends and family. Our hobbies of home decorating, sewing, and car repair help eliminate the labor cost. Vacations are spent camping with the family, in State and national forest areas where facilities are furnished and the cost is low.

This account is figured on a minimum basis and does not include items that occur frequently which are unforeseen.

I hope this will be some help to you in finding out where our money goes and what it is used for. A postal pay raise is essential if we are to maintain a balanced economic status.

Sincerely,

BEVERLY J. STONE.
LOUIS L. STONE.

PORTLAND, OREG., *May 18, 1957.*

HON. RICHARD NEUBERGER: I would appreciate very much if you would give all your support to pay bills S. 27 and H. R. 2474.

We sure do need a raise in pay, with everything going up in prices.

I am a mail carrier from Portland. I have 5 years in the Postal Service, if we don't receive a good pay raise this year I will have to quit the post office and try to get a better paying job. (I know there are plenty of them around.)

I am trying to support a family of four children, and a wife on my postal wages, and it can't be done.

My take-home pay amounts to $133.01 every 2 weeks, or $266.02 a month. Out of that amount here are a few things I've got to do with the money.

House payment	$55.00
Lights	11.50
Heating, fuel	15.00
Food	140.00
Furniture	16.00
Gasoline	15.00
Telephone	4.02
Doctor bills, medicine, and so on	15.00
Total	271.52

As of now I am over the $266.02 I make. Also I have clothing to buy, union dues to pay, medical insurance to pay, and life insurance for the family. So you can see that I need a raise in pay. I know you will do all you can to help us out. So please back up our pay bills.

Thanks a lot.

I remain,

LOUIS P. SCHEETZ.

UNITED STATES POST OFFICE DEPARTMENT—REGIONAL OFFICE, STATEMENT OF EARNINGS AND DEDUCTIONS

Hours: 80. Gross pay, $150.38. Taxes: Federal, $3.60; State, $3. Deductions: Retirement, $9.77; life insurance, $1. Net pay: $133.01.

MONEY WE PAY OUT A MONTH

My husband Lawrence Kadolph has worked for the Post Office Department 10 years. This is for our family of four. Our yearly pay is $4,410. Our yearly take-home pay is $3,695.90. Our monthly pay before any deductions are taken out $367.50; take-home pay, $307.10.

House payment	$48.00
Car payment	76.00
Insurance	20.00
Groceries	80.00
Electric bill	9.00
Garbage	1.25
Gas bill for the car	10.00
Hospital and doctor bills	10.00
Branch 82 dues	2.25
Paper	1.95
Telephone bill	4.29
Taxes on our house	17.50
Oil for heat	12.00
Water	1.40
Entertainment and clothes	10.00
Total	303.64

MRS. LAWRENCE L. KADOLPH.

MUNICIPAL CIVIL SERVICE BOARD,
Portland, Oreg., May 17, 1957.

Senator RICHARD NEUBERGER,
Washington, D. C.

DEAR SIR: For your information the current salary rates for firefighter and police patrolman are $326-354-384. After July 1, 1957, they will be $368-400-432.

Very truly yours,

CHESTER LOCKE,
Personnel Examiner II.

Transit mix or wet mix trucks:	
3 yards and under	2.50
Over 3 yards	2.60
Truck helper, steady	2.50
Truck repairmen (when used)	2.80
Trucks, semitrailer and truck and trailer (over 10 tons, including low beds)	2.55
Two-wheeled power tractor with trailer:	
9 yards and under	2.80
Over 9 yards and including 20 yards	2.90
Over 20 yards	3.00
Warehousemen (warehouse parts and tool men)	2.50
Winch truck (takes classification of truck on which winch is mounted.)	

(Plus 7½ cents per hour health and welfare.)

(Foremen and/or truck dispatchers (when used), $.125 per hour above the majority of the journeymen supervised. Time and one-half daily and Saturdays, Sundays, and holidays double.)

ADJOURNMENT

Mr. MANSFIELD. Mr. President, under the previous order, I move that the Senate stand in adjournment until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 12 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until tomorrow, Thursday, May 23, 1957, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 22, 1957:

UNITED STATES DISTRICT JUDGE

Robert Van Pelt, of Nebraska, to be United States district judge for the district of Nebraska, vice John W. Delehant, retired.

UNITED STATES ATTORNEY

Jack Chapler Brown, of Indiana, to be United States attorney for the southern district of Indiana for a term of 4 years. He is now serving in this office under an appointment which expires July 31, 1957.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 22, 1957:

UNITED STATES ATTORNEYS

Lloyd H. Burke, of California, to be United States attorney for the northern district of California, for a term of 4 years.

Frederick W. Kaess, of Michigan, to be United States attorney for the eastern district of Michigan, for a term of 4 years.

John O. Henderson, of New York, to be United States attorney for the western district of New York, for a term of 4 years.

Harold K. Wood, of Pennsylvania, to be United States attorney for the eastern district of Pennsylvania, for a term of 4 years.

A. Pratt Kesler, of Utah, to be United States attorney for the district of Utah, for a term of 4 years.

UNITED STATES MARSHALS

Saul Hale Clark, of Idaho, be be United States marshal for the district of Idaho, for a term of 4 years.

Clement W. Crahan, of Iowa, to be United States marshal for the northern district of Iowa, for a term of 4 years.

George W. Beach, of New Mexico, to be United States marshal for the district of New Mexico, for a term of 4 years.

William E. Smith, of New York, to be United States marshal for the eastern district of New York, for a term of 4 years.

Howard C. Botts, of Ohio, to be United States marshal for the southern district of Ohio, for the term of 4 years.

Bernard A. Boos, of South Dakota, to be United States marshal for the district of South Dakota, for a term of 4 years.

William Budd Parsons, of Washington, to be United States marshal for the western district of Washington, for a term of 4 years.

Noah W. Riley, of Wyoming, to be United States marshal, for the district of Wyoming, for a term of 4 years.

WITHDRAWALS

Executive nominations withdrawn from the Senate May 22, 1957:

POSTMASTERS

Michael D. Eddy, Jr., Brave, Pa.
Dodd D. Weatherly, Carrollton, Tex.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MAY 22, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Eternal God, our Father, Thine is the strength which supports and sustains us; the holiness which allures and enchants us; the wisdom which inspires and guides us; the pardoning grace which forgives our sins and transgressions.

Take our feeble and faltering spirits and make them the sanctuaries and centers of Thy divine light and power.

Hear us in our prayers of intercession and supplication for the poor and needy in the stricken areas of our beloved country, and all whose lives are beshadowed by sorrow, haunted by fears, and baffled by perplexities.

Help us to believe that Thy kingdom of truth and righteousness, of peace and good will, is slowly emerging out of the welter of confusion and uncertainty in which we are living and laboring.

To Thy name we ascribe all the praise. Amen.

The Journal of the proceedings of yesterday was read and approved.

MEMBERSHIP OF JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

The SPEAKER laid before the House the following communication, which was read by the Clerk:

COMMITTEE ON WAYS AND MEANS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 16, 1957.

Hon. SAM RAYBURN,
Speaker of the House of Representatives.

MY DEAR MR. SPEAKER: Pursuant to section 8002 of the Internal Revenue Code of 1954 the following 5 members of the Committee on Ways and Means have been designated as members of the Joint Committee on Internal Revenue Taxation for the 85th Congress: JERE COOPER, chairman; WILBUR D. MILLS; NOBLE J. GREGORY; DANIEL A. REED; THOMAS A. JENKINS.

Cordially yours.

JERE COOPER.

CALL OF THE HOUSE

Mr. KLUCZYNSKI. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 76]

Albert	Durham	Mason
Allen, Calif.	Elliott	Miller, Calif.
Ayres	Fogarty	Miller, Md.
Baker	Garmatz	Morano
Baring	Granahan	Morgan
Beamer	Green, Pa.	Murray
Betts	Gubser	O'Neill
Boggs	Henderson	Passman
Boland	Hoeven	Polk
Bowler	Holland	Powell
Byrd	Holtzman	Preston
Byrne, Pa.	James	Riehlman
Chelf	Kearney	Saylor
Chiperfield	Kearns	Sieminski
Christopher	Kelley, Pa.	Siler
Chudoff	Kirwan	Sullivan
Coad	Lennon	Taylor
Cooley	Loser	Wolverton
Dawson, Ill.	McConnell	Zelenko
Dennison	Martin	

The SPEAKER. On this rollcall 373 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

LEGISLATIVE BRANCH APPROPRIATION BILL, 1958

The SPEAKER. The unfinished business before the House is the motion of the gentleman from Iowa [Mr. GROSS] to recommit the bill (H. R. 7599) making appropriations for the legislative branch for the fiscal year ending June 30, 1958, and for other purposes.

Without objection, the motion will again be reported.

The Clerk read as follows:

Mr. GROSS moves to recommit the bill, H. R. 7599, to the Committee on Appropriations with instructions that the appropriation of $7,500,000 for the acquisition of property, construction, and equipment, additional House office building be stricken from the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 176, nays 206, not voting 51, as follows:

[Roll No. 77]

YEAS—176

Abbitt	Dorn, S. C.	Nicholson
Abernethy	Dowdy	Nimtz

NOT VOTING—51

Albert	Elliott	Mason
Allen, Calif.	Fogarty	Miller, Calif.
Baker	Garmatz	Miller, Md.
Baring	Granahan	Morano
Beamer	Green, Pa.	Morgan
Boggs	Gubser	Murray
Boland	Hoeven	Passman
Bowler	Holland	Polk
Byrd	Holtzman	Preston
Byrne, Pa.	James	Rogers, Mass.
Chelf	Kearney	Saylor
Chiperfield	Kearns	Sieminski
Christopher	Kelley, Pa.	Siler
Coad	Lennon	Sullivan
Cooley	Loser	Taylor
Dawson, Ill.	McConnell	Wolverton
Durham	Martin	Zelenko

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hoeven for, with Mr. Holtzman against.
Mr. Taylor for, with Mrs. Sullivan against.
Mr. Polk for, with Mr. Boggs against.
Mr. Beamer for, with Mrs. Granahan against.
Mr. Kearns for, with Mr. Garmatz against.
Mr. James for, with Mr. Byrd against.
Mr. Siler for, with Mr. Durham against.
Mr. Allen of California for, with Mr. Kelley of Pennsylvania against.
Mr. Mason for, with Mr. Zelenko against.
Mr. McConnell for, with Mr. Miller of California against.
Mr. Morano for, with Mr. Fogarty against.
Mr. Kearney for, with Mr. Baring against.
Mr. Saylor for, with Mr. Albert against.
Mr. Gubser for, with Mr. Byrne of Pennsylvania against.
Mr. Chiperfield for, with Mr. Green of Pennsylvania against.

Until further notice:

Mr. Sieminski with Mr. Baker.
Mr. Preston with Mr. Martin.
Mr. Dawson of Illinois with Mr. Miller of Maryland.
Mr. Boland with Mrs. Rogers of Massachusetts.
Mr. Holland with Mr. Wolverton.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on passage of the bill.

Mr. NORRELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 279, nays 93, not voting 61, as follows:

[Roll No. 78]

Mr. Fogarty with Mr. Van Zandt.
Mr. Miller of California with Mr. Saylor.

Mr. COUDERT changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. NORRELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. VORYS. Mr. Speaker, I am voting to cut out the $7.5 million appropriation for going ahead with the House Office Building plans. I have great affection and respect for the members of this Building Commission, the Speaker, the gentleman from Georgia [Mr. VINSON], and the gentleman from New Jersey [Mr. AUCHINCLOSS]. I am willing to confess that I have not kept myself up to date on their plans. I think we need some more parking space, better cafeteria facilities, and more space for committees. But I did not realize, until I studied these hearings and heard today's debate, that the Commission is proposing to spend $100 million on their plans, that all of this will cost $230,000 per Congressman.

I do not need a third office room. I think the plans are too fancy, too elaborate. In any case, I do not think we need to go ahead with this project now, when building costs are so high and the demand for materials creates additional inflationary pressures. The Commission has acquired the necessary real estate. They can make some additional parking space, and then mark time on this project. I hope they will reconsider some of the elaborate plans we hear about, and cut the cost of the whole project. I know of no way to obtain such reconsideration except to cut out this appropriation today.

MORE ABOUT THE PROPOSED HOUSE OFFICE BUILDING PROJECT

Mr. RAY. Mr. Speaker, yesterday the House considered at some length the cost of an additional House Office Building and related projects, and this morning the House voted 206 to 176 against a motion which was aimed at eliminating a seven-and-a-half-million-dollar appropriation for continued work on that project. I now present the project costs on a per Member basis.

The entire cost of the project, including committee rooms, and so forth, is estimated at $100 million. Dividing that by 438, the number of Members in the House of Representatives plus the 3 Territorial Delegates, we get a cost of $228,000 per Member. Taking the cost of the additional office building itself and considering only the $64 million yet to be spent, and dividing that by 170, the number of 3-room suites to be in the building, we get $376,000 per Member's suite. On the same basis, the remodeling of the present Old House Office Building and the present New House Office Building would run to $66,000 for each 3-room suite to be provided in those buildings.

I submit that these figures establish that continuation of this project at this time is reckless and extravagant in the extreme and that the motion to recommit the bill, H. R. 7599, should have been adopted.

Mr. BOLAND. Mr. Speaker, when the roll was called on recommital and on final passage of the legislative branch appropriation bill, I was not recorded. I was unavoidably detained on official business with another Government agency. Had I been present, I would have voted against recommittal and for final passage.

At the time of the markup of this bill by the full Appropriations Committee, I made my views known to my colleagues on the committee. Yesterday, in the Committee of the Whole, I voted against the amendment to strike out funds for the construction of an additional House Office Building. I did so because I recognize the dire need for additional space for committees, committee chairmen, and committee staffs. Committee work is perhaps the most important function of the Members of this House. Without adequate facilities, this function suffers. It would not be economically wise to defer this program. Some $15 million has already been spent and it would be poor judgment to cut it off now.

However, Mr. Speaker, I do find fault and said so in committee with one part of this program. And that is the provision for alterations to the Old and New House Office Buildings. This entails the possible spending as reported in the hearings of some $18.5 million. I am pleased to note that this bill does not carry any money for fiscal year 1958 for remodeling of these buildings. There ought to be another long, careful, and hard look taken with respect to this particular part of the program. Alterations are to be made so as to provide three-room suites for all Members. The vast majority of Members need a three-room suite as much as they need another hole in their heads. Present facilities are entirely adequate to take care of the Members except with reference to committee chairmen. The committee chairmen, as I understand it, will get their needed space in the additional House Office Building. There is absolutely no justification for any alterations to the present House Office Buildings. I hope the House Office Building Commission will come to that same conclusion and

will not recommend or approve this phase of the program.

Mr. CUNNINGHAM of Nebraska. Mr. Speaker, I did not support H. R. 7599, the appropriation bill for the legislative branch, because it contained items I believed to be unnecessary and which should have been stricken from the bill.

I specifically opposed the expenditure of $7,500,000 to begin the construction of a third House office building. This initial expenditure would ultimately lead to a total outlay of $100 million, as it was pointed out in the debate that in addition to the new office building it was planned to remodel the two existing buildings and add other improvements.

To me this was the one real economy test which this session of the Congress had to face. It is interesting to note that those who profess their beliefs in economy the loudest were the ones who fought the hardest for this expenditure of the taxpayers' dollars.

Personally, I find my two-room suite to be adequate for my needs. I find that it allows me to do my work efficiently and that is all that I am concerned with.

So far the House has made sizable reductions in the appropriation bills which it has had before it during this session. However, many of these reductions amount to "paper cuts" and in my opinion few real economy cuts have been made. Had the House voted to reject the new building plans for a third House office building, then it could say truthfully that it was interested in economy. But the House failed to do so.

I was proud to have joined with 175 of my colleagues in opposing this spending program by the House of Representatives and my conscience is clear.

PERMISSION TO SIT DURING SESSIONS OF THE HOUSE

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the Committee on Small Business may be allowed to sit during general debate in the sessions of the House through the remainder of the week.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THIRD DEFICIENCY APPROPRIATION BILL

Mr. CANNON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7221) making supplemental appropriations for the fiscal year ending June 30, 1957, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Missouri? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. CANNON, THOMAS, KIRWAN, WHITTEN, ROONEY, TABER, JENSEN, H. CARL ANDERSEN, and CLEVENGER.

A BILL TO INCREASE CERTAIN RETIREMENT ANNUITIES

Mr. DAWSON of Utah. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. DAWSON of Utah. Mr. Speaker, I have today introduced a bill to remedy an inequity which Congress itself, I am sorry to say, has done more than its share to create.

The bill would increase annuities to Federal employees who retired before October 1, 1956, a class of annuitants who did not share in the increased benefits granted last year to subsequent retirees.

These people—indeed, all persons who have retired on a fixed income—represent the real human tragedy of the inflation encouraged, if not brought on, by freehanded Government spending. In the prolonged inflationary cycle, rising costs have carried wages and salaries along with them so that, while the active worker's higher income may be illusionary in part, at least he has not lost ground.

But consider the person living, or trying to live, on retirement income. He has not even the comfort of illusion. To him it is only too real that as prices go up and up, his fixed income buys less and less.

Out of salaries which were not always adequate, these Government workers of whom I speak paid into their retirement funds good 100-cent dollars. Now that they have retired, we give them back 50-cent dollars. What kind of confidence game is that?

In all fairness, we owe it to these retired workers to maintain their buying power somewhere near the level which they in good faith thought they were to have for their later years.

This bill, which would grant only modest and reasonable increases in the annuities upon which many of these people are wholly dependent, is the short-term answer to the problem they face. Of greater importance in the long run, not only to these former workers but to all persons living upon retirement income now or in the future, is the arrest of the inflationary cycle.

To the total cost of our Federal Government, this bill would add only the well-known drop in the bucket. It is, incidentally, the first bill I have introduced this session which would add, however little in proportion, to the cost of our Government. Still, it illustrates in principle the frightening self-perpetuation of astronomic Government spending: the spending pumps the economy, sending up the costs, requiring more spending, and so around and around the circle.

The lasting answer must be to bring our Federal spending back into reason, reduce the national debt, and put the brakes on rising costs and taxes which are squeezing our workers and strangling our retired workers.

But until that has been accomplished, I believe passage of this legislation is an obligation incumbent upon us. I urge immediate and favorable action on this proposal.

DIVERSION OF WATER FROM LAKE MICHIGAN

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 254 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2) to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army, to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes. After general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. MADDEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, this resolution provides for an open rule and 2 hours of general debate on the bill.

H. R. 2 authorizes the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the supervision of the Secretary of the Army, to withdraw from Lake Michigan, in addition to all domestic pumpage, a total annual average of 2,500 cubic feet of water per second to flow into the Illinois Waterway which is the Illinois River and connecting channels including the Chicago Drainage Canal. This diversion would continue on a test basis for a period of 3 years, during which time the Secretary of the Army, through the Army Engineers, will study the effects of the increased diversion and make a report to Congress, with recommendations, before January 31, 1961. The estimated cost of the study and report authorized is $430,000, the major part of this amount to be used to cover the pollution and sanitary aspects of the study.

The Corps of Engineers, in a report dated January 29, 1957, pointed out that the estimated reduction in the generation of hydroelectric energy at plants in New York and Ontario, representing 72 percent of the total plants involved, would be about 1 percent of the total energy production. The report further states that the lowering of lake levels that would result from the 3-year diversion would be from three-eighths to five-eighths of an inch, and that the temporary lowering effects of the 3-year

diversion would affect navigation adversely during low lake stages, but concluded the effect on navigation would be small and of a temporary nature.

During recent years great damage has resulted to property owners along the shores of Lake Michigan in northern Indiana. When a violent storm comes from the north or northwest this area suffers greatly from water flooding the coastline and doing great damage to buildings and property adjacent to the south shore of Lake Michigan.

The Corps of Engineers stated that lowering of the lake level from three-eighths to five-eighths of an inch that would result from a 3-year trial diversion would tend to be beneficial in lessening possible damage to property located on the south shore.

The large steel industries in my district who depend upon millions of tons of lake shipping have not protested to me that this small diversion of water would in any way affect shipping on the Great Lakes.

The Rules Committee has provided adequate time for all those interested to present their views. I, therefore, urge the adoption of House Resolution 254 so the House may proceed to the consideration of H. R. 2.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Illinois.

Mr. YATES. The lowering that would take place, to which the gentleman referred, namely, three-eighths of an inch, is what the Army engineers estimate will occur over the entire 3-year period in Lake Erie and five-eighths of an inch in Lakes Michigan and Huron?

Mr. MADDEN. Yes; over the entire 3-year period.

Mr. YATES. At the conclusion of the experiment, in the event the Congress no longer authorizes an additional flowage of water, in a relatively short time the lake will resume its normal level?

Mr. MADDEN. That is correct. There has been considerable agitation in the northern area of Indiana in regard to that situation. Now, I do not know whether a small three-eighths inch diversion over a 3-year trial period is going to help us in northern Indiana, but I know it is not going to do us any harm.

The Committee on Rules provided 2 hours' debate for this legislation, which I do not think it is going to take, but nevertheless the committee made that provision.

I now yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the gentleman from Indiana has so excellently stated the proposition before us that I do not feel that I should take much time, and I shall be brief. But, the facts remain that after extensive hearings the Committee on Public Works reported this bill favorably by a vote of 18 to 6. We had quite a lengthy discussion before the Committee on Rules, and, if my recollection is right, I believe there was only one member of the Committee on Rules that opposed the bill.

Now, what does this amount to? It merely means that they may use but three-eighths of an inch more water for this diversion from Lake Michigan down the Illinois River. Coming from Illinois, I have not received any letter from anyone disapproving this bill. Everyone seems to favor it.

Now, the question arises, Well, who is going to be harmed if this bill passes? I do not think anyone will be harmed, because the bill provides that the Secretary of the Army shall at all times have direct control and supervision of the amounts of water directly diverted from Lake Michigan. In plain words, that means that at any time it appears that this diversion is going to be harmful to anyone, in any way, the Secretary of the Army has the right and the power and he is ordered and directed to stop it.

So, Mr. Speaker, I reiterate that inasmuch as the Committee on Public Works held extensive hearings and by a vote of 3 to 1 favored this bill, and that of the total membership of the Committee on Rules only one was opposed to the rule, I submit that the rule should be adopted.

Mr. Speaker, I yield 10 minutes to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. Mr. Speaker, this resolution, House Resolution 254, would make in order the consideration of a bill which has been a matter of controversy for a great many years. Under the provisions of the bill, the city of Chicago would be permitted to divert anywhere from 1,500 to 5,000 cubic feet per second of water from Lake Michigan and the Great Lakes system.

As the gentleman from Illinois [Mr. ALLEN] has said, this would be done under the supervision of the Army Corps of Engineers. However, the only supervision that the engineers would actually have under the provisions of this bill would be to decide whether it should be as little as 1,500 feet at times and as much as 5,000 cubic feet per second of diversion at other times.

For many, many years, Chicago has been attempting, very frankly, to use the waters of the Great Lakes, and of all that great transportation system, for its own particular benefit. In my part of the country we have to have sewage disposal plants so efficient that the water which flows therefrom to our streams is pure, and will not in any way pollute them. But in Chicago, despite the fact they have spent considerable money on sewage disposal systems, they still use the Illinois River as a sort of drainage ditch, often filled with sewage and pollution. Now they want to use the waters of the Great Lakes to wash all this sewage down into the Mississippi.

Back in 1930 the city of Chicago was diverting 10,000 cubic feet per second of water from Lake Michigan and the Great Lakes. The other States which were affected, because the waters of the Great Lakes were being lowered and transportation was being interfered with, brought suit in th United States Supreme Court. The Supreme Court issued an order that the city of Chicago should not divert more than 1,500 cubic feet per second. Ever since that time Chicago officials have constantly been attempting and endeavoring; and I certainly do not blame any Chicagoan or Illinoisan for promoting his own self-interest in this matter—to get authority to divert more water—but I do not like them to do so to the consequent danger, and bad effects, upon the people of my State and all the other States touching upon the Great Lakes. Ever since 1930, when that Supreme Court decision was handed down, Chicago has been attempting to get more and more water for diversion from the Great Lakes.

Twice now the Congress has passed a bill on this matter, and I realize there is a pretty well organized effort behind this legislation, and I take my hat off to the gentleman who originated the bill and has worked very assiduously and ably for the benefit of his own constituents, but a bill of this nature was passed in the last two Congresses and both times promptly met with the veto of the President of the United States, because it is his duty, it is his responsibility, to protect the interests of all the people of this country, including those of the people of the other States besides Illinois which have some shorelines on the Great Lakes.

No one knows exactly what may happen as a result of such new water diversion. Tests have shown that dropping the water level of the Great Lakes by only 1 inch means that 100 tons of shipping, on the average, in each vessel on the Great Lakes, is lost. Of course, you remember during the war period what a terrible struggle it was to get enough iron ore down through the Great Lakes to supply our steel mills, in order to produce needed steel for the national defense. Not only that, but this bill affects the shore property along the Great Lakes in all these other States.

The officials of every State, outside of Illinois, on the Great Lakes have, of course, opposed this legislation and spoken against it.

We are now spending, under legislation passed in this Congress not long ago, to hundreds of millions, and probably billions of dollars on developing the St. Lawrence Seaway and the Great Lakes for international shipping.

Every bit you lower the water level of the Great Lakes, the more water you take out, the more you have to deepen the ship channels, and the more money you have to spend on those channels for use by seagoing vessels and also the ships now operating on the Great Lakes. And, by the way, there is more freight tonnage hauled in ships on the Great Lakes than in all the American freight ships that sail the seven seas of the world.

So it is something of importance to us as to whether we are not only going to injure these other States, and take away water that belongs to those States as well as it does to Illinois, but will also make our entire St. Lawrence Seaway system more costly and make more difficult the use of the various ports in the other States along the Great Lakes, if we vote for a bill which has been opposed, and I think still is, by the President of the United States. I want to predict right now he will veto this legislation if we pass it.

Then there is one other thing I wish to mention quickly. The Army engineers have just completed a survey and study of this proposal, and have submitted it to the State Department. Right now, under the auspices of the State Department, an international commission, made up of members from this country and members from Canada, is attempting to work out some sort of agreement as to the use of the waters of the Great Lakes. It must be remembered that these waters belong not only to the United States and to the States bordering the Great Lakes but to Canada as well, which country has an interest in this bill.

I am sure you will find the passage of this legislation has not been recommended by the administration, but that instead the position of the administration is directly opposite, and that by the approval of this bill we will of course be interfering with the international conference now going on between American and Canadian officials to decide what action should be taken in connection with the waters of the Great Lakes.

I think the simplest way to get rid of this bill, and to have a lot of time and expense, is just to defeat the rule, and leave the bill where it is, and where it has been placed twice by vetoes of the President, in the dead-letter box up on the Speaker's table.

Mr. MADDEN. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. YATES].

Mr. YATES. Mr. Speaker, the gentleman from Ohio is, as we all know, a very able Member of this House. In this particular instance I think he speaks from historical antagonisms rather than from present facts.

A mere perusal of the bill will show that the gentleman's statement regarding the varying amount of diversion authorized presently from 1,500 cubic feet per second to 5,000 cubic feet per second is not encompassed by this bill. Presently the Metropolitan Sanitary District of Greater Chicago is authorized to withdraw from Lake Michigan 1,500 cubic feet per second by law. This is under the terms of the decision of the Supreme Court of the United States issued in 1930, to which the gentleman from Ohio referred. It is true that Chicago, prior to that time, was withdrawing 10,000 cubic feet per second. But in that decision there is another clause to which the gentleman from Ohio did not refer and that recognized the right of the Congress of the United States to increase the amount of water which the Sanitary District of Chicago could withdraw from the Great Lakes, if the Congress in its wisdom so decided.

The opponents of the bill have testified before the Committee on Public Works and I am sure they will say to the House today that this is a matter that should be left to the Supreme Court of the United States rather than to the Congress.

This is not true. I read from the decision of the Supreme Court in 281st United States Reports, page 179, petition on the part of the State of Wisconsin against Illinois in which Justice Holmes speaking for the Court said:

> All action of the parties and the Court in this case will be subject, of course, to any order that Congress may make in pursuance of its constitutional powers and any modification that necessity may show should be made by this court.

The decision goes on further and says:

> The amount of water ultimately to be withdrawn unless Congress may prescribe a different measure is relatively small.

Now, those quotations are taken from the actual decision of the Supreme Court of the United States.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield.

Mr. BROWN of Ohio. Of course, the United States Supreme Court historically has always held in making a decision that certain things shall be effective unless the Congress changes the law.

Mr. YATES. That is correct.

Mr. BROWN of Ohio. And they follow the law; is that not correct.

Mr. YATES. That is correct.

Mr. BROWN of Ohio. What they were saying in that decision is that Chicago's taking of 10,000 cubic feet of water per second out of the Great Lakes for sewage disposal purposes should be stopped and that they should be enjoined and they should not be permitted to take more than 1,500 cubic feet per second unless the Congress by law decides otherwise. The Congress can give away the Great Lakes, if they want to.

Mr. YATES. That is right. That is why we are here. We are asking the Congress of the United States not to authorize the city of Chicago to withdraw 10,000 cubic feet of water per second as they were doing prior to 1930. What we are asking the Congress of the United States to do is to permit us to withdraw an additional 1,000 cubic feet per second, which will increase the amount we withdraw to 2,500 cubic feet per second.

Mr. BROWN of Ohio. Then, my statement as to what the Supreme Court actually held, that they did enjoin the city of Chicago from withdrawing all this extra water and limiting it to 1,500 cubic feet per second is correct.

Mr. YATES. It is correct, but it is not appropriate.

Mr. BROWN of Ohio. Well, that is the gentleman's opinion, of course.

Mr. YATES. That is correct, just as you say that what you say is appropriate. I pointed out to the gentleman that he is still voicing historical antagonism.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield.

Mr. VANIK. Is it not the purpose then of this legislation to circumvent the decision of the Supreme Court?

Mr. YATES. On the contrary, it is to carry out the Supreme Court decision rather than to circumvent it. The gentleman heard me a few seconds ago when I read from the decision itself in which it was stated that the Congress may authorize an additional amount of water to be withdrawn by the Sanitary District of Chicago and we are now in the Congressional forum at the present time requesting the Congress to give us that additional amount of water—for test purposes, let me point out—and not on a permanent basis. We are asking here only that we be authorized to withdraw 1,000 cubic feet per second under direct control of the Corps of Army Engineers for an experimental period of 3 years. During that time the Army engineers will determine what the effects have been so that all the States on the Great Lakes may know and so that the Public Health Service of the United States, which is involved in this too, may know what the pollution effect will be as the result of these tests.

Mr. VANIK. But the body of the law which supports that Court decision supports the proposition that water should not be withdrawn.

Mr. YATES. On the contrary, the decision itself says that water may be withdrawn. The Congress has twice approved this bill. We are asking the Congress to again approve this bill. I want to point out one thing further in respect to what the gentleman from Ohio said about the Presidential veto. I have here the copy of the letter that the President of the United States wrote to Hon. EVERETT MCKINLEY DIRKSEN on August 9, 1956, in which he commented on his veto. The President said this:

> THE WHITE HOUSE,
> *Washington, August 9, 1956.*
>
> DEAR EVERETT: I am deeply appreciative of your repeated personal expressions of interest in H. R. 3210, a bill relating to the diversion of water from Lake Michigan into the Illinois waterway. Because of your interest, I am especially sorry that I found it necessary to veto the bill for the reasons set forth in the attached message.
>
> I should like to call your attention especially to one passage in the veto message. You will note that I have requested the Department of State to open discussions with the Canadian Government in respect to this matter, and also that I have requested the Department of Defense to expedite certain essential reports we shall need before this matter can be completed. Of this I assure you when the needed information is at hand we shall move as rapidly as circumstances will permit to obtain a solution of this matter so important to the city of Chicago.

The report of the Army engineers, to which the President referred in his letter to Mr. DIRKSEN, has already been obtained. Those reports indicate that over the 3-year experimental period the effect on the level of Lake Erie on which Ohio borders will be three-eighths of 1 inch, overall, for the 3-year period. Not for 1 year but for 3 years.

Mr. McGREGOR. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield.

Mr. McGREGOR. I think the gentleman wants to be fair.

Mr. YATES. The gentleman wants to be fair.

Mr. McGREGOR. I would like to suggest to the gentleman that the Supreme Court's ruling on April 21, 1930, said that there will be no more diversions under the present law. The gentleman has said that if the Congress wants to change that law, then the Supreme Court will again be asked for a ruling. Is it true that under existing law, under the decision handed down by the Supreme

Court on April 21, 1930, no more water can be diverted?

Mr. YATES. The gentleman is exactly wrong. I read from a decision of the Supreme Court in which the diversion of 1,500 cubic feet per second is authorized by that decision. The gentleman stated that the decision did not authorize the diversion of any water. The decision authorized the diversion of 1,500 cubic feet per second. In addition, the Court made reference to the fact that the city of Chicago was going to construct modern facilities, and it said this:

> Perhaps the complainants would not be very insistent with regard to the 1,000 or 1,500 cubic feet per second which earlier in this case they seemed to admit to be reasonable, if their demand were allowed that the domestic pumpage be purified and returned to the lake—a demand not contemplated by their bill. But purification is not absolute. How nearly perfect it will be with the colossal works that the defendants have started is somewhat a matter of speculation. The master estimates that with efficient operation the proposed treatment should reach an average of 85 percent purification and probably will be 90 percent or more. Even so we are somewhat surprised that the complainants should desire the effluent returned.

The gentleman from Ohio [Mr. BROWN] says that people in Ohio are being endangered by this. Yet the City of Cleveland is putting all of its waste back into Lake Erie. The city of Milwaukee is putting all of its waste back into Lake Michigan. The city of Detroit is putting all of its waste back into Lake Michigan. The city of Chicago has these alternatives with respect to its waste disposal: We can either put all of our waste back into Lake Michigan, which is a situation that I do not want to contemplate and I am sure the opponents of the bill would not want to contemplate, or it can move its waste into the Illinois Waterway down to the Gulf of Mexico, along the Mississippi River.

We are a growing community. As a growing community the problem of waste disposal is a growing problem. We can only dispose of our waste into Lake Michigan or we can send it into the Illinois Waterway. What this bill proposes to do is to permit us to continue our present system of disposing of it in the Illinois Waterway, to take care of the needs of a growing community without further increasing the contamination problem in the lake. We in the city of Chicago want to deal with this problem in a reasonable manner.

Mr. SHEEHAN. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield.

Mr. SHEEHAN. In response to an inquiry directed to you by the gentleman from Ohio, my memory is that when the Supreme Court wrote its opinion they had a stipulation that the flow was to be limited until such time as Chicago had completed its sewerage construction, which they have done.

Mr. YATES. The gentleman is right. The sanitary district of Chicago is now considered to be one of the engineering marvels of the world, because of the high peak of engineering excellence it has attained with respect to sewage disposal.

The Sanitary District of the City of Chicago has met the terms of the decree of the Supreme Court completely. That is why we are now before Congress. There is nothing more that we can do in an engineering way; we can only seek to solve our problem we think through the use of additional water.

We want this test in order to find out whether or not it will be harmful to the other States surrounding our community if water be withdrawn. We do not believe it will be. We want to find out by actual test. One would think that our neighbors would want to see this question resolved on the basis of fact, not fancy.

Mr. ALLEN of Illinois. Mr. Speaker, I would like to compliment the gentleman from Illinois [Mr. YATES] on the presentation he has made, but it is very apparent to me that he has been well schooled by the gentleman from Illinois [Mr. O'BRIEN], who has worked faithfully and steadily on this bill for many years.

I yield 2 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Speaker, over the past 3 years I have had a chance to go into this matter in considerable detail.

May I say in the beginning that this does not affect me in the State of Illinois; I have no constituents whatever who would be affected regardless of what action this House takes, so I think I am in a position to speak rather impartially.

My investigation reveals, as far as I can tell, that there would be no material damage done to anybody as a result of allowing this test to take place over a 3-year period. All of the evidence indicates that the lowering of this lake would not be above a maximum of three-eighths of an inch, and probably not over one-eighth of an inch per year.

I want to be as intellectually honest about this as I can, and I want, therefore, to say to the people of Chicago that if as a result of this test it shows that material harm is being done I certainly would have a chance to review my position to favor this matter at this time and to be against it at a later time.

From all I can find out about this matter this test certainly should be made, especially after these people spent all these years getting their sanitary district in a position where they can, without harm to the remainder of Illinois, put sewage into the Illinois River at a faster rate than they are at the present time. That appears to be the situation insofar as the investigation that was made by the committee showed and the investigation which I have made.

I want to say that at this time this bill has my backing.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Wisconsin.

Mr. BYRNES of Wisconsin. I suggest that if the gentleman cannot find any damage that will result from this bill he had better look at the report of the Army engineers that has been forwarded to the Congress; and I would ask him to explain away the loss which is pointed out by the Corps of Engineers—a loss in dollars and cents—to New York and the power developments in New York, Ontario, and Quebec of a maximum of $918,000 to a minimum loss of $408,000 by reason of the reduction of the power facilities with a compensating increase at the Lockport area in Chicago of only $202,000.

There certainly is a loss in dollars and cents. I refer the gentleman to the report of the Corps of Army Engineers.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 5 minutes to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Speaker, I rise in support of Mr. O'BRIEN's bill, H. R. 2—identical to H. R. 212, which I introduced myself—which authorizes the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway by 1,000 cubic feet per second. This legislation, in similar form, has previously twice passed both the House and the Senate.

Mr. Speaker, I would like to state at the beginning that I speak not as a Member of Congress from the city of Chicago. In fact, my own northern Illinois district, the 13th, lies—except for 2 half precincts—completely outside of the metropolitan area. I speak today, representing my own interest and the great interest of my district in support of legislation which we know to be essential to the health and well-being of the entire Greater Chicago area. We deem it, in fact, legislation for the better health and well-being of all communities, no matter how far distant, through which the waters, starting in Chicago, are carried down State and throughout the long progress of the waterway.

I would admit that my primary interest was first aroused in this situation at the time that my entire district was alerted to the dangers of an overflooding Lake Michigan. In 1954 I pointed out to you that such damage to the Illinois shore of Lake Michigan for a 1-year period, from the spring of 1951 to the spring of 1952, totaled $11,288,000. I further pointed out that during this same period of high lake levels, the total damage on the United States shores of all the Great Lakes amounted to $61 million. Even though, admittedly, the decrease in the lake level as a result of increasing the diversion from 1,500 cubic feet of water per second to 2,500 cubic feet of water per second, as proposed in this bill, would be almost infinitesimal—estimated at three-eighths of an inch for the 3-year test period—any prospect of relief that could be given to the individuals, cities, and park districts on the lake front would indeed be a boon.

Our emphasis, however, is on the need for greater water diversion to better facilitate the operation of the great facilities of the Sanitary District of Chicago.

At the time that the present 1,500 cubic foot limitation was set, a statement was made in the report of 1933, as follows:

> It does not appear possible to arrive at a conclusive determination whether this flow

will afford suitable sanitary conditions on the waterway after the sewage purification plants at Chicago have been completed and placed in operation.

Since that report was made, the Sanitary District of Chicago is now, and has been since 1950, providing complete treatment for substantially all of its sewage; but still the Sanitary District testifies that there is serious pollution in the upper 50 to 60 miles of the Illinois Waterway and that there can be no marked improvement until more fresh water is available.

In addition, a greater flow is necessary for the adequate expansion of the increasing commercial use of the Illinois Waterway. I am sure that you all know that since the 1,500 cubic feet per second water diversion limitation was set, commerce on the Illinois Waterway has increased from 200,000 tons per year to considerably over 20 million tons per year. Industry in the Chicago area has expanded greatly; and the population has increased so greatly that the present 1,500 cubic feet of water per second diversion is no longer adequate—neither for a commercially useful waterway nor for satisfactory sanitary conditions.

In fact the situation became so bad along the Illinois Waterway last fall, due to the low water levels, that traffic thereon had to be suspended; and there was even great danger of contamination to drinking water systems in small communities downstate along the Illinois Waterway. As a result, in November of 1956, the State of Illinois requested and received the necessary emergency relief—with the Supreme Court approving an increase in the water diversion from Lake Michigan into the Illinois Waterway from 1,500 cubic feet per second to an average of 8,500 cubic feet per second, under the direction of the Corps of Engineers, until January 31, 1957. This provided necessary temporary help and further pointed out the advantages of this proposed survey to study the effects of increased water diversion for a 3-year period. Furthermore, during this temporary increased diversion, none of the injuries did occur which have been feared by the opponents to this legislation, even though the increase was much, much greater than that proposed in the bill presently under consideration.

In the 83d and in the 84th Congresses, both House of Congress voted overwhelmingly for this legislation. It is my sincere hope that when passed by the Congress again, H. R. 2 will receive the approval of the President, since I believe that the objections cited in his previous veto messages have been or are being met. The first point of the President's veto message was based on his statement:

> Existing diversions are adequate for navigation on the Illinois Waterway and the Mississippi River.

This objection can now be discounted by the fact that the water in the Illinois Waterway was so low last fall as to stop all traffic thereon, necessitating the emergency action to increase the diversion to 8,500 cubic feet per second.

The second, third, and fourth points of the President's veto message were as follows:

> 2. All methods of control of lake levels and protection of property on the Great Lakes should be considered before arbitrarily proceeding with the proposed increased diversion.
>
> 3. The diversions are authorized without reference to negotiations with Canada.
>
> 4. Legitimate interests of other States affected by the diversion may be adversely affected.

It would appear to me that points 2 and 4 have been met by the fact that the Corps of Engineers has completed its studies, which are contained in Senate Document No. 28, 85th Congress; and that this report points out that the estimated lowering in lake levels during the 3-year test period of increased water diversion proposed in H. R. 2 would be only three-eighths of an inch. This situation would not or could not adversely affect shipping and would have no significant effect on the production of power.

In an effort this year to help meet in advance and in adequate time any objections that could possibly call for a Presidential veto on the third point, a subcommittee was appointed early in this session—consisting of Mr. O'BRIEN, Mr. YATES, and myself—to urge the State Department and the President to negotiate with Canada for a friendly agreement on the increased diversion. These negotiations are now proceeding and are being expedited. It is my hope and expectation that such action will clear the way for Presidential approval of H. R. 2. I therefore urge the Congress today to give its usual prompt approval to this necessary legislation.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the remainder of my time to the gentleman from Wisconsin [Mr. WITHROW].

Mr. WITHROW. Mr. Speaker, it has been said repeatedly that there would be no damage done by reason of the diversion of 1,000 cubic feet of water per second from Lake Michigan, and it has been said that there would be only the lowering of three-eighths of an inch in the lake level of Lake Michigan. While I do not think that is so very important, it does not give us the proper perspective when we speak of fractions of inches. However, I do want to correct that statement in this regard.

When General Person was before the Committee on Public Works I questioned him as to the drawing off of an additional 1,000 cubic feet of water per second from Lake Michigan. General Person testified that the drawing off of 1,000 more cubic feet of water per second would mean a lowering of Lake Huron and Lake Michigan of five-eighths of an inch and that it would lower Lake Erie three-eighths of an inch and that it would lower Lake Ontario three-eighths of an inch. Now, the taking off of that much water, additional diversion from Lake Michigan, will affect every one of the Great Lakes with the possible exception of Lake Superior, and make no mistake about that. It is a huge volume of water.

Now, I would like to come down to this point. I asked General Person how much that additional diversion would affect the tonnage per normal vessel on the Great Lakes, particularly on Lake Michigan. General Person stated to me that we are facing the possibility of a reduction in shipping tonnage of possibly 85 tons per ship, on normal ships, on Lake Michigan. I have here the testimony of Admiral Spencer who at one time was head of the Coast Guard, I believe, and Admiral Spencer said this in regard to the diversion bills, which were similar bills. Admiral Spencer said that the bills under consideration—and they included a diversion of 1,000 cubic feet per second, the same as this bill—the bills under consideration could reduce existing vessel capacity by as much as 4 million tons per year. These are facts and certainly they contradict the statement that there is no damage to be done by reason of the proposed diversion of 1,000 cubic feet per second.

Now, going further we find this. As I said before, this diversion will affect every one of the Great Lakes with the possible exception of Lake Superior. It will affect the flow of water in the Niagara River, and that is terribly important, for this reason. I have here a report of the Chief of Engineers submitted in February 1957.

> The minimum estimated energy losses from a 3-year increase in diversion as based on existing plants will be 72,800,000 kilowatt-hours in the United States plants and 115,200,000 kilowatt-hours in Canadian plants, for a total estimated loss of 188 million kilowatt-hours.

That is in existing plants.

> The maximum estimated losses from a 3-year increase in the diversion as based on existing and proposed plants are 148,700,000 kilowatt-hours in the United States plants and 294,300,000 kilowatt-hours in Canadian plants, for a total estimated loss of 443 million kilowatt-hours.

Certainly that is quite a loss. At the present time we are having an international conference. Do you think for one moment, in view of the fact that the Canadian Government will lose all of these millions of kilowatt-hours, all of this water to generate power, they are going to agree to this additional diversion? And, therefore, how can the President, in good conscience, do anything else than veto this piece of legislation?

Mr. Chairman, here we are in the process of bringing into being the St. Lawrence Seaway. We are trying now to fix up the connecting channels. As a matter of fact, we are about to authorize that corporation to sell bonds to the extent of $140 million. It seems to me that if we are to permit a diversion that will lower the lake level to any degree whatsoever, we are working at cross-purposes with the completion of the St. Lawrence Waterway.

Mr. Chairman, I would like to call your attention at this time to the fact that the cities and communities along the Great Lakes that have harbors are doing everything within their power and spending thousands and in some cases millions of dollars to bring into being the St. Lawrence Seaway, and here we are seriously considering H. R. 2, which, if

enacted into law, would hinder to a degree at least the realization of this great project.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. MADDEN. Mr. Speaker, I yield such time as he may desire to the gentleman from Wisconsin [Mr. REUSS].

Mr. REUSS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Speaker, H. R. 2 is unnecessary and unwise.

The Supreme Court has jurisdiction over water diversion. It can grant permanent or temporary relief to Chicago when the need is shown, and has done so.

The Corps of Engineers has studied this matter over many years, and reported its findings. That study shows clearly that increased diversion would have harmful effects on navigation and power.

To say that a 3-year study will tell us the permanent effect of increased diversion is to say that a traffic count taken Monday, Tuesday, and Wednesday will tell us how wide a highway we will need in 20 years.

Our relations with Canada are at stake in this matter. Increased water diversion from the Great Lakes by American cities and States could well injure Canadian ports and power developments. Certainly we must not offend our good neighbor to the north by taking precipitous, unilateral action on water diversion.

Secondly, the President has twice vetoed this bill, and was on sound ground in so doing. In addition to his concern over our relations with Canada, the President has pointed out that all other means of solving the problems which greater water diversion is supposed to solve should be fully explored, and that means must be provided to protect navigation, power and shoreline rights.

The State Department is in the process of conducting discussions with Canada on the subject of increased diversion, and other executive departments have the matter under study. Certainly H. R. 2 should not be acted upon until these discussions have been concluded and a report made. If this is not done, I am sure that a third veto will result.

Canada still has the matter under consideration and the Ottawa Government is consulting with the Provinces involved. The reports I have are that the Provinces are disturbed at the loss of hydroelectric power and other harmful effects. They were not favorable to extra diversion.

Mr. MADDEN. Mr. Speaker, I yield such time as he may desire to the gentleman from Wisconsin [Mr. JOHNSON].

Mr. JOHNSON. Mr. Speaker, I should like to commend the gentleman from Wisconsin [Mr. WITHROW], a member of the Public Works Committee, for the wonderful statement he has made in opposing this legislation. I should like to associate myself with him in his position on this proposed legislation.

Mr. MADDEN. Mr. Speaker, at this time I yield such time as he may desire to the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. Mr. Speaker, I am opposed to the rule on the Great Lakes water diversion bill because I am strongly opposed to this legislation. I had voted against it when it was before this House during previous Congresses, and I testified against the bill before us in March of this year when it was considered by the Committee on Public Works.

Lake Michigan is not a bathtub to be filled or drained at the pleasure of the Chicago Sanitary District. It is a part of a complicated drainage basin which affects the welfare of 7 States and 2 nations. No change should be made in the operation of the basin without due and careful consideration of the interests of all parties concerned.

I realize that the legislation before us proposes a limited increase in the rate of water diversion through the Chicago Sanitary Canal on a 3-year basis. There is no evidence, however, that the proposed rate will fulfill the wishes and the needs of the Chicago Sanitary District. On the contrary, if we consider the weight of earlier experience, we can reach the conclusion that the increase proposed in the bill merely constitutes a wedge to open the floodgates.

The large-scale drainage through the Chicago Sanitary Canal had permanently lowered the levels of the Great Lakes by 6 inches and caused extensive damage and loss to the people of the Great Lakes States before it was finally curtailed by the Supreme Court decision in 1930.

We do not want to see that happen again. We cannot, in justice, advance the interests of a single community at the expense of the city of Milwaukee, and of numerous other communities located on the shores of the Great Lakes.

For these reasons, I do not believe that this is sound legislation and I am opposed to it.

Mr. MADDEN. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and on a division (demanded by Mr. BROWN of Ohio) there were—ayes 69, noes 35.

Mr. BROWN of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

The Doorkeeper will close the doors, the Sergeant-at-Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 267, nays 102, not voting 64, as follows:

[Roll No. 79]

So the resolution was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Gordon for, with Mr. Polk against.

Mr. Hébert for, with Mr. Kearney against.

Mr. Dawson of Illinois for, with Mr. Taylor against.

Mr. Holtzman for, with Mr. Kearns against.

Mr. Garmatz for, with Mr. Baker against.

Until further notice:

Mr. Morrison with Mr. Martin.

Mr. Thompson of Louisiana with Mr. Morano.

Mr. Miller of California with Mr. James.

Mr. Durham with Mr. Allen of California.

Mr. Fogarty with Mr. Chiperfield.

Mrs. Granahan with Mr. McConnell.

Mrs. Sullivan with Mr. Mason.

Mr. Green of Pennsylvania with Mr. Miller of Maryland.

Mr. Hemphill with Mrs. Rogers of Massachusetts.

Mr. Kelley of Pennsylvania with Mr. Saylor.

Mr. Byrd with Mr. Hoeven.

Mr. Baring with Mr. Siler.

Mr. Albert with Mr. Simpson of Pennsylvania.

Mr. Celler with Mr. Beamer.

Mr. Zelenko with Mr. Gubser.

Mr. Powell with Mr. Wolverton.

Mr. Preston with Mr. August H. Andresen.

The result of the vote was announced as above recorded.

The doors were opened.

Mr. BLATNIK. Mr. Speaker, I move that the House resolves itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2) to authorize the State of Illinois and the Metropolitan Sanitation District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2, with Mr. WILLIS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. BLATNIK. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the matter of additional diversion of Lake Michigan waters at Chicago on a temporary test basis has been under consideration by the Congress for a number of years. It was heard by the committees in the 82d, 83d, and 84th Congresses and was passed by the 83d and 84th Congresses but vetoed on both occasions. The present bill which has been reported by the Committee on Public Works must be viewed in the light of changed conditions since the last time it was considered in the 84th Congress. The bill in the last Congress and its predecessor were vetoed for reasons which have either now been removed or which have every prospect of being removed in the near future. I want to present enough of the background and facts to the Members so that there will be a clear understanding why favorable action now appears to be warranted.

The bill (H. R. 2) would authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the supervision and direction of the Secretary of the Army, to withdraw an additional 1,000 cubic feet of water per second to flow into the Illinois Waterway for a period of 3 years from enactment. This amount of 1,000 cubic feet per second is in addition to the presently authorized diversion of 1,500 cubic feet per second, and is also in addition to domestic pumpage. The bill provides that the Secretary of the Army shall study the effects of the increased diversion and shall report, with recommendations, to the Congress the results of such a study on or before January 31, 1961. In this study, the Public Health Service of the Department of Health, Education, and Welfare shall assist the Secretary of the Army in those aspects of the study relating to pollution and public health. The Corps of Engineers will carry on the actual studies on the effect on lake levels with respect to navigation and power.

There is a long history to the diversion problem. The amount diverted was as much as 10,000 cubic feet per second in 1928, but through a decree of the United States Supreme Court, issued April 21, 1930, the diversion was reduced to 1,500 cubic feet per second in addition to domestic pumpage. The effective date of the reduction was established in the decree as December 31, 1938. This diversion was increased under Supreme Court order on a few occasions, some in the interest of pollution abatement and some as war emergency measures in the interest of navigation. These diversions were for periods in 1940, 1942, and 1944. In December of 1956, the Supreme Court permitted an additional diversion, increasing gradually to a total of 7,000 cubic feet per second, exclusive of domestic pumpage. On January 28, 1957, the Court extended this temporary diversion to February 28, 1957, at which time extreme low-water stages on the Mississippi River below the mouth of the Illinois River had become sufficiently improved to permit the discontinuance of the increased emergency diversion. The purpose of this increase was to assist navigation through an unusually severe low-water period.

In vetoing a similar bill in the 84th Congress, the President's memorandum of disapproval was based, among other things, on a need for additional information on the effects of the increased diversion, and as a result, the Bureau of the Budget requested, through channels, that the Corps of Engineers prepare a special report as soon as possible under the existing authority for a comprehensive report on water levels of the Great Lakes. This report has now been prepared and submitted to the Congress, to the Bureau of the Budget, to the State Department, and to other interests. It is dated January 29, 1957, and is contained in Senate Document No. 28, 85th Congress.

The Chief of Engineers found that the temporary increase in the diversion of 1,000 cubic feet per second for 3 years would have temporary effects that would reach a maximum in about 3 to 3½ years, and then gradually diminish and disappear in about 15 years after the temporary diversion was discontinued. The lowering of the water surface on Lakes Michigan, Huron, Erie, and Ontario would be only three-eighths of an inch. There would be no effect on Lake Superior. The effect of decreased outflow on hydroelectric plants in New York and Ontario, representing 72 percent of the total involved, would be only a small fraction of 1 percent of the total energy production at the plants affected. The actual amount would vary, depending upon when the diversions are started and when proposed additional hydroelectric plants are put into operation. There would be some increase in hydroelectric power production at the existing Lockport plant in the Illinois Waterway, which would partly offset the decrease on the Niagara and St. Lawrence Rivers. According to the report of the Chief of Engineers, the remaining effects of the lake level lowering would be too small to measure in monetary terms.

The Committee, in reporting H. R. 2, was cognizant of the grounds upon which the bills in previous Congresses were vetoed. In the 84th Congress, the veto was based on three points.

The first was the lack of information on the effect of the diversion on lake levels. This matter has now been resolved by completion of the report of the Chief of Engineers, which shows that the temporary diversion would cause a minor loss in hydroelectric power production and the other effects, such as on navigation and shore front property, would be too small to measure.

The next point concerned the lack of agreement with Canada on the matter of diversion. The State Department has furnished its views to the committee and has pointed out that talks are now finally under way. The State Department called attention to the value of the report of the Corps of Engineers as an indispensable element in a joint examination of the subject with Canadian

authorities. It pointed out that the report provides the relevant information which the President advised having on hand before proceeding further. All that is left, therefore, of the basis for the veto as far as this second point is concerned, is the fact that the discussions between the United States and Canada now under way have not been finally concluded. The most recent information from the State Department indicates that every effort is being made to expedite these deliberations. The majority of the committee, however, feels that the bill should not be retarded or stopped since the basic objection on this point should no longer be an overriding consideration.

The last point concerns the objections of some of the States to the diversion. The fact that the diversion is only temporary and for the purpose of study, that the effects have been demonstrated to be either minor or too small to be measurable, and the fact that downstream interests are safeguarded by limiting the maximum diversion to 5,000 cubic feet per second and prohibiting diversion during times of flood, all make it apparent that this last point is no longer a valid reason for objecting to the bill.

In summary, it appears that a large part of the objections upon which the previous vetoes were based have now been removed or mitigated, and therefore, Mr. Chairman, I urge favorable action on H. R. 2.

Mr. WITHROW. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the distinguished gentleman from Wisconsin.

Mr. WITHROW. The gentleman said that most of this damage was speculative. I know the gentleman wants to be fair. But we have a report from the Chief of Engineers in regard to the loss of power, which report we have not had heretofore. That report was just made, in February of this year.

Mr. BLATNIK. The gentleman is correct. That report was made in answer to the objections raised by the administration in vetoing the bill. One of the points the veto message carried was that we should have this preliminary report or survey by the Corps of Engineers. It has been completed and is now available to us. The facts show that the results would be either negligible or so small as not to be of much consequence. The second survey, the sanitary report, which will be the major part of the survey, has not been carried out at all and cannot be carried out until we pass this legislation.

Mr. WITHROW. But in no way did the report approve this legislation.

Mr. BLATNIK. It neither approved nor disapproved. It merely gave an estimate of the situation and the results were either too small to be measured or so small as to be hardly of any significance at all.

Further details will be submitted by the gentleman from Illinois [Mr. O'BRIEN], the distinguished leader of the delegation of 16 of his colleagues from his State in support of this proposed legislation.

Mr. BYRNES of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the gentleman from Wisconsin.

Mr. BYRNES of Wisconsin. The gentleman refers to the engineers' study that has been filed and he says that the damage found would be either negligible or of no consequence. The gentleman is familiar with the finding as far as the power loss is concerned in the St. Lawrence and New York and Canadian areas is he not?

Mr. BLATNIK. We have those figures.

Mr. BYRNES of Wisconsin. Does the gentleman say that that is inconsequential as far as the loss is concerned?

Mr. BLATNIK. Yes; it is estimated that the loss may run anywhere from $400,000 to $900,000 a year with a gain elsewhere of $200,000, making a net loss of approximately $500,000 or $600,000.

Mr. BYRNES of Wisconsin. And the gentleman considers that very inconsequential?

Mr. BLATNIK. Yes, spread over the Great Lakes area.

Mr. BYRNES of Wisconsin. That is in one area; that is not the whole of the Great Lakes. That is just in the New York and Canadian area.

Mr. BLATNIK. Yes.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman from Wisconsin makes much of the point of a possible monetary loss which may be attributable to this diversion. The report of the Army engineers states the figures upon which the gentleman from Wisconsin made his statement. That report goes on to point out that this loss, to which the gentleman refers, is a fraction of 1 percent of the total amount of power generated in the area which will suffer the monetary loss.

Mr. BYRNES of Wisconsin. Does that make a $600,000 loss inconsequential, because the total power developed may be somewhere in the millions and therefore relatively that is small in amount? It is still a $600,000 loss that this experiment is going to create in the area as far as power is concerned; and you cannot get away from it.

Mr. YATES. I certainly can get away from it. I can get away from it by pointing out first that two diversions from Canada into Lake Superior have already raised the level of the lake by five-eighths of an inch above its normal level. Therefore, there is more water in the Great Lakes than would be taken out by this bill. That is one way I can get away from it. The second way I can get away from it is to point out that much more important than the monetary loss that may be involved in this legislation is the possibility of human loss, of illness, of pollution, the sanitary problems that may be created as the result of not being able to try this experiment. The gentleman talks about the monetary loss. I think this House is equally interested in the human problems, the solution of which are wrapped up in passage of this bill.

Mr. BYRNES of Wisconsin. If the gentleman will yield, on the health point the gentleman recalls that the Sanitary District of Chicago went before the Supreme Court and made certain allegations—this was a number of years ago—as to the health situation. They even painted in their petition the fact that people were dying because of the problem of the sewage canal.

Mr. YATES. And they were.

Mr. BYRNES of Wisconsin. What did the Supreme Court find in that decision? They found there was no justification for the allegations made in the complaint of the Chicago Sewage District. That was several years ago. If your situation has not improved in that period, I would say that Chicago is sleeping.

Mr. YATES. Let me assure the gentleman that Chicago is not sleeping.

The gentleman referred to an excessive withdrawal by our community. Prior to 1930, we did not have the engineering facilities with which to deal with the problem. We have built those facilities in our community. The fact still remains that even though we have attained a peak of engineering efficiency in the development of the sewage facilities, 10 percent still remains after treatment. This cannot be disposed of by engineering improvements. Therefore, we need this legislation to determine whether or not we can dispose of the residue without harm to the State of Wisconsin or the other States bordering the Great Lakes.

Mr. KNOX. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the gentleman from Michigan.

Mr. KNOX. On the question that was raised by the gentleman from Illinois [Mr. YATES], I might state that as far as Lake Superior is concerned Lake Superior is so low at the present time that it was necessary for the International Joint Commission to order a restriction on the flow of water from Lake Superior into the St. Marys River, which is the normal feeder for the lower lakes, by 10,000 cubic feet per second. It was necessary for the Government-owned powerplant at Sault Ste. Marie, Mich., which supplies the power for the operation of the Sault locks, to shut down unit 10 because of the low water in Lake Superior.

Mr. YATES. The Army engineers in this report that was submitted in accordance with the President's request point out that there will be no loss of water in Lake Superior as the result of this test in Chicago.

Mr. BLATNIK. Here is an example of what I mean by speculation and some confusion. We hear discussion about Lake Superior. We have always known and have again been informed by the gentleman from Illinois, quoting from the report, that this has no effect on Lake Superior.

Mr. SMITH of Wisconsin. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Chairman, I am opposed to further diversion of water from Lake Michigan to the Illinois Drainage Canal, hence I am op-

posed to the bill that is now before us for consideration.

Mr. Chairman, all of the States that border on the Great Lakes hold title to the waters of those lakes as a public trust to protect and preserve them for the benefit of present generations and generations that will follow.

Diversion of these waters from the Great Lakes will materially injure the interests of more than 50 million people who today reside in the Great Lakes area and who are today the beneficiaries of this great natural resource.

Diversion of water from the Great Lakes to other areas is injurious to the commerce that prevails on those lakes and this constitutes a major factor in the economy of all the States bordering on the Great Lakes.

It must be obvious to all that for a period of more than 100 years tremendous public expenditures have been made and are continuing to be made for the improvement of port facilities throughout the Great Lakes, which facilities will be injured by any impairment of the natural levels of these lakes.

Likewise it is important to point out that the Government of the United States and the Government of the Dominion of Canada have also expended and are expending large sums of public money in the development of the St. Lawrence Seaway which I believe will be considerably injured by the impairment of the lake levels that presently exist.

Mr. Chairman, there is presently pending in this House a request for a substantial increase in appropriations for the development of the St. Lawrence Seaway. In fact the amount requested about doubles the amount originally authorized. So there is this great investment by our Government and by the Dominion of Canada. Are we going to impair these investments?

Recently, Mr. Chairman, at a conference of the lake States the following resolution was adopted:

Be it resolved, That this conference of State, municipal, and industrial officials, speaking directly for and on behalf of the 50 million citizens of this region, hereby expresses unalterable opposition to any diversion of water from the Great Lakes watershed and specifically urges the Congress of the United States to defeat legislative attempts by the Chicago Sanitary District, the State of Illinois, and other groups outside the Great Lakes area which would pillage the natural resources vested by law and by specific Supreme Court decision in the people of the Great Lakes watershed and which would violate the rights of the people of the Great Lakes and Canada under existing treaties between the two Nations.

It is interesting to note, Mr Chairman, that in the letter of transmittal from the Department of the Army, office of the Chief of Engineers, dated January 29, 1957, Maj. Gen. E. C. Itschner admits that the increase in the diversion from Lake Michigan at Chicago would effect the levels and outflows of Lakes Michigan, Huron, Erie, and Ontario, and the St. Lawrence River, all of which are downstream, but they would not affect the levels of Lake Superior, which is upstream. The temporary increase in the diversion of 1,000 cubic feet per second for 3 years would have temporary effect that would reach a maximum in about 3 to 3½ years, then gradually diminish and disappear about 15 years after the temporary diversion was discontinued. The effects of a permanent diversion would increase progressively to a maximum in about 15 years and would then continue permanently at that amount. Thus there would be permanent impairment of lake rights.

General Itschner, in his full report to the Senate committee—Senate Document No. 28—on page 40, states the effect on navigation of an increase in water diversion at Chicago, as follows:

Commerce on the Great Lakes has been a very vital factor in development of the entire Great Lakes region. The area tributary to the Great Lakes is rich in natural resources and has extensive fertile agricultural areas which give rise to the large amount of commerce on the Great Lakes. The major portion of Great Lakes commerce passes between the lakes. Ample natural depths for navigation are generally available in the open lakes. In their natural state the channels connecting Lakes Superior and Huron and Lakes Huron and Erie were very shallow for long reaches. Extensive dredging has been required in about 140 miles of these connecting channels to provide adequate depths for interlake navigation. In addition, the construction of locks was required near the head of the St. Marys River for navigation to bypass the 21-foot drop through the rapids at Sault Ste. Marie. The Straits of Mackinac connecting Lakes Michigan and Huron are wide and deep but dredging of several shoals has been necessary in the approaches to the straits to provide suitable channels for navigation.

The Great Lakes possess few natural harbors. The mouths of tributary streams, and to a lesser extent the lee sides of islands and points of land afforded shelter for vessels during the early years. However, extensive improvements have been required to develop harbors by constructing protective structures such as piers and breakwaters and by dredging channels from deep water to the docks in protected harbor basins or in the inner river channels.

Experience on the Great Lakes has clearly demonstrated that vessel owners have always taken full advantage of the improved depths provided for navigation. There are today and it is expected that there will continue to be many vessels in the Great Lakes fleet that are required to load at reduced drafts except during times when levels of the lakes are at high stages. Consequently, lowering of lake levels resulting from an increase in diversion from Lake Michigan at Chicago will adversely affect Great Lakes navigation. The magnitude of this effect will vary with the amount and duration of the increase in diversion.

Mr. Chairman, for the reasons that I have stated, I believe it is incumbent upon me as one of the Representatives from the great State of Wisconsin to oppose H. R. 2. If there is need for further sewage treatment by the city of Chicago this is the responsibility of that great municipality. I urge the defeat of this bill.

Mr. BLATNIK. Mr. Chairman, I yield to the gentleman from Illinois [Mr. O'BRIEN], the author of the bill H. R. 2, such time as he may require.

Mr. O'BRIEN of Illinois. Mr. Chairman, this bill has twice been approved by the Congress. It was passed by the 83d and 84th Congresses only to be vetoed by President Eisenhower. I have filed the bill again because its objective is so vital to the people of the State of Illinois and because I have reason to believe that the principal objections raised by the President and which provoked his veto may be eliminated.

The bill was passed twice before because it provides for an intelligent and commonsense approach to a very difficult problem which confronts the State of Illinois.

Chicago is one of the great industrial communities of the world. As an industrial city it has the burden of disposing of a tremendous amount of waste products, and as a matter of fact, its human and industrial waste is the greatest in the United States—greater even than New York City itself. And Chicago is growing and will continue to grow, thereby multiplying its waste disposal problems enormously.

To meet this problem the Metropolitan Sanitary District of Greater Chicago has built a sewage-disposal system which is perhaps the finest of its kind in the world. It has the finest and most modern equipment in the world, purchased at a cost of hundreds of millions of dollars, all paid for by the citizens who live in Cook County. The engineering processes of the system permit a 90 percent purification which is the highest degree obtainable. It is for the treatment of the 10 percent balance that we need a small amount of additional water from Lake Michigan.

We believe that the small amount of additional water will not be injurious to any of the communities who live on the Great Lakes. We do not know this for sure. And that is the purpose of this bill—to find out. It proposes to conduct a test for 3 years under the direction of the Corps of Army Engineers. We are now withdrawing 1,500 cubic feet per second from Lake Michigan. This test would permit us to withdraw an additional 1,000 cubic feet per second. This is certainly not an unreasonable amount.

Let me emphasize that this is only an experiment. It is not permanent diversion. It will end in 3 years and all during this time it will be conducted under the direct supervision of the Army engineers. It will give us the opportunity we desperately need to find out whether the increased amount of water taken will actually be harmful to the communities that depend upon the water of the Great Lakes for one reason or another.

We are faced with the necessity to eliminate increasingly noxious fumes and the possible contamination of the drinking water system of some communities along the Illinois Waterway. We want to avoid that unhealthy and unsanitary condition without hurting any of our neighbors. All we ask is your approval to permit us to make this test. Passage of H. R. 2 will give us that opportunity.

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of Illinois. I yield.

Mrs. CHURCH. I have asked the gentleman to yield so that I may express to him personally and for the city of Chicago and for the entire metropolitan area, which the sanitary district serves, my appreciation for what the gentleman

has done to make this legislation possible. For his persistence, his patience, and his outstanding cooperation, we are grateful. I hail my colleague from Illinois [Mr. O'BRIEN] as the leader in this movement.

Mr. O'BRIEN of Illinois. I thank the gentlewoman. I want to say, too, that the gentlewoman did her share in helping us to succeed, as I am sure we will today.

Mr. COLLIER. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of Illinois. I yield.

Mr. COLLIER. This afternoon in the argument there have been proposed up to now actually two objections. One is the apparent fear of pollution of the waterways, and the other, of course, is the fact that three-eighths of an inch would be conceivably reduced from the lake level. I would just like to point out, if I may, that actually pollution in the water would not be increased by this program. In reality, it would be lower by volume by reason of the increasing of the flowage into the waterway. Secondly, when we are talking about three-eighths of an inch over a 3-year period, I do not think we should lose sight of the fact that by the normal process of nature each year—and this is according to figures of the Army engineers—the variation in the water levels of the 5 Great Lakes is from 12 to 22 inches per year. That is the normal situation, and we are speaking about three-eighths of an inch over a span of 3 years.

Mr. McGREGOR. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I would like to answer the distinguished gentleman from Illinois [Mr. YATES] who seemed to infer that no one had opposed this, and it should become a law. This is the third time that this particular legislation has been before this House. I might refer you to the fact that it has been vetoed twice. For what reason? For the simple reason that the President had asked the Army engineers, in conjunction with Canadian officials, to make surveys relative to this subject, and a report. That report was submitted by the Army Engineer Corps on February 18, 1957. Immediately upon receipt of that report of the Army engineers the President appointed a Commission to work in conjunction with our Canadian officials to determine what should be done about that report. The President, in his veto message on two occasions, called attention to the fact that they had already recognized that there was a problem there but he thought that the fact that we were dealing with our Canadian friends they should be in on the survey to determine what would be fair and equitable. I repeat, the Army engineers made their report on February 18, 1957, and a commission was appointed, and that commission has been working and is working now and submitting their findings to their respective countries.

I read the report of the Department of State relative to this subject:

> In view of the fact that negotiations with Canada are under way, the State Department would prefer that the proposed legislation not be enacted until the conclusion of the joint examination now being undertaken by the two countries. It does not seem appropriate to proceed with a measure which will have tangible consequences in both countries while bilateral discussion of those consequences is still in process.

Now, do we want to embarrass not only our own Government but the Canadian Government and go through with this legislation and say that we must do so and so without regard to the Commission working for an equitable solution? That Commission is going to report. It will probably be only a few weeks. They may do the very thing you want to do, but let us not slap our Canadian neighbors in the face and give no regard to the Commission that is working on this very subject. That is my plea this afternoon.

Mr. BOYLE. Mr. Chairman, will the gentleman yield?

Mr. McGREGOR. I yield to the gentleman from Illinois.

Mr. BOYLE. Does the gentleman really feel that Canada has any proprietary interest in this bill?

Mr. McGREGOR. Yes, I do. Let me answer the gentleman's question. Let me ask the gentleman this: Does he consider Canada a good neighbor of ours?

Mr. BOYLE. I think she is a wonderful neighbor, and Canada has expressly said that she has no legal concern for this inland lake whatsoever.

Mr. McGREGOR. Will the gentleman put that in the RECORD, that "Canada has no concern for this inland lake whatsoever" and I am using his exact words?

Mr. BOYLE. I will as soon as I get an opportunity.

Mr. McGREGOR. I will be very happy. Does the gentleman deny that we have a Commission now operating between Canada and the United States in order to resolve this problem?

Mr. BOYLE. I submit we have a Commission, but I further submit that I have already included in the RECORD, 2 or 3 weeks ago, an editorial from one of the prominent newspapers in Canada saying that they cannot understand why in the name of heaven our State Department continues to talk about Canadian interests in Lake Michigan, because confessedly Canada has absolutely no concern for it under the treaty of 1909.

Mr. McGREGOR. The gentleman is wrong and the record will show that Canada is interested and has been cooperative. I am not going to yield to the gentleman to make a speech. He can make a speech in his own time. I challenge the gentleman to dispute it. There is a Commission appointed and they have been working to solve the many problems. Why not let them make their report.

There is a commission from Canada meeting with a like commission from the United States to study the engineers' report and then make a finding.

Mr. WITHROW. The reason Canada is so vitally interested in this diversion of water from Lake Michigan is the fact that under the estimate of the Army engineers the minimum estimated energy loss for a 3-year increase in diversion for Canada is 115 million kilowatt-hours. Certainly they are interested in that; and until that matter has been cleared up and some sort of concession made they are not going to agree. Of course they are interested and rightfully so.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. McGREGOR. I do not want to consume too much time, but the gentleman yielded to me. I yield to the gentleman.

Mr. YATES. I want to point out that under the treaty for the diversion of water between the United States and Canada which was negotiated in 1909, and under which the Commission to which the gentleman referred is now operating, the Commission can determine the equitable flow of water between the two countries. Under that treaty Lake Michigan was specifically excluded as being an inland lake and not affecting the flow of water from Canada.

Mr. McGREGOR. We are coming right back to the original argument. The Commission is holding meetings; they are in conference. Let us give them an opportunity to submit their views.

I want to say something to my far western friends, many of whom are expecting to send their grain and produce through the St. Lawrence Waterway, that if you reduce the depth of water 1 inch it will mean the loss of 100 tons carrying capacity. What is it going to mean to the St. Lawrence Seaway? It will have a like effect on Michigan. So again I remind you who are thinking of sending some of your agricultural products through this seaway, do not forget that 1 inch means 100 tons.

We are going to have to rely upon experts. I am of the definite opinion that I know nothing about the water level situation. I repeat, we have appointed a board of Army engineers; they have made their report. Canada has done likewise, and those commissions are now operating. Let us be fair, let the experts give us their opinion at least, and then we can take it up.

I want to read the last paragraphs of the veto message of President Eisenhower:

> Although I am fully aware of the seriousness of some of the problems confronting the Chicago area and the State of Illinois, the record on H. R. 3210 affords no basis for me to change my position in the matter. Accordingly, under the circumstances, I am convinced that the bill should not be approved.
>
> I am asking the State Department to engage in discussions with the Canadian Government in an attempt to work out a solution to these problems as soon as all pertinent facts are available.

Let us give the commission an opportunity.

I would like to summarize and include opinions of some of our State officials as well as Federal.

Mr. Chairman, again we have for our consideration H. R. 2, which is a bill to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago of diverting some of the water from Lake Michigan into the Illinois Waterway.

Mr. Chairman, may I give a brief résumé of previous bills on this subject?

In the 83d Congress a similar bill, H. R. 3300, was presented and passed and was

vetoed by the President. Again in the 84th Congress H. R. 3210 was presented to us and it was again vetoed by the President.

Mr. Chairman, by permission given to me in the House, I insert the President's veto message on H. R. 3210 under date of August 9, 1956. May I quote from a portion of the President's veto message:

A comprehensive report by the Corps of Engineers which will include consideration of the best methods of obtaining improved control of the levels of the Great Lakes and of preventing recurrence of damage along the shores is nearing completion. I am asking the Secretary of Defense to expedite completion of this report.

I would also like to quote further from the veto message of the President and I quote:

I am unable to approve the bill because * * * (2) all methods of control of lake levels and protection of property on the Great Lakes should be considered before arbitrarily proceeding with the proposed increased diversion, (3) the diversions are authorized without reference to negotiations with Canada, and (4) the legitimate interests of other States affected by the diversion may be adversely affected.

The report of the Army engineers referred to has now been submitted. The Army engineers submitted this report in February 1957. This report has been forwarded to a commission, a group of which represents Canada and a group which represents the United States.

That Commission is working now, Mr. Chairman, trying to determine an equitable solution to this problem and it certainly seems to me that in fairness to all parties concerned we should delay the consideration of this legislation until the discussions with the Canadian Government are completed and a definite agreement be entered into. I am not going into the details of the merits or demerits because I am sure that those who will follow me and are members of the subcommittee that handled this legislation will give you full details of just what the proposal will do.

Mr. Chairman, I would like to just point out a few things for consideration. At the present time the water supply in the Great Lakes is diminishing. This stage of the water has been for several years and is now downward. Some months ago we heard the sponsors of the St. Lawrence Seaway tell us that its construction and development was primarily for the people to provide a deepwater channel for the Great Lakes. Lowering of the lake levels by even so much as 1 inch will certainly result in increased costs and maintaining port facilities. The cargoes carried by the vessels to these ports are of vital importance to our industry and the lowering of this water 1 inch means about 100 tons less each payload for each ship. You can readily see what it will mean to the shippers of this area. This is only a touch, Mr. Chairman, and I am sure more factual information will be furnished by my colleagues. However, may I stress upon you this one point. The same conditions exist now, namely, that the Commission made up of individuals representing the Canadian Government and individuals representing the United States Government are now trying to work out an equitable agreement. Please let us be fair with that Commission and wait until they file their report.

Mr. Chairman, I am inserting in my remarks the very fine statement made by the attorney general of Ohio, the Honorable William Saxbe. I also am enclosing a copy of a letter from the State Department under date of February 14, 1957, in which the State Department asks that the legislation be postponed. I also am inserting for the RECORD, Mr. Chairman, a letter from our Governor of Ohio calling a meeting of a governor's conference. I also am enclosing the results of that governor's conference. Also enclosed is a telegram from Governor O'Neill received yesterday.

In conclusion, may I quote from the statement of the Department of State:

In view of the fact that negotiations with Canada are underway, the State Department would prefer that the proposed legislation not be enacted until the conclusion of the joint examination now being undertaken by the two countries. It does not seem appropriate to proceed with a measure which will have tangible consequences in both countries while the bilateral discussion of those consequences is still in process.

STATEMENT OF WILLIAM SAXBE, ATTORNEY GENERAL OF OHIO

I appreciate the opportunity of appearing before this committee to speak for the State of Ohio in opposition to the bills providing for the diversion of the waters of the Great Lakes into the Illinois Waterway, via the Chicago Sanitary Canal.

In prior sessions of the Congress, the policy of the State of Ohio has been to oppose any legislative action which would permit diversion of water from Lake Michigan in excess of that amount permitted by the decree of the Supreme Court of the United States entered April 21, 1930.

From time to time, of course, there may be emergency circumstances which will warrant the diversion of additional water. The Supreme Court has adequate authority and jurisdiction to authorize increased diversion in such emergency situations. For example, in the fall of 1956, when the State of Illinois petitioned the Supreme Court for a temporary modification of the decree of April 21, 1930, to permit an additional diversion, the State of Ohio, an original complainant, interposed no objection to the Illinois application. We did not waive our previous objections to diversion and expressly reserved the right to take such a position in any further proceedings before the Court. The basis for this policy formulation was upon the representation that there was temporary emergency.

To reiterate, the policy of the State of Ohio has been consistent in opposing diversion. The increase of commerce in the Great Lakes region, and the growing demand for industrial, domestic and navigational water has resulted in recurrent water shortages. This in conjunction with the lowering of the water tables and other water resources from natural causes makes it apparent that water conservation and supply is now of paramount importance to the public welfare.

History confirms the wisdom of this policy. The waters of the Great Lakes, like all other natural resources, are not unbounded and unlimited. The supply of water into the Great Lakes varies from time to time, sometimes that supply is abundant; sometimes it is not. At present, the supply is diminishing. The stage of the water of the Great Lakes is now and has been downward for several years and there is no indication that the downward trend is abating. I am informed that the levels of the Great Lakes fluctuate in a 23-year cycle, the most high point of such cycle was reached during 1952. It would appear that these levels would be expected to decrease for at least the next 7 years. In October 1952, for example, the mean stage of Lakes Michigan and Huron was 581.95 feet above sea level. In October 1956 the mean stage for those lakes was 579.97 feet above sea level, showing that within the 4-year period the level had been lowered by 1.98 feet. In October 1952 the mean stage for Lake Erie was 573.27 feet above sea level, while in October 1956, the mean stage was 572.56, indicating a lowering of the mean stage of 0.71 foot.

Congress, after many years of debate and consideration, finally authorized the construction and development of the St. Lawrence Seaway, the primary purpose of which is to provide a deep-water channel for the Great Lakes. The ports on the Great Lakes now exceed in importance in many instances even the large deep-water ports on both coasts. The seaway, of course, will further increase the importance of these ports. Ohio cities will participate in the increased commerce the deep-water route will bring. Our cities along Lake Erie from Toledo to Conneaut are planning for the expansion of their port facilities and for the deepening of their harbor channels.

Lowering of the lake levels by even so much as 1 inch will certainly result in increased costs of constructing and maintaining port facilities, and thereby increase the financial burden.

The cargoes carried by the vessels to these ports are of vital importance to the industrial complex of northern Ohio. It is important to the industry involved and to the ultimate consumers of their products that cost of transporting raw materials to feed these industries be kept at the lowest possible point. Adm. Lyndon Spencer, testifying on behalf of the Lake Carriers Association before this committee in the 84th Congress, mentioned that these carriers determine their loadings very carefully, even as close as a 30-inch clearance. In the newer ships a 1-inch loss in draft results in the loss of 100 tons of cargo. This, of course, means that transportation expenses are raised.

As I understand it, one of the purposes of the St. Lawrence Seaway is to enable port cities on the Great Lakes Waterway to accommodate oceangoing bottoms. Thus it would seem that the legislation presently before this committee is at cross purposes with the desired objectives of the St. Lawrence Seaway project. On the one hand the affected States are to increase deep-water facilities, and on the other hand permission is given to lower water levels.

This bill attempts to meet the previous objections to a permanent diversion of water from Lake Michigan by providing for a 3-year temporary diversion and a study of its effects. The State of Ohio views this as an attempt of the "camel to get his nose in the tent," and feels that once the authority to divert additional water has been granted by congressional action, it will be continued. The tendency of temporary projects and measures to become permanent is well known to all of us in public life.

Further demonstrating the camel's nose in the tent idea, when the State of Illinois in January of 1957 sought an extension of the temporary modification order of December 17, 1956, they pleaded in their application that by reason of the diversion of water permitted under the order of December 17, 1956, the emergency existing in the Chicago Sanitary District and Illinois Waterway had terminated. Upon this representation, States of Ohio and Wisconsin then objected to any further diversion other than that diversion permitted by the original Supreme

Court decree of April 21, 1930. Even after such admission, the State of Illinois obtained an additional 30-day diversionary period from the Court.

If this authority is granted to the Chicago Sanitary District and the State of Illinois, it will set a precedent for such diversions by other governmental authorities in the United States or Canada. Surely they would have a right to insist that they be given the same privileges with respect to diversion that the Chicago Sanitary District is granted in this bill. There have been proposals in Ohio in recent years that water from Lake Erie be diverted to points in Ohio situated in the Ohio River watershed.

Although there are other serious problems, such as the constitutionality of such legislation, possibly of conflict with existing international treaties and agreements, which are well worthy of consideration, I have restricted my comments to discussing the problems which directly affect the people of the State of Ohio. I wish to thank the committee for affording me the opportunity of appearing before you to express the views of the State of Ohio on this problem.

DEPARTMENT OF STATE,
Washington, February 14, 1957.

The Honorable CHARLES A. BUCKLEY,
Chairman, Committee on Public Works,
House of Representatives.

DEAR MR. BUCKLEY: Reference is made to your letter dated January 11, 1957, and this Department's letter of January 14, 1957, concerning your request for a report on H. R. 2, to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes.

Attention is invited to the statement concerning H. R. 3210, which was similar legislation in the 84th Congress, by Marselis C. Parsons, Jr., Director of the Office of British Commonwealth and Northern European Affairs of this Department. His testimony, with a memorandum on legal questions and a note dated February 13, 1956, from the Canadian Embassy, is printed in hearings of a subcommittee of the Senate Committee on Public Works on H. R. 3210 at pages 53–65.

At the close of the last session of the 84th Congress, H. R. 3210 was passed but was disapproved on August 10, 1956, by the President. In his memorandum of disapproval he said in part:

"A comprehensive report by the Corps of Engineers which will include consideration of the best methods of obtaining improved control of the levels of the Great Lakes and of preventing recurrence of damage along the shores is nearing completion. I am asking the Secretary of Defense to expedite completion of this report. This report is in addition to the technical report on the effects of an increased diversion into the Illinois Waterway which has been made by the Joint Commission. I think it would be unwise to proceed with the diversion in the manner proposed in H. R. 3210 until all relevant information has been obtained, particularly since objections to the proposed diversion have been registered by the Canadian Government in its note dated February 13, 1956, and additional objections filed by legal advisers of the States of Wisconsin, Ohio, and New York.

"Although I am fully aware of the seriousness of some of the problems confronting the Chicago area and the State of Illinois, the record on H. R. 3210 affords no basis for me to change my position in this matter. Accordingly, under the circumstances, I am convinced that the bill should not be approved.

"I am asking the State Department to engage in discussions with the Canadian Government in an attempt to work out a solution to these problems as soon as all pertinent facts are available."

The Department has been advised by the Chairman of the United States Section of the International Joint Commission that two reports of its International Lake Ontario Board of Engineers are available for use in any discussion of this subject with Canadian officials and that it is not expected that further studies by its board of the proposed diversion will be necessary.

The special report of the Corps of Engineers, mentioned by the President in his memorandum has now been transmitted for clearance to the Director of the Bureau of the Budget. As soon as the official report is received by this Department, a conference with Canadian officials on this subject will be arranged at the earliest possible date.

In the circumstances it is believed that action respecting this legislation should be postponed until the results of the projected conference with Canadian officials can be made available to the committee.

The Department has been informed by the Bureau of the Budget that there is no objection to the submission of this report.

Sincerely yours,
ROBERT C. HILL,
Assistant Secretary
(For the Secretary of State).

THE STATE OF OHIO,
OFFICE OF THE GOVERNOR,
State House, Columbus, April 18, 1957.

To all Members of the United States House of Representatives and United States Senate.

From: Great Lakes States.

GENTLEMEN: On Friday, April 12, at my invitation official representatives of every Great Lakes State except Illinois, together with a large number of municipal and port authority officials and representatives of the substantial commercial interests of this region, met at Cleveland, Ohio, to discuss legislation now pending before the United States House of Representatives permitting an increased diversion of Great Lakes water through the Illinois Waterway.

This conference unanimously adopted the resolution attached to this letter, expressing the unalterable opposition of these States to this attempt to rob our people of a natural resource possessed by them and which possession has been specifically recognized and protected by the United States Supreme Court.

May I urge each of you to consider this resolution and may I call upon you to protect the paramount interest of our States in this body of water? If you would like to review a complete transcript of this conference, please so advise me.

Very truly yours,
C. WILLIAM O'NEILL,
Governor of Ohio.

RESOLUTION ADOPTED BY GOVERNOR'S CONFERENCE, CLEVELAND, OHIO, APRIL 12, 1957

Whereas the States of New York, Pennsylvania, Ohio, Indiana, Michigan, Wisconsin, and Minnesota hold title to the waters of the Great Lakes under a high public trust to protect and preserve them for the benefit of some 50 million of their citizens; and

Whereas any diversion of these waters from the Great Lakes watershed materially injures the interest of these 50 million citizens in this natural resource; and

Whereas the commerce of the Great Lakes is a major factor in the economy of the region made up of these States and of the Nation itself, specifically in the coal, chemical, steel, and utility industries and public hydroelectric facilities; and

Whereas diversion of Great Lakes water outside the Great Lakes watershed materially injures the above-described commerce and the above-described industries; and

Whereas tremendous public expenditures have been made in and are continuing to be made in the improvement of port facilities throughout the Great Lakes, which facilities will be materially injured by any impairment of the natural levels of the lakes; and

Whereas the Government of the United States and the Government of the Dominion of Canada have expended and are expending tremendous public funds in the development of the St. Lawrence Seaway, which development will be materially injured by any impairment of the natural level of the lakes; and

Whereas the Congress of the United States has authorized the deepening of the connecting channels of the Great Lakes involving further tremendous expenditures of public funds, which deepening will be directly reduced by any impairment of the natural level of the lakes: Now, therefore, be it

Resolved, That this conference of State, municipal and industrial officials, speaking directly for and on behalf of the 50 million citizens of this region, hereby expresses unalterable opposition to any diversion of water from the Great Lakes watershed and specifically urges the Congress of the United States to defeat legislative attempts by the Chicago Sanitary District, the State of Illinois and other groups outside the Great Lakes area which would pillage the natural resources vested by law and by specific Supreme Court decision in the people of the Great Lakes watershed and which would violate the rights of the people of the Great Lakes and Canada under existing treaties between the two nations; and be it further

Resolved, That a copy of this resolution be transmitted to the Vice President of the United States as President of the Senate, the Speaker of the House of Representatives, the chairman of the Senate and House Committees on Public Works and to each Member of Congress from the States participating in this meeting.

COLUMBUS, OHIO, *May 21, 1957.*

Representative J. HARRY MCGREGOR,
House Office Building,
Washington, D. C.

I am informed H. R. 2 authorizing diversion of Great Lakes water through Illinois Drainage Canal to be considered on the floor of the House this week. This is a direct attempt to take a natural resource belonging to our citizens which has been vested in them by decree of the United States Supreme Court. This State has consistently opposed such efforts for almost half a century. I urge you to oppose this bill.

C. WILLIAM O'NEILL,
Governor of Ohio.

Mr. BLATNIK. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. KLUCZYNSKI].

Mr. KLUCZYNSKI. Mr. Chairman, I rise in support of H. R. 2. This bill authorizes an increase in diversion of water from Lake Michigan into the Illinois Waterway, in the amount of 1,000 cubic feet per second, in addition to the present amount of 1,500 cubic feet per second annual average now authorized by permit of the Secretary of the Army pursuant to the 1930 decree of the Supreme Court of the United States.

The bill directs the Secretary of the Army to make a study of the effect in the improvement in the conditions of the Illinois Waterway by reason of this increase in the diversion and to report the study results to Congress before January 31, 1961, with the Army's recom-

mendation as to the continuation, increase or decrease as to the proper diversion amount. The Army made a report to Congress in 1933, when a diversion of 5,000 cubic feet per second, plus domestic pumpage, was authorized, and stated that while in their judgment, aside from sanitary requirements, a minimum average diversion of 1,500 cubic feet per second plus domestic pumpage as ultimately authorized by the Supreme Court decree would meet the needs of a commercially useful Illinois Waterway, a further study should be made when the sewage purification plants had been completed and placed in operation by the Metropolitan Sanitary District of Greater Chicago.

That time has now arrived and no studies as to the Illinois Waterway on this phase have been made since 1933.

At the hearings before the House Public Work Committee of the 82d Congress in June 1952, the Army engineers recommended an increase in diversion and authorization for the further study, recommended in 1933. They stated 3 years would be required for such study. The Committee on Public Works in the 82d Congress favorably recommended similar bills following the Army engineers' recommendations.

In the 83d Congress, H. R. 3300 was introduced by Representative Jonas, of Illinois. This measure was passed by both the House and Senate. However, it was pocket vetoed by the President after the adjournment of the 83d Congress.

In the 84th Congress H. R. 3210 was passed by the House and Senate and again vetoed by the President.

H. R. 2 was introduced in the present Congress to meet the objections of the President and contain the following sections which were not in H. R. 3300 which was vetoed.

First. The maximum direct diversion from Lake Michigan shall not at any time exceed a flow of 5,000 cubic feet per second;

Second. The Secretary of the Army shall at all times have direct control and supervision of the amounts of water directly diverted from Lake Michigan;

Third. The Secretary of the Army shall not allow any water to be directly diverted from Lake Michigan to flow into the Illinois Waterway during times of flood in the Illinois, Des Plaines, Chicago, or Calumet Rivers.

The Committee on Public Works was requested to consider the following in their hearings on water diversion:

(a) The serious damage along all the shores caused by the present unprecedented high levels of the Great Lakes.

(b) The interest of navigation and interstate commerce both on the Great Lakes and the Illinois Waterway.

(c) Conditions in the port of Chicago and the Illinois waterway existing since the completion of the sewage-treatment program by the Metropolitan Sanitary District of Greater Chicago.

I firmly believe that this legislation is in the best interests, not only of the Cook County area, but of the entire Midwest.

The Illinois Waterway is steadily increasing in importance. It connects the two most important waterway systems in the Nation, namely, the Great Lakes and the Mississippi River. An additional diversion of 1,000 cubic feet per second of water from Lake Michigan, in addition to the presently authorized 1,500 cubic feet per second, would provide a clean stream and improve navigation. It would result in a marked improvement in the Chicago sewage system, and would lead to a drop in the level of Lake Michigan.

I know that some of my colleagues are concerned with the effect that this legislation may have on the Great Lakes water levels. I want to reassure them that we are also concerned with those water levels, but this legislation will have no material lowering effect on these lakes, a mere three-quarter inch on Lakes Michigan and Huron and only about one-half inch on Lakes Erie and Ontario and, as the report shows, these effects would not be realized until several years after the increased diversion commenced. The bill provides for the increased diversion only for a period of 3 years, after which the Corps of Engineers will file its complete study report, on which the right to further diversion will depend.

The chief opponents of this legislation are the Great Lakes Carrier Association. Let me tell the Members of the House that I would be the last man in this Congress to harm the shippers of the Great Lakes.

I have been a member of the House Committee on Public Works for a number of years and have always supported legislation beneficial to the Lake Carriers' Association such as the St. Lawrence Seaway, and was the sponsor for the widening of the Cal-Sag Canal which means so much to the Lake Carriers' Association and the shippers of the Great Lakes.

As for the shipping interests, I doubt whether anyone can seriously contend that three-fourths inch lowering can materially affect the shipping to the extent as to outweigh the needs, necessities, and benefits to the residents of Cook County.

There has been some talk of opposition from downstate Illinois, because of the fears of pollution from the filth and slime of the cities downstream. This objection has been adequately met by the assurances that in times of high water in the rivers, the increased diversion would not be used.

Instead of polluting downstream waters, the heavier flow will provide the means to freshen the waterway. The improved sewage-treatment methods used by the Metropolitan Sanitary District of Greater Chicago will help the purification of the water.

Frankly, I see no basic reason why anyone should oppose the adoption of this bill. I sincerely hope and trust it will be enacted by the House by a substantial majority.

Mr. McGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin, a member of the committee [Mr. WITHROW].

Mr. WITHROW. Mr. Chairman, I think we all ought to realize by now that, based on the report of the Corps of Engineers there is going to be damage done by reason of this diversion of a thousand cubic feet per second from Lake Michigan.

Secondly, I wish to point out a few projects in the United States. For instance, I would like to take you over to Niagara Falls, the Niagara project which will come into being, something we perhaps have overlooked. We are going to divert water from the river above Niagara Falls through a huge covered canal to form a lake, and below that lake we will have the Lewiston power project in New York? How are they going to get that water? We are going to divert the water from the Niagara River, but are they going to divert it 24 hours a day? No.

They are going to divert the water at certain hours of the night; then, they are going to permit the water to flow over Niagara Falls so that the beauty and the scenery and the falls will not be destroyed and the lake level may be built up. To say there is not a shortage of water in that area is ridiculous. The diversion of this thousand feet of water per second is going to make it more acute and that fact is recognized by the Corps of Engineers. So the people of New York should be particularly interested in this matter.

Mr. Chairman, I hold in my hand a letter dated April 18, 1957, addressed to: All Members of the United States House of Representatives and United States Senate, signed by the Honorable C. William O'Neill, Governor of Ohio, reading as follows:

THE STATE OF OHIO,
OFFICE OF THE GOVERNOR,
State House, Columbus, April 18, 1957.

To: All Members of the United States House of Representatives and United States Senate.

From: Great Lakes States.

GENTLEMEN: On Friday, April 12, at my invitation official representatives of every Great Lakes State except Illinois, together with a large number of municipal and Port Authority officials and representatives of the substantial commercial interests of this region, met at Cleveland, Ohio to discuss legislation now pending before the United States House of Representatives permitting an increased diversion of Great Lakes water through the Illinois Waterway.

This conference unanimously adopted the resolution attached to this letter, expressing the unalterable opposition of these States to this attempt to rob our people of a natural resource possessed by them and which possession has been specifically recognized and protected by the United States Supreme Court.

May I urge each of you to consider this resolution and may I call upon you to protect the paramount interest of our States in this body of water? If you would like to review a complete transcript of this conference, please so advise me.

Very truly yours,

C. WILLIAM O'NEILL,
Governor of Ohio.

The resolution referred to in that letter is as follows:

RESOLUTION ADOPTED BY GOVERNOR'S CONFERENCE, CLEVELAND, OHIO, APRIL 12, 1957

Whereas the States of New York, Pennsylvania, Ohio, Indiana, Michigan, Wisconsin, and Minnesota hold title to the waters of the Great Lakes under a high public trust to protect and preserve them for the benefit of some 50 million of their citizens; and,

Whereas any diversion of these waters from the Great Lakes watershed materially injures the interest of these 50 million citizens in this natural resource; and

Whereas the commerce of the Great Lakes is a major factor in the economy of the region made up of these States and of the Nation itself, specifically in the coal, chemical, steel, and utility industries, and public hydroelectric facilities; and

Whereas diversion of Great Lakes waters outside the Great Lakes watershed materially injures the above described commerce and the above described industries; and

Whereas tremendous public expenditures have been made in and are continuing to be made in the improvement of port facilities throughout the Great Lakes, which facilities will be materially injured by any impairment of the natural levels of the lakes; and,

Whereas the Government of the United States and the Government of the Dominion of Canada have expended and are expending tremendous public funds in the development of the St. Lawrence Seaway, which development will be materially injured by any impairment of the natural level of the lakes; and

Whereas the Congress of the United States has authorized the deepening of the connecting channels of the Great Lakes involving further tremendous expenditure of public funds, which deepening will be directly reduced by any impairment of the natural level of the lakes: Now, therefore, be it

Resolved, That this conference of State, municipal and industrial officials, speaking directly for and on behalf of the 50 million citizens of this region, hereby expresses unalterable opposition to any diversion of water from the Great Lakes watershed and specifically urges the Congress of the United States to defeat legislative attempts by the Chicago Sanitary district, the State of Illinois and other groups outside the Great Lakes area which would pillage the natural resources vested by law and by specific Supreme Court decision in the people of the Great Lakes watershed and which would violate the rights of the people of the Great Lakes and Canada under existing treaties between the two Nations; and be it further

Resolved, That a copy of this resolution be transmitted to the Vice President of the United States as President of the Senate, the Speaker of the House of Representatives, the chairman of the Senate and House Committees on Public Works and to each Member of Congress from the States participating in this meeting.

There are a good many people who are vitally interested in this diversion because it affects every one of the Great Lakes with the possible exception of Lake Superior.

Mr. Chairman, I hope that the pending bill will be defeated.

Mr. BLATNIK. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Chairman, I am taking these 2 minutes merely to predict that the Dominion of Canada, as a result of the conference now underway and following a long study and conversations with provincial authorities, will approve of this diversion and that, after the House and the Senate have passed the O'Brien bill, the President enthusiastically will sign it. It is just that simple. What is proposed is definitely to the advantage of the entire Great Lakes region.

All this is an experiment. If there is damage to anybody the work will be stopped immediately by the United States Government. Chicago certainly would not want to hurt her neighbors in any way. Moreover, Chicago also is to be an ocean port as a result of the St. Lawrence Waterway development, in fact the biggest of them all, and her own interest knocks into smithereens the argument of our friends from Wisconsin and Ohio that she is conspiring in some strange and mysterious way to lower the water of Lake Michigan so that ships of ocean draught cannot enter the harbors of the Great Lakes. The fact is that we on the Great Lakes have suffered more from high than from low water. At this time and with the prospect of fresh drains of water into the Great Lakes, which as yet cannot be measured, the wisest of the engineers are unable to calculate what will prove to be the normal level of water in the lakes. Commonsense and what time will prove to be the mutual interest of all the Great Lakes cities command that there should be no delay in the enactment of the O'Brien bill into law and the commencement of a test diversion under the supervision of the Corps of Army Engineers which will be stopped the very moment there is substantial harm to anyone.

The professed fears of harm resulting from the experimental diversion of a mere 1,000 additional units of water from great big Lake Michigan are actually fantastic. In this dramatization of the shadow our friends from Wisconsin and Ohio have overlooked the substance. Having no facts or logic to support their contentions, they necessarily must fall back on fantasy.

I am confident that the bill will pass the House and the Senate and that it will be signed by the President. I am equally confident that after the reexamination of the subject matter that the Canadian Government has made the position of the Dominion will be in conformity with the position of Chicago.

The united delegation from the Chicago area, comprising both Democrats and Republicans, on a strictly bipartisan basis, in supporting this proposed legislation, have had the wise and inspired leadership of the Honorable THOMAS J. O'BRIEN, and for this we are indebted to the gracious and distinguished Congresswoman from Illinois [Mrs. CHURCH] because it was on her nomination and insistance by all his colleagues that Congressman O'BRIEN accepted an assignment that he had wished to give to another. The entire House knows the diligence with which TOM O'BRIEN has kept to his mission, and when later today his bill finally has passed, the hand of every Member of the House, whether he voted for or against the measure, will be reached out to grasp TOM O'BRIEN'S hand in warm congratulation.

Mr. McGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. FORD].

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Ohio.

Mr. VORYS. Mr. Chairman, if what the gentleman from Illinois and other proponents have said is true, namely, that they are confident Canada is going to approve of this whole business, then, certainly, they would not object to having this bill recommitted until we can get the report from the joint study with Canada. In that way we will avoid an international incident and will avoid slapping a friendly neighbor in the face. If they have the courage of their convictions it seems to me these proponents would joint in a motion to recommit the bill until there is a report from the International Commission.

Mr. FORD. Mr. Chairman, the thing that bothers me primarily about this legislation is the fact that for a 3-year period there is a survey authorized with an additional diversion of 1,000 cubic feet per second. Now, supposing this diversion is authorized, the diversion does take place and then thereafter the Army engineers come up with a recommendation that in their opinion there should be no additional diversion over the 1,500 cubic feet per second. I, in the debate a year or two ago, asked the gentleman from Illinois if under those circumstances would he and the others who are the proponents of this bill then bow to the recommendations of the Corps of Engineers and would not seek additional diversion over the 1,500 cubic feet per second. When I asked the question of the gentleman from Illinois, and when I asked others, not one of the proponents would admit that they would bow to the recommendations of the Corps of Engineers. I do not challenge their good faith, but I say that by this legislation what they are seeking to get is the camel's nose under the tent, and once they get that additional diversion, then they will not be amenable to the diversion going down to the present level even though the Corps of Engineers makes the recommendation. So, in my judgment, this legislation is simply an effort to get the diversion up regardless of the consequences, and once it is up, then they will never retract and go back to the lower level, even though the Corps of Engineers may recommend that it is detrimental and harmful to the Great Lakes and the areas surrounding it.

In my district I have about 30 or 40 miles that borders on Lake Michigan. I would like to show you some pictures that appeared in a newspaper, the Grand Rapids Herald, one of which indicates a tanker which is transferring oil from the tanker to tanks on the land. You will note from this picture that the ship cannot get up to the dock. Why? Because in the last year the level of Lake Michigan has gone down 1.8 feet. The net result is that this tanker cannot operate effectively and efficiently.

Now, here is a picture of some water intake structures that the city of Grand Haven built out into the water of Lake Michigan to supply water for the city of Grand Haven, a community of about 10,000 people. This picture, taken this spring, indicates that this water intake, as you can see, is more than 7 feet out of the water at the present time. If the lake goes down farther, I am not so sure that this new system to supply water for the city of Grand Haven will operate effectively. So, when we talk about pollution in the Illinois area, we

in Michigan, those who have relied on an adequate level of the lake, must be concerned about the water supply in the communities in that area.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman referred to the colloquy that he and I had some years ago when the bill was previously on the floor. The gentleman will remember that I said that I could not speak for my whole community in replying to his question as to whether, in the event the experiment indicated that its continuance would be detrimental, that we would not then present our petition to the Congress again. The gentleman at that time, as I recall our colloquy, asked for a postponement of the legislation on the further ground that the Corps of Engineers was in the process of making a study, and that it would be best to postpone consideration of the legislation until the Corps of Engineers completed that study. The gentleman knows now that the Corps of Engineers has completed that study. Although they have neither recommended nor disapproved the proposed experiment, the Corp of Engineers has estimated, on the basis of its study, that over the 3-year period the sum total of the entire loss in lake levels would be five-eighths of an inch in Lakes Michigan and Huron and three-eighths of an inch in Lake Erie. This is according to the report of the Corps of Engineers.

I now ask the gentleman whether his opposition has been dissipated as a result of the statements by the Corps of Engineers that for the most part such an experiment would have minimal injurious effects upon the surrounding area.

Mr. FORD. The gentleman has stated the facts correctly. At the same time I feel that even with this report, the responsible individuals in the executive branch of the Government are not satisfied that we ought to proceed with this legislation. And since even with this report they cannot favorably recommend the legislation, it seems to me that we should take more time before we enact the legislation.

Mr. YATES. Mr. Chairman, if the gentleman would yield further, I think the gentleman has drawn an erroneous conclusion from a logical base. The fact that the Corps of Engineers did not recommend the legislation does not mean they are opposing it. It was not their function, as they point out in the report, either to recommend or to disapprove. They were merely to present the facts, leaving to the Congress the decision whether to make the test or not. The fact that they made no recommendation does not mean per se that they disapprove the test.

Mr. FORD. Is it not also true that those in the executive branch of the Government who have access to this report by the Corps of Engineers do not feel that they can come forward and favorably recommend the enactment of the legislation?

Mr. YATES. The gentleman speaks of superiors in the executive branch. To whom does the gentleman refer?

Mr. FORD. Based on the attitude of responsible people in the executive branch of the Government, I understand that no one representing the so-called higher authorities in the executive branch of the Government has come forward and favorably recommended this legislation. So, based on that situation as we find it today, it seems to me that it would be unwise to proceed with any program that might have an injurious and detrimental effect not only on shipping, on recreation and water supply, but other programs that are affected by the level of the lakes.

In addition, I must say this—and I emphasized it to begin with, but I want to reemphasize it now—the people who are the prime proponents of this legislation are not willing to say that they will abide by the recommendations of the Corps of Engineers, if those recommendations are contrary to their wishes.

Mr. YATES. Would the gentleman take my statement as being indicative of what the whole Chicago community would be willing to do or not do?

Mr. FORD. I would accept the gentleman's statement for he is a very able and very energetic proponent of this legislation, and a Member for whom I have the highest personal regard.

Mr. YATES. I reciprocate the gentleman's regard and admiration. I have the highest esteem for the gentleman as well. That is why, knowing the gentleman's affection for facts and for logic, and knowing that he would be persuaded by the empirical approach rather than by any theoretical or fanciful arguments, I would ask, Does the gentleman not agree with me that the best and surest proof as to what is likely to result from the 3-year experiment would result from the test itself? After that we will be in a position to appraise what the effect would be.

Mr. FORD. Providing the people who are the proponents are willing to go on record—the gentleman and others who are the proponents of this legislation—that they would abide by the decision. I hope the legislation is defeated.

Mr. BLATNIK. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. VANIK].

Mr. VANIK. Mr. Chairman, the issue involved in this debate transcends the local conflict between the Chicago area and the many communities of the lower lakes which are competing for use of the Great Lakes waters. It also transcends the traditional competition between the seaboard ports and the ports of the Great Lakes. The question is, Should one community, Chicago, for its own purposes be permitted to withdraw water from the Great Lakes, which are the property of this Nation, Canada, and the citizens of the several States?

There have been conflicts in Congress before over water. On this subject, no individual Member can feel indifferent to the issues involved. The harmful and wrongful precedents established by this legislation will at some time or another or in some way affect every single Member of this House.

To the people, who constitute the wealth of this land, the fresh-water supplies are America's prime asset and must be guarded.

Increasing water needs and the falling water table of the several States are rapidly approaching a national crisis. Ohio, Indiana, Pennsylvania, New York, and even Illinois are threatened with reduced water tables, along with an increase in their populations. As a matter of fact, more and more communities as far away as 100 miles from the Great Lakes are looking to the day when they can tap the Great Lakes for a water supply for life, for industry, and for their very sustenance. We can anticipate a tremendous development of urban growth along the New York Thruway, and the Pennsylvania, Indiana, and Ohio Turnpikes. Some day there will be one continuous band of cities along these highways. These new communities are going to need water, and the only source for that water is the Great Lakes Basin.

Secondly, the commerce of the Great Lakes cannot be placed in jeopardy by the self-interest of one city. In Cleveland the huge ore-carrying vessels drag their bottoms in the mud of a shallow river in order to reach their unloading berth. We cannot afford any loss of water in this part of the Great Lakes. We have tremendous investments in shipping facilities, and we would be exposed to the adverse effect of a lowered level if this legislation were to become law. It would have a disastrous effect along the entire Great Lakes seaway, as has been previously indicated.

Chicago's need for water is not for life but for waste. To permit that city to flush its industrial wastes into the lower Illinois and Mississippi downstate areas is a wrongful act, and those people in the lower areas who believe they will enjoy a bonanza of water for commerce will soon discover they have received an increased gallonage of pollution.

Chicago says it needs this water to preserve its public health, and at the same time it boasts of its tremendous sewage-disposal facilities and the tremendous sums that have been spent to eliminate pollution. The fact of the matter is that the city of Chicago has not spent more but less per capita for pollution control than most of her sister cities along the Great Lakes Basin. As a matter of fact, the Chicago area is doing next to nothing to treat the tremendous quantities of industrial waste which are generated in that area. I do not know about the other cities, but my city is building an interceptor sewer below the level of the river from which the effluent and industrial waste will be pumped up into a sewage-disposal plant.

It seems to me that the tremendous waste generated by the steel industries, the oil and the chemical plants in industrial areas is of paramount national concern. The only way our cities can approach this problem is by building adequate industrial waste disposal plants. There is not enough water in the Great Lakes to supply local needs, present and future, and still permit Chicago the special privilege of flushing its industrial wastes down the drainage canal. If this legislation becomes law,

it will give Chicago another 3 years to defer that which ought to be done now and what eventually must be done, and that is the construction of adequate sewage disposal and treatment facilities—adequate enough to treat tremendous volumes of industrial waste.

The day is near when no form of pollution will be permitted to contaminate either our air or our water, and the sooner we face up to that day, the sooner we make Chicago, Cleveland, and all the other Great Lakes cities face up to that day—the better for all of America. I hope this legislation will be defeated.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. CRAMER], a member of the committee.

Mr. CRAMER. Mr. Chairman, I rise in opposition to this resolution. I would like to point out for the following reasons. We hear a lot about economy today. Here is a place where legitimately there can be cut some $435,000 in future expected appropriations by not approving this authorization. Secondly, I want to point out the fact, and it has been pointed out previously, that there is not a single department that has favorably recommended this resolution. The Army engineers have taken a neutral attitude on the matter. The State Department is in opposition to it. The President has vetoed it twice. No department has indicated a favorable report on it. It is a little difficult for me to conceive—just a few minutes ago the House voted on an authorization and an appropriation for a $100 million new House Office Building, which never went before the Committee on Public Works. I think it is time we recognized the established rules of the House of Representatives not only in this, but in all instances—that where there are no favorable reports from the departments, that that be given adequate weight by the committee, which, in my opinion, was not done in this particular instance. Much has been said with regard to the President's position concerning this legislation and his reasons for the veto. So far as I am concerned in reviewing those four reasons for the veto, and I will review them very briefly, these are the facts. With regard to No. 4, it still remains in full force and effect:

> The legitimate interests of other States affected by the diversion may be adversely affected.

That is neither refuted nor discussed in the report.

Secondly, with regard to No. 3:

> The diversions are authorized without reference to negotiations with Canada.

In the committee report on page 7 with regard to that, the committee said in regard to the negotiations with Canada, the State Department pointed out these were now proceeding. There is no question but what the State Department opposes this bill, and that position is just as valid today as it was at the time of the President's previous vetoes on this measure.

With regard to number two of the President's veto message:

> All methods of control of lake levels and protection of property on the Great Lakes should be considered before arbitrarily proceeding with the proposed increased diversion.

That is the question which seems to be in the committee report indicated to be on page 7—and again I quote—"satisfactorily settled by the engineers." That is in the report. It is anything but satisfactorily settled. Now I want to point this out in the committee hearings themselves. The Army engineers in their report had these statements to make which, in my opinion, show that if you accept the evaluation of the Corps of Army Engineers on this project on the face of the report that is presently before the committee, there will unquestionably be an adverse overall result of this project. Let me give you the very facts as stated by the Corps of Army Engineers through General Person on page 21 of the committee hearings. In that respect of the hearings, what they said with regard to specific points that the Corps of Army Engineers had under consideration at that time. With regard to point number one, these are the benefits, these are the detriments on this project, which the committee has said in its report has been "satisfactorily settled." I say that they have been unsatisfactorily settled. They have been adversely settled. Here are the facts—number one.

These are the findings of the Army engineers upon which the proponents of this legislation are largely basing their efforts.

> An adverse effect on hydroelectric energy generation at Niagara and St. Lawrence plants, evaluated, in part, at from $408,000 to $918,000, depending on the timing and the amount of future additions to generating capacity.
>
> No. 3. Changes in theoretical dependable capacity which are not considered susceptible of monetary valuation—

Is the second objection to the bill.

It has been testified in the report to the effect that it would mean 100-ton light load on the part of all ships involved under this decrease in the height of the water resulting from water diversion as the Army engineers found would be the result. The cost of this would be substantial.

I want to point out that the Department of Public Works Committee has approved a $35 million increase in the St. Lawrence Seaway authorization, and has recommended it to the House. That means a total of $140 million that has been authorized for the St. Lawrence Seaway. To increase the depth of one portion of the St. Lawrence Seaway to the extent of 2 inches would cost in excess of $5½ million. The cost of overall deepening by 1 inch would be tremendous. The loss due to light loading at the rate of 100 tons per ship likewise would result in a substantial loss.

The CHAIRMAN. The time of the gentleman from Florida [Mr. CRAMER] has expired.

Mr. McGREGOR. I yield the gentleman 2 additional minutes.

Mr. CRAMER. So I say to you that when you consider the Army engineers' report—and I want to read these other two points:

> 5. Temporary effects on Great Lakes navigation tending to be adverse, but not practicable of measurement in monetary terms.
>
> The report also presented data to show that similar considerations, in amounts that would be somewhat greater and more susceptible of measurement and evaluation, would be involved if there were a permanent increase in the diversion.

The only reason for this 3-year study is an attempt to make this a permanent project. That statement on the part of the engineers is a significant fact.

I point out the fact that the statement of the Assistant Secretary of State appears on page 25 of the hearings in opposition to the bill.

I point out further that the additional reason contained in point 3 of the President for his objection to this bill still remains as valid as it was before. I point out with regard to point No. 3, in the President's objection, the committee states in its report the fact that the diversion is only temporary, for the purpose of a study and the fact that downstream interests are safeguarded by limiting the maximum diversion to 5,000 cubic feet per second and prohibiting diversion during times of flood. This would seem to indicate that there is no reason to take a different point of view than has been taken by the President with regards to the action of the last two Congresses.

That still remains as an effective objection as it has been at any previous time, because there is no question about it but what this is intended to be a permanent project. The request for this additional money is largely on the basis of the needs for determination on the part of the Health Department.

But before I go to that, let me say with regard to the opposition to this bill, the distinguished previous Governor, now Senator from the State of Ohio, FRANK LAUSCHE, had this to say, and I think this is critical in the consideration of this legislation; the determination of the needed diversion is now before and will continue to be before the United States Supreme Court and if at any time the parties involved feel they need additional water and can prove it is needed they can get it, but the Supreme Court at no time asked for additional diversion. Therefore, as Senator LAUSCHE said in his statement before this committee, "the Court also retains jurisdiction so that any of the parties to the original action can at any time apply for relief. Therefore, adequate means are already available to protect the rights of interested parties without the necessity of legislation." Therefore I say to you that as far as I am concerned the validity of three of the objections on the part of the President continue to remain and we are doing nothing but inviting an additional veto on the part of the President by passing this legislation.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. CRAMER. I yield.

Mr. VORYS. The gentleman is familiar with the practice of asking the Army engineers for their opinion on whether projects are economical and feasible and so forth.

Mr. CRAMER. Exactly.

Mr. VORYS. Does the gentleman not consider it significant, in view of the conclusions on the facts that the gentleman has just so ably reported to Congress, that the proponents of this project have not asked the engineers for their opinion?

Mr. CRAMER. They have received no favorable opinion from any governmental agency and the engineers' statement before the committee in my opinion is unfavorable.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

Mr. BLATNIK. Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana [Mr. BOGGS].

Mr. BOGGS. Mr. Chairman, I listened a few moments ago with considerable interest to the distinguished gentleman from Ohio [Mr. VANIK], who sought to leave the impression that the only affirmative interest in this proposal comes from the city of Chicago; and he made certain other references to that great city which I am quite certain the able representatives from Chicago are capable of answering.

I doubt if I shall consume all of the 5 minutes to which I am entitled, but I take this time to point out that the entire Mississippi Valley has an interest in this legislation. I realize, of course, that when we legislate, particularly in matters affecting the different sections of our Nation, that it is incumbent upon us as best we can to balance the equities between the various regions of our great country.

This legislation is directly of interest to the commerce on the Mississippi River and its tributaries. Last fall, as all of you know who read the report, the water was so low in the Illinois River, particularly at the Alton Lock dams in the lower Illinois, that the vast commerce which flows up that river was practically unable to move. That meant that most of the oil, petroleum, fuel oil, and other bulk commodities which go to the large cities of the Midwest were unable to move through the Mississippi River and the Illinois River.

At that time the Supreme Court ordered an increase in diversion from Lake Michigan and provided additional water for those locks and made possible the movement of the cargoes into the city of Chicago. So I think it is to gainsay the facts to have this body believe that this is simply a matter in which Chicago happens to be interested.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. Surely, I shall be glad to yield.

Mr. FORD. Suppose that in the future should this legislation be approved, that water in the Mississippi and its tributaries was high; would the people downstream want to be faced with legislation which by law increases the diversion from 1,500 cubic feet per second to 2,500 cubic feet per second? Or would they prefer to leave the increase or decrease to the discretion of the Supreme Court?

Mr. BOGGS. I think the gentleman really poses a hypothetical question.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. No; I have already yielded to the gentleman.

Mr. Chairman, I understand the measure before this body provides for a 3-year test; it is not permanent legislation. I know the gentleman has expressed some fear about its permanency, but I do not know how you would reach any satisfactory conclusion unless you permitted this test to be made.

The amount of diversion involved here is so small, relatively speaking, considering the capacity of the Mississippi River system, that its effect upon flood conditions in areas which are subject to flood, even if you had the maximum, I think would be imperceptible.

And I might say further that as far as I can see from a study of the report, that the effect is also imperceptible in the gentleman's area. I cannot believe that three-eighths of an inch, or one-quarter of an inch or an inch in bodies of water of the magnitude of Lake Michigan, Lake Erie, or Lake Huron could conceivably have any adverse effect, or for that matter have any perceptible effect. So it seems to me that in attempting to balance the equities between Canada and the United States, between the Great Lakes region and the Mississippi Valley region, between the city of Chicago and the other communities involved—Cleveland, for instance—this is a minimum. This is simply a test run to see what transpires, then to effect an equitable adjustment, if possible, as a result of the data so gathered.

I trust this measure will be adopted.

Mr. McGREGOR. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois, a member of our committee [Mr. BYRNE].

Mr. BYRNE of Illinois. Mr. Chairman, as a member of the Committee on Public Works and as a member of the subcommittee on Rivers and Harbors and Flood Control, I listened with a great deal of interest to my colleague from Florida who in the interest of economy stood here and opposed this pending legislation.

I come from the Chicago area, the southwest side of the city of Chicago. I want to commend the dean of the Illinois delegation, the gentleman from Illinois [Mr. O'BRIEN], and I also want to commend the able remarks of the gentleman from Illinois [Mr. YATES] as well as the remarks of the gentlewoman from Illinois [Mrs. CHURCH], the gentleman from Illinois [Mr. COLLIER], and those who might follow me.

It was only recently—I believe in the last week or two—when a precedent was established here on the floor of the Congress in connection with certain legislation that was proposed and in which some $50 million, was recommended, and finally enacted into law, the theory of the legislation being the creation and the encouragement of communities and towns to begin the construction of sewage disposal plants. Undoubtedly the fact that communities should be encouraged is something that we are all interested in. The thought behind that legislation was that the Federal Government would provide money as a beginning so that local communities could carry on and start building proper disposal plants.

We in the city of Chicago have not followed that procedure because in 1930 the Metropolitan Sanitary District of Greater Chicago was created and that district began spending money in the local community. Up to the present time it has spent some $300 million.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. KLUCZYNSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois.

Mr. BYRNE of Illinois. Mr. Chairman, in the city of Chicago approximately $300 million have been spent to create a proper sewage disposal plant. As a result of that, if we will look at the testimony taken by our committee, it will be found that has reached the point of efficiency of about 90 percent. In the Chicago area the Sanitary District of Chicago is taking care of a population of 4½ million people and, in addition to that, it is taking care of industrial waste that would be equivalent to the sewage of 3,800,000 people a total of 8,300,000 people. As was so ably expressed by the gentleman from Louisiana, this is but an experiment. All that we are asking the Congress of the United States is to give us an opportunity to continue an experiment so that we can divert an additional amount of water in order to take care of that additional 10 percent that remains after the 90 percent we are handling so capably.

Mr. Chairman, this is a reasonable request. Chicago has established an excellent precedent in doing a good job and it has been doing a good job right up to the present time. This bill should be passed by the House.

Mr. McGREGOR. Mr. Chairman, I yield such time as he may desire to the gentleman from Ohio [Mr. DENNISON].

Mr. DENNISON. Mr. Chairman, I am strenuously opposed to the passage of this bill, H. R. 2. Its passage would result in vast inequities to millions of people who use and obtain their livelihood along the shores of the Great Lakes and in my opinion, this is but the beginning of a permanent raid on the waters of these lakes for the benefit of one special group and one special area.

The ultimate effect of this unprecedented use of our public natural resources would be disastrous to the welfare and economy of those who have been led to believe, by the act of this very body in creating the Great Lakes-St. Lawrence Seaway, that the shores and the resources of our lakes would remain inviolate.

It is my great privilege to represent the 11th Congressional District of Ohio which is situated in the northeastern section of Ohio, the northern border of which contains approximately 60 miles of shoreline on Lake Erie. This area,

particularly along the lake, is one of the fastest growing industrial areas in the entire United States and this is so because of the ingenuity and the vision of the men and women who have dedicated their lives to the economic betterment of the area and also because of the hope and the promise which the act of this very body gave to them in approving the plan and the construction of the Great Lakes-St. Lawrence Seaway. Many new industries have located in this dynamic area which I represent and many more will continue to do so. We must, however, remain true to our pledge which is implicit in our support of the Great Lakes-St. Lawrence Seaway, namely, that the water of Lake Erie and of all the Great Lakes, will be made available equally to all those who border on its shores.

What are some trying to do today who support this bill? We have only to read the hearings before the Subcommittee on Rivers and Harbors of the Committee on Public Works and we find therein that this proposed diversion of water for the exclusive benefit of the city of Chicago will result in a lowering of the water level of Lake Erie by three-eighths of an inch and will reduce the carrying capacity of each ship that henceforth shall sail the Great Lakes by 85 tons per ship. The testimony of no less an authority than Linden Spencer, president of the Lake Carriers Association, indicated that the potential loss from the additional diversion at Chicago to the United States fleet, alone, would be nearer 1,200,000 tons annually and if the Canadian fleet is included, would be nearer to 1,500,000 tons annually.

Just a few months ago hearings were held in my district at the cities of Fairport Harbor, Conneaut, and Ashtabula, inquiring as to the advisability of deepening the channels in the harbors thereof so that ships ultimately using the Great Lakes-St. Lawrence Seaway will have adequate facilities at which to dock. What is the effect of this bill, H. R. 2, on this project which Congress has already sponsored? Clearly, it would be to vitiate to a great extent the benefits which this body has heretofore agreed are necessary to the welfare and the preservation of our national economy.

Opposition to this measure is not only shared by those of us who represent areas fronting on the Great Lakes, but by many others. I have just received a telegram from C. William O'Neill, Governor of Ohio, in which he states as follows:

> I am informed H. R. 2, authorizing diversion of Great Lakes water through Illinois drainage canal, to be considered on the floor of the House this week. This is a direct attempt to take a natural resource belonging to our citizens which has been vested in them by decree of the United States Supreme Court. This State has consistently opposed such efforts for almost half a century. I urge you to oppose this bill.

In his state of the Union message, President Eisenhower declared:

> Water is rapidly becoming our most valuable natural resource and when neglected can be a destroyer of both life and wealth.

This is no time to tamper with this precious commodity. This is no time to deplete our most valuable natural resource. This is the time to consider carefully and wisely how best our water resources can be used for the benefit of our whole economy and not just a small area around Chicago.

Much has been said today about this bill being the "camel's nose under the tent." I heartily concur, for if we pass this measure, what is to prevent the same interests from coming in 3 years hence or even a year hence, demanding the right to more water on the basis of alleged need created by normal population increases and, citing as a precedent the very bill we are asked to vote upon today.

I say to you once again—a piecemeal diversion of water from the Great Lakes by and for the benefit of one community or one State, wheresoever situated, is a dangerous precedent and one which we cannot conscientiously support, particularly at a time when it is so incumbent upon this Nation to conserve every resource that it has—not only for the welfare of its own people but for its own national security.

Mr. McGREGOR. Mr. Chairman, I ask unanimous consent that the gentleman from Ohio [Mr. HENDERSON] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HENDERSON. Mr. Chairman, I am opposed to the enactment of H. R. 2. I voted against the rule and it is my intention to vote against the bill itself. This bill has been up before the Congress on two previous occasions. Hearings have been held on three previous occasions. The President vetoed similar legislation in the 83d Congress and again in the 84th Congress. He gave as his reasons for the veto the following: First, that existing diversions were adequate for navigation in the Illinois Waterway and the Mississippi River. Second, all methods of control of lake levels, and protection of property on the Great Lakes should be considered before arbitrarily proceeding with the increased diversion. Third, the diversions are authorized without reference to negotiations with Canada. And fourth, legitimate interests of other States affected by the diversion may be adversely affected.

Mr. Chairman, I believe that the last two of those reasons should be considered very seriously by the Congress. Very definitely we will be affecting water rights of our neighbors to the north, the Dominion of Canada. In diverting waters, we are setting a precedent which might lead toward diversions by Canada to which we might object, but because of the diversions undertaken by this country, we would be in a poor bargaining position. Then too, it might lead to serious differences of opinion with the Dominion of Canada in the event the 3-year period authorized by this bill were to be extended.

I feel sincerely that if the provisions of this bill were to be exercised by the city of Chicago for a period of 3 years that there would be tremendous pressure brought to bear upon Congress to continue the authorization indefinitely, even though at the end of the 3-year period Canada might object to such continuation.

Much of the economic progress of the Great Lakes States and, in fact, the United States has been attributable to lake shipping. The tonnage on our Great Lakes has exceeded all expectations. We are presently developing the St. Lawrence Seaway so that additional tonnage in ocean-going vessels can be shipped from our Nation to all parts of the world. There is a suspicion that diversion of water might adversely affect the development of the St. Lawrence Seaway and, Mr. Chairman, where there is even a suspicion it would seem to me to be very wise to act carefully in the face of it.

The northeastern part of the United States is dependent, in part, upon electricity generated by the waters flowing from our Great Lakes. Anything which we might do in this Congress which would reduce the flow of that water might endanger our hydroelectric resources. The Governor of our great State of Ohio, William O'Neill, has expressed opposition to this plan. Other members of the State government of Ohio and of other States bordering on the Great Lakes have opposed this legislation. I feel that it is a step this Congress should not take and that this proposal should be rejected.

Mr. McGREGOR. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. McVEY].

Mr. McVEY. Mr. Chairman, I should like to associate myself with those who favor the passage of H. R. 2, a bill to increase the diversion of water from Lake Michigan to the channels of the Chicago Sanitary District. H. R. 2 provides for an increase in the diversion of water from Lake Michigan of 1,000 cubic feet per second. The present rate of diversion, as you have been told, is 1,500 cubic feet per second. I do not wish to discuss the results to be obtained from this additional diversion of water and the present need for it. I wish to correct an impression which prevails among a great many people, including some who should be well acquainted with the sewage treatment plants in the city of Chicago. I should like to recite a portion of an editorial of the Chicago Daily Tribune on this particular subject. This excerpt from the editorial follows:

> The Financial Post of Toronto, in a front page editorial, urges Chicago to build a sewage treatment plant instead of "trying to grab more Great Lakes water to flush its raw sewage down into the Mississippi." For nearly a century, the newspaper said, Chicago has been trying to avoid the expense of building a sewage treatment plant.
>
> Such ill informed statements could be ignored if they appeared in a minor newspaper without resources to hire a competent staff or to maintain a library, but the Financial Post is considered an important business weekly, a star in the crown of Canadian journalism. On occasions it has been used by the Government to enunciate its policies. There is no excuse for such a newspaper to be as benighted as the editorial indicates.

At today's prices, the total value of the sanitary district's facilities runs into millions of dollars. I am told there are three such plants. According to the record, their total cost was approximately $150 million. In addition to this amount,

the Chicago Sanitary District has invested $180 million on interceptor sewers. Another $100 million has been spent on canal projects in connection with sewage disposal.

It should be understood that Chicago does not flush its raw sewage down into the Mississippi. The difficulty in this situation rests upon the fact that the waters at present lack oxygen and have too much nitrogen, making a need for more fresh water from the lake. It is my purpose to present to you the fact that the city of Chicago has done a splendid job in its attempt to properly dispose of its sewage problem. No city in the world has made a greater effort in this respect than has Chicago.

It is my opinion that the additional diversion of 1,500 cubic feet per second will not in any way interfere with shipping facilities of the ports bordering on Lake Michigan. The fact that the level of the lake varies so greatly during the cycle which extends from 7 to 14 years should be conclusive evidence of the fact that this additional diversion, which, according to the Army engineers, would lower the lake level less than 1 inch, should not be a matter that disturbs anyone. Another thing that should be repeated, perhaps, and remembered, is the fact that this bill provides for a 3-year trial only, and if during that time the facts do not bear out the information which we have received from the Army engineers, a change will be in order to remedy any situation then existing. It is my pleasure to support H. R. 2, and I hope it will be approved by the Congress.

Mr. KLUCZYNSKI. Mr. Chairman, I ask unanimous consent that the gentleman from Illinois [Mr. GORDON] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. GORDON. Mr. Chairman, I rise in support of H. R. 2. As one of the cosponsors of identical legislation, I have for many years supported the purpose of this legislation, authorizing the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army, to test the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway.

I wish to commend the able chairman of the Committee on Public Works and our colleagues on that committee for their forthright report recommending the passage of this bill. It was my privilege to appear before them and urge favorable action on this proposal, and it is quite evident from their hearings and report that they have considered the measure thoroughly and objectively.

The enactment of this legislation is essential to the proper handling of the flow of sewage through the Illinois Waterway. The diversion of water during the test authorized in the bill would affect the levels and outflows of Lakes Michigan, Huron, Erie, and Ontario, and the St. Lawrence River but would not affect the levels or outflows of Lake Superior. A temporary increase in the diversion of 1,000 cubic feet per second would have temporary effects, according to the Corps of Engineers, which would reach a maximum between 3 to 3½ years and gradually diminish and disappear about 15 years after discontinuance of the temporary diversion. The committee report points out that the Corps of Engineers stated that the lowering of lake levels from three-eighths to five-eighths of an inch that would result from the 3-year diversion would tend to be beneficial in lessening possible damage to shore property during storms and high lake stages, but the lowering effect is too small to permit monetary evaluation.

Mr. Chairman, the bill as reported by the Committee on Public Works contains safeguards limiting the flow from Lake Michigan and provides that the Secretary of the Army shall at all times have direct control and supervision; also that the Secretary of the Army shall not allow any water to be directly diverted from Lake Michigan during times of flood in the Illinois, Des Plaines, Chicago, or Calumet Rivers.

In view of the able testimony received by the committee in support of this bill and the facts developed in the committee report, I urge my colleagues to join with me in supporting H. R. 2. I hope it will be promptly enacted into law.

Mr. McGREGOR. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. SHEEHAN].

Mr. SHEEHAN. Mr. Chairman, I rise in support of H. R. 2. I rise also for the purpose of trying to straighten out some of the statements which have been made. One of the previous speakers said something to the effect that Chicago flushes waste down the river, and also that Chicago flushes industrial waste down the drainage canal. At no time is any raw sewage or any raw industrial waste of any kind flushed down the Chicago drainage canal. Everything within the city of Chicago and the Chicago Sanitary District is completely treated by the sewage treatment facilities of the sanitary district of Metropolitan Chicago.

Last year it was pointed out that 1 of the 7 mechanical wonders of the world was the sewage treatment facilities of the Chicago Sanitary District. Therefore, any claim to the effect that raw sewage is flushed down the river, or raw material waste is flushed down the river is unfounded and, in my opinion, untrue.

Reference was made to the fact that this bill will cost $430,000. There is nothing in the bill providing any appropriation or asking for any appropriation. It is estimated that some money will be asked for. However, $385,000 of the $430,000 to be asked would cover the pollution and sanitary aspects of the study which would be undertaken by the United States Public Health Service.

As the gentleman from Illinois [Mr. BYRNE] so well pointed out, we have recently voted a huge sum of money for the study of pollution and of sanitary facilities and there is no reason why the Public Health Service, the Corps of Engineers, or anyone should ask for any additional money to make further studies.

I would also like to point out that certain Members have been quite concerned about loss of money in Canada through loss of production of electrical energy. Also they are quite concerned about a loss of money to boat operators and other commercial enterprises. It seems to me that we have to weigh the benefits of health and sanitation against mere dollars. Anything that concerns the health and welfare of the people ought certainly to be put far above any pecuniary or monetary considerations.

I would also like to point out that the reason this bill is here—and I wish to emphasize this—is that in the original treaty of 1909 with Canada, diversion of water in Lake Michigan was established at 10,000 cubic feet per second. In the Supreme Court decision of 1929 or 1930, the Supreme Court stated that until such time as the city of Chicago had completed its sewage treatment facilities, the amount was to be cut to 1,500. We have completed those facilities.

The Supreme Court in that decision pointed out the fact that once the city of Chicago completed its sewerage facilities program, they could come back to the Congress to find out where they could go from there. The city of Chicago and the Sanitary District of Cook County has completed the installation of all the treatment facilities. Therefore, they come back to the Congress. As it turned out, they did not have to come back to the Congress because the Supreme Court in its temporary decision of several months ago, raising the flow to 8,000 cubic feet per second recognized that they, too, have jurisdiction in this matter.

I might say that some allegations have been made here that the reason they need the water is to flush Chicago sewage down the river. Mr. Chairman, no additional flushing will be done whether more or less water is provided, because all of the effluent, that which remains after a 97 percent treatment of the sewage—and there is not a single city in the world or a country in the world that has as efficient a sewage treatment plant as the city of Chicago has—after that effluent is all done with, that is what is put into the river. The downstate communities, and along the Mississippi River, would get the same amount of effluent whether or not any additional water is provided. Therefore it would be in the interest of health and of the sanitation of the rest of the country to add more water on the very simple principle that anything that is diluted, and the more it is diluted, the less objectionable it will be or it will become.

It has been pointed out that with the addition of additional water, more life will grow in the streams, both animal life by way of fish, and plant life, will prosper and grow.

Mr. KLUCZYNSKI. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY. Mr. Chairman, as a member of the Subcommittee on Public Works it has been my pleasure to work for the passage of H. R. 2. Without giving the Army Corps of Engineers this increased

diversion, there is no possible way to determine whether or not damage will result. I might say to the opponents of this legislation that the engineers may stop this diversion at any moment they feel it is causing material damage. The great metropolitan area of Chicago is badly in need of this diversion, and I am happy to join with my distinguished colleague, the Honorable TOM O'BRIEN, and other sponsors of this legislation in urging its enactment. I am proud to have introduced a companion measure to H. R. 2.

Mr. McGREGOR. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Chairman, as the representative of 11 counties in northwestern Michigan, 7 of which border on Lake Michigan, I rise to voice my vigorous opposition to H. R. 2, which would divert additional Lake Michigan water into the Illinois Waterway.

H. R. 2 is not a bill which serves the national interest, as such. It is a special, or local, bill and is not general legislation.

The extent of diversion at the present time—1,500 cubic feet per second—is adequate for navigation purposes. To the extent that the Congress considers factors other than navigation, I submit Congress is extending beyond its legitimate scope.

Brig. Gen. J. L. Person, Assistant Chief of Engineers for Civil Works, has testified that the Lake Michigan level would be affected in 3 years by at least five-eighths inch. He testified further that Great Lakes cargo ships are now operating within an inch of the lake bottom in many places.

Much has been said on the floor today to the effect that no appreciable damage or harm will result if H. R. 2 is passed. As a specific example proving that serious damage will result, I wish to point to a situation in my district at Manistee.

Lake Manistee lies inland and is connected with Lake Michigan by a channel about 6,400 feet long through the Manistee River. A difference in level of even 1 inch is a very serious matter as far as navigation in this channel is concerned.

At the present time at least three manufacturing firms at Manistee are paying a surcharge amounting to many thousands of dollars a year because cargo boats are not now able to load to capacity and navigate the channel. Accordingly, it is clear that even so little a change in level as 1 inch can have a serious, detrimental and expensive effect in areas far removed from Chicago.

Of course, many people in my district are concerned about the effect that the lowering of water level will have upon their valuable lake front real estate.

While this concern of individual property owners is entitled, I submit, to serious consideration, I would like also to focus the attention of the House upon the great investment which the Federal Government, and particularly this Congress, has at stake in this matter. The protection of huge Federal investments should be of particular concern in these days when Members of Congress, as well as their constituents, are especially economy conscious.

To date, Congress has already authorized $105 million of borrowing authority toward this country's share of developing the St. Lawrence Seaway.

A bill has been introduced in the House in this session seeking authorization of an additional $35 million, which will make the total cost of this vast project $140 million.

The purpose of the St. Lawrence Seaway development, of course, is to enable deeper draft, oceangoing vessels to use the Great Lakes ports.

The legislation to divert Great Lakes water is working directly contrary to, and at cross-purposes with, the seaway project.

If the diversion proposal should become law, the cost of the entire St. Lawrence Seaway development project must be reevaluated. The expense for deeper and deeper dredging would inevitably add vast sums to the overall cost of the project.

Accordingly, it should be clear that the cost of providing sewage disposal for the Chicago area, which should be financed locally by that municipality, would be borne in part not only by Lake Michigan property owners, but also by all taxpayers of the United States who are underwriting the St. Lawrence Seaway.

We have been told that the bill provides only for a 3 year "test"; but, of course, if Chicago is permitted to depend on more Great Lakes water to meet its sewage-disposal problems during the next 3 years, the same pressures now in evidence will be exerted with equal force 3 years from now. This is the "foot in the door" which can only set a dangerous precedent. If the requested Chicago diversion is permitted, there will be no consistent reason for refusing other diversion requests which can only result in irreparable damage to the vested property rights of thousands and thousands of Lake Michigan real-estate owners.

On behalf of the people of my district, and in the interest of the country as a whole, I respectfully urge the House to reject H. R. 2.

Mr. McGREGOR. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. TEWES].

Mr. TEWES. Mr. Chairman, it seems to me that recently the House has been legislating with sugary phrases. Last week we eliminated the soil bank program on the ground that it was a "temporary injunction." Today we are going to affect permanently the welfare of millions of people living on Lake Michigan on the ground that this is a mere "test" proposal.

The issue here is not simply a "test." The issue is actually much greater than that: Shall we open a Pandora's box to these people by establishing a principle which has wide ramifications?

We are told that there will be a mere three-eighths of an inch diversion of water from Lake Michigan. That may be true for the purposes of the "test." However, Illinois indicated back in 1930 that once given a green light it is willing to go to extreme lengths when it removed 6 inches from Lake Michigan for these same purposes.

We are told the test may remove 4 million tons of cargo yearly from Lake Michigan. The issue again is not the 4 million tons in the "test" but the additional millions that will be affected once the precedent has been established.

We are told that the test will affect only 72 million kilowatt-hours presently generated by these waters, but this legislation actually opens the door to future tampering with billions of such units of energy.

We are told here that the test is intended to help solve the sewage problem of Chicago. But this bill sets the pattern for greater diversions to facilitate navigation and even to improve the water supply of southern States.

So the issue here I say again is not the simple "test" which the Chicago spokesmen would have this House believe. The issue is much greater: Shall we here sublimate the interests of riparian States to any and all raiders who can show some benefit from diversion?

And let us not be deceived. Contrary to the inferences which have been left here the damage to the lake States from this legislation will be great. The Supreme Court has affirmed this fact on several occasions; the President has confirmed this fact in his veto message. The Corps of Engineers has made similar findings in its reports.

This is not a test. This is permanent legislation.

In behalf of the people of Wisconsin I voice my vigorous objection to this bill and ask the Members of the House to support us in our protest.

Mr. McGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Chairman, the issue before us on H. R. 2 today has been quite effectively stated by the gentleman from Wisconsin [Mr. WITHROW], a member of the Committee on Public Works. In his statement before the House he adequately and effectively pointed out to the Members today the effect of this legislation on the shipping on the Great Lakes, the effect of this water diversion on the development of power in the Great Lakes area, and the effect of this proposed diversion on the health of many of the communities on the Great Lakes.

It seems to me that it is well for us to pause and reflect upon another bill which was recently reported out of the Committee on Public Works, a bill which would increase the authorization for revenue bonds for the St. Lawrence Seaway from $105 million to $140 million. The St. Lawrence Seaway was passed and approved by the Congress as a vehicle by which commerce, labor, agriculture, and business would be benefited throughout the area of the Midwest. The breadbasket of the United States would have access to the Atlantic Ocean through this Great Lakes Seaway. The Committee on Public Works at the same time they reported out the bill to increase the borrowing authority for this seaway project reports out a bill which will lower the water levels of the Great Lakes. H. R. 2 will add to the cost of every harbor de-

velopment in the Great Lakes area and will lower the amount of tonnage that can be carried on every ship on the Great Lakes.

It seems to me that this action of the committee in approving H. R. 2 should certainly not be supported by the House today. We are affecting the commerce, the industry, and the health of the entire Middle West breadbasket area of the United States by going along with this diversion to take care of a local sewerage problem in the city of Chicago. It is my sincere hope that the House today will not go along with this diversion of water from Lake Michigan.

Mr. KLUCZYNSKI. Mr. Chairman, I yield 10 minutes to the gentleman from Chicago [Mr. BOYLE].

Mr. BOYLE. Mr. Chairman, at this juncture of the debate, it is quite apparent that the House understands pretty generally the import and the language of H. R. 2, which has been commonly referred to during the course of this debate as the O'Brien lake diversion bill. Of course, today, one of the greatest problems facing our country is the problem of the development and the conservation of our water resources. Flood, drought or pollution in any one area of our country not only adversely affects the immediate region, but indirectly affects the entire United States. Such is the case with the project which the committee is considering here today.

Mr. HOFFMAN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and one Members are present, a quorum.

Mr. BOYLE. Mr. Chairman, H. R. 2 and the companion bills introduced including my own bill, H. R. 570, would authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago under the direction of the Secretary of the Army to test on a 3-year basis the effect of increasing the diversion of water from Lake Michigan into the Illinois waterway. I submit this legislation follows the suggested course of conduct announced by the Supreme Court of the United States in the case of State of Wisconsin against the State of Illinois in volume 281, at page 198, where the Court said:

> All action of the parties and the Court in this case will be subject, of course, to any order that Congress may make in pursuance of its constitutional powers and any modifications that necessity may show should be made by this Court.

Following that language, the Court as late as December 17, 1956, did order additional increase in diversion in the following language:

> Per curiam: In view of the emergency in navigation caused by low water in the Mississippi River, paragraph 3 of the decree in these causes issued on April 21, 1930, is temporarily modified to permit the diversion to and including the 31st day of January 1957, from the Great Lakes-St. Lawrence system into the Illinois Waterway and the Mississippi River of such amount of water not exceeding an average of 8,500 cubic feet a second, in addition to domestic pumpage, as the Corps of Engineers, United States Army, shall determine will be useful in alleviating the emergency with respect to navigation currently existing without seriously interfering with navigation on the Illinois Waterway, at such times and in such amounts as the Corps of Engineers shall direct. The entry of this order shall not prejudice the legal rights of any of the parties to these causes with respect to any other diversion of the waters involved. After January 31, 1957, all provisions of the decree entered on April 21, 1930, shall remain in full force and effect until further order of this Court.
>
> Whereas an order temporarily modifying the decree in these cases has this day been made because of an existing emergency; and
>
> Whereas other prompt action to relieve the emergency may be required during the modification period in furtherance of the order: It is
>
> *Ordered*, That all such matters be referred to Mr. Justice Burton, circuit justice for the seventh circuit, with power to act.

From December 17 to December 23, 1950, the diversion exclusive of domestic pumpage, was increased gradually to a daily average rate of about 7,900 cubic feet per second. From December 17, 1956, to January 11, 1957, the diversion was at an average rate of about 7,500 cubic feet per second and domestic pumpage was at an average rate of 1,660 cubic feet per second. The increased diversion resulted in a lowering of the levels of Lake Michigan and Huron by about 0.01 foot on January 11, 1957.

On January 28, 1957, the Court further extended the modified temporary diversion authorized on December 17, 1956, to February 28, 1957. No further extension was requested since extreme low-water stages had been sufficiently bettered by that time.

Of course, the people of Chicago will derive great benefits from the project, but the charge that it would be for the "benefit of a single community" does not hold true.

The Illinois Waterway, into which the additional water would flow, is not simply a Chicago project, but an integral, important and very long section of the great inland waterway that connects the Great Lakes and the Gulf of Mexico. Now that the St. Lawrence seaway project is underway, many more seagoing vessels will be able to reach and operate on the Great Lakes. The United States, in order to benefit fully from this great project, needs to develop all means of allowing the maximum amount of shipping to reach the Gulf of Mexico from the Great Lakes via the Mississippi River. The diversion of this water from Lake Michigan into the Illinois Waterway is one step toward making this possible.

Along this same line, I would like to mention the Calumet-Sag project, which is now actively in progress, at an estimated Federal cost of $80 million. When this channel is widened and improved, the benefits that will accrue when the cheaper mode of shipping is made possible will go to the entire Nation.

Development of all means of transportation has been encouraged for national defense. If this country should ever be subjected to bombing by an enemy nation, our roads and railroads might conceivably be put out of commission. Under these conditions, transportation by water might play a most important role in the defense of the entire country.

It has been charged that to divert an additional 1,000 cubic feet per second of water from Lake Michigan on an experimental basis would endanger shipping by lowering the lake level in essential ports. However, evidence shows that the withdrawal of this amount would reduce the lake level only five-eighths of an inch. It is difficult to understand how so little a reduction could handicap shipping appreciably.

The property owners that surround Lake Michigan could benefit from this slight lowering because of the diversion—certainly more than any shipping would be damaged. The lake is ringed with cities and with homes, resorts, and industrial properties which have suffered hundreds of millions of dollars of property damage from high waters of the lake in recent years. On Chicago's Outer Drive, expensive detours have had to be constructed, to avoid floodwaters on the drive. These properties could be given relief without endangering shipping on the lake.

Although I mention the pollution problem last, it is surely not the least of the problems which could be met in part by this legislation. Even with complete treatment of sewage, there is still a serious pollution problem in the upper reaches of the Illinois Waterway. Not only would the people of Chicago and the vicinity welcome cleaner water in the waterway, but it is in the interest of the entire country that this serious pollution problem be solved.

Certainly the insanitary conditions and water contamination in the Chicago River, which is a part of the port of Chicago, are a deterrent to navigation. The poor quality of the water means higher cost of upkeep, and has an adverse effect on the morale of the crews and on the conditions affecting commerce on the waterfront. Increased diversions would materially improve the situation.

For the safety and the health of the people of the area, and for the benefits that will be derived by the entire country, I urge passage of this bill.

We are faced here today with the proposition of whether we are going to let not only the city of Chicago, and not only Illinois, but all of those areas that touch on the Illinois Waterway, get a test of 3 years.

The physical facts warrant support of this fine piece of legislation. The objections heretofore set out in the two previous veto messages have been cured, and the legislation, if passed by this body, will clear the Senate and will be enacted into law.

I yield back the remainder of my time, Mr. Chairman.

Mr. McGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. KNOX].

Mr. KNOX. Mr. Chairman, my colleague from Minnesota, the chairman of the subcommittee handling this legislation, yielded to me when he had the floor and I spoke briefly on conditions that existed in Lake Superior. It has been

stated that Lake Superior has no effect upon this legislation at all. I differ with the opinion of those who say that Lake Superior is not a contributing factor. Lake Superior is the main stem of water flow into the lower lakes.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. KNOX. I will yield later.

Lake Superior is so low, as far as water levels are concerned, that the International Joint Commission saw fit in the month of March to cut back the waterflow from Lake Superior into the St. Marys River and on down into Lake Huron and Lake Michigan by 10,000 cubic second-feet. This water was used for the generation of power by the Michigan Northern Power Co. to supply power for the Union Carbide Co. Of course it was disastrous as far as the Union Carbide Co. was concerned, because they had to curtail 50 percent of their operations, which caused a heavy layoff of their employees.

Two weeks ago when I was home I discussed water levels with the engineer in charge at Sault Ste. Marie, Mich., and he informed me that the curve rule had not changed in Lake Superior, which means there is still going to be a curtailment of 10,000 cubic second-feet of waterflow out of Lake Superior on down into the lower lakes.

It has been said that this diversion would amount to three-eighths of an inch decrease by diverting 1,000 additional cubic second-feet. All right. If conditions remain the same in Lake Superior, then possibly Lake Michigan may drop another foot. As far as the Chicago drainage canal is concerned, it has been said that they were going to use it for flushing purposes. That may be true to some degree; but—if we are going to be consistent in legislation which we have passed whereby we have appropriated $50 million to assist in the construction of sewage-disposal plants—for what purpose? To clean up our streams, our lakes and our rivers. So why should we start to divert water for flushing purposes? In my opinion, I think it is about time that all of the States along the Great Lakes and connecting waters should take advantage of the legislation which Congress has enacted, and get their houses in order and stop the pollution of the streams, rivers, and lakes of our Nation.

Now we go a little further and must consider the St. Lawrence Seaway. If you are going to divert water that will lower the levels in the connecting channels of the Great Lakes, indirectly it is going to call upon the Congress once again to appropriate additional funds in order to maintain the 27-foot depth of channel required by law. Is that what you want? Do you want to continue to divert these waters so we will have to appropriate additional funds in order that we may be able to maintain the 27-foot depth which is controlled by legislation as far as the St. Lawrence Seaway is concerned.

In addition to these problems that are facing the people of the Great Lakes area we have all of our harbors, and we are having difficulties in the harbors along the Lake Michigan shore at this time because of low water. There once again we will be called upon to appropriate funds for the deepening of these harbors so the ships may be able to get into the harbor to load cargo and discharge cargo for that particular area.

In conclusion, Mr. Chairman, I hope the legislation will be defeated.

Mr. KLUCZYNSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. Mr. Chairman, I had not intended to take any time on this legislation. I notice, however, that the printed record of the hearings held before the Subcommittee on Rivers and Harbors of the Committee on Public Works on legislation to increase Lake Michigan water diversion does not contain a copy of the statement which I submitted to the committee on this subject.

I am given to understand that the omission was inadvertent.

Mr. BLATNIK. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield.

Mr. BLATNIK. I say to the gentleman from Wisconsin that I was presiding at the hearing when the gentleman from Wisconsin appeared. He presented an excellent statement. I express regret that the testimony he presented at that time was inadvertently omitted. I wanted to confirm the gentleman's statement.

Mr. ZABLOCKI. I thank the gentleman. I would, therefore, Mr. Chairman, like at this point to include in the RECORD the full text of my statement presented during the hearings and expressing my opposition to this legislation and the reasons therefor.

(The statement referred to follows:)

The legislation to authorize an increased water diversion through the Chicago sanitary canal has been considered by Congress on several previous occasions. It has even reached the White House, only to be vetoed by the Chief Executive. In each instance in the past, these efforts to use the waters of Lake Michigan to the advantage of a single community, and without regard to the interests of other parties concerned, have met with failure. I sincerely hope that this will occur again, and I would like to briefly outline my reasons for taking this position.

In the first place, Lake Michigan is not a bathtub or a tank to be filled or drained at the pleasure of the Chicago Sanitary District. It is a part of a complicated drainage basin which affects the welfare of seven States, and two Nations. No change should be made in the operation of the basin without due and careful consideration of the interests of all parties concerned—parties which include the people of Canada and the people of seven Midwestern States. The haste with which legislation authorizing an increased rate of diversion through the Chicago sanitary canal has been rushed through Congress in the past—and may be rushed again—suggests that the interests of all parties concerned are not being given due consideration.

Now I know that the proponents of this legislation will cite the 1957 Corps of Engineers report on the effect on Great Lakes and St. Lawrence River of an increase of 1,000 cubic feet per second in the diversion at Chicago, to substantiate their claim that the interests of other parties have been considered, and to show that the legislation before your committee will not appreciably endanger the welfare of anyone concerned.

I cannot agree with such contentions. I shall tell you why.

Back in 1930, after almost 40 years of litigation between Chicago and the other States of the Great Lakes area, the Supreme Court of the United States pointed out that the Chicago water diversion up to that time had caused a permanent lowering of 6 inches in the level of the Great Lakes; that it had greatly damaged lake commerce by decreasing the cargo capacity of lake vessels; that it had damaged beaches, fisheries, and recreational areas; and that it had caused a permanent lowering of the water table in the Great Lakes region with great resulting damage to docks, harbor facilities, and building foundations.

For this reason, the Supreme Court ruled that the rate of diversion then in effect through the Chicago Sanitary Canal should be reduced gradually from 10,000 cubic feet per second to 1,500 cubic feet per second. The decision of the Court had proved to be wise.

Now the point I want to make is this: Large-scale drainage through the Chicago Sanitary Canal had permanently lowered the levels of the Great Lakes by 6 inches in the past, causing extensive damage and loss to the people of the Great Lakes States.

The 1957 report of the Corps of Engineers concerns itself with the possible effect of increasing the water diversion in Chicago by 1,000 cubic feet per second. This increase—which amounts to only a fraction of the original rate of diversion—will, we are told, lower the lake levels by 1 inch.

Now the questions that we must ask ourselves are these: Just how significant is a 1-inch drop in the level of the Great Lakes; and, will the Chicago Sanitary District—which formerly needed diversion at the rate of 10,000 cubic feet per second—be content with a 1,000 cubic-foot increase in the established rate of 1,500 cubic feet?

The Corps of Engineers' report answers the first question. It states, on page 50, that the experience of vessel operations on the Great Lakes clearly shows that they are affected, and promptly respond, to changes of depth as small as 1 inch. This indicates that a permanent lowering in the level of the Great Lakes of 1 inch will affect—and affect adversely—the shipping and other interests on the Great Lakes. When this 1-inch drop will come on top of very low and declining water levels—which we are experiencing at present—its effect will be even more serious.

As to the second question, I believe that past experience can guide us to the right answer. When we consider the original diversion rate through the Chicago Sanitary Canal, and the emergency rate recently put into effect, we must recognize that the 1,000-cubic-foot figure mentioned in the Corps of Engineers' report, and in the proposed legislation, is only the wedge to open the floodgates.

We must, therefore, carefully consider the full implications of the proposal pending before your committee. It would, in effect, advance the interest of a single community at the expense of the city of Milwaukee and of other communities located on the shores of Lake Michigan. For that reason, I do not believe that this is sound legislation, and I am opposed to it. I hope that your committee will table this measure.

The problem of the Chicago Sanitary District can undoubtedly be solved—but it should be solved through the consent of all interested and affected parties. This is the proper way. The problem should not be solved in an arbitrary and discriminatory fashion through the passage of special legislation. The bills before the committee propose the latter course and, as such, should be defeated.

Mr. McGREGOR. Mr. Chairman, I yield the balance of the time on this side to the gentleman from Wisconsin [Mr. BYRNES].

The CHAIRMAN. The gentleman from Wisconsin is recognized for 9 minutes.

Mr. BYRNES of Wisconsin. Mr. Chairman, I think we all recognize the great value and emphasis that is put on water today. It is a problem in all areas of the country; and that, I suppose, is one of the basic reasons why this is a controversial issue and does generate some emotion and conflict at least between the particular areas that are immediately involved in the problems raised by this bill.

I am not at all criticizing my colleagues from Chicago for being vehement in their attempt to accomplish for the Sanitary District of Chicago that which the sanitary district has been unable to get through all other legitimate channels. They have a perfect opportunity if they have a sound case to go to the Supreme Court. They have done so, and the Supreme Court has found that their position in petitioning for additional diversions has not been reasonable.

They have gone to the President of the United States. They went to President Roosevelt at one time to get an order; they have gone to public health authorities to get orders; they have gone every place, but always upon an analysis of the situation that exists they have been turned down. They now move into the political area and attempt to get here what the sanitary district has been unable to get in other ways.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman does not contend that the Congress has not jurisdiction, does he?

Mr. BYRNES of Wisconsin. Not at all. I am simply suggesting that you have today, without coming to Congress, an avenue of relief if you are entitled to it. That avenue is the Supreme Court which you have gone to in the past. That case is not a closed case. It has been reopened. It is not closed today. You can petition that Court tomorrow for an increase in diversion and that Court will hear your petition and decide the facts. It did so, in fact, as recently as last January. In December last a petition was filed before the Court asking for the right to divert additional waters because of a peculiar problem that the district had at that time. The Supreme Court granted them the authority for additional diversion. They went in again in February and obtained an extension of time for that diversion.

Mr. BLATNIK. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Minnesota.

Mr. BLATNIK. By the gentleman's own statement the Court decided there was merit in the request?

Mr. BYRNES of Wisconsin. On a temporary basis, I remind the gentleman, the Court put in a cutoff date and the cutoff date has arrived.

Mr. BLATNIK. As the gentleman further stated, the request has come up several times and in every instance approved, although on a short-term basis. This problem keeps on recurring and recurring and we attempt by this 3-year survey to conclusively come up with some data from which we can reach a final decision as to what should be done.

Mr. BYRNES of Wisconsin. The gentleman is missing the point. The problem as we see it in the Great Lakes States and in Canada is the problem of a permanent diversion or a continuing diversion over a period of time. The Supreme Court has also said that there should be a limitation of 1,500 cubic feet per second as far as a continuing diversion is concerned. The Court also said, and we agree, that there are temporary situations and that when Chicago can prove, and when the sanitary district can prove, that there is an urgent situation existing, then they may come before the Court and the Court will grant them relief. To me that is the proper way for this matter to be solved.

Mr. Chairman, the gentleman from Ohio [Mr. VANIK] put his finger on part of the problem here and that is that the principal question is whether Congress will authorize the taking of water belonging to the 8 Great Lakes Basin States for the benefit of 1 city, Chicago, to the damage of 50 million people residing in the rest of the Great Lakes Basin States. That is the fundamental issue. They think they are going to be more successful here than they were in court. That same question was before the Court and the Court said that as far as Chicago's share of this water was concerned it should be limited to 1,500 cubic feet.

Mr. Chairman, I am not going into the question of lake tonnage. That has been discussed. It is clear there is going to be an adverse effect on lake tonnage; you cannot get away from that. The gentlemen on this committee which reported this bill know that we have inadequate ports along Lake Michigan today as far as depth is concerned. There are hearings and reports by the Corps of Engineers that increases in depths of channels are needed. This is going to make them that much more inadequate.

We also have the dollars and cents findings of the Corps of Engineers as to actual loss and damage that will result from even the 3-year experiment. The engineers have found a possible power loss valued at a maximum loss of $918,000 and a minimum of $408,000 offset only by an increase in a power potential of $202,000 in Illinois.

My Chicago friends pretend to be so reasonable; they are willing to write off a loss to the New York area and the Quebec area and the Ontario area of $918,000, so that they can get an additional advantage of the $202,000. Is that being reasonable? I put it up to this Congress.

Now, all of these findings of the Corps of Engineers are based on a temporary 3-year diversion, but remember this, the purpose of this bill looks toward the objective of a permanent diversion, because it is the purpose of the temporary experiment to see whether they can make the diversion permanent. There will be much greater losses when the diversion covers a longer term.

Let me point out again that Chicago has the means to obtain a temporary diversion and even a permanent diversion. The court has not said that they would not at any time consider raising the 1,500 cubic feet per second diversion to some higher amount on a permanent basis. They said they would, depending upon the facts presented to the court. So if the need was there, they could go to the court today and get a permanent diversion of 2,500 or 3,000 or whatever was reasonable and equitable as far as the rights of all of the parties were concerned.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Illinois.

Mr. YATES. Does the gentleman want to deny us the right to come to Congress rather than go to the courts? The gentleman stated that we have a right to come to the Congress. Why would he limit our right to obtain relief?

Mr. BYRNES of Wisconsin. The gentleman comes here with tears in his eyes and complains that they have no place to go and the Congress has to bail them out. I say that is not true.

Mr. YATES. We have not said that at all nor have we indulged in such dramatics.

Mr. BYRNES of Wisconsin. You have ample avenues available based on the facts if you simply take the avenues presently open to you.

Mr. YATES. That is not true at all. We say we have two possible remedies, the courts and the Congress. The gentleman cannot limit us to one of them.

Mr. BYRNES of Wisconsin. I urge that this important issue, affecting a great watershed, 2 nations and 8 Great Lakes States should be decided by the judicial processes and not by this political method.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That, in order to provide a basis for a study of the effect of increased diversion of water from Lake Michigan upon the Illinois Waterway and the degree of improvement in such waterway caused thereby, the effect of such increased diversion upon commerce among the several States and navigation on the Great Lakes and the Illinois Waterway, and the extent to which such increased diversion may affect the level of Lake Michigan, authority is hereby granted to the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the supervision and direction of the Secretary of the Army, to withdraw water from Lake Michigan, in addition to all domestic pumpage, at a rate providing a total annual average of not more than 2,500 cubic feet of water per second, to flow into the Illinois Waterway during the 3-year period which begins on the date of enactment of this act, subject to the following limitations:

(1) The maximum direct diversion from Lake Michigan shall not at any time exceed a flow of 5,000 cubic feet per second;

(2) The Secretary of the Army shall at all times have direct control and supervision of the amounts of water directly diverted from Lake Michigan; and

(3) The Secretary of the Army shall not allow any water to be directly diverted from Lake Michigan to flow into the Illinois Waterway during times of flood in the Illinois, Des Plaines, Chicago, or Calumet Rivers.

Mr. MICHEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MICHEL: On page 2, line 21, strike out the period and insert a semicolon and the word "and"; and immediately below line 21 insert the following:

"(4) With respect to the regulation of flows along the Illinois River, particularly at Pekin, Ill., the diversion authorized by this act in accordance with this section will be regulated with the objective of maintaining a uniform flow at Pekin of 8,000 cubic feet per second when such uniformity of flow is feasible, as determined by the Chief of Engineers and the Secretary of the Army, and when maintenance of this uniformity will not conflict with or interfere with the preceding provisions of this section."

Mr. MICHEL. Mr. Chairman, I should like to preface my clinching argument for adoption of my amendment with a few introductory remarks for which there was no time during the course of general debate.

Inasmuch as the Illinois River runs diagonally through my congressional district for a little better than a hundred miles, we have a definite interest in any proposed increase in diversion. Except for the last year or two, downstate Members of Congress from Illinois have generally been opposed to any increase.

I have taken the position that an increase of 1,000 cubic feet per second would serve a number of good purposes provided that the controlling of the daily rate of diversion is regulated to a degree by the Corps of Engineers downstream at Pekin, Illinois. As a matter of fact, I introduced a bill to that effect, H. R. 6260.

I sought by my testimony before the committee to regulate the diversion as a means of giving us a more uniform flow in the river throughout the year.

There seems to be little question that the main cause of the death of thousands of fish in the river last fall was the rapid lowering of the water level. Any quick change of the water level for any reason, aside from an outright emergency, is inexcusable.

Such changes are not only destructive to fish and wildlife, but are highly inconsiderate of the people whose land lies adjacent to the river.

Sudden shifts of the water level cause the destruction of those recreational pursuits which we have come to enjoy downstream.

I have been told that the increased diversion would increase the oxygen content of the river and would be of major benefit to fish and wildlife. Better control of low-water flow assists materially in the spawning activities of fish life. It is also my belief that a better quality of water would tend to develop a better grade and type of fish. Higher low-water stages would provide better duck hunting facilities. Reduction of diversion during the fall months in past years has tended to dry up many small pools of water that could have been used for duck hunting purposes.

I point out these advantages to the sportsmen and conservationists as the objections to increased diversion in Illinois in years past have come principally from these quarters.

There are other benefits to be derived downstream with a properly controlled increase in diversion.

Ground water levels all over the State are declining and in the Illinois River Valley the underground water level definitely fluctuates with the river level. Any raising of the low-water level, therefore, has a corresponding beneficial effect on the level of the underground water supply.

As a matter of fact, the situation is so critical that the Peoria Water Works Co. has already constructed four river-water infiltration pits into which some 12 to 15 million gallons of river water is put into our underground water supply and plans are underway to construct a water purification plant. In addition to Peoria, Jacksonville, Winchester, and Galesburg have already found it necessary to do likewise in the future.

During the low-flow period of the Illinois River, there is an inadequate supply of sufficient water to provide proper cooling for major industrial and power plants. Continued industrial development will require more and bigger power plants with a corresponding increase in demand for more cooling water during low stages in the river. Increased flow of cooler Lake Michigan water would increase the efficiency of industrial and powerplant cooling systems.

Higher low-water levels would eliminate the costly operation of reducing river barge payloads due to low-river water levels. With the rapid increase of river shipping this is becoming more and more important.

A comparison of figures for tonnage carried on the Illinois Waterway indicate a growing traffic on the river. At Peoria, for instance, total tonnage for 1956 was over 18 million tons, an increase of 2 million tons over the previous year.

In the past, ice breaking during the winter months has been a costly operation, both from the standpoint of ice-breakers and tow barges. During the past few months of this last winter that emergency resulted in the order by the United States Supreme Court for a temporary increase in diversion.

It seems to me that for as many years as this matter has been kicked around we ought to take the logical and sensible approach and authorize this increase in diversion for an experimental study period of 3 years to determine once and for all what the effects actually will be.

Inasmuch as the bill reported out of the committee is acceptable to me as far as it goes, but does not make mention of maintaining a uniform flow downstream, I have offered an amendment which will accomplish this purpose.

Mr. BLATNIK. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Minnesota.

Mr. BLATNIK. Mr. Chairman, as per the committee report, we have no objection to the amendment; in fact, the language is exactly the same as that incorporated in the committee report, and it was fully the intent of the committee that this particular feature be carried out which we thought would be done without spelling it out in specifics. So we have no objection to the amendment.

Mr. McGREGOR. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Ohio.

Mr. McGREGOR. Mr. Chairman, I want to say that the gentleman from Illinois has also submitted the amendment to the minority side and we concur in the statement of the majority and accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

PROGRAM FOR THE BALANCE OF THE WEEK

Mr. ARENDS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask a question of the majority leader and that is whether there is contemplated any change in the program either for tomorrow or Friday.

Mr. McCORMACK. Tomorrow there are two bills scheduled; the judges' bill and a bill from the Armed Services Committee suspending troop ceilings. Those will be in order.

If there is sufficient time we shall take up H. R. 6548 to amend the Universal Military and Training Service Act as regards persons in the medical, dental and allied specialist categories; that is, if that can be disposed of tomorrow.

As announced heretofore on Friday general debate will begin on the Department of Defense appropriation bill.

Mr. ARENDS. And there will be a continuation of the consideration of the Department of Defense bill on Monday?

Mr. McCORMACK. Yes.

Mr. ARENDS. I thank the gentleman.

Mr. BYRNES of Wisconsin. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I apologize for taking more of the Committee's time; but I had intended during the time allotted to me to discuss another aspect of this matter which I do not think has been mentioned today. That is the principle that is involved with respect to the international aspect of these waters; that is, the Great Lakes waters, which are boundary waters and other waters that are boundary waters.

What we do in connection with this matter may have an effect upon other waters that are involved between the United States and Canada. In fact, I think this action here may directly affect the matter of the treatment of the waters of the Columbia River and the Kootenai River, which rise in Canada in the Northwest. We know Canada is now proposing to divert from those rivers about 29,000 cubic feet per second of water into a project of its own the result of which will be to reduce the amount of water that will flow into the United

States side. This can have a very serious effect, if it is done, upon some of our very important power developments in the Northwest. For instance, it has been said that this would do very great injury to installed and projected American powerplants, such as the Grand Coulee, the Chief Joseph, the McNary, the John Day, the Dalles, and the Bonneville Dam.

Here today we are talking about diverting waters of the Great Lakes which will damage Canada. And there is no question about it. The Corps of Engineers' finding is that part of the power loss is going to be a loss to Canada. Canada has in the past and has continued to express its opposition to the diversion, not the diversion as far as it relates to Lake Michigan, which I agree with the gentleman from Illinois is not necessarily considered a boundary lake, but what is done in Lake Michigan does affect the boundary lakes, the other Great Lakes, so that Canada's interest is very definite and has always been very apparent.

We are talking here about the Lake Michigan water which will then affect the Canadian situation as far as the other lakes are concerned. Canada is talking about diverting rivers and waters in the Northwest. I sound this note of warning: If we go ahead, and permit diversion at Chicago, we certainly have no right to make any objections to Canada as far as their proposals to divert waters out of the Columbia River and the Kootenai River. We know that in connection with each one of those dams and the power developed from them the consequences are going to be enormous.

Again, when we talk about water we are talking about a very important element, an element of very high value. We are talking about all of its consequences. I hope the House when it votes on this measure will not vote on it lightly.

Mr. BOYLE. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Illinois.

Mr. BOYLE. The gentleman by either implication or plain language does not want this House to assume that it has any right to tell Canada what it is going to do in the lakes?

Mr. BYRNES of Wisconsin. There is a very serious question as what our status is under the treaty of 1909. I say, let us not get ourselves in a position where we violate the treaty of 1909 and thus be put in a position where we cannot insist that Canada respect the treaty of 1909.

Mr. BOYLE. If you are going to say that the treaty of 1909 expressly excluded Lake Michigan, you have to accept it.

Mr. BYRNES of Wisconsin. It did not exclude action that we might take that would have an effect upon the other border lakes. If we act in diverting Lake Michigan and that has an effect on the border lakes, we are very definitely affecting that treaty.

Mr. BLATNIK. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. YATES].

Mr. YATES. Mr. Chairman, in the closing minutes of this debate I wish to pay my tribute to the dean of the Illinois delegation for the magnificent service he has rendered in connection with this bill. I have been privileged to serve with Mr. O'BRIEN for a number of years. In this bill particularly I have seen his wisdom, his energy, and his ability displayed to such a point that I feel confident as a result of his efforts this bill will be passed. I pay this tribute to him because of the action he has taken in an effort to press the State Department to bring its negotiations with Canada to a conclusion promptly. The State Department is historically reluctant to engage in such negotiations with our neighbor to the north.

On May 10, as a result of the letters he has forwarded to the State Department, he received a communication from the Assistant Secretary of State, reading in part as follows:

As you will recall from earlier correspondence, the subject of increased diversion of water from Lake Michigan into the Illinois Waterway was discussed in detail some time ago with officials of the Canadian Embassy here in Washington. Since then the Department of State has learned from the Canadian Embassy that Canadian engineers are now considering the proposal. The Canadian Embassy has also advised the Department that the Canadian Government considers that this matter is of direct concern to certain of the Provincial governments and that consultations with these Provinces are underway.

We hope for an early and successful disposition of the matter.

I return now to my colloquy with the gentleman from Wisconsin [Mr. BYRNES] and call the attention of the House to another day, to May 8, 1952. On that day, the gentleman from Wisconsin [Mr. BYRNES] was not so concerned with the negotiations on waterways with our neighbor to the north, Canada. At that time the gentleman from Wisconsin and myself, together with 33 other Representatives from districts which border on the Great Lakes, addressed a communication to President Truman. I will read from that communication asking the President to take some action to relieve the pressure of water from the Great Lakes, and asking Canada to cease diverting its waters into the Great Lakes. Let me read the communication. Listen to what our communication said at that time:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 8, 1952.

His Excellency, the President,
Hon. HARRY S. TRUMAN,
The White House,
Washington, D. C.

DEAR MR. PRESIDENT: A disaster of major proportions is slowly spreading across the midcontinent of the United States as a result of the steadily rising waters of the Great Lakes.

For many months now, we have sought by every means at our command to arouse the proper executive department of the Federal Government to take bold and forthright action to alleviate and curb this creeping catastrophe. To date we have been met at many points by evasions, by flat refusals to act, or by timorous pleadings that nothing could be done without the cooperation of the Canadian Government. On the other hand, we are glad to say that the Corps of Engineers is currently making a comprehensive survey of the damage caused by the high waters and that the Reconstruction Finance Corporation, the Department of Agriculture and the Housing and Home Finance Agency are investigating the extent to which they can render emergency assistance to the affected States.

Mr. President, the causes of these high waters are in part manmade. In at least two instances, the lake levels have been substantially raised as the result of authorizations extended to Canada by this Government (of questionable legality, to begin with) to accommodate Canadian commerce or augment Canada's hydroelectric power potential. No quid pro quo was asked for these great concessions, nor did they redound in any way to the benefit of this country or its citizens. Quite the contrary. They were solely for the benefit of the Canadian economy.

Today, in part as a result of these substantial concessions, as well as other causes, the Great Lake shores are being inundated at an alarming rate. Damage has been unofficially estimated at a billion dollars as the property and fortunes of tens of thousands of American citizens are engulfed and wiped out by the encroaching waters.

Mr. President, you can check this creeping tide of disaster, if you will, by directing your executive agencies, including the Departments of State, Justice and the Army, as well as the International Joint Commission, to take the action which they have the power to take under the law to alleviate this critical situation. To delay further, on the ground that this Government cannot act without Canada is to deepen the widespread and growing apprehension that interests of the citizens of this country are no longer the first and major concern of this Government.

You have indicated a humanitarian concern for the distressed citizens of the Missouri and Mississippi River Valleys, whose homes and fortunes were swept away by the recent floods. We earnestly urge you to manifest a similar concern for the residents of the Great Lakes Basin, whose plight is no less dire, by directing your executive agencies to inaugurate remedial and preventive action in their behalf forthwith.

We remain, sir, respectfully yours,

This letter was sent to the President of the United States by 35 Members of the House on May 8, 1952, at a time just as we, in Illinois, feel at the moment the State Department was not pressing for action in as expeditious a manner as it might have done. The State Department has been historically a slow vehicle to move. At the present time, it is trying to arrive at an agreement with the Canadian Goverment, but the fact remains that on other occasions we have sought to obtain Executive action without the necessity of obtaining prior approval from the Government of Canada. The gentleman from Wisconsin and I both sought such action in 1952. There is such a situation now. It is perfectly proper while negotiations are going on to ask this Congress to act upon this matter.

Mr. BYRNES of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield.

Mr. BYRNES of Wisconsin. I think, as Members of Congress, we have a right to complain against the action of Canada at that time increasing an already bad situation which we had because of the

tide cycle of the lake which was unusually high.

Mr. YATES. I agree with the gentleman.

Mr. BYRNES of Wisconsin. Our complaint was against manmade actions in the lake. Now we are complaining against an effort to make manmade actions to reduce our lake level.

Mr. YATES. The reduction will be minimal. I do not believe Canada will object. At any rate, part of the flow from these Canadian Waterways are still discharging into Lake Superior and will counteract whatever diversion Illinois may be authorized to make under this bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. As soon after the date of enactment of this act as is possible, the Secretary of the Army shall cause a study to be made of the effect on Lake Michigan and on the Illinois Waterway of the increased diversion authorized by the first section of this act, and the improvement in conditions along the Illinois Waterway which may result from such increased diversion. The Secretary of the Army shall report to the Congress on or before January 31, 1961, the results of such study. Such report shall contain recommendations with respect to continuing the authority to divert water from Lake Michigan into the Illinois Waterway in the amounts authorized by this act, or increasing or decreasing such amounts.

Mr. BLATNIK (during the reading of the bill). Mr. Chairman, I ask unanimous consent that further reading of the bill be dispensed with and the bill be considered as read and be printed.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. HOFFMAN. Mr. Chairman, I move to strike out the last word, and I ask unanimous consent to speak out of order.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HOFFMAN. I ask unanimous consent, also, Mr. Chairman, to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HOFFMAN. Mr. Chairman, there was so much confusion yesterday when the Committee had under consideration an appropriation bill which carried an item for the construction of a House Office Building and an amendment was offered to strike that item that something should be said to straighten out the situation. Several times we were told that the amendment which authorized the expenditure for this new House Office Building had previously been offered and accepted without objection from those who now opposed the appropriation. Either directly or by implication it was charged that we had been negligent then, should not now complain.

The charge that we did not object when the authorization was made—that we were not diligent—is without merit—the record so shows.

Permit me to quote some of yesterday's statements which charge we did not then, that is, on March 18 of 1955, oppose the construction of this new building.

I read from the CONGRESSIONAL RECORD, May 21, 1957, pages 7329–7330:

Mr. VINSON. Does not the gentleman know and does not the House know that after an open debate on an appropriation bill the language was written in creating a House commission or, rather, giving authority to the House commission to do this construction and to take charge of the construction of this new office building?

Mr. RAY. I recall no such debate.

Mr. VINSON. Does not the gentleman also know that whenever legislation is offered on an appropriation bill it is subject to a point of order? And legislation of this magnitude was so thoroughly understood by every Member of the House that they had ample opportunity to object by simply making the point of order against the legislation.

Mr. RAY. I did not know enough to make that objection at that time.

Mr. VINSON. That may be true, although I doubt it. But the balance of the House knew because here in this appropriation bill for 1955, chapter 12, there is a whole chapter dealing with this subject matter and any Member of the House could have had it stricken out by simply making a point of order against it. This was strictly legislation on an appropriation bill.

* * * * *

Mr. ROONEY. * * * In the month of March—to be exact, March 18, 1955, and I am going to read from the CONGRESSIONAL RECORD, volume 101, part 3, page 3204, an amendment with regard to this project was offered on the floor of the House to a then pending supplemental appropriation bill by the distinguished gentleman from Texas, the Speaker of the House, the Honorable SAM RAYBURN.

* * * * *

Mr. VINSON. * * * Every Member of the House knew every phase about it, and the amendment was so drawn it went into every detail. That is exactly what the Commission has been doing. We have been complying with what the House gave its unanimous consent for the Commission to do.

Mr. ROONEY. * * * There was no objection to it although it was legislation on an appropriation bill, and it was adopted. Contrary to what the gentleman from Ohio, my distinguished friend [Mr. MCGREGOR], has said, the Committee on Appropriations had nothing to do with it except that it happened to have on the floor of the House the bill which became the vehicle for instituting the additional New House Office Building.

* * * * *

Mr. GROSS. I yield to the gentleman from Georgia.

Mr. VINSON. The gentleman was here in 1955. He sat in his usual seat and contributed then just as he does now to all debate. Why did he not stop it in 1955 when we had to get unanimous approval before it could go through?

Mr. GROSS. I did not know, in the first place, that I was completely answerable to the gentleman from Georgia for all of my actions and activities here.

Mr. VINSON. Of course the gentleman is not answerable to me, but he had an opportunity in 1955 to stop it.

Mr. GROSS. Let me say to the gentleman, better late than never. I do not know where I was in 1955, but the gentleman knows I tried to stop it in 1956 before a spade of earth was turned. Does not the gentleman know that? And I did not get the votes last year.

* * * * *

Mr. ROONEY. I am sure the gentleman from Iowa understands and I am sure the gentleman from Michigan understands that just one Member had to get up on the floor to make the point of order that it was legislation on an appropriation bill. You did not need any votes at all.

Permit me to answer the charge there was no objection to the authorization of the item yesterday under consideration—that no objection was made—that every possible available objection was made by me, your humble servant.

On March 18, 1955, an appropriation bill was before the Committee of the Whole House on the State of the Union. An amendment was offered by the gentleman from Texas [Mr. RAYBURN] authorizing the construction of an additional new House Office Building.

The gentleman from Missouri [Mr. CANNON], without seeking recognition by the Chairman or being recognized by him, accepted the amendment.

As the Clerk was reading the amendment and before he finished and as he finished, the Member from the Fourth District of Michigan was on his feet seeking and repeatedly demanding recognition to make a point of order.

I was not at first given recognition and then when recognized was told that my point of order came too late.

Permit me to read the rule:

A question of order on an appropriation in any such bill [appropriation bill], joint resolution, or amendment thereto may be raised at any time. (Rules of the House of Representatives, 85th Cong., rule XXI, sec. 4, p. 439.)

That there may be no further uncertainty from the RECORD of March 18, 1955, let me read:

The Clerk read as follows:

"CAPITOL BUILDINGS AND GROUNDS

"Capitol Grounds: For reconstruction, repair, alteration, and improvement of the areas of the United States Capitol Grounds located above and in the vicinity of the legislative garage, situated north of Constitution Avenue between New Jersey Avenue and Delaware Avenue, including expenditures for personal and other services and all other necessary items, $611,000, to remain available until expended.

"House Office Buildings: To enable the Architect of the Capitol, under the direction of the House Office Building Commission, to carry out the provisions of Public Law 176, 80th Congress, approved July 11, 1947, relating to erection of an additional House Office Building, including accommodations for parking automobiles, $25,000."

Mr. RAYBURN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

"Amendment offered by Mr. RAYBURN: On page 19 strike out all of lines 5 through 10, inclusive, and in lieu thereof insert:

"'CHAPTER XII—A

"'ADDITIONAL HOUSE OFFICE BUILDING

"'SEC. 1201. There is hereby authorized to be constructed on a site approved by the House Office Building Commission, in accordance with plans to be prepared by or under direction of the Architect of the Capitol and to be submitted to, and approved by, such Commission, an additional fireproof office building for the use of the House of Representatives, including such necessary access facilities over or under public streets and such other appurtenant or necessary facilities as may be approved by such Commission.

"'SEC. 1202. (a) If the site upon which the building authorized to be constructed by section 1201 of this act is not within the United States Capitol Grounds as defined in the act entitled "An act to define the area of

the United States Capitol Grounds, to regulate the use thereof, and for other purposes," approved July 31, 1946 (40 U. S. C., secs. 193a–193m), the Architect is authorized to acquire such site by purchase, condemnation, or otherwise, and upon acquisition of such site and completion of the building, such building, and the grounds, sidewalks, and facilities surrounding it shall be subject to the provisions of (1) the act of May 4, 1907, as amended (40 U. S. C., sec. 175) (relating to the control, supervision, and care of the House Office Building), and (2) the act entitled "An act to define the area of the United States Capitol Grounds, to regulate the use thereof, and for other purposes," approved July 31, 1946 (40 U. S. C., sec. 193a–193m).

"'(b) Any proceedings for condemnation brought under subsection (a) shall be conducted in accordance with the act entitled "An act to provide for the acquisition of land in the District of Columbia for the use of the United States," approved March 1, 1929 (16 D. C. Code, secs. 619–644).

"'SEC. 1203. For carrying out the purposes of this act there is hereby appropriated $2 million, to remain available until expended; and there are hereby authorized to be appropriated such additional sums as may be necessary to carry out this act.

"'SEC. 1204. This subchapter may be cited as the "Additional House Office Building Act of 1955."'"

Mr. CANNON. Mr. Chairman, in view of the emergency involved, and the urgent need of the facility for which the appropriation is proposed, the committee accepts this amendment and approves the expenditure.

Mr. HOFFMAN of Michigan. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. HOFFMAN of Michigan. I make the point of order against the amendment that it is legislation on an appropriation bill.

Mr. CANNON. Mr. Chairman, the point of order comes too late.

The CHAIRMAN. The point of order does come too late.

Mr. HOFFMAN of Michigan. How does it come too late when I was on my feet seeking recognition before the gentleman was recognized?

The CHAIRMAN. The gentleman, as chairman of the committee, was recognized first.

Mr. HOFFMAN of Michigan. That is to say the rule that requires recognition of the chairman of a committee would deprive another Member from making a point of order?

The CHAIRMAN. No. Did the gentleman address the Chair?

Mr. HOFFMAN of Michigan. I did address the Chair before the Clerk finished reading.

The CHAIRMAN. That was not the proper time.

Mr. HOFFMAN of Michigan. I was on my feet and addressed the Chair before the Clerk finished and as soon as he finished. Now, if I have to shout louder, I can do that.

The CHAIRMAN. The Chair could not recognize the gentleman until the Clerk had finished reading.

Does the Committee get the significance of that ruling? Here is a Member of the Committee on his feet addressing the Chairman, attempting to make a point of order but because someone on the committee had accepted the amendment or risen to accept an amendment, the Member from Michigan is not recognized. One addressing the Presiding Officer for the purpose of making a point of order is entitled to recognition even though another Member has the floor—is engaged in debate. You hear that ruling almost every day.

Did you ever hear of a more absurd, a more unfair, a more arbitrary ruling than one which denied me recognition to make the point of order either because it came too late or because a member of the committee in charge of the bill demanded recognition? Of course, the responsibility for the ruling rests ultimately not with the Chairman of the Committee, but with the Parliamentarian.

Every Member of this House knows—I say he knows if he knows anything at all about the rules of parliamentary procedure—that a point of order can be made, as rule XXI, subsection 4, says, at any time; otherwise how could a legislature get a quorum to legislate or proceed at all in an orderly manner? Without that rule and its observance a legislative body cannot function.

If I were in charge or control of either party, all I would have to do to avoid points of order, avoid observance of all rules, get legislation I wanted passed, would be to have members of the committee in charge of a bill sit here and every time anyone made a point of order have a member of that committee get up, for, under the ruling of the Chair as shown by the RECORD, the member of the committee in charge of the bill must be recognized in preference to the Member who wants to make a point of order. The point of order would always come too late.

I say that is arbitrary. It is unfair. It is absurd, and there is no question about it.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HOFFMAN. Mr. Chairman, I ask unanimous consent to proceed for 30 seconds.

The CHAIRMAN. Without objection the gentleman is recognized for 30 seconds.

There was no objection.

Mr. HOFFMAN. In the Committee yesterday we on this side who were opposed to this appropriation were accused of sitting on our hands and keeping our mouths shut when the matter originally came up. That just is not the fact. The RECORD so shows.

Now, what more could I have done? What could I have done, other than appeal from the ruling of the Chair—usually a futile gesture—than what I did do? I realize that sometimes I do make too much noise but I can get a whistle if that is necessary to get recognition under the present rules.

At the time I made no argument either for or against the merits of the bill. With that issue I was not then concerned. I was all hot and bothered on the point of order. I stated that I was not finding fault with the substance of the amendment—my concern was in striking it from the appropriation bill—as it should have been. Discussing a pro forma amendment I then said:

Mr. HOFFMAN of Michigan. Mr. Chairman, I move to strike out the last word.

(Mr. HOFFMAN of Michigan asked and was given permission to revise and extend his remarks.)

Mr. HOFFMAN of Michigan. Mr. Chairman, I am not finding fault with the substance of this amendment offered by the gentleman from Texas [Mr. RAYBURN], our Speaker.

For 15 years I have been trying to get a decent place for Congressmen to eat, entertain their homefolk, and still have the time to perform their duties. But I have not seen any amendment come from that side of the aisle, I have not seen any amendment offered by the gentleman who is offering this amendment to do anything to provide that which everyone knows we need, which we have needed for 20 years. But that is not my point at all. My point is this.

I have been told from the well of the House, by the Speaker, who offered this amendment, that this is one of the greatest deliberative bodies in the world. I have heard that more than once from the gentleman from Texas [Mr. RAYBURN], and on several occasions the gentleman has coupled with it the statement that our proceedings should be orderly and in accordance with the rules of the House—the House which he dearly loved.

Yet, while we are supposed to be operating under rules to which the gentleman has called our attention, what happened today, just a few moments ago? The Members of the House saw what happened. The gentleman from Texas [Mr. RAYBURN] offered an amendment which was obviously in violation of a House rule. I was on my feet seeking recognition by the Chair, for I saw the gentleman from Missouri [Mr. CANNON] standing by the Speaker on the other side of the aisle. I knew I must make my point of order before debate on the amendment began. At least twice while the amendment was being read I addressed the Chair seeking to make a point of order—when the Clerk finished reading I again addressed the Chair, saying, "Mr. Chairman, a point of order." Twice I addressed the Chair—and in no whisper. Instead of giving me the recognition to which I was entitled, the Chair recognized the gentleman from Missouri, a member of the committee, who being recognized, said my point of order came too late. It did not come too late. It was made at the proper time, but apparently on advice of someone I was refused the recognition to which I was entitled under the rules. I do not charge any conspiracy between that gentleman and the gentleman from Texas [Mr. RAYBURN]. Oh, no; I do not charge that at all. But what they did was to so arrange things so that the gentleman in the chair, as was not his prerogative, instead of recognizing me when I was trying to obtain recognition, both before the Clerk had just finished reading and after, recognized the gentleman from Missouri [Mr. CANNON]. So, by their procedure, they did what? They deprived a member of the minority, a Member of the House from the Fourth District of Michigan, of the opportunity, under the rules, an opportunity which he should have, a right given him by the rules of the House, to which the Speaker has so often asked us to adhere, to make a point of order. How can a Member make a point of order if, when on his feet, in a loud voice, almost a shout, addressing the Chair, he says, "Mr. Chairman," then adds, "A point of order, Mr. Chairman," when the chairman refuses to see him. If that is legislating deliberately, all right. I will say that that is what I call a gag rule, an arbitrary ruling or procedure, which deprives a Member of the House, which on this occasion deprived the Member from Michigan, of a privilege, of a right, that is given him under the rules of the House, rules under which the amendment of the gentleman from Texas [Mr. RAYBURN] was out of order. The statement of the Chair that he could not recognize me before the Clerk finished reading, if followed, would prevent the making of a point of order when the House was out of order—an absurdity. Moreover, I was on my feet addressing the Chair, as 50 Members of the House well know, when the Clerk finished reading the amendment.

If you like that kind of procedure, all right. But do not ever come around to me and do not ever cry babylike, from the well of the House, of a fancied violation of the rules—do not preach or cry to me about the sacredness of the rules of the House, about something that may happen over here on this side. And it was all so unnecessary. Why not the legislation in the amendment in a bill in the regular way—sent to a committee? Was there something requiring secrecy, haste? Was there an emergency? Rules made for me to obey are rules for all to follow.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. RAYBURN].

The amendment was agreed to.

By unanimous consent, the pro forma amendments were withdrawn.

Mr. TABER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I come from one of those States which will suffer as a result of the lowering of the water level of Lake Ontario. Frankly, the people of my State do not approve of this bill. They feel it will destroy valuable rights and embarrass them very much.

At the present time we have a very low level of Lake Ontario, and the diversion permitted by this bill, if it is passed, will aggravate it a little more. Under all of the circumstances, it seems to me that the House of Representatives and the legislative body at the other end of the Capitol should not at this time create a diversion which would harm people living along Lake Erie, Lake Ontario, Lake Huron, and the northern parts of Lake Michigan. If we attempt to do this, we are destroying the riparian rights of all the people all along that line. You are going to make it a great deal more difficult for them to maintain a pure water supply and to take care of the shoreline. A lowered shoreline means lots of exposed land, diseased weeds, and all that sort of thing which will result in an unhealthy condition. The Congress should not try to do something which will destroy the rights of one set of people.

The CHAIRMAN. Under the rule the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. WILLIS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2) to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes, pursuant to House Resolution 254, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. McGREGOR. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. McGREGOR. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. McGREGOR moves to recommit the bill, H. R. 2, to the committee on Public Works until the bilateral discussions between the United States and the Dominion of Canada with respect to the further diversion of water from Lake Michigan have been concluded.

Mr. BLATNIK. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

Mr. McGREGOR. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 143, nays 225, not voting 65, as follows:

[Roll No. 80]

Mr. Wharton for, with Mr. Green of Pennsylvania against.
Mr. Henderson for, with Mr. Davis of Tennessee against.
Mr. Wilson of California for, with Mrs. Sullivan against.
Mr. Krueger for, with Mr. Durham against.

Until further notice:

Mr. Albert with Mr. Martin.
Mr. Hemphill with Mr. Chiperfield.
Mr. Roosevelt with Mr. Hyde.
Mr. Whitten with Mr. August H. Andresen.
Mr. Byrd with Mr. Mason.
Mr. Elliott with Mr. Morano.
Mr. Preston with Mrs. Rogers of Massachusetts.
Mr. Sieminski with Mr. Simpson of Pennsylvania.
Mr. Holland with Mr. Siler.
Mr. Sheppard with Mr. Smith of California.
Mr. Chelf with Mr. Wolverton.

Mr. CLARK changed his vote from yea to nay.

Mr. BECKWORTH changed his vote from yea to nay.

Mr. FEIGHAN changed his vote from nay to yea.

Mr. SCRIVNER changed his vote from nay to yea.

Mr. MILLER of New York changed his vote from nay to yea.

Mr. SCHWENGEL changed his vote from yea to nay.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER. The question is on the passage of the bill.

Mr. WITHROW. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 223, nays 144, not voting 66, as follows:

[Roll No. 81]

Mason	Sheppard	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Judd for, with Mr. Polk against.
Mr. Gordon for, with Mr. Kearney against.
Mr. Dawson of Illinois for, with Mr. Taylor against.
Mr. Holtzman for, with Mr. Kearns against.
Mr. Garmatz for, with Mr. Baker against.
Mr. Roberts for, with Mr. Hoeven against.
Mr. Fogarty for, with Mr. Beamer against.
Mr. Bailey for, with Mr. Allen of California against.
Mr. Kelley of Pennsylvania for, with Mr. Gubser against.
Mr. Green of Pennsylvania for, with Mr. James against.
Mrs. Sullivan for, with Mr. McConnell against.
Mr. Durham for, with Mr. Saylor against.
Mr. Preston for, with Mr. Wharton against.
Mr. Albert for, with Mr. Henderson against.
Mr. Sieminski for, with Mr. Wilson of California against.
Mr. Byrd for, with Mr. Krueger against.
Mr. Roosevelt for, with Mrs. Bolton against.

Until further notice:

Mr. Anfuso with Mr. Martin.
Mr. Zelenko with Mr. Morano.
Mr. Baring with Mr. Siler.
Mr. Sheppard with Mr. Simpson of Pennsylvania.
Mrs. Griffiths with Mr. Wolverton.
Mr. Whitten with Mr. Hyde.
Mr. Elliott with Mr. Chiperfield.
Mr. Davis of Tennessee with Mr. Mason.
Mr. Chelf with Mr. Miller of Maryland.
Mr. Passman with Mrs. Rogers of Massachusetts.
Mr. Cooley with Mr. Schwengel.
Mr. Eberharter with Mr. August H. Andresen.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND REMARKS

Mr. BLATNIK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed, H. R. 2.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

CALENDAR WEDNESDAY BUSINESS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday for the next 2 weeks be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION BILL, 1958

Mr. ROONEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 6871) making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1958, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. ROONEY, PRESTON, SIKES, MAGNUSON, CANNON, COUDERT, BOW, CLEVENGER, and TABER.

SMALL-BUSINESS MEN'S ASSOCIATION

Mr. PORTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, 425 Members of this House accepted invitations to a dinner held last night at the Mayflower Hotel celebrating the 20th anniversary of the National Small-Business Men's Association. The president of this association, Mr. L. M. Evans, made a speech which can only be described as ignorant, insulting, and irresponsible. He told us, who had gathered there to do honor to small-business men, that the country would be better off if there were a fence around Washington, that without us; that is, legislative, judiciary, and executive branches, the country would soon close ranks and be better off.

He told us New York should not tell Tennessee what to do, Ohio should not tell Kentucky, and so on, in other words on the national level the denial of a union of States.

It was plain to me he did not represent nor did he speak for the small-business men I know and respect. It was also plain that his anarchistic point of view was based on ignorance of our Government, not knowledge; on his complete failure to understand what "United" in United States means.

Mr. Evans enjoined us to remember, in connection with cutting the budget and taxes, that we could fail to be reelected. What he seemed to forget, or not understand at all, was that we had been elected and that we were all doing our best according to our knowledge and belief as to our duty. That his ignorance extended to the simplest matters regarding our system of government was indicated when he spoke of Representatives as having 4-year terms of office. It is a sad day for small-business men when such as Mr. Evans lead them and purport to speak for them.

FEDERAL EXCISE TAX ON RENTAL OF SAFE DEPOSIT BOXES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DINGELL. Mr. Speaker, I have introduced legislation which will repeal sections 4286 and 4287 of the Internal Revenue Code, which relate to the Federal excise tax on the rental of safe deposit boxes.

This tax was originally instituted in 1932 as an emergency measure to provide the Federal Government with additional revenue. At that time the rate of tax imposed was 10 percent of the amount collected in rentals on those boxes. In 1940 this tax was increased to 11 percent. One year later, with the outbreak of the Second World War, it was increased to 20 percent. The Excise Tax Reduction Act of 1954 reduced it to 10 percent—the rate which currently prevails.

In the fiscal year 1956 this tax produced $5,512,000 in revenue for the Federal Government. A table is enclosed at the end of my statement showing the amount collected each year since this tax was first adopted.

It has been estimated that there are at least 12 million renters of safe deposit boxes. Generally, the rents range from $2 to $8 a year for the average-size box.

I am seeking the abolition of this tax for the following reasons:

First of all, this tax works a hardship on those persons renting safe-deposit boxes. For the most part, these renters are not wealthy, but are persons of modest means who use the boxes more for the protection of the deed to their home, their life-insurance policies, and other important papers, rather than for the storage of stocks and bonds. This tax, superimposed upon the many others levied by the Federal, State, and local governments only adds to the tax burden of those renting the boxes.

Second, this tax produces such a small amount of revenue annually, that with the time and labor spent by the Government in collecting it, it represents little more than a nuisance tax. The $5,512,000 collected in 1956 was only 0.007 percent of the $75,112,649,000 received from all sources. The loss in revenue which would result from the abolition of this tax would be partially offset by an increase in income-tax collections from safe-deposit-box companies and banks whose earnings would rise from the increased usage of these boxes.

Third, safe-deposit boxes are essential for the safekeeping of one's personal possessions and should not be taxed in the same manner as luxury or nonessential items. As the law now stands, no distinction is made by the Federal Government in the rate imposed on safe-deposit-box rentals and on such less essential items as cosmetics, furs, and jewelry—the same rate applies to each of these articles.

Fourth, this tax is burdensome on safe-deposit companies which are dedicated to the promotion of thrift, savings, and the protection of personal possessions. This arises from the fact that this tax discourages some individuals from renting the boxes. Therefore, as long as it remains in effect, the operations of these safe-deposit companies and banks are handicapped.

Fifth, repeal will tend to encourage the rental of safe-deposit boxes. This in turn will stimulate purchases of Federal savings bonds which the Government is constantly seeking to encourage. Without safe-deposit boxes in which to place their bonds, individuals tend to resist Treasury bond drives.

Finally, while there was some justification for this tax during the war when the Federal Government was compelled to tap every possible source of revenue, this argument does not hold today.

The repeal of this tax is now long overdue. I, therefore, ask your consideration and approval of my bill seeking its repeal.

Federal tax collections on the use of safe-deposit boxes, fiscal years 1933–56

1933	$2,365,041
1934	2,715,851
1935	2,317,619
1936	1,997,410
1937	2,039,714
1938	2,013,159
1939	1,960,525
1940	1,988,934
1941	2,215,898
1942	3,662,536
1943	6,070,096
1944	6,593,675
1945	7,311,450
1946	7,857,166
1947	8,560,125
1948	9,081,103
1949	9,461,317
1950	9,554,488
1951	9,568,647
1952	10,210,796
1953	10,368,153
1954	9,318,000
1955	5,568,000
1956	5,512,000

SOCIAL SECURITY BENEFITS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DINGELL. Mr. Speaker, one of the major problems of our time is the great difference between the amount of money a worker gets in his last pay check before he is forced to retire, and the amount he receives in his first social-security benefit. The average social-security benefit today is about $63 per month—or just $756 a year. On the other hand, the average wage in manufacturing today is about six times this amount. I am, therefore, introducing a bill which will help to equalize this striking drop in income upon retirement by

raising the maximum used for social-security benefit and tax purposes from $4,200 to $6,200 a year.

As you know, social-security benefits are computed on the basis of the worker's taxable wages. One of the primary purposes of this method of computing benefits is to preserve an appropriate relationship between a worker's earnings and his retirement income. It follows, therefore, that if maximum creditable wages are not closely related to existing wage levels, this cardinal principle of the system is distorted.

When the social-security system was established in 1935 the desirability of this relationship was clearly recognized. The wage base established at that time covered all earnings of almost all workers. In 1938, for instance, only 5.9 percent of all male workers were earning more than $3,000 a year, the wage base at that time. Since that time the wages have risen by more than 300 percent. But the taxable wage base for social-security purposes has been increased by only 40 percent. By 1954 the situation had gotten so bad that 61 percent of all full-time male workers—the family breadwinners of our country, were earning more than the wage base, $3,600 at that time. In the 1954 amendments, Congress recognized this startling disparity by increasing the base to $4,200. But this increase was woefully inadequate at the time because 42 percent of all male workers were still earning more than $4,200 a year. By 1955 this percentage had risen to about 50 percent. Thus the gap between income during working years and income in years of retirement continues to grow at a frightening rate. However, if my amendment is enacted, bringing the wage base up to $6,200, all but 10 percent of male workers will have all their earnings credited under social security. This will return the system to its original purpose of providing a wage base that will include all the earnings of almost all American workers.

What will this increase in the wage base mean in terms of social-security benefits? The maximum benefit for a worker retiring in the future because of age or disability will be increased from the present $108.50 per month to a more reasonable figure of around $140 per month. His widow, who now receives only $81.40, would be entitled to benefits of over $100 a month. And the combined family benefit of a retired husband and wife will be increased from $162.80 to around $200 per month. Thus social-security benefit payments would be brought more nearly into line with the increased salaries and living costs now prevailing in America.

It should be noted that the new wage base will not increase social-security taxes for workers earning less than $4,200. The maximum increase to the employer and the employee will amount to just $3.75 per month. For workers receiving more than $4,200 but less than $6,200 the added tax will be proportionately less. In view of the higher benefits provided, this is certainly a good investment, and one which could not be purchased at a comparable price in private insurance.

The newly covered professional groups who, in general, have earnings which exceed the present wage base, would be afforded much better protection for their retirement years. A recent study by the Department of Commerce shows, for example, that as long ago as 1954, 75 percent of the Nation's independent lawyers had incomes of $4,000 or more per year.

Moreover, this amendment would have the effect of reducing the level premium cost of the social-security program by around 0.40 percent of payroll. This saving will allow liberalizations of other aspects of the program. It would, for instance, more than cover the cost of increasing the earned-income exemption for retired workers from the present $1,200 per year to $1,800, as proposed in my bill, H. R. 7669, which is also designed to help adjust retirement income to the rising cost of living.

This is an improvement in our social security system which is long overdue. As early as 1954 the A. F. of L. and CIO supported the Lehman-Dingell bill, which would have brought the wage base up to $6,000 to keep pace with rising wage levels. It conforms with the philosophy of the Advisory Council on Social Security, appointed by the Senate Finance Committee of the 80th Congress, as to what constitutes an appropriate wage base. The Advisory Council stated:

> Since the American system of relating benefits to past wages rests on the principle that considerations of individual security and individual incentive require a relationship between benefits and the previous standard of living of the retired person, benefits must be increased for higher paid wage earners as well as for workers in the lower income brackets.

Mr. Speaker, I urge early action on the part of the Congress with respect to this most important matter. In so acting we will bring our social security system into line with the basic idea of assuring an American worker a retirement income which is more closely related to the income he received during his working years. It will enable him to maintain a more decent standard of living at a time of rising living costs. We have a serious obligation to the aged and disabled men and women in our country to enact this legislation.

DEBATE ON THE SECOND APPROPRIATION BILL, FISCAL YEAR 1955

Mr. ROONEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Speaker, I understand that this afternoon without notice to me and during my absence from the floor on official business in the other body at the other end of the Capitol, my distinguished friend, the gentleman from Michigan [Mr. HOFFMAN], mentioned my name three times during the course of some remarks he made. I am at a loss at this moment to know what the gentleman said, but I understand from hearsay that he referred to the debate and colloquies had during the course of the consideration in the House of the second Appropriation bill of fiscal year 1955, had on March 18, 1955. I think the best answer I may make at this moment, without knowing what remarks the gentleman from Michigan made, is by way of incorporating at this point in the RECORD the language beginning at the point where the gentleman from Texas, our distinguished Speaker, offered an amendment to that bill, CONGRESSIONAL RECORD, volume 101, part 3, in the third column of page 3204, down to and including all of the following page 3205, and then to the point where the amendment of the gentleman from Texas was agreed to in the first column of page 3206. The matter I refer to is as follows:

Mr. RAYBURN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

"Amendment offered by Mr. RAYBURN: On page 19 strike out all of lines 5 through 10, inclusive, and in lieu thereof insert:

"'CHAPTER XII–A

"'ADDITIONAL HOUSE OFFICE BUILDING

"'SEC. 1201. There is hereby authorized to be constructed on a site approved by the House Office Building Commission, in accordance with plans to be prepared by or under direction of the Architect of the Capitol and to be submitted to, and approved by, such Commission, an additional fireproof office building for the use of the House of Representatives, including such necessary access facilities over or under public streets and such other appurtenant or necessary facilities as may be approved by such Commission.

"'SEC. 1202. (a) If the site upon which the building authorized to be constructed by section 1201 of this act is not within the United States Capitol Grounds as defined in the act entitled "An act to define the area of the United States Capitol Grounds, to regulate the use thereof, and for other purposes," approved July 31, 1946 (40 U. S. C., secs. 193a–193m), the Architect is authorized to acquire such site by purchase, condemnation, or otherwise, and upon acquisition of such site and completion of the building, such building, and the grounds, sidewalks, and facilities surrounding it, shall be subject to the provisions of (1) of the act of May 4, 1907, as amended (40 U. S. C., sec. 175) (relating to the control, supervision, and care of the House Office Building), and (2) the act entitled "An act to define the area of the United States Capitol Grounds, to regulate the use thereof, and for other purposes," approved July 31, 1946 (40 U. S. C., sec. 193a–193m).

"'(b) Any proceedings for condemnation brought under subsection (a) shall be conducted in accordance with the act entitled "An act to provide for the acquisition of land in the District of Columbia for the use of the United States," approved March 1, 1929 (16 D. C. Code, secs. 619–644).

"'SEC. 1203. For carrying out the purposes of this act there is hereby appropriated $2 million, to remain available until expended; and there are hereby authorized to be appropriated such additional sums as may be necessary to carry out this act.

"'SEC. 1204. This subchapter may be cited as the "Additional House Office Building Act of 1955.'"

Mr. CANNON. Mr. Chairman, in view of the emergency involved, and the urgent need of the facility for which the appropriation is proposed, the committee accepts this amendment and approves the expenditure.

Mr. HOFFMAN of Michigan. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. HOFFMAN of Michigan. I make the point of order against the amendment that it is legislation on an appropriation bill.

Mr. CANNON. Mr. Chairman, the point of order comes too late.

The CHAIRMAN. The point of order does come too late.

Mr. HOFFMAN of Michigan. How does it come too late when I was on my feet seeking recognition before the gentleman was recognized?

The CHAIRMAN. The gentleman, as chairman of the committee, was recognized first.

Mr. HOFFMAN of Michigan. That is to say the rule that requires recognition of the chairman of a committee would deprive another Member from making a point of order?

The CHAIRMAN. No. Did the gentleman address the Chair?

Mr. HOFFMAN of Michigan. I did address the Chair before the Clerk finished reading.

The CHAIRMAN. That was not the proper time.

Mr. HOFFMAN of Michigan. I was on my feet and addressed the Chair before the Clerk finished and as soon as he finished. Now, if I have to shout louder, I can do that.

The CHAIRMAN. The Chair could not recognize the gentleman until the Clerk had finished reading.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I should like to ask the chairman of the Appropriations Committee what is the emergency that compels us to construct a new office building, and what is going to be the cost of this building?

Mr. RAYBURN. Mr. Chairman, if the gentleman will yield, I can say this to the gentleman, that if he were on the House Office Building Commission and had a dozen people coming to him every day asking for additional space, why he would understand something about the necessity for building a building that gives us more space. They do need this building very badly, and this is a start on it; I think a good start. Of course, I must admit that this Commission that is going to handle it is a very fine Commission, because the gentleman from Texas [Mr. RAYBURN] is a member of it.

Mr. GROSS. I would agree with that.

Mr. RAYBURN. And the gentleman from Georgia [Mr. VINSON], and one of the finest men of the House and a man who probably knows more about public buildings than anyone, the gentleman from New Jersey [Mr. AUCHINCLOSS]. I do not think this Commission is going to run wild on anything. But I do know that we need additional space here to carry on efficiently the work of the Members of the House of Representatives.

Mr. GROSS. Mr. Chairman, may I inquire of the gentleman from Texas [Mr. RAYBURN], is this going to be an ornamental type of building again, or is it going to be a functional type of building? What are we getting into here?

I am concerned, and deeply concerned, because things are happening out in the State of Iowa today that are not good for the economy of the State or of this country. Let me say to the gentleman that last year 54 percent of the farmers of the State of Iowa did not make sufficient income to pay a State income tax. I am concerned—and I want the gentleman to understand that I make this inquiry in the utmost sincerity—about this spending situation. We are putting up buildings on the Capitol Grounds, tremendous structures, and a great deal of money is going into them. I want to know the necessity for these expenditures.

Mr. RAYBURN. I think it is very necessary for the Members of the Congress, in order to serve the State of Iowa, as well as the other 47 States, to have the instruments and the room in which to work to perform their duties.

Mr. DONDERO. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I just came into the Chamber to hear part of the debate going on over the amendment offered by the gentleman from Texas [Mr. RAYBURN].

I happen to walk through the hallways of this Capitol Building nearly every day, and have for a good many years. I notice, and I am sure other Members have noticed, that partitions have been built setting off parts of the hallways or corridors in order to obtain more office space. The same has been done over in the new and old House Office Buildings. They have had to cut off some of the hallways in order to obtain more office space.

Certainly the people of the United States would be willing for us, as representatives of a great Nation, to have sufficient space in order to carry on the business of their Government. I do not think there will be any objection to it.

Mr. HALLECK. Mr. Chairman, will the gentleman yield to me?

Mr. DONDERO. I yield.

Mr. HALLECK. I should like to commend the gentleman for the statement he has made. I have not had as close a connection with the matter of proper housing to carry on the functions of the House of Representatives as has been had by the gentleman who has just spoken or the gentleman from Texas [Mr. RAYBURN]. However, I have been sufficiently close to the matter to know that as the responsibilities of the Congress have increased in recent years, we have found ourselves in all sorts of additional activities. Different functions must be carried on. I know of my own knowledge that we need additional space, and I sincerely hope that this amendment will be adopted and that we may get on with the construction of this building that I say is justified and necessary.

Mr. DONDERO. Mr. Chairman, I should like to close my remarks by saying this: I have never been charged in this Chamber with being one who is willing to spend the people's money for nothing. I am known here as a conservative. But here is an amendment which I think we should all support in the interest of the common welfare of the American people.

Mr. HOFFMAN of Michigan. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am not finding fault with the substance of this amendment offered by the gentleman from Texas [Mr. RAYBURN], our Speaker.

For 15 years I have been trying to get a decent place for Congressmen to eat, entertain their homefolk, and still have the time to perform their duties. But I have not seen any amendment come from that side of the aisle; I have not seen any amendment offered by the gentleman who is offering this amendment to do anything to provide that which everyone knows we need, which we have needed for 20 years. But that is not my point at all. My point is this:

I have been told from the well of the House, by the Speaker, who offered this amendment, that this is one of the greatest deliberative bodies in the world. I have heard that more than once from the gentleman from Texas [Mr. RAYBURN], and on several occasions the gentleman has coupled with it the statement that our proceedings should be orderly and in accordance with the rules of the House—the House which he dearly loved.

Yet, while we are supposed to be operating under rules to which the gentleman has called our attention, what happened today, just a few moments ago? The Members of the House saw what happened. The gentleman from Texas [Mr. RAYBURN] offered an amendment which was obviously in violation of a House rule. I was on my feet seeking recognition by the Chair, for I saw the gentleman from Missouri [Mr. CANNON] standing by the Speaker on the other side of the aisle. I knew I must make my point of order before debate on the amendment began. At least twice while the amendment was being read I addressed the Chair seeking to make a point of order—when the Clerk finished reading I again addressed the Chair, saying, "Mr. Chairman, a point of order." Twice I addressed the Chair—and in no whisper. Instead of giving me the recognition to which I was entitled, the Chair recognized the gentleman from Missouri, a member of the committee, who being recognized, said my point of order came too late. It did not come too late. It was made at the proper time, but apparently on advice of someone I was refused the recognition to which I was entitled under the rules. I do not charge any conspiracy between that gentleman and the gentleman from Texas [Mr. RAYBURN]. Oh, no; I do not charge that at all. But what they did was to so arrange things so that the gentleman in the chair, as was not his prerogative, instead of recognizing me when I was trying to obtain recognition, both before the Clerk had just finished reading and after, recognized the gentleman from Missouri [Mr. CANNON]. So, by their procedure, they did what? They deprived a member of the minority, a Member of the House from the Fourth District of Michigan, of the opportunity, under the rules, an opportunity which he should have, a right given him by the rules of the House, to which the Speaker has so often asked us to adhere, to make a point of order. How can a Member make a point of order if, when on his feet, in a loud voice, almost a shout, addressing the Chair, he says, "Mr. Chairman," then adds, "A point of order, Mr. Chairman," when the Chairman refuses to see him. If that is legislating deliberately, all right. I will say that that is what I call a gag rule, an arbitrary ruling or procedure, which deprives a Member of the House, which on this occasion deprived the Member from Michigan, of a privilege, of a right, that is given him under the rules of the House, rules under which the amendment of the gentleman from Texas [Mr. RAYBURN] was out of order. The statement of the Chair that he could not recognize me before the Clerk finished reading, if followed, would prevent the making of a point of order when the House was out of order—an absurdity. Moreover, I was on my feet addressing the Chair, as 50 Members of the House well know, when the Clerk finished reading the amendment.

If you like that kind of procedure, all right. But do not ever come around to me and do not ever cry babylike, from the well of the House, of a fancied violation of the rules—do not preach or cry to me about the sacredness of the rules of the House, about something that may happen over here on this side. And it was all so unnecessary. Why not the legislation in the amendment in a bill in the regular way—sent to a committee? Was there something requiring secrecy, haste? Was there an emergency? Rules made for me to obey are rules for all to follow.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. RAYBURN].

The amendment was agreed to.

Now, it may be that here on the floor this afternoon the distinguished gentleman from Michigan, my dear friend, was making a later extension of remarks than his lengthy extension of remarks of March 18, 1955.

In any event, it is clear from the foregoing that the gentleman's point of or-

der came too late and that the rulings of the Chair were not extended.

These remarks of the gentleman from Michigan following the Chair's ruling that the point of order came too late are highly interesting.

Mr. HOFFMAN of Michigan. Mr. Chairman, I am not finding fault with the substance of this amendment offered by the gentleman from Texas [Mr. RAYBURN], our Speaker.

The amendment he referred to created the additional New House Office Building for which further funds were approved by a rollcall vote of the House earlier today.

NO TIME TO GAMBLE WITH OUR SECURITY

Mr. PELLY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, Friday the House will take up the defense appropriation bill, which is probably the most important legislation we will consider at this session of Congress.

Members of Congress, particularly those of us who are not members of committees having jurisdiction over the armed services, to a large extent are going to have to depend on the President and more informed opinions as to the security needs of the United States. In the past personally I have looked to the committee itself as a composite viewpoint of those who have studied the defense program over a great many years.

Right now, however, I am apprehensive that in cutting the administration's budget request by $2.5 billion the committee may have gone too far. The general public demand for a reduction in Federal spending should not influence us here. Each one of us has the responsibility of acting on the basis of facts, and then later being prepared to defend what we do to our constituents. Personally I can defend my economy votes thus far, but when it comes to the security of the Nation I draw a line. I admit the number of factors on which we have to make a decision are almost too technical and involved for a layman. So, on this particular appropriation I shall not lend my vote to any position that means giving this Nation less than 100 percent ability to defend itself. I frankly don't dare support economy as against maximum security. So I shall support President Eisenhower's budget request in every instance where there is doubt, because I know he has the best background and advisers on which to evaluate and analyze the overall requirements of our military establishments. Friday I will forsake the role of one seeking to reduce the Federal budget. I intend to support the full defense funds asked for, unless the committee has discovered unnecessary waste or a nonessential expenditure of public funds. This is no time to take risks of any kind, and that same viewpoint likewise will guide my thinking when it comes to the defense aspects of foreign aid. I do not believe we can safely curtail expenditures in defense items the way we have been doing with other agencies of the Government.

GOVERNORS APPEAR IN SUPPORT OF APPROPRIATION FOR UPPER COLORADO PROJECT

Mr. DIXON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. DIXON. Mr. Speaker, it is unusual for governors of four great States in our country to unitedly file statements before the Appropriations Committee in the interest of one common problem. That very thing happened yesterday when Gov. Steve L. R. McNichols of Colorado and Gov. George Dewey Clyde of Utah appeared in person before the Appropriations Committee in the interest of the appropriation for construction of the Colorado River storage project; and Gov. Milward Simpson of Wyoming and Gov. Edwin L. Mechem of New Mexico presented testimony through their official representatives.

Now the case made by the governors for the appropriation was briefly as follows: The upper Colorado Basin is one of great abundance in natural resources and scenic grandeur. It is an area which produces some 90 percent of the uranium mined in this country. The oil shale deposits of western Colorado contain the world's greatest coal deposits. Our lands are capable of producing specialty crops and of sustaining large numbers of sheep and cattle. Yet the all important factor in the development of these resources and enterprises is the water which flows from the winter snows that fall in the upper States and the electrical energy which it will generate.

The governors were unanimous in pointing out to the committee that 99 percent of the Federal investment in the Colorado River storage project will be paid back to the Federal Treasury by the users of water and power. However, repayment cannot begin until construction is completed. On this basis the testimony presented showed that it was economically sound to make substantial appropriations for construction in order to get the project complete and revenues returning to the Treasury.

Governor Clyde stated that the favorable construction contract for the Glen Canyon Dam was $27 million below the Bureau of Reclamation estimate. This favorable development since the issuance of the President's budget request would justify an increase in the project appropriation from $25 million to $33 million.

The merits of the Colorado River storage project are many and have been well established. In view of the approval by the Congress in passing authorization, the governors urged that the project be carried through to a speedy completion in order that construction and material price increases would not place additional burdens on the people who repay the costs of the project.

Governor Clyde, who is by training and 35 years of professional experience an eminent hydrologist, reiterated that the Colorado River is one of the Nation's greatest unharnessed resources and that the Colorado River project is the means of putting to use wasting water, and will in no way adversely affect the rights of downstream water users.

Governor Clyde assured the committee that he and the governors of the other upper-basin States, and the people of the four States, are not at all unmindful of the fiscal problems faced at this time; that they are fully aware of the need for economy, and in harmony with efforts to attain it.

True economy in this instance can be best achieved by a sustained, adequate construction schedule that will provide a rapid return of benefits from the investment.

The governors were unanimous in pointing out that this project is a capital investment that would not only be repaid directly by the users of water and power, but that similar projects had returned to the Treasury more than four times the total construction costs in taxes.

This is not a project we are going to debate. It is not only authorized but it is a project that is under construction. Already $13 million has been wisely spent. Federal interests dictate that we keep it moving ahead at a high level of construction.

LEGISLATIVE APPROPRIATION BILL

Mr. REES of Kansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES of Kansas. Mr. Speaker, I did not support the bill, H. R. 7599, considered earlier today, being known as the legislative branch appropriation bill, for the reason it contained items I believe should be deleted therefrom. They are items about which I inquired when the bill was being debated in Committee of the Whole yesterday.

I do not see the justification for spending the item of $7,500,000 to start construction of a new office building for Members of the House. The disturbing thing is that is a part of a proposed expenditure of $100 million for this project. The members of the Appropriations Committee gave us that information yesterday.

I regret that I take issue with the distinguished leadership of the House. I feel in view of the condition of our Treasury, as well as the demand for economy everywhere, the expenditure of these funds at this time is ill advised. The need of saving the funds is far greater than the need of a new office building.

PERSONAL ANNOUNCEMENT

Mr. CURTIS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CURTIS of Massachusetts. Mr. Speaker, by inadvertence I missed rollcall No. 78 on the passage of the bill H. R. 7599. Had I been present I would have voted "Yea."

PAN AMERICAN AUDIT

The SPEAKER. Under the previous order of the House, the gentleman from Wisconsin [Mr. LAIRD] is recognized for 15 minutes.

Mr. LAIRD. Mr. Speaker, during the recent hearings before the Committee on Appropriations on the Commerce Department budget, considerable attention was given to the request of the Civil Aeronautics Board for additional personnel in its field audit section.

As a member of the subcommittee of the Appropriations Committee that handles the Department of Commerce appropriations, let me say that our subcommittee gave careful thought and thorough consideration to the request of the CAB.

The Chairman of the Board, a distinguished citizen of my native State of Wisconsin, the Honorable James R. Durfee, testified that the Board was handicapped in conducting audits of airline operations in connection with the determination of subsidy requirements. Because of staff limitations, it has not been possible, in prior years, to subject the carriers to the thorough examination which one would expect in view of the extensive subsidy payments which have been made by the Federal Government.

The Chairman was most persuasive, and despite the desire of the committee for curtailment of Federal expenditures, it was our conclusion that a modest additional expenditure for the employment of 25 additional field auditors might well enable the Government to reclaim vastly greater sums in subsidy improperly claimed by United States flag carriers. The House subsequently concurred in this action of the committee.

Since this House action was taken, I have had occasion to examine two orders of the Civil Aeronautics Board relating to the activities and the subsidy payments of a certificated United States air carrier, Pan American World Airways.

The first of these, Order No. E–11103, institutes a general investigation of the relationships between Pan American and its farflung subsidiary companies, including 13 domestic and foreign-flag airlines and 14 other businesses which range from a hotel in Fairbanks, Alaska, to a real estate company in the Middle East.

The second order, No. E–11146, reopens the record in the Transatlantic Final Mail Rate case, docket No. 1706, for further proceedings.

This order alleges that Pan American has failed to charge subsidiary companies proper costs for leased aircraft, has absorbed ground-service costs of subsidiaries, has failed to bill affiliates with proper charges for airport services and overhead costs, has improperly charged depreciation costs, has failed to allocate overhaul costs to subsidiaries, and in numerous instances has deviated from the Board's uniform system of accounts or has failed to observe accepted accounting principles in the keeping of its books and records.

As a result of these practices, the CAB alleges, Pan American has received excessive operating costs and increased its subsidy requirement. The preliminary audit, which is far from complete and touches only a portion of the Pan American operation, indicates, according to the order, that Pan American has claimed excessive subsidy amounting to as much as $6,500,000. This is separate from an amount of nearly $6 million in excessive subsidy which the Board has already alleged that Pan American claimed in 1954 in its Pacific division.

The Civil Aeronautics Board states in its order that completion of the audit may disclose other discrepancies requiring further exploration. It points out that the information developed in the current audit was not apparent from the reports filed with the Board by Pan American and could not have been determined from the type of audit which the staff was hitherto equipped to perform.

The information relates not only to practices of Pan American in respect to the charging for services to affiliates, but also to the actual accounting practices of the carrier as related to the Board's regulations. The Board indicates that because of staff limitations, it has been handicapped in performing thorough audits of Pan American, and necessarily has been required to rely in ratemaking more extensively than it preferred upon the information supplied to the Board by Pan American, in which procedure the Board feels it was entitled to assume that Pan American's reports and filing were correct.

Mr. Speaker, since the creation of the Civil Aeronautics Act in 1938, Pan American revenues have exceeded $1½ billion. Of this amount, which includes the revenues of Panagra, of which Pan American owns 50 percent, more than $300 million has been received from the Treasury of the United States, in the form of mail pay and subsidy. It is estimated that in subsidy alone, Pan American has received from the Government in excess of $200 million.

These are staggering sums, Mr. Speaker, and should serve to focus attention on the importance of the Civil Aeronautics Board proceedings to which I have referred, and upon the wisdom of the House in providing additional staff for the CAB. If the allegations of the CAB prove to be correct with respect to the preliminary audit of Pan American, and if similar discoveries are made in the remainder of Pan American's operations, the Government may recapture huge sums from Pan American. This would be a welcome result at a time when all of us are concerned with holding the taxpayer's burden to a minimum.

In analyzing the CAB orders, however, two thoughts occur to me.

The order with respect to Pan American subsidy appears to reopen the record only with respect to the Atlantic division, despite the fact that Pan American has been heavily subsidized in all its divisions—the Atlantic, Latin American, Pacific, and Alaska divisions, as well.

It occurs to me that if analysis of one division reveals the questionable practices indicated in the order, a thorough analysis of the other divisions might be equally fruitful, and I hope this is the intention of the CAB.

Secondly, the order reopens the record only during the years 1946–53. Pan American has been receiving subsidy since the passage of the Civil Aeronautics Act in August of 1938, and many of the carriers' agreements with subsidiary corporations were in existence at that time.

In view of this fact, it would seem appropriate that the CAB should study the years between 1938 and 1946, as well.

I am aware, of course, that at the time these orders were issued, the CAB could rely only upon the personnel then authorized, and may well have restricted the investigation because of staff limitations. Now, however, if the appropriation for additional field auditors receives the approval of the President and the Congress, it should be possible for the CAB to audit the entire Pan American operation throughout the years in which it has received subsidy payments from the Federal Government.

In view of the revelations which resulted from the preliminary work by the audit staff, and the promising probability that the Government will recover substantial sums of money improperly claimed by Pan American in the form of subsidy, it is my hope that the CAB will make the Pan American audit as thorough and searching as possible. In view of the grave nature of the charges made in the orders of the CAB, Pan American, if these charges are without merit, should welcome a complete and thorough investigation.

HEARINGS ON ATOMIC-HYDROGEN WEAPON RADIATION

The SPEAKER pro tempore (Mr. EDMONDSON). Under previous order of the House, the gentleman from California [Mr. HOLIFIELD] is recognized for 5 minutes.

Mr. HOLIFIELD. Mr. Speaker, as I informed the House on May 7, a special subcommittee of the Joint Committee on Atomic Energy will hold public hearings beginning on Monday, May 27, and extending through June 12 on the problem of radioactive fallout from nuclear weapons explosions. In my opinion, this is one of the most important and vital questions which the Joint Committee and the Congress have to consider in the present session.

Ever since the original announcement of the hearings, I have had hundreds of letters from people here in this country and overseas expressing concern over the fallout problem and over the effects of fallout on human beings, livestock and agriculture. Many of these people

frankly state that they are confused over the mass of conflicting statements being made on all sides, and express the hope that these hearings will serve to dispel some of this confusion through bringing together in one forum the best scientific opinion available.

There is no question that the people of this country and in foreign nations alike are deeply troubled by this problem. They are afraid for themselves and for their children, and are bewildered by claims and counterclaims which are often based on inaccurate information or emotional considerations.

It is the intention of the subcommittee to approach the fallout problem in an objective manner and through the presentation of expert testimony to arrive at a better understanding of what we are up against.

I would like permission to insert in the RECORD at this point, Mr. Speaker, a copy of the list of expert witnesses invited to the hearings and a detailed outline describing the scope and content of the hearings.

The SPEAKER pro tempore (Mr. EDMONDSON). Without objection, it is so ordered.

There was no objection.

The matter referred to is as follows:

CONGRESS OF THE UNITED STATES, JOINT COMMITTEE ON ATOMIC ENERGY—THE NATURE OF RADIOACTIVE FALLOUT AND ITS EFFECTS ON MAN—OPEN HEARINGS, MAY 27-JUNE 7, 1957—TENTATIVE TIME SCHEDULE AND LIST OF EXPERT WITNESSES INVITED

MONDAY, MAY 27

Morning

10 a. m.

Dr. Charles L. Dunham, Division of Biology and Medicine, Atomic Energy Commission. I. Introduction.

10:30 a. m.

Dr. Mark Mills, University of California Radiation Laboratory. II. Background Information—Radioactivity and Radiation. III. Background Information—Controlled Fission and Fusion Reactions and Their Potential as a Source of Hazard.

Afternoon

2 p. m.

Dr. Alvin C. Graves, Los Alamos Scientific Laboratory. Dr. Frank Shelton, Armed Forces special-weapons project. Gen. Alfred D. Starbird, Division of Military Application, Atomic Energy Commission. V. The Production of Radiation and Radioactivity by Detonating Nuclear Weapons.

3:15 p. m.

Dr. W. W. Kellogg, Rand Corp. VI. Atmospheric Transport, Storage, and Removal of Particulate Radioactivity.

TUESDAY, MAY 28

Morning

10 a. m.

Dr. Lester Machta, United States Weather Bureau. VI. Atmospheric Transport, Storage, and Removal of Particulate Radioactivity.

11:15 a. m.

Dr. Gordon Dunning, Division of Biology and Medicine, Atomic Energy Commission. VII. Local Fallout: The Mechanisms by Which It Can Affect Man and the Measures He Can Take To Minimize Exposure.

Afternoon

2 p. m.

Dr. Lyle Alexander, Department of Agriculture. VIII. Delayed Fallout: The Behavior in Geological and Physical Processes and the Mechanisms by Which Delayed Fallout Enters Into the Biological Processes and Reaches Man.

3 p. m.

Dr. Forrest Western, Division of Biology and Medicine, Atomic Energy Commission. VIII. Delayed Fallout: The Behavior in Geological and Physical Processes and the Mechanisms by Which Delayed Fallout Enters Into the Biological Processes and Reaches Man. IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, Biosphere, and Its Uptake and Behavior in Man.

3:45 p. m.

Dr. Roger Revelle, Scripps Institute of Oceanography. VIII. Delayed Fallout: The Behavior in Geological and Physical Processes and the Mechanisms by Which Delayed Fallout Enters Into the Biological Processes and Reaches Man.

WEDNESDAY, MAY 29

Morning

10 a. m.

Dr. Merrill Eisenbud, New York Operations Office, Atomic Energy Commission. IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, and Biosphere, and Its Uptake and Behavior in Man.

10:45 a. m.

Dr. J. L. Kulp, Columbia University, Lamont Geological Laboratory. IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, Biosphere, and Its Uptake and Behavior in Man.

11:30 a. m.

Dr. William F. Neuman, University of Rochester School of Medicine and Dentistry. IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, Biosphere, and Its Uptake and Behavior in Man.

Afternoon

2 p. m.

Dr. Wright Langham and Dr. E. C. Anderson, Los Alamos Scientific Laboratory. IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, Biosphere, and Its Uptake and Behavior in Man.

MONDAY, JUNE 3

Morning

10 a. m.

Dr. H. L. Friedell, the School of Medicine, Western Reserve University. X. The Effects of Radiation on Man.

10:45 a. m.

Dr. Austin Brues, Argonne National Laboratory. X. The Effects of Radiation on Man.

11:30 a. m.

Dr. E. P. Cronkite, Brookhaven National Laboratory. X. The Effects of Radiation on Man.

Afternoon

2 p. m.

Dr. Ernest Pollard, Biophysics Department, Yale University. X. The Effects of Radiation on Man.

2:45 p. m.

Dr. Edward Lewis. California Institute of Technology. X. The Effects of Radiation on Man.

3:30 p. m.

Dr. Hardin Jones, University of California Radiation Laboratory.

TUESDAY, JUNE 4

Morning

10 a. m.

Dr. James F. Crow, Genetics Department, University of Wisconsin. Dr. Bentley Glass, Johns Hopkins University. X. The Effects of Radiation on Man.

11:15 a. m.

Dr. A. H. Sturtevant, California Institute of Technology. Dr. H. J. Muller, University of Indiana. X. The Effects of Radiation on Man.

Afternoon

2 p. m.

Dr. W. L. Russell, Oak Ridge National Laboratory. X. The Effects of Radiation on Man.

2:30 p. m.

Dr. Lauriston Taylor, National Bureau of Standards. X. The Effects of Radiation on Man.

3 p. m.

Dr. William B. Looney, Massachusetts General Hospital. X. The Effects of Radiation on Man.

3:30 p. m.

Discussion.

WEDNESDAY, JUNE 5

Morning

10 a. m.

Dr. W. F. Libby, Commissioner, Atomic Energy Commission. XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy.

11:15 a. m.

Dr. Ralph Lapp. XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy.

Afternoon

2 p. m.

Dr. Walter Selove, Department of Physics, University of Pennsylvania. XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy.

3 p. m.

Discussion. XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy.

THURSDAY, JUNE 6

Morning

10 a. m.

Dr. Dunham and other AEC and Government witnesses. XII. The Impact of the Present State of Affairs: What Should the Research Program in the Physical, Geological, Biological, and Medical Sciences Be?

Afternoon

2 p. m.

Drs. Warren, Kulp, Brues, Crow, and others. XII. The Impact of the Present State of Affairs: What Should the Research Program in the Physical, Geological, Biological, and Medical Sciences Be?

GUIDANCE TO THOSE PRESENTING TESTIMONY

Scope of hearings

The hearings will deal primarily, but not exclusively, with the scientific (physical, geological, biological, and medical) subject matter associated with radioactive fallout. Matters of program, money, and policy as they relate to the scientific research aspect will be dealt with. The hearings will also deal for background purposes with scientific subject matter in topics related to weapon-caused fallout such as fallout from reactor accidents, and the biological effects of radioactivity caused by events other than fallout.

Approach of hearings

The hearings are to educate the committee and the public about fallout, how it originates, what happens to it, why it constitutes a hazard, what our sources and methods of getting information are, how adequate our knowledge is, and what the program in research for the near-future should be. The hearings thus amount to a report on the progress of research. But because fallout is of intense concern to the

committee and the public from a hazards point of view, and because of differences of opinion as to the facts and conclusions as to fallout hazards and their control, a special effort will be made, by means of the hearings, to assemble and disseminate information that is understandable and useful.

The record of the hearings should help competent persons to make the following sorts of judgments:

1. What actual experimental, clinical, or operational data is a given result based on.

2. How good is existing data on a given subject.

3. How good is our understanding of the phenomena for which data are being collected; how good are the hypotheses used to relate data to arrive at results.

4. What are the results, as opposed to the conclusions, of work to date.

5. What data should be collected urgently, because such data might never again be available assuming a continuation of tests.

6. What further should be done by way of standardizing definitions, assumptions, etc.;

7. What information can specifically be earmarked for use by civil defense and other agencies as working information?

Plan of presentation

The following order of presentation has been worked out:

I. An organized presentation by expert witnesses chosen from qualified persons in particular scientific fields:

A. Presentation of "background statements" by experts in the field of physics, meteorology, geology, biology, and medicine, to be followed by questioning confined to and appropriate for the statement but not broadening the subject matter.

B. Presentation of detailed statements on specific topics that should be examined carefully because they are particularly relevant, important or controversial.

C. Presentation of testimony designed to pull things together and point out the impact of the situation as it stands:

1. What we know, what we can predict and how surely we can predict it; what we don't know.

2. What action might serve to change the situation.

NOTE.—Oral presentation by expert witnesses should attempt to present scientific data in a form understandable to informed laymen. More detailed and technical data may be submitted for the record to supplement oral presentation.

II. An open presentation by those working in the field, or interested members of the public who requested an opportunity to testify before the committee.

MAIN TOPICS OF THE ORGANIZED PRESENTATION

The organized presentation will be broken down into the following main topics:

I. Introduction.

II. Background Information—Radioactivity and Radiation.

III. Background Information—Controlled Fission and Fusion Reactions and Their Potential as a Source of Hazard.

IV. The Natural Occurrence of Radioactivity and Radiation.

V. The Production of Radiation and Radioactivity by Detonating Nuclear Weapons.

VI. Atmospheric Transport, Storage, and Removal of Particulate Radioactivity.

VII. Local Fallout: The Mechanisms by Which It Can Affect Man and the Measures He Can Take To Minimize Exposure.

VIII. Delayed Fallout: The Behavior in Geological and Physical Processes and the Mechanisms by Which Delayed Fallout Enters Into the Biological Processes and Reaches Man.

IX. A Detailed Discussion of the Occurrence of Strontium 90 and Cesium 137 in the Atmosphere, Biosphere, and Its Uptake and Behavior in Man.

X. The Effects of Radiation on Man. Somatic Effects—Pathology. Genetic Effects. Methods and Standards of Radiation Protection as Applied to Fallout Problems. Specific Questions for Discussion.

XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy.

XII. The Impact of the Present State of Affairs: What Should the Research Program in the Physical, Geological, Biological, and Medical Sciences Be?

("Oral" denotes topic to be presented before JCAE orally, but may be read from prepared text.)

("Insert" denotes topic to be presented by a prepared statement to be inserted in the record but not presented orally.)

("Bibliography" denotes topic that should be covered, in addition to the above, by some references to the literature.)

Any one or all of these methods of presentation may be indicated for the topics below.

I. Introduction (oral) (to be preceded by opening statement by the hearing committee chairman to orient for the record the purpose, scope, and approach of the hearings).

A brief discussion for JCAE orientation, along the following lines:

A. The general nature of radioactivity and radiation.

B. Why radioactivity, radiation, and nuclear energy are closely associated.

C. Man's relationship to radioactivity and radiation.

D. The general nature of the biological effects of radioactivity and radiation.

E. The nature of the impact of applying nuclear energy for man's benefit on the health of individuals and on the health and welfare of the population as a whole.

F. Some factors that might be considered in deciding whether or not the hazards associated with radiation and radioactivity are worth risking to try to get the benefits expected from applying nuclear energy.

II. Background information—radioactivity and radiation (oral, insert if desired, bibliography if desired).

A. The nature of radioactivity and radiation.

B. Mass, energy, and radiation.

C. Quantum and corpuscular radiation.

1. Energy relationships, the radiation field, definition of roentgen.

2. Fundamental particles.

D. Reactions of radiation with matter:

1. Ionization and energy transfer.

a. Definitions, quantitative relationships.

b. Specific ionization.

c. Chemical and physical changes.

2. Penetration, absorption, attenuation, etc., of radiation.

a. Definitions, quantitative relationships.

3. Induced radioactivity.

4. Secondary radiations.

E. The phenomenon of radioactive decay:

1. Modes of decay, decay chains, etc.

2. Definitions: Half-life, average life, decay constant, curie, relation between mass, half-life, and curie for different isotopes.

F. Neutron radiation: 1. Special characteristics.

G. Neutron fission and fission chain reactions:

1. Fission, number of neutrons released, energy spectrum, prompt and delayed neutrons, fraction of total.

2. Fission energy release, its nature and distribution by type (radiant, kinetic, potential, etc.), primary and secondary fission energy.

3. Fission products: yield versus mass number, physical and chemical properties (particle size, vapor condensability, water solubility, etc.).

(a) Radioactive decay of fission product mixtures, the simple models.

(b) The limits of validity of the $t^{-1.2}$ law.

H. Nuclear fusion and thermonuclear processes:

1. Contrasts between fusion and fission, relationship to binding energy, energy and neutron release per unit weight of material consumed, etc.

2. Products and energy produced, including neutrons, gamma rays, and alpha particles.

3. Radioactivity of fusion products.

J. Particle accelerators and X-ray machines as sources of radiation and radioactivity.

1. The potential radiation hazards associated with accelerators.

III. Background information—controlled fission and fusion reactions and their potential as a source of hazard (oral).

A fairly brief discussion for orientation, along the following lines:

A. Controlled fission reactions and nuclear reactors:

1. Types and characteristics of neutron chain reactions as employed in reactors.

2. Prompt and delayed neutrons and their role in control.

3. Other reactor characteristics that lend themselves to application for control.

4. Types and characteristics of reactors (from hazards standpoint):

(a) Research, test, power, production.

(b) Liquid fuel, solid fuel, homogeneous.

5. Sources of radiation and radioactivity hazards from reactor operation, associated chemical processing, and waste disposal, including liquid and gaseous effluents (bibliography, including recent AEC report).

B. Controlled thermonuclear reactions:

1. Contrast control problems with fission reactor situation.

2. Compare as potential source of radiation and radioactivity hazard:

(a) Time schedule for controlled TN development.

(b) Possible place in meeting power demand of future.

IV. The Natural Occurrence of Radioactivity and Radiation (oral, inserts, and bibliography.)

A review and discussion of this topic, citing as appropriate such treatments as appear in the National Academy reports, the U. K. Medical Council report, The World Health Organization report (Sievert), the Government of India study, the statement by Dr. Warren Weaver (Hearings, Foreign Relations Subcommittee, January 16, 1957), the British Journal of Radiology (29, pp. 409–417, 1956), and Dr. Libby's article in Science.

A. Naturally occurring radioactive materials and decay products and radiations.

B. Cosmic radiations, composition, characteristics, effect of altitude.

C. Spontaneous fission and induced radioactivity.

D. Measurement methods and limitations of the data.

V. The production of radiation and radioactivity by detonating nuclear weapons (oral, inserts, bibliography).

A. Description of nuclear weapon explosion:

1. Heat, blast, radiation, and neutron production in a bomb—rough models for scaling and attenuation.

2. Division of radiant energy into:

(a) Prompt gamma and X-rays.

(b) Kinetic energy of neutrons—induce activity and cause direct damage.

(c) Potential energy which will manifest itself as:

(1) Direct fission product activity.

(2) Induced radioactivity (e. g., C-14).

B. The effect of weapon type and size from the point of view of fallout produced, both local and delayed.

C. The effect of the type of burst on the radiation and radioactivity resulting and on the fallout produced—

1. Air bursts.

2. Ground or surface bursts.

3. Underground bursts.

4. Underwater bursts.

VI. Atmospheric Transport, Storage, and Removal of Particulate Radioactivity (oral, inserts, bibliography).

A. The types of fallout defined and described, and the conditions under which each type is produced—physical characteristics of particles, cloud formation, condensation, etc.

B. Local fallout:

1. The predictability of local fallout:

(a) Theory of predicting fallout.

(b) Models of radioactivity within the cloud (both Nevada and PPG), dependence on type and yield of weapon and type of scavenging material.

(c) Meteorological transport, examples of fallout under different winds, and in massive attacks.

(d) Uncertainties in model and meteorology.

(e) Weathering and redeposition of particles.

(f) Decay.

2. Observed patterns of local fallout:

(a) Patterns of external radiation in Nevada and the PPG.

(b) Radiation levels as a function of time. Radiation dose to unprotected persons as a function of time of fallout from fallout.

(c) Fractions of fallout observed locally.

(d) Factors affecting patterns of fallout.

(e) Physical, chemical, and radiochemical properties.

(f) Deposition of toxic materials.

C. Intermediate and delayed fallout:

1. The production and distribution of fallout in the atmosphere:

(a) Dependence on height of burst, yield, type of explosion, and scavenging material.

(b) Observed or inferred physical, chemical, and radiochemical properties, with special reference to fractionation.

(c) Division of material: (local), tropospheric, and stratospheric; determining conditions.

2. Transport through and removal from the atmosphere:

(a) The stratosphere:

(1) Transport, mixing, possible methods of removal.

(2) Storage time; cumulative worldwide fallout as a function of time; predictions of future fallout from single event; from past weapons tests.

(3) Sources of information; measurements and estimates of radioactivity in stratosphere.

(b) The troposphere:

(1) Tropospheric removal processes; storage time:

(a) Precipitation, interception, dry deposition.

(2) Possible regions of unusual removal (fallout) because of meteorology or topography:

(a) Exposure to prevailing winds and the sometimes accompanying effect, orographic rainfall.

(b) Effect of large bodies of water on the distribution of fallout on adjoining land areas.

(3) Meteorology tracking and other discussion of transport.

3. Observed deposition on the ground:

(a) Geographical distribution; dependence on physical factors.

(b) Physical, chemical, and radiochemical properties, with special reference to fractionation.

(c) Measurement techniques and limitations of the data: (1) gummed paper, (2) gauze, (3) pots, collection of rainfall, and (4) soil samples.

4. Quantitative predictions of future fallout:

(a) From past tests.

(b) From future tests.

D. Interrelationships between study of fallout and study of meteorology; contributions of fallout studies to meteorology.

VII. Local fallout: The mechanisms by which it can affect man and the measures he can take to minimize exposure (oral, inserts, bibliography).

A. The relative importance of external radiation compared with internal radioactive emitters for the local fallout situation;

1. The source of the external radiation:

(a) Properties.

(b) Decay.

2. Internal emitters:

(a) Radioiodine, inhalation and ingestion.

(b) Other emitters.

B. Shelter and shielding and their effects.

C. Other immediate emergency measures that can reduce hazard.

D. Dose and dose-rate vs. time.

VIII Delayed fallout: The behavior in geological and physical processes and the mechanisms by which delayed fallout enters into the biological processes and reaches man (oral, inserts, bibliography).

A. The relative importance of internal emitters compared with external radiation in general for the long-run fallout situation (other than local fallout).

1. Factors of interest; criteria for deciding what radiation and which emitters should be worried about:

(a) Yield.

(b) Half-life.

(c) Physical distribution.

(d) Physical, chemical, and radiochemical properties.

(e) Uptake by plants from soil.

(f) Uptake by animals and man from diet, water, and air.

(g) Retention and distribution in man.

NOTE.—This topic up to this point is primarily an orientation for the detailed treatment to follow in the remainder of this and the following topics.

B. Deposition on and migration in soil and transport by surface waters.

1. Dependence on chemical properties:

(a) Strontium.

(b) Cesium.

(c) Plutonium.

(d) Rare earths.

2. The effect of river basin and ground water flow patterns; the effect of porous substructure such as Idaho lavas; the effect of inland sinks such as Salton Sea.

3. Effect of soil type and rock structure.

4. Mechanisms for fallout penetration into soil.

5. Decay.

C. The effect of agricultural practices on the distribution of fallout.

1. Possibilities for modifying agricultural practices.

2. Possibilities for liming soils.

D. The effect of fallout on water supplies for human, agricultural, and industrial use.

1. Possibilities for water treatment.

E. Possibilities for modifying present food collection and distribution and handling systems to guard against hazard.

F. Behavior in oceans mixing above thermocline, waste disposal techniques and ultimate effects.

G. Entry into biological processes including man's food chain.

1. Deposition and retention on surfaces of vegetation.

2. Uptake by vegetation from soil:

(a) Characteristics for various plants and various radioactive materials:

(1) Strontium.

(2) Cesium.

(3) Rare earths.

(4) Plutonium.

(b) Dependence on soil characteristics.

(c) Other factors: decay, biological half-life, effective half-life.

3. Soil-plant discrimination factors.

4. Uptake by marine life and algae.

5. Uptake by animals, animal products, and man.

H. Retention and decay in animals and man.

1. Distribution of fallout in body tissues, fluids, milk.

(a) Tendencies for localization.

(1) Radioiodine.

(b) Dependence of equilibrium values on effective half-life.

2. Discrimination factors (preferential uptake of particular fallout products by particular species of plants, animals, and man); types and how measured or inferred.

(a) Experiments for determining discrimination factors.

(b) Numerical values for the various factors.

(c) Combining values for the individual factors.

IX. A detailed discussion of the occurrence of strontium 90 and cesium 137 in the atmosphere, biosphere, and its uptake and behavior in man (oral, inserts, and bibliography).

NOTE.—Sr–90 will be outlined in detail below.

A. Distribution, storage time, and fallout rate from atmosphere.

1. Combination of local and worldwide fallout of Sr–90 resulting from fractionation; long half life; stratospheric holdup and mixing; decay.

B. Deposition on soil and plants—variations of Sr–90 level in environment as a result of weapons detonated in a relatively short period of time—from a few months to 2 or 3 years:

1. Predicted fallout as a function of mixing and time.

2. Effects of retention of fallout on surfaces of vegetation.

C. The calcium model as a basis for predicting Sr–90 behavior:

1. Similarities and differences in behavior in the biosphere and in man:

(a) How much do we know about calcium?

(b) How much do we know about strontium?

2. Influence of amount of calcium in soil, diet; dilution and discrimination:

(a) Dependence of occurrence of Sr–90 in animal and plant life on calcium in soil and diet.

(b) Practicability of controlling occurrence of Sr–90 by adding calcium to soil and diet.

(1) Calcium additives to milk.

(c) Removal of Sr–90 from foods.

(1) Calcium considerations.

D. Deposition in man—varieties of Sr–90 level:

1. Function of age and time and location.

2. Observed occurrence in man and corresponding observed occurrences in soil and food.

E. Observed occurrence of Sr–90 in soil, food, and man (brief summary with detailed supplementary insert).

F. Predicted occurrence from weapons tests held prior to 1957:

1. Relation to accepted concentration standards (the basis of which is to be discussed later).

NOTE.—Cs–137 will be outlined below.

G. Distribution in the physical environment:

1. Half-life, stratospheric storage, chemical properties, similarities to potassium.

2. Deposition.

H. Occurrence in food supplies; probable sources:

1. Potassium model for discussing behavior of Cs–137 in biosphere.

J. Observed occurrence in humans—relationship to acceptable concentrations, on basis to be discussed later.

K. Predicted occurrence in humans as a result of weapons tests to 1957.

X. The effects of radiation on man (oral, inserts, bibliography).

SOMATIC EFFECTS—PATHOLOGY

A. Introduction and orientation: distinction between somatic and genetic effects, between acute effects of high level radiation

and long-term effects of low level radiation and radioactivity, between damage per se and the standards developed to protect against damage.

B. Early effects of exposure of animals and man to external radiation:

1. Gamma and X-radiation: syndrome of radiation sickness:

(a) Fallout on Marshallese: Rongelap, Uterik.

(1) Children recently returned to Marshall Islands.

(b) Los Alamos incidents.

(c) Other examples—radium.

2. Beta radiation—beta burns:

(a) Marshallese.

(b) Other examples—radium.

C. Early effects of exposure to internal radiation.

D. What are the criteria for picking out the harmful radioelements included in fallout?

1. How sure are we that all the harmful ones have been picked out:

(a) Strontium.

(b) Cesium.

(c) Rare earths.

(d) Plutonium.

(e) Iodine.

E. Delayed effects due either to single massive doses or to protracted chronic exposure; enumeration of effects of interest; dose dependence:

1. Examples.

2. Relationships between the two types of dosings.

F. Mechanisms and responses of man to radiation and radioactivity:

1. Briefly review chain of events:

(a) Physical effects.

(b) Biochemical and chemical effects.

(c) Cellular effects.

(d) Effects on whole organism.

2. Processes of physical interaction—physical effects:

(a) Significance of alpha, beta, gamma rays, and neutrons in the process.

(b) Significance of these rays with regard to penetration and whether introduced within the organism or arising from outside.

3. Chemical and biochemical changes:

(a) Direct effect of ionization on vital cell molecules.

(b) Indirect effects as a result of ionization of water in the presence of oxygen.

(c) Relationship and importance.

4. Cellular changes:

(a) Range of sensitivity of cells (list most sensitive, gonads, to least sensitive, nerve, muscle, bone).

(b) Relate sensitivity of nucleus to cytoplasm.

5. Effects on the whole organism:

(a) Range of survival dose on mammals (guinea pigs 200 r, rabbits 800 r).

(b) Compare with nonmammalian radiation (virus, for instance, 1,000,000 r).

(1) Point out species variation and position of man.

6. Clinical syndrome in man (nausea and vomiting, hematopoietic depression, epilation, bleeding, etc.).

(a) Special place of hematopoietic response to radiation.

(b) Delayed effects:

(1) Reduced longevity (a) reduction in life expectancy—validity of concept at low levels of radiation.

(2) Production of leukemia and neoplasms (tumors).

G. Relationships of damage mechanisms to dosages:

1. Aplastic anemia, leukemia, and cancer as a result of exposure to radiation:

(a) Doses at which observable damage occurs; relationship of probability of damage to dose and dose rate; latent periods; doubling doses; relationship to tissue irradiated.

(b) Relative importance of cancer and leukemia under various conditions: external source; exposure of various critical organs to radiation from external and internal sources: lungs, gut, thyroid, skeleton, etc.

GENETIC EFFECTS

H. The nature of genetic effects: evidence, experience, data.

J. Relationship between radiation and change in mutation rate:

1. Natural mutation rate (2 percent).

2. Dose necessary to double mutation rate (50 r).

3. Apparent linear nonthreshold relationship between dose and effects.

4. Cumulative character of genetic effects.

5. Mechanics of introducing and eliminating mutants in genetic pool.

K. Predicted increase in mutation rate as a result of postulated increase in radiation levels from fallout.

1. Effects on population, as individuals and as a whole.

METHODS AND STANDARDS OF RADIATION PROTECTION AS APPLIED TO FALLOUT PROBLEMS

L. Standards for external-radiation effects: the concepts and definitions relating the amount of damage to the amount and kind of radiation causing the damage:

1. Definitions and concepts behind the units used for dose rate, cumulative dosage, biological effectiveness, etc.: the r, rad, rem, RBE; ionizing density; linear energy transfer.

2. Kinds of radiation and varying conditions of exposure.

3. Simplifying assumptions to get practical standards.

4. Calculation of dose and dose rate resulting from several kinds of radiation acting together.

5. Calculation of dose and dose rate resulting from one or several kinds of radiation acting on different parts of the body.

M. Standards for internal-radiation effects:

1. Definition and concepts behind the measurement of internal body burdens and dosages; the models used:

(a) Maximum permissible concentration.

(b) Safety factors.

(1) Population versus occupational dose.

(2) Young versus adult.

(3) Whole body versus localized dose.

(c) Relationships between internal and external radiation dose.

2. Calculation of cumulative dose rates and dosages from external radiation and internal radiation of various kinds and under various conditions of exposure.

N. Philosophy: The assumptions and models behind the establishment of the standards:

1. Historical trends to the present and trends for the future.

2. The validity of the assumptions now used in the light of up-to-date knowledge.

3. Possibility of hazards resulting from low-level exposure: threshold considerations:

(a) Why do we not know whether or not there is a threshold for each of the various radiation effects of interest? How and when can we improve knowledge on this point?

(b) A radiologist may believe that the existence of a threshold is probable or he may not—what are the pros and cons?

(c) What about the acceptability of the currently recommended standards under either belief of (b)?

4. The probable trend of the standards for the future:

(a) Will new standards have to be developed to cover certain hazards not now adequately protected against?

(b) Are the standards defined in such a way that they can be ranked for any given situation so that the proper standard among several can be chosen to give the least likelihood of hazardous exposure? Is there any ambiguity if several standards apply?

(c) Do there now exist, or are there likely to be, different standards in use by the United States and other governments, or by the United States, and States, and municipalities?

SPECIFIC QUESTIONS FOR DISCUSSION

A. All low-level effects are extrapolations from high-level effects. How secure is this extrapolation? Discuss its relationship to the nonthreshold character of genetic effects, and to the question of threshold of bone cancer.

B. Are there any distinctions between temporary and permanent (long term) damages, between repairable and irreparable damage?

C. Are there special criteria for small groups of persons as compared with large populations with regard to radiation? Is there a difference between small and large populations? Between large populations and the whole population? Does the distinction apply only to genetic effects?

D. Discuss the known effects of radiation on such aspects of the human being as mental posture, personality, intelligence, other, etc.

E. Are there any chemical reinforcements of body defenses against radiation? What about drugs recently announced as being of possible use for X-ray dosages?

F. What is to be gained or lost by the recordkeeping recently proposed for each person covering his lifetime history of radiation dosage?

G. How much radiation and radioactivity was man naturally exposed to and medically exposed to before weapon firing began?

H. Are the dosage standards for individuals and populations adequate for S-90? What are the factors for genetics, skeleton age, age of individual, health of person, etc.?

J. How adequate is the radium model as a basis for predicting the Sr-90 damage in man?

K. What is the behavior of radioiodine in man from a damage and dosage point of view? What about Cs-137, C-14, etc.?

L. Is the biological effect of Sr-90 and its daughter Y-90 similar or the same as that of external radiation of any sort?

XI. The Impact of the Present State of Affairs: Summary, Interrelationships, and Implications on Policy (oral, inserts, bibliography).

A. In essence, what is the state of our knowledge in the areas discussed as relevant to the fallout problem; what do we know about:

1. The amount of radiation and radioactivity released by weapons fired to date:

(a) By the United States.

(b) By others.

2. The amount of local and delayed fallout created by these weapons.

3. Where this fallout is:

(a) How much has decayed.

(b) How much has fallen out and where.

(c) How much is still up there and where.

4. What has happened to the ground fallout that has fallen out:

(a) How much got on or in soil and where.

(b) How much got on plants.

(c) How much got in the ocean.

(d) How much got elsewhere.

(e) How much of all this has decayed after it fell out.

(f) How much has directly affected man as external radiation.

(g) How much as internal radiation.

5. The mechanisms by which fallout gets distributed in the atmosphere and on the earth.

6. The mechanisms by which fallout gets into the biosphere and to man—or gets to man directly.

7. The mechanisms by which exposure to fallout leads to damage.

8. The amount of damage, if any, that man has so far sustained from fallout.

9. The mechanisms and measurement of biological damage from radiation.

10. The relationships between damage and dose.

B. Using the knowledge now available, how well can one predict—and how would one predict—the following:

1. The amount of fallout still to fall out from weapons already fired.

2. Where this fallout will fall out.

3. What will happen to it:

(a) How much will decay or otherwise be harmless.

(b) How much will directly affect man as internal or external radiation.

(c) How much damage, if any, man will suffer from it.

C. Using the knowledge now available, how much information does one need to postulate concerning the characteristics of future weapon firings (test or war), so that one could predict with a certainty appropriate for policy-making purposes the same sort of information as discussed above for future firings?

1. Is such a prediction possible even assuming unlimited information concerning the firing characteristics? How would it be made?

2. Is a postulated rate of firing (yield per unit time) meaningful? What in principle does "present rate of firing" mean? Is a postulated rate of firing sufficient information by itself for making the sort of prediction named here?

3. How does one take into account such problems as divers sites of firing, firing of weapons whose characteristics are not known, differences in weapon type and burst?

4. Are the present criteria for biological damage adequate and are the related measurements adequate so that one could predict with a certainty appropriate to policy-making the future hazard, if any, owing to future weapon firings—even if he could forecast how much fallout there would be and what would happen to it? If the criteria are adequate how are they put together?

5. If one had before himself a working definition of hazard that was satisfactory from a moral or ethical, social, political, and economic point of view, and if this definition was stated in terms of measureable or observable phenomena in nature (including man), does sufficient information exist so that he could determine, again with a degree of certainty appropriate to policy-making, whether or not a hazardous situation exists now or will exist in the future for various possible circumstances of weapon firings and radioactive fallout? Could he determine the degree of hazard? If their answers are "no," is it possible to state what information is lacking and how it might be obtained?

XII. The Impact of the Present State of Affairs: What Should the Research Program in the Physical, Geological, Biological, and Medical Sciences Be? (oral, inserts, bibliography):

A. Information sources and distribution:

1. Do and must private research groups depend on the Government, particularly the AEC, for most of their data? To what extent does the depth and breadth of the research program rest on what the Government is doing and on what the Government is willing to turn over to private research institutions?

2. Is scientific information adequately and promptly distributed and available?

3. To what extent are Government classification and other information-withholding mechanisms interfering with the distribution of information to the public and to scientific groups?

4. How much and what kind of data on radioactive fallout remains classified? What justification is given by AEC and other Government agencies for continued classification of such information? How much effort does the Government make to let it be known that material has been declassified after that action has actually occurred?

5. Is information exchange occurring properly between the United States and foreign countries and the U. N.? Is the United States adequately represented on international scientific and policymaking groups related to this problem?

B. The research program: What is the extent of research on radioactive fallout?

1. Is the AEC presented with a conflict of interest when it is required to act on the one hand as an agent in developing nuclear weapons, and on the other hand as an agent in providing safeguards against weapon hazards? If a conflict does exist, what would be effective ways of removing or at least minimizing it?

2. How much of the research is being done by the Government and how much by private research groups under Government sponsorships and with Government funds?

3. Are there serious soft spots in either the experimental or theoretical aspects of the sciences related to fallout; in particular are there any that limit a thorough understanding of the civilian and military implications of fallout?

4. How well is the research program in balance?

5. Is the general level of the research program adequate in view of the obvious policy implications of fallout in such areas as weapons testing, nuclear weapons bans, civil defense, the military posture?

6. Is the scope of inquiry on fallout problems broad enough so that it is not likely that the United States could be surprised by an enemy using the properties of fallout in a manner that we have no notion of how to cope with?

7. Is the atmospheric, biospheric, and medical sampling program adequate? Should more work be done, for example, on determining the normal incidence of bone cancer in areas of various background levels?

8. What, if any, data should be sought after urgently on grounds that it may never again become available assuming tests continue; that is, what virgin data and what check points should be found?

9. Should the United States prepare, through cooperative programs, to process fallout samples from all parts of the world?

10. Are Federal funds made available for fallout research adequately protected?

11. Is cooperation between Government and non-Government research adequate?

12. If the program is inadequate, should Congress increase appropriations for fallout research?

C. JCAE information:

1. Should the results of fallout research be made available to and reviewed by the JCAE as well as the AEC?

2. Would the creation of a special group of scientists be an effective way of reviewing information and resolving differences of opinion?

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I should be glad to yield to the majority leader.

Mr. McCORMACK. The people of the country are indebted to the gentleman from California for the dedicated public service he has rendered in many respects, and in the important field into which his committee is going to make inquiry, which is another piece of evidence of the dedicated public service of the gentleman from California.

This is a very important field, one about which very little is known by the public generally. Yet it is a field that affects the very life and existence of every human being.

I want to congratulate the gentleman for the legislative journey and inquiry that his subcommittee under his leadership is going to make and express the hope that the newspapers of the country in informing our people on this very important subject will cover the hearings as broadly as possible, because the subject matter of the hearings is of vital importance to every human being.

Mr. HOLIFIELD. I thank the majority leader for those remarks. I want to say that it is the intention of this subcommittee, which is composed of most of the members of the Joint Committee on Atomic Energy, by the way, to do a very objective job in this field. We do not intend to enter into discussions of morality or philosophy or politics in this particular set of hearings. What we are really concerned about is to bring together into one document as much of the scientific opinion as we can get from the most credible witnesses on this very important subject. There will be differences of views, but the views will be based on differences of opinion of highly qualified scientists. We will not go into the field of the laymen in order to get an opinion, during this particular series of hearings. These will be scientists. I have invited between 35 and 40 of the most famous scientists in America. They do not all agree on these subjects, but they are all qualified professionally to testify on the various subjects which we shall take up in these hearings. It is our intention to do an objective job so that the Congress and the editors of the papers and magazines and any other persons interested in this subject can at least go to one place in order to get a compendium of vital information on this subject.

We are going to try, although this will be difficult, to get our scientific witnesses to testify in laymen's language, which can be understood by the lay reader. We are going to try as far as possible to make it understandable to the general public.

Mr. BURNS. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Hawaii.

Mr. BURNS. I want to compliment the distinguished gentleman from California, an outstanding leader in this field. The problem is of great concern to the people of Hawaii. The tests that are being conducted in the Pacific have increased the radiological content of the air there. The hearings the gentleman from California is holding are most timely and needed in order to give the people some understanding of the problem and to show whether their fears are justified or not justified. Again, I compliment the able and distinguished gentleman from California on holding these hearings.

Mr. DEROUNIAN. Mr. Speaker, I notice on the ticker an AP release dated today at 4:12 in behalf of our distinguished colleague, the gentleman from New Jersey [Mr. THOMPSON], and I note the time—the present time is 5 minutes to 6. He has already released the speech he is supposed to have delivered, berating

the so-called Eisenhower Republicans for not supporting the President. I would trust, since he has not given the speech, that when he does, the facts therein will be more accurate than his release time. That reminds me of a time an opponent was running against me. He issued a release that he had spoken at a certain place, that at such meeting he had received a great amount of applause. The next day, it was revealed he had never been at the meeting at all.

Now, I assume that the gentleman from New Jersey [Mr. THOMPSON] has gotten some of his percentage figures from the Congressional Quarterly. I assume that he believes that these figures are correct and nonpartisan in nature. May I commend to the House an insertion in the CONGRESSIONAL RECORD, volume 102, part 11, page 15395, by our colleague, the gentleman from California [Mr. UTT] giving some facts about the Congressional Quarterly:

First, the publication is owned and published by Nelson Poynter, of St. Petersburg, Fla., and it has no official connection with the Congress of the United States. Mr. Poynter is also the owner and publisher of the St. Petersburg Times, a publication which is undeniably New Deal in its sympathies, and certainly in its editorial slanting of the news.

Of course, I have no quarrel with what position any newspaper takes.

Second, Mr. Poynter is not unknown to the members of the House Un-American Activities Committee, and the official files of that body show that Mr. Poynter is listed as initiating sponsor of the organization known as Independent Citizens Committee of the Arts, Sciences, and Professions. The official files show that his name was carried on the letterhead of that committee, and his association with the committee was reported in the Communist Daily Worker of December 24, 1944.

In a separate report entitled "Review of the Scientific and Cultural Conference for World Peace Arranged by the National Council of the Arts, Sciences, and Professions" the Committee on Un-American Activities stated:

"The meeting was sponsored by a Communist-front organization known as the National Council of the Arts, Sciences, and Professions. The National Council of the Arts, Sciences, and Professions is a descendant of the Independent Citizens Committee of the Arts, Sciences, and Professions which was repudiated in 1946 by Harold L. Ickes, its chairman, because of its Communist character."

Mr. Poynter's pious protestations of political unbias are clouded seriously by the strong New Deal flavor of his St. Petersburg newspaper and by the fact that files of the House Committee on Un-American Activities reveal that Press Research, a publication also organized and published by Nelson Poynter, was an admittedly biased periodical.

To complete the picture, records indicate that Mr. Poynter served with the Office of War Information under a Democratic administration.

And I do not begrudge his having had a political job.

The files of the House Un-American Committee also show that Mr. Poynter was a member of the Political Action Committee and that he arranged with a Mr. C. B. Baldwin, assistant chairman of the PAC of CIO, to give PAC free copies of his publication even though they were prepared for other clients who were paying for the service.

May I say further that the Congressional Quarterly does not speak for the executive branch of the Eisenhower administration nor for the Republican Party. In reading Congressional Quarterly statistics, all the above ought to be taken into consideration.

THE PRESIDENT'S LEGISLATIVE PROGRAM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New Jersey [Mr. THOMPSON] is recognized for 30 minutes.

Mr. THOMPSON of New Jersey. Mr. Speaker, last night, and on Tuesday night of last week, President Eisenhower felt constrained to bypass the Congress and go to the people in defense of his spending program. This is a unique expedient, the need for which was quite obvious. The need is worthy of our attention, Mr. Speaker, and I shall now discuss it—not only for the benefit of the House, but for the President and his assistant, Sherman Adams, as well.

I have said "for the President and Sherman Adams as well" because neither of these estimable gentlemen seems to realize, as yet, where their problem lies.

On two occasions in the last week, General Eisenhower dispatched messages to Republican meetings calling for the election of a Republican Congress in 1958 so that "responsibility can be fixed." It is obvious that the President does not realize where his support and opposition are coming from, and I, therefore, presume to tell him.

As to Governor Adams—he suffers from the same lack of knowledge, for on May 17 he wrote to me, among others, thanking me for my support and asking for more. To my knowledge, he did not write to a Republican Member—but I shall soon demonstrate why.

Mr. Speaker, until this week the House had voted 31 times on measures important enough to the President for him to have expressed his opinion on them. The statistics show an amazing fact—the Democratic Members of the House supported him 57 percent, the Republicans a mere 44 percent.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield at this point for a clarification of his statement?

Mr. THOMPSON of New Jersey. Yes, and then I will decline to yield further.

Mr. FRELINGHUYSEN. I am wondering about the 31 votes that were considered important. Is this based on the Congressional Quarterly's compilation?

Mr. THOMPSON of New Jersey. That is right.

Mr. FRELINGHUYSEN. That referred to nine votes in the Senate.

Mr. THOMPSON of New Jersey. The Senate has not voted on as many items as we have as yet. If the gentleman does not mind, I will continue with my statement, and will yield later.

Had he known this, I am sure the President would have called for even more Democrats in 1958. This need not concern us, however, for—whatever he calls for—the President will have an even more Democratic Congress in 1958.

In the CONGRESSIONAL RECORD, volume 101, part 8, page 10266, on July 11, 1955, the gentleman from New Jersey, the Honorable PETER FRELINGHUYSEN, noted the third anniversary of President Eisenhower's nomination. My distinguished colleague's insertion was signed by 54 Republican Members representing all those elected in the 83d or 84th Congress. They came from 25 States, representing 294 electoral votes, quite an impressive array.

Our Republican friends and colleagues urged the President to seek a second term in their statement. They noted that—

Dwight David Eisenhower was elected in 1952 by an overwhelming majority of the American people because they believed him to be uniquely qualified to lead our country in a time of crisis.

The 54 intrepid "moderns" asked Ike to run again "to solidify our gains and complete our program (because) we Republican Members of Congress believe President Eisenhower should remain in office for a second term." Well, Mr. Speaker, we must here concede that he did so and by an overwhelming vote at that. Following his great victory in 1956, the Republicans talked more than ever of his mandate to lead the Nation—through them, of course.

The signers of the petition of the gentleman from New Jersey, went on to say:

In the atomic age * * * it is vital that our Nation be led by a man with great experience in the international field and one who possesses patience, firmness, understanding, and courage.

Now, we all know that the President is courageous—his war record and his sallies on behalf of his budget prove the fact. Most of all, though, he has demonstrated patience. Many a lesser man would have become exasperated with his party before this.

The President is, as our Republican friends say, "understanding," too. He understands that he is a "lame duck" under the 22d amendment and that he is being abandoned by many of his former Republican followers.

As to his firmness, the claim of the 54 signers may yet be proved but, to date, President Eisenhower has shown no evidence of that trait.

I have quoted for you the reasons given by the 54 Republicans in their 1955 statement for Ike to lead them again. Their candidate was elected again to lead them, but have they followed? Let's look at the record.

Alas, these 54 Republicans who importuned so eloquently, are not all with us in the 85th Congress. One or two did not seek reelection and 3 or 4 were defeated, but 49 remain. According to volume XV of the nonpartisan Congressional Quarterly of May 16, 1957, the Presidential support score of these 49 is 34.5 percent. Yes, Mr. Speaker; they have supported the leader of their party, the man they so wanted to follow, all of the 34.5 percent of the time so far in the 85th Congress. Need I say that he has not led them 65.5 percent of the time? Following is an alphabetical list of the

Republican signers with their support and opposition scores taken from the tables of Congressional Quarterly:

	Supported	Opposed
Alger (Texas)	9	91
Avery (Kansas)	45	55
Baldwin (California)	91	9
Bass (New Hampshire)	23	73
Baumhart (Ohio)	50	50
Becker (New York)	14	82
Bentley (Ohio)	23	73
Bolton (Ohio)		
Bosch (New York)	14	86
Broyhill (Virginia)	32	68
Cederberg (Michigan)	27	73
Chase (Nebraska)		
Coon		
Cramer (Florida)	32	64
Cretella (Connecticut)	18	14
Curtis (Massachusetts)	64	36
Derounian (New York)	18	73
Dixon (Utah)	55	45
Dorn (New York)	50	50
Fino (New York)	41	50
Fjare		
Frelinghuysen (New Jersey)	64	32
Gubser (California)	41	50
Henderson (Ohio)	18	77
Hiestand (California)	27	73
Holt (California)	36	50
Hosmer (California)	36	50
Hyde (Maryland)	64	36
Johansen (Michigan)	23	77
Jonas (North Carolina)	18	82
Knox (Michigan)	59	41
Krueger (North Dakota)	14	82
Laird (Wisconsin)	27	73
Lipscomb (California)	18	82
Mailliard (California)	27	59
Minshall (Ohio)	18	82
Pelly (Washington)	77	23
Pillion (New York)	18	73
Poff (Virginia)	32	68
Ray (New York)	32	68
Rhodes (Arizona)	59	41
Robsion (Kentucky)	45	55
Scherer (Ohio)	9	73
Schwengel (Iowa)	73	27
Siler (Kentucky)	5	82
Teague (California)	27	73
Thomson (Wyoming)	32	68
Utt (California)	14	77
Wainwright (New York)	23	73
Weaver (Nebraska)	27	73
Westland (Washington)	50	50
Wilson (California)	41	45
Young (Nevada)		
Younger (California)	32	68

Mr. Speaker, on May 16, the very day following President Eisenhower's TV-Radio plea on behalf of his budget, 42 Democrats sent him the following telegram:

As Democratic Members of Congress, who have, in the national interest, resisted irresponsible budget cuts, we welcome your belated decision to go to the people in defense of your budget.

Whereas your speech contained political overtones and implications which, in our opinion were irrelevant and unnecessary, it was on the whole a constructive defense of the Federal budget.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I am delighted to yield to my distinguished leader.

Mr. McCORMACK. Was a reply received in answer to that telegram?

Mr. THOMPSON of New Jersey. Yes; we had a reply from Sherman Adams.

Mr. McCORMACK. Oh, you received a reply from Sherman Adams.

Mr. THOMPSON of New Jersey. In which reply, he thanked us and asked for more support.

We must observe your failure to note that much of your current difficulty over the budget comes from members of your own party, most, if not all, of whom you recommended for support by the electorate in the elections of last November.

We are, nonetheless, willing to cooperate with you in your efforts to stem the reckless economy drive which constitutes a threat to our national defense and to the general welfare of the United States.

We are for sound economies, and support many of the recommendations that have been made by the Appropriations Committees of the House and Senate.

We urge further studies which, we believe, can bring about savings in the operation of the Defense Establishment, while at the same time increasing the efficiency of the armed services.

We approve your determination to press for the enactment of school construction legislation and for other measures necessary to meet the Federal Government's responsibility in meeting the needs of our growing economy and population.

In a statement issued on January 30 of this year 80 Democrats announced their support of a program which in many ways parallels your own legislative requests.

We said at that time that, "If a sufficient number of so-called modern Republicans join in support of the program there will be no difficulty in securing passage of legislation to carry it out."

Parenthetically, I might add that the school bill is a classic example of that. If 90 to 100 Republican votes are produced for it, it is certain of passage this year.

It is our hope that you will act to curb those members of your own Cabinet whose statements and actions are endangering your own program, and that you will undertake to persuade Members of your own party in Congress to support your program.

We will do our part in the best interests of all the people of the United States.

You will note that we welcomed the President's belated effort but pledged our support of our national defense and the general welfare of the United States. We meant just that. We, too, approve of economy and, indeed, have worked for it, but we do not intend to contribute our votes to an irresponsible slashing of the arteries of the public good and the national defense.

Let us look at the record of the 42 Democrats on the same votes used for the 54 Republicans. Yes, Mr. Speaker, we have supported President Eisenhower 77.3 percent and have voted against him only 22.7 percent. Of course, Mr. Speaker, Mr. Eisenhower is not leading us—we never asked him to do as the 54 Republicans did. Mr. Eisenhower simply is adopting great Democratic programs from previous administrations. We are being absolutely consistent, but are our Republican friends?

Following is the list of signers of the telegram of May 16 with their support and opposition scores, also taken from Congressional Quarterly:

	Supported	Opposed
Eugene J. McCarthy (Minnesota)	73	27
Frank Thompson, Jr. (New Jersey)	77	23
Lee Metcalf (Montana)	82	18
John C. Kluczynski (Illinois)	82	18
John Lesinski, (Michigan)	86	14
Henry S. Reuss (Wisconsin)	86	14
Coya Knutson (Minnesota)	77	23
Abraham J. Multer (New York)	50	23
Al Ullman (Oregon)	82	18
D. S. Saund (California)	77	18
Edith Green (Oregon)	64	27
Charles O. Porter (Oregon)	82	18
Melvin Price (Ohio)	95	5
Leonard Farbstein (New York)	77	18
Chet Holifield (California)	77	23
A. S. J. Carnahan (Missouri)	82	9
Charles A. Boyle (Illinois)	55	45
Charles A. Vanik (Ohio)	73	27
Thomas E. Morgan (Pennsylvania)	86	9
Kathryn E. Granahan (Pennsylvania)	82	18
Thaddeus M. Machrowicz (Michigan)	82	18
Charles H. Brown (Missouri)	68	27
George H. Christopher (Missouri)	86	14
Louis C. Rabaut (Michigan)	82	14
Byron G. Rogers (Colorado)	59	36
Gracie Pfost (Idaho)	82	18
Martha W. Griffiths (Michigan)	82	18
John J. McFall (California)	86	14
James Roosevelt (California)	64	18
B. F. Sisk (California)	73	27
Lester R. Johnson (Wisconsin)	82	18
George M. Rhodes (Pennsylvania)	91	9
Wm. J. Green, Jr. (Pennsylvania)	68	5
Earl Chudoff (Pennsylvania)	77	23
James A. Byrne (Pennsylvania)	73	18
Wm. A. Barrett (Pennsylvania)	77	18
George P. Miller (California)	82	9
Peter W. Rodino, Jr. (New Jersey)	77	23
Hugh J. Addonizio (New Jersey)	77	23
Harlan Hagen (California)	91	9
Frank M. Clark (Pennsylvania)	73	18
John D. Dingell (Michigan)	82	18
Alfred E. Santangelo (New York)	82	18

Mr. Speaker, the foregoing support and opposition scores were listed only for the 53 friends of our colleague from New Jersey who wanted Ike to lead them and for the 42 Democrats who signed the wire of May 16. Now, I would like to tell you about the leadership of both parties in the House.

Our friends across the aisle are led by these distinguished and respected gentlemen, Mr. MARTIN, Mr. ARENDS, and Mr. HALLECK, who nominated General Eisenhower at San Francisco. Here are their support and opposition scores to date, according to Congressional Quarterly:

	Supported	Opposed
Martin	55	45
Arends	50	50
Halleck	59	41

Our leaders, on this side, are the distinguished and beloved gentleman from Massachusetts [Mr. McCORMACK] and the gentleman from Oklahoma [Mr. ALBERT]. Here are their support and opposition scores, also from Congressional Quarterly:

	Supported	Opposed
McCormack	95	5
Albert	95	5

Now, Mr. Speaker, do you see why I am so presumptious as to suggest that the President and Governor Adams do not realize where their program trouble arises? I shall write to them enclosing the statistics set forth in this little effort.

On January 30, 1957, some 80 Democrats announced their legislative desires and concluded that document with the following:

If a sufficient number of so-called modern Republicans join in support of the program, there will be no difficulty in securing passage of legislation to carry it out.

That program parallels, in many ways, the President's legislative program. I still believe, Mr. Speaker, that if the President and Mr. Adams can finally lead the modern Republicans to follow the Democrats on a course of responsible action, great things can be accomplished for the people of the United States. We await them with a simple admonition—34.5 percent support of their President is not enough.

Mr. BASS of New Hampshire. Will the gentleman yield? He used my name.

Mr. THOMPSON of New Jersey. I yield to the gentleman from New Hampshire, although I do not recall using the gentleman's name.

Mr. BASS of New Hampshire. I understood the gentleman to use my name or mention it in connection with one of the groups of Members.

Mr. THOMPSON of New Jersey. We will not quibble about that.

Mr. BASS of New Hampshire. Will the gentleman not agree with me that in using these percentage figures that if they are to be of any use they must be fair and accurate?

Mr. THOMPSON of New Jersey. Yes, and I might point out that the Republican campaign committee issued them to each and every incumbent Member of Congress who paraded them up and down the land last year, practically went about the land asking people to support them and the incumbent President.

I now yield to my friend from New Jersey [Mr. FRELINGHUYSEN] whose name I did mention.

Mr. FRELINGHUYSEN. I do not want to interrupt the line of questions the gentleman from New Hampshire had in mind, for I am sure he had not finished, but now that I have the opportunity, I would like to say it seems to me that the gentleman from New Jersey would have made a better demonstration and showing if he had given us some idea as to the nature of the votes which he considers of such crucial importance in support of the Eisenhower program.

Mr. THOMPSON of New Jersey. The gentleman from New Jersey has been specific about them.

Mr. FRELINGHUYSEN. I do not understand what the gentleman means.

Mr. THOMPSON of New Jersey. Fourteen of them, I think there are 14 areas in the Health, Education and Welfare bill and the slashes that were made or attempted to be made here.

The President, the Secretary of Labor, Mr. Mitchell, the Secretary of Health, Education and Welfare, Mr. Folson, in separate and in unified statements said they could not be cut.

Mr. FRELINGHUYSEN. If we could take a specific instance instead of generalities—I would like to ask the gentleman to be specific.

Mr. THOMPSON of New Jersey. I do not know how much more specific one could be.

Mr. FRELINGHUYSEN. The gentleman has failed to be specific at all.

Mr. THOMPSON of New Jersey. I am very sorry. I have not had any help from my friend from New Jersey. I find, although we agree on many things——

Mr. FRELINGHUYSEN. How about the sewage disposal proposal, which was one of the items in the HEW appropriation bill?

Mr. THOMPSON of New Jersey. That is included.

Mr. FRELINGHUYSEN. That is definitely one the President did not approve which Congress approved and it was not on the administration program.

Mr. THOMPSON of New Jersey. I may say to the gentleman that his version might be quite correct from his point of view, but my recollection is different, and I am sure that the newspapers which have not been listed in any subversive activities, like the New York Times, lists President Eisenhower, Secretary Mitchell, and Secretary Folsom as saying that the items in their budget were absolutely needed and could not be cut and should not be cut. If the gentleman wants to vote one way or the other and if the President does not care about stream pollution, that is all right. You can argue if you want with these statistics. I quote them from the CONGRESSIONAL RECORD. These are taken from the CONGRESSIONAL RECORD.

Mr. FRELINGHUYSEN. I fail to understand the gentleman's argument and it is for the sake of clarification that I am asking these questions. The gentleman is taking a curious position. He wants the majority leader to err, too. I would like to get an indication of the voting which caused the majority leader to be 95 percent for the Eisenhower program. You have intimated that perhaps the defense budget has already come up and has been included. I suggest very strongly that this particular presentation from the Congressional Quarterly, whether or not it is normally unbiased, which I doubt, is not a very accurate reflection of anything.

Mr. THOMPSON of New Jersey. It is the reflection that the gentleman of New Jersey supported the President 83 percent of the time and was against him 17 percent. Is that inaccurate?

Mr. FRELINGHUYSEN. I say it is entirely inaccurate unless we know what the specifics are, and there is indicated where we are in favor or opposed to certain legislation.

Mr. THOMPSON of New Jersey. I am glad to know that.

Mr. FRELINGHUYSEN. I would like the gentleman to elucidate on that.

Mr. THOMPSON of New Jersey. Is the gentleman asking a question now?

Mr. FRELINGHUYSEN. A combination of questions and comment.

Mr. THOMPSON of New Jersey. It certainly is.

Mr. FRELINGHUYSEN. I want to get the gentleman's own position.

Mr. THOMPSON of New Jersey. I will not object to the gentleman asking for time by unanimous consent afterward, but let me use a little bit of my time to answer some of his comments.

Mr. FRELINGHUYSEN. I would welcome that.

Mr. THOMPSON of New Jersey. Now, as to the majority leader and the gentleman from New Jersey desiring to wear I Like Ike buttons, that is not so in a political sense. But he is the President of the United States and I am very pleased wherever he is right to support him, as is the majority leader.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. The simple answer is that the President agreed with me 95 percent of the time.

Mr. THOMPSON of New Jersey. I now yield to the gentleman from New Hampshire.

Mr. BASS of New Hampshire. I would like, if I may, to develop my first question for about a minute, if the gentleman does not mind. I hold in my hand a list of the 22 rollcall votes that were taken in the House, on which these scores are based.

Mr. THOMPSON of New Jersey. There were 31.

Mr. BASS of New Hampshire. Twenty-two. Nine were in the Senate and 22 in the House.

Mr. THOMPSON of New Jersey. Yes.

Mr. BASS of New Hampshire. Fourteen of those 22 were on the amendments offered to the Health, Education, and Welfare appropriation bill.

Mr. THOMPSON of New Jersey. Yes.

Mr. BASS of New Hampshire. So that if somebody voted for all of those amendments, then voted with the President on everything else, namely, the Mideast doctrine, the corn bill, the Patman resolution, the USIA request, and I will not go on, his score would be 37 percent for Eisenhower?

Mr. THOMPSON of New Jersey. I would suppose that might be correct.

Mr. BASS of New Hampshire. I do not consider that a fair or accurate formula and I think it is most misleading. Take the soil bank, that was not included in this, and that was one of the most important pieces of legislation.

Mr. THOMPSON of New Jersey. That will be included in a subsequent one. I have no quarrel with the gentleman from New Hampshire and his interpretation of this. I am merely presenting it as I see it, I am presenting it as this nonpartisan publication sees it.

Now, I am sure that the gentleman from New York does not mean that every name that appears in the Daily Worker——

Mr. BASS of New Hampshire. New Hampshire.

Mr. THOMPSON of New Jersey. I had reference to the gentleman from New York who anticipated this. I am sure that every name which appears in the Communist Daily Worker is not a subversive, and I know nothing about the tactics employed or the thinking employed by the gentleman from New York in his reference to subversive lists and the fact that a person worked for a Democrat or was in the Democratic Cabinet or anything else. That is irrelevant to this thing.

I merely say to you people who asked your President to run so hard for you that you have aided and abetted—notwithstanding your point of view to me—that you have aided and abetted the headlong dash for the President's program to go down the drain.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I think the additional observation might well be made that on the record that exists, the President's problem is to regain the leadership of his own party, because their party is split, they are disrupted, they are in revolt against him, and the problem of the President of the United States is to get control of his own party again, and if talking to the people is for the purpose of operating upon the Republican Members of Congress, why, that is an advisable step. But, the record shows that the Democratic vote is absolutely consistent with the best interests of the people.

Mr. THOMPSON of New Jersey. Mr. Leader, would you not agree with me that the President said in his press conference last Wednesday morning that he was not going to go after anybody in the Congress? No one suggested, as I recall, that he picked up the bludgeon or used any unorthodox or immoral or unethical methods. It was suggested that he call them in. Is that not so?

Mr. McCORMACK. The gentleman's recollection, in substance, is correct. My statement is—and I think the gentleman will agree with me—that the President, for whom we have sympathy in his relationships with his own party, is the political leader of the Republican Party. But, he is our President

Mr. THOMPSON of New Jersey. That is quite so.

Mr. McCORMACK. But the record shows that the Republican Party in Congress is in revolt against him, man to man, the great majority of them, and the poor President's job is to try to get back, as political leader, control of his own party to help him out as President of the United States. Might I also say in connection with his foreign administration program that he will get more support from the Democrats on that than he will from his own party.

Mr. THOMPSON of New Jersey. I quite agree.

Mr. McCORMACK. The very night before he sent up his message I was asked in a press conference about that, and I said I thoroughly supported him, because in foreign affairs we have got to give the President power and the weapons to carry out the policies of our country in the national interest of our own country.

Mr. THOMPSON of New Jersey. I quite agree with my distinguished leader, and I might say that it is our responsibility, setting this aside, to act in the best interests of the United States. The President as the President is certainly not our political leader. Fortunately for us he has adopted a great many principles of the previous administration, and we have supported him, but our obligation is to maintain the national defense of the United States and the public welfare of the United States. That is what we have been doing; that is what 80 Democrats offered to do and have reiterated their offer, and we just hope that you wonderful fellows over there will join us. We get lonesome just working for Ike. We need a little help.

Mr. BASS of New Hampshire. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from New Hampshire.

Mr. BASS of New Hampshire. I would just like to ask this one question: Does the gentleman feel that the formula that was used on all these percentage figures is a fair and accurate one as it relates to Eisenhower support?

Mr. THOMPSON of New Jersey. Yes, in context, considering the statements made by the President in his press conference, if one is patient enough to read it carefully and understand it, and considering the statements by Mr. Mitchell and Mr. Folsom with respect to the specific legislation concerned with this, I think they are absolutely fair.

Mr. BASS of New Hampshire. What the gentleman is saying, then, is that a vote on a $30,000 reduction is equal to a vote on the Mid-East resolution?

Mr. THOMPSON of New Jersey. As a single vote, why, certainly, it must be. Let me say this to my friend from New Hampshire. The fact of the matter is that a $30,000 reduction in the Office of the Secretary of Labor, in his judgment, might perfectly well be as important to that Department as a vote on a $1 billion bill in another department.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from California.

Mr. HOLIFIELD. Mr. Speaker, I want to compliment the gentleman on his exposition tonight and the statistics that he has put in the RECORD. I come from the great city of Los Angeles. We are blessed with two Republican newspapers there. They take me to task because I happen to be voting for democratic ideas and democratic principles.

I was somewhat amused in looking over this list at some of my Republican colleagues from California. I find some of them give me a 77-percent credit of voting for the policies and principles which the President advocated, but some of my Republican colleagues I found were down as low as 14 percent, and many of them around 25 percent and 30 percent. I am wondering if these Republican newspapers that claim they are so fair, will give me a little line, just a line on the back page, next to the Safeway grocery ad, saying that HOLIFIELD supported the President 77 percent of the time, while our Republican Congressmen varied from 14 percent, most of them I think, up to about 50 percent.

Mr. THOMPSON of New Jersey. I hope they do that for my friend from California.

Mr. HOLIFIELD. Of course, I want the gentleman to know that they have always opposed me in elections.

Mr. THOMPSON of New Jersey. Oh, we would expect that.

Mr. HOLIFIELD. And, of course, I do not seek their support, nor do I expect their support. I do not happen to need it, because the people in my district believe in the general welfare of the country. They believe in foreign aid, they believe in a strong defense, and, of course, I try to represent them in that way.

Mr. THOMPSON of New Jersey. Talking about newspapers, is it not interesting to the gentleman from California that our friend from New York referred to the St. Louis Post-Dispatch as a New Deal newspaper. It has become New Deal because it supported Stevenson in the last election, the first Democratic candidate for the presidency, in many, many years that it supported, in 1956. It was not New Deal from 1952 to 1956, because it was for Eisenhower.

Does the gentleman have that experience in California?

Mr. HOLIFIELD. I have that experience, except that I never have had the experience of a metropolitan newspaper supporting the Democratic candidate for the Presidency.

Mr. THOMPSON of New Jersey. We have not either, but I should like to experience that, too.

Mr. KEAN. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to my friend from New Jersey.

Mr. KEAN. It seems to me that this colloquy proves that the Republicans are still the ones who are for economy and the Democrats are the ones who are still for spending.

Mr. THOMPSON of New Jersey. In a sense I agree with the gentleman, the distinction being that we are for responsible economy and you are not. We consider that if the President of the United States says that he needs X number of dollars for economic assistance abroad, that he possesses the knowledge, he possesses the intelligence, which we do not. We have to rely upon him and we intend to.

Mr. KEAN. Mr. Speaker, I think the gentleman from New Jersey has some intelligence. He says he does not have the intelligence. He referred to the President as saying that he has intelligence "which we do not."

Mr. THOMPSON of New Jersey. Oh, no. I have the highest regard for everyone on the gentleman's side of the aisle and especially for the gentleman from New Jersey [Mr. KEAN], and for my friend, the gentleman from New Jersey [Mr. FRELINGHUYSEN]. I just happen to disagree with these gentlemen on this matter.

Mr. FRELINGHUYSEN. Mr. Speaker, in view of the interesting nature of this discussion, I should like to ask unanimous consent that the gentleman from New Jersey [Mr. THOMPSON] be granted an additional 10 minutes so we can at least get some of the questions we would like to aim at him answered, if that is going to be possible.

The SPEAKER pro tempore. The gentleman would have to make that request after the other special orders of the day that are scheduled. We have a special order to follow the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I would like to make that request now.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. EVINS. Mr. Speaker, I object.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from Wisconsin.

Mr. LAIRD. Now that we have decided that the Republicans are for economy and the Democrats are against economy, which the gentleman from New Jersey [Mr. THOMPSON], has admitted——

Mr. THOMPSON of New Jersey. You read the RECORD in the morning and you will see what I said. I said we are for responsible economy.

Mr. LAIRD. How phony some of these rollcalls are you are attempting to use as your criteria for determining support of the President.

Mr. THOMPSON of New Jersey. The Congressional Quarterly did that.

Mr. LAIRD. I am talking about how phony this basis is the gentleman is using, that was published in the Congressional Quarterly.

THE TVA—A GREAT NATIONAL ASSET—BUDGET CUT—YET TIRADE OF MISREPRESENTATION CONTINUES—CHAMBER OF COMMERCE SPOKESMAN PRESENTS FALSE PICTURE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Tennessee [Mr. EVINS] is recognized for 40 minutes.

Mr. EVINS. Mr. Speaker, I have always respected the integrity of the United States Chamber of Commerce whose officials so often appear before various committees of the Congress to present the point of view of the chamber on legislative matters or to provide informational testimony in fields in which its members have authoritative knowledge. I have not always agreed with the position of the chamber of commerce and, indeed, on some matters I have disagreed strongly. But I have always assumed that when representatives of the chamber of commerce appear before our committees to present their position that they were accurately and faithfully stating the viewpoint of the chamber and of its members. I am sorry to say that I have been shocked to discover that this assumption is not always justified by the facts.

My colleagues may have noticed in the press that recently Mr. Louis V. Sutton, president of the Carolina Power & Light Co., testified before the House Public Works Committee, representing himself as a spokesman for the chamber of commerce. In his testimony, Mr. Sutton opposed the various plans for giving the TVA authority to finance its future power operations through the sales of bonds and then announced a 10-point program for liquidating the TVA by selling out this agency of our Government to his own fraternity—the private utilities. Mr. Sutton gave the committee to understand that he was presenting, not his own views, but the views of the chamber of commerce—that the chamber of commerce had adopted resolutions advocating the sale of the TVA. I, along with many others, was shocked by the reports of this testimony. Mr. Speaker, I have clear evidence that Mr. Sutton did not present the positions of the chamber of commerce accurately but indeed misrepresented it and that as a consequence members of the committee concerned, as well as the general public, assumed some things which were not true. Misrepresentation in any instance is deplorable, but the false slant of Mr. Sutton's testimony in this instance should not and must not go unanswered.

The implications of the situation, if permitted to be continued, could mean the undermining of our system of Government. As we all know, the Congress legislates based upon facts and information given to our committees and we should not permit people in high positions to falsify facts to the Congress. This situation seems to me to go to the root of the relations between Congress and the various organizations labeled "lobbies." Let me make clear that in using this word for the sake of simplicity, I do not desire to give it derogatory connotation. I think the right of such organizations to present their point of view to Congress is well based in constitutional rights and, indeed, I am sure we all recognize that this function of responsible lobbies can and does serve a needed and useful purpose. But, as I am also sure we are all aware, the Congress has faced a number of problems in connection with the activities of such organizations and in fact, we have attempted, with very poor success, to deal with those problems through legislation. One of the things we have tried to establish is the answer to the question: Whom, exactly, do these people represent? The situation to which I am addressing my remarks suggests that in the future we must also inquire more closely into the question: Do these people accurately present the point of view of the people they purport to represent?" In the present instance—the case of the Carolina Power & Light Co.—I think the facts clearly demonstrate that the man who appeared as the official representative of the chamber of commerce and who assured the committee that his statement represented their views was, in fact, speaking only for himself, or mainly for himself and his industry—the private utilities, the private power lobby. This is a matter which should be of real concern to the chamber of commerce as well as the Congress. I believe that the committees of Congress concerned would be justified in recalling Mr. Sutton for further examination concerning his official responsibilities with the chamber. Certainly we know of his position with the Carolina Power & Light Co. and can thus be assured of his personal prejudices and selfish intents. I believe that in the future all committees should demand clear evidence that statements purporting to give the official position of any organization do, in fact, just that.

Mr. Speaker, certainly the members of the committee were entitled to assume from Mr. Sutton's testimony that the chamber of commerce had officially acted on these specific matters—the TVA self-financing plan and the 10-point plan for eventual sale of the TVA. But, Mr. Speaker, that assumption is by no means borne out by the facts. The fact is that, in conveying the impression to the committee that they had been approved by the membership of the chamber of commerce, Mr. Sutton and his accomplice, Mr. Richard W. Smith, were misrepresenting the facts and misleading the commtitee.

Moreover, Mr. Speaker, this is not an isolated instance but apparently a continuing attempt to mislead the Congress that goes back at least 2 years. At that time the very same Mr. Sutton and his very same confederate, Mr. Smith, appeared before the Senate Public Works Committee, which was holding hearings on a TVA self-financing bill. There they also testified against the self-financing bills and presented a similar 10-point program for destroying the TVA. And once more they managed to convey the impression that their statement was the official chamber position. At that time Senator KERR, Democrat, of Oklahoma, also tried to determine just how accurately the testimony reflected the views of the chamber of commerce.

The impression there given, from a careful examination of the testimony, was that the chamber had endorsed and approved Mr. Sutton's plan for the sale of TVA. He promised to document this fact by supplying additional evidence for the record. There is nothing in the record of the hearings to indicate that he fulfilled his promise.

With reference to Mr. Sutton's more recent testimony, the reports of the press on it indicated that he was purporting also to present official chamber policy. To make sure that the press reports were accurate, I asked the chamber of commerce for a copy of the officially adopted policy on which Mr. Sutton's testimony was based. In the course of the telephone conversation, Mr. Donald W. Van Tuyl, who is a water resources assistant in the natural resources department of the United States Chamber of Commerce, admitted that neither the "10 point program" nor the proposal for the sale of the TVA, nor the statement opposing the TVA self-financing bills had ever been submitted for a referendum to the membership of the chamber. He said that Mr. Sutton's testimony was based on "general policy declarations on water resources adopted by such referendums." He was asked to read the portion of the policy declarations which dealt with the TVA and replied that no portion of them dealt with the TVA specifically and by name. In fact, he said that there was no statement—indeed no mention—of the TVA whatever.

When Mr. Van Tuyl advised that the policy declarations were general, he was very correct. They are so general that, Mr. Speaker, believe it or not, the TVA is never even mentioned in them. Nor is there in them any reference whatever to the TVA self-financing plan. Mr. Speaker, there is no mention in it whatever of any plan to sell the TVA's power facilities. In fact, Mr. Speaker, I can find nothing in the policy declarations on natural resources which corresponds directly to the 3 most important proposals of Mr. Sutton's 10-point program.

His first proposal suggests the establishing of a policy which would cut off the TVA entirely from any further appropriations and also from any possibility of selling its bonds to the public. The final proposal would permit private

or public power agencies to purchase all or any part of TVA power facilities. He would dismember a great efficient agency bit by bit. The second would also facilitate dissolution of the TVA by permitting customers of the TVA to buy power elsewhere or to build their own powerplants. There is nothing in the water resources policy booklet of the chamber which resembles any of these proposals.

It is clear from these policy declarations that the chamber does not approve of Federal development of water resources and particularly of the power aspects of such developments. But nowhere do I find either stated or implied the proposal that Federal power projects should either be starved to death or sold to private interests. I maintain that there is a tremendous difference between these two positions. I know several people, for example, who believe in the TVA and who believe that its effect on the private-utility business has been salutary, but who also believe that one such yardstick is enough and no others should be established. Such people might easily vote for the chamber's various declarations so far as they affect the future, but would oppose Mr. Sutton's 10-point plan for destroying the TVA.

I suppose that Mr. Sutton would justify the derivation of his "10-point program" by saying that it was consistent with the general policy adopted by the chamber membership. But Mr. Speaker, that is not what Mr. Sutton told the committees. He told them it was chamber policy. And, Mr. Speaker, there is a vast difference between consistency and identity.

Let me make clear that while I would not agree with such a decision, I should not object to the chamber of commerce expressing its views in opposition to the self-financing plan, or other views it might officially entertain. And it may well be that if the chamber had actually referred such proposals to its members it would have received the necessary two-thirds majority to adopt them as official policy. But the fact is that these proposals were not submitted for approval. Until they are approved, a mere dues-paying member should not be permitted to use the name of the chamber of commerce to make false statements and to attack a great agency of the Government that is serving not only the people of a great region but also the Nation as a whole.

Mr. Speaker, when a man purports to represent an organization and tells us that he is presenting the official views of the organization but in actual fact is presenting proposals which can be derived from those official declarations only by tortous logic, and loose inference, I think he can fairly be said to be misrepresenting the organization and its members. Moreover, Mr. Speaker, there is, in my view, a serious question of propriety when this is done before a committee of the Congress. Therefore, I am suggesting that the committees concerned recall Mr. Sutton for further examination to determine whether other proprieties or even laws have been violated. Moreover, this apparently deliberate attempt to mislead the Congress and the public before committees of both the House and the Senate seems to me to indicate the need for legislation that will protect us against similar masquerades by lobbyists for the private power monopolies or other irresponsible interests.

Mr. Speaker, many of us in Congress from the TVA area have been bewildered by one aspect of this matter. We know that most people in our area are for the TVA and for a sound self-financing plan. We know this includes many members of local chambers of commerce. Indeed, on numerous occasions, the local chambers of commerce in my district have to my certain knowledge joined with other organizations in support of the TVA and otherwise have shown their approval of the TVA. Under these circumstances, I for one, have often wondered whether those local chambers of commerce were ever given the opportunity to vote on these anti-TVA pronouncements made on behalf of the chamber of commerce. We know now, of course, that the answer is that they have not. But after reading the general policy declarations—I repeat, general policy declarations—adopted by the chamber, the mystery disappears. There are indeed numerous statements and recommendations in these policy declarations which TVA supporters would have no difficulty in supporting for the simple reason that they are already in effect. And, therefore, I would not be at all surprised to learn that many of our TVA friends who belong to the chamber may have voted for some of the policy declarations in the belief that such a vote was not at all inconsistent with their support of the TVA.

For example, point No. 2 of Mr. Sutton's 10 points would require the TVA to establish rates which, I quote, "reflect all costs, including interest, taxes, and amortization on a sound accounting basis." We who are most familiar with TVA have long maintained that TVA rates do already reflect these factors. I would like at this point to have inserted in the RECORD a simplified balance sheet of TVA power operations for the last year. This report, on power operations, expenses, and income gives a clear picture of TVA's operations:

Balance sheet of TVA power operations 1956

SOURCES OF POWER

	Billions (kilowatt-hours)	Percent capacity	Cost (kilowatt-hours)	Cost (millions)
TVA dams [1]	11.588	51	1.03	[2] $12.236
TVA steam plants	43.068	95	2.66	[2] 114.731
Alcoa dams [3]	1.456	47	------	------
Cumberland dams [4]	1.369	35	3.7	5.062
Purchased power [5]	.278	------	3.0	.838
Net interchange [6]	.394	------	3.65	1.428
Total	58.153	------	2.413	134.315

[1] Because of dry weather hydro generation was far below potential.

[2] Includes depreciation.

[3] 13 dams owned by Alcoa are operated in coordination with TVA system, their output is delivered to TVA lines and TVA delivers somewhat more than equivalent to Alcoa from its lines.

[4] Cumberland River dams are operated by Corps of Engineers but TVA purchases the power through Southeast Power Administration.

[5] When TVA is short of power it buys power from private power companies; price varies with circumstances.

[6] TVA is part of gigantic power grid which includes adjoining private power companies; power is interchanged both ways and payment is made for net balance.

Disposition of power

	Billions (kilowatt-hours)	Price (kilowatt-hours)	Revenue (millions)
		Mills	
Sales to distributors	15.546	4.26	66.073
Sales to industries	7.227	3.85	27.795
Sales to Federal agencies	30.512	4.09	124.930
Interdivisional sales	.558	3.76	2.102
Total sales	53.845	4.10	220.902
Shop use	.003	------	------
To Alcoa	1.808	------	------
Transmission losses	2.495	------	------
Total	58.153	3.8	220.902

Operating expenses

Generation expense	$107,360,592
Purchased power	838,980
Net interchange	1,428,987
Transmission	8,015,487
Account and collecting	152,033
Sales promotion	520,684
In lieu of taxes	4,147,654
Administrative	7,077,875
Other expenses	103,215
Depreciation	38,095,699
Total	167,741,206

Income

Power sales	$220,902,537
Rents, etc (other income)	739,679
Total	221,642,216
Net operating profit	53,901,010
Interest on debt	41,843
Refunding debt	14,000,000
Repayment to Treasury	45,000,000
Total	59,041,843
Drawn from reserves	5,140,933

This balance sheet shows that last year the TVA made a profit of $53 million after deducting all generation, operating and administrative expenses, depreciation and payments in lieu of taxes.

I want to call attention to the $4 million the TVA paid in lieu of taxes. This represents 5 percent of receipts from all customers except the Federal Government itself, as provided by the TVA Act. But, let me point out that this is not the total of taxes TVA's customers pay in their power bills. The 151 distributors who actually sell power to homes, stores and fatcories paid an additional $7 million. So that in all the TVA and its distributors paid more than $11 million in taxes and in lieu of tax payments. This represents 6.4 percent of the electric bills paid by the purchasers of power in the area. By way of comparison, in the areas of the private power companies neighboring the TVA, the taxes paid represent from 4.8 percent to 11.3 percent of the total power bill paid by their customers. Therefore, the plain fact is that the State and local governments in the TVA area get a higher percentage of the total power bill in taxes than some surrounding States get from the power bills collected by neighboring private monopoly utilities.

Throughout the Nation as a whole, the taxes paid by private power companies have increased by 147 percent since 1937—the year private power companies ceased to operate in the TVA area. But the taxes paid by the TVA and its distributors have increased by nearly 175 percent. So that it seems a pretty good assumption that the TVA States and

local governments are actually receiving more in taxes than they would have if they were still being served by private power companies. Indeed, I suspect that the impetus which the TVA yardstick has given to the enterprise of the private power companies has increased the taxes collected by local governments in all the States.

The provisions of the TVA Act in respect to the payments in lieu of taxes have long been considered a model and have often been cited as an example which ought to be followed in other Federal developments. In view of this, it is not hard to imagine that even a stanch TVA proponent might have approved the policy declaration of the chamber dealing with taxes which, incidentally, reads:

> The State and local governments should be paid for the taxes they would have secured had the business been owned and conducted by a taxpayer.

It seems that actually, TVA's operations are considerably more generous than the chamber declaration demands.

UNITED STATES TREASURY PAYMENTS

Last year the TVA made total payments to the Treasury of $59 million. Fourteen million dollars of this was to retire the last of the bonds whose proceeds were used to buy the property of the private power companies. Incidentally, those bonds were retired some 10 years ahead of their maturity. The remaining $45 million was a direct payment into the United States Treasury under the repayment provisions of the law.

At this point, Mr. Speaker, I ask unanimous consent to have reproduced in the RECORD a simplified statement of the sources of TVA capital:

Sources of TVA capital

Total cost of completed powerplant	$1,588,464,205
Reserves and funds for future use	59,381,134
Inventories	24,574,901
Total	1,672,420,240
Appropriated by Congress	1,253,500,168
Property transfers [1]	19,365,266
Bond proceeds [2]	65,072,500
Total from Uncle Sam	1,337,937,934
Less:	
Redemption of bonds by TVA	65,072,500
Repayment to Treasury [3]	145,059,019
Total repaid by TVA	210,131,519
Net Government investment	1,127,806,415
TVA profits and depreciation invested in plant	339,943,913
Total TVA investment	549,943,913

[1] TVA started with transfer of Wilson Dam and other Federal property at Muscle Shoals.

[2] TVA sold $65,000,000 in bonds to RFC and Treasury to purchase private power facilities. These bonds are now entirely retired about 10 years in advance of maturity.

[3] TVA is required to repay the Federal investment within 40 years; it is presently years ahead of the schedule of repayment.

Summary: ⅓ of the total cost of completed powerplant came from income from TVA's power operations and ⅔ represents the net investment of the Federal Government.

The TVA has now repaid a total of $210 million of the Government's investment. The act of 1948 which requires the TVA to make this repayment calls for a schedule which would return the investment in 40 years. Mr. Speaker, I want to call the attention of those who have questioned the good faith of the directors of the TVA to the fact that the TVA is far ahead of the prescribed legal schedule. In fact, if it continued to repay at the rate it has been paying, it would return the entire investment in less than 25 years. I note that the officially adopted policy declarations of the chamber of commerce calls for repayment of indebtedness in water resources projects on a 50-year basis and most other Federal projects are set up on a 50-year schedule. Again, Mr. Speaker, it would seem that the TVA is going beyond what the official chamber policy calls for.

The minimum payments required under the 1948 act, providing for repayments into the Treasury through June 30, 1957, will be $33 million. The total payments made have been $226,500,000—an amount far in excess of the statutory annual requirements.

Besides being ahead in its repayment schedules, the TVA has invested $339 million in capital improvements. This is considerably more than the depreciation of the plant. In other words, while repaying the investment at a rate almost twice as fast as the law requires, the TVA has also added to the value of the property so that its depreciated value is greater today than the actual investment of the Government. Mr. Speaker, this comes pretty close to realizing the old paradox of "eating your cake and having it too."

One more thing, and perhaps the most remarkable of all, while the TVA's customers have thus paid or repaid a large part of the cost of the system and eventually will pay or repay the entire cost of it, this great asset will continue to belong to the Government—all the people of the United States. What a contrast there is here in profit for Uncle Sam between the TVA and those prides of private power monopolies—Electric Energy Inc., and the Ohio Valley Electric Generating Co. In those cases the private power companies invested 5 percent—only 5 percent, I repeat—of the total cost and under the terms of their contract with the Atomic Energy Commission, Uncle Sam pays in his power bill all the costs, including depreciation, taxes and all. And when Uncle Sam is finished paying for 95 percent of the plant, it will belong 100 percent to the private power companies who own it, and not the Government—all the people—as in the case of TVA.

Let us look at these proposals that the TVA should pay both interest on the Federal investment and amortization which would eventually return the total cost. I have examined these proposals and I do not know of a single one that proposes any change in the ownership of the TVA.

Under the chamber of commerce repayment policy on this point the TVA's power customers would, through their power bills, pay off the mortgage with interest but would never acquire any ownership equity in the TVA. Now, personally, I have no objections whatever to the Federal Government owning the TVA. In fact, I think it would be folly to give up Federal ownership of the TVA. But I am very tired of so-called businesslike solutions of the TVA problem that contain such ridiculously unbusinesslike gimmicks. One sometimes becomes provoked at people who tell us that the TVA should be treated like any other business and who then come up with proposals that outrage the very basic principles of equity on which our business laws are based.

It is true that the act of 1948, calling for these payments to the Treasury, did not call them interest. But let us, for the sake of seeing how closely the TVA approaches the recommendations of the chamber of commerce, examine this figure in terms of what would be required if we label part of these annual payments "interest" and part of them "repayment."

The total investment of the Federal Government in the TVA power system was $1,337,000,000. As nearly as I can verify, the average cost of money to the Treasury last year was not more than 2½ percent. Assuming this, the interest on the Federal investment would amount to about $33 million. The chamber in one of its policy declarations, calls for repayment of investment in not more than 50 years. Assuming this 50-year period, the annual amortization would be about $26 million. So that the $59 million actually paid to the Treasury last year would cover more than both interest and amortization.

In any event, Mr. Speaker, we see that the TVA is at present living up to the recommendation of the chamber of commerce, that rates for Federal power should be high enough to—I quote from their official policy declaration—"reflect all costs, including interest, taxes, and amortization on a sound accounting basis."

I note that Mr. Sutton proposes that in addition to all this the TVA ought to make payment in lieu of income taxes. This type of proposal can lead to argument which has no end, involving as it does all sorts of contradictions, including that of Uncle Sam paying taxes to himself—taking money out of one pocket and putting it into another, both pockets belonging to Uncle Sam. However, I gather that the point of the proposal is that rates should be high enough to include such a return or its equivalent to the Government, and thus come closer to corresponding with the rates of private utilities. The trouble with such proposals is that they overlook the fact that the TVA differs tremendously from a private utility. For one thing, the TVA is strictly a wholesaler of power and private utilities are retailers and thus get a more profitable share of the market. Furthermore, the history of private utilities shows clearly that they operate on the principle of charging all the traffic will bear. In any event, the profit motive is paramount in their operations. The TVA, on the other hand, is charged by law with selling power at the lowest possible rates and in establishing it, Congress made clear that its motive was to provide a yardstick of competi-

tion by example. Furthermore, Uncle Sam is the TVA's best customer. The United States Government buys 56 percent of all the power the TVA sells and almost 60 percent of all the power it generates. Uncle Sam, therefore, has a vital interest in keeping his power bill as low as possible. It should be remembered that the Federal Government has two interests in TVA rates—on one hand the interest of the only stockholder and on the other hand that of the largest customer. I repeat, the United States Government takes 56 percent of all TVA-produced power.

These differences make comparison difficult and I personally believe, irrelevant. But let us strain the point and make such a comparison and make it over the entire life of the TVA.

Mr. G. O. Wessenauer, Manager of TVA's Power Division, has made this comparison in the past before the Subcommittee on Public Works Appropriations. I can summarize his position in a few words thus:

Between 1933 and June 30, 1956, the TVA had a total revenue from power operations of roughly $1,238,000,000. Its total operating costs amounted to $604 million, payments in lieu of taxes to $41 million, and depreciation to $227 million. These costs total $872 million. Interest at 2 percent, which would represent the average cost of Government money during the period would have totaled $183 million to bring the total costs to $1,055,000. This would leave $183 million for the total net profit before taxes. A typical private utility with the same gross revenue would have paid Federal income taxes of about $140 million. Thus, there would have remained a margin of $43 million of net profit after taxes.

Speaking of income taxes, I wonder just how much income tax the private utilities actually pay nowadays. My colleagues are well aware of the rapid amortization scandals under this administration. For example, I learned on solid authority, that Mr. Sutton's own Carolina Power & Light Co., has received tax certificates totaling $48 million. These certificates gave the company $21 million in actual tax relief. In other words, because of this gimmick, Mr. Sutton's company paid Uncle Sam $21 million less in income taxes than it would have had to pay under normal amortization procedures.

I wonder if the House is aware that the private power companies all together have received $1.4 billion in such tax relief and that the total subsidy they will derive from the tax certificates issued to date will amount to $4.7 billion—or nearly $5 billion. I think this is an abominable subsidy when we consider that private utilities operate on a guaranteed profit basis.

I note that the other day the Secretary of the Treasury testified before the Senate Finance Committee that the Treasury has to borrow $3 billion annually to make up the loss of revenue which results from these tax certificates to businesses. I note too that the Treasury is now having to pay more than 3 percent interest on borrowed money. It has been established that these tax certificate subsidies amount to an interest-free loan from Uncle Sam. But, Mr. Speaker, it is obvious that the private utilities are not only receiving this loan without interest, but that it is costing the Treasury and, therefore, the taxpayer in excess of $100 million a year in interest to make up losses additionally for these subsidies to the private utilities.

In view of these facts, I marvel at the gall of Mr. Sutton and his fellow private power monopolists. Enjoying a clear Federal subsidy, they deplore the successful operation of TVA which benefits the people of the area and the Nation. Enjoying interest-free loans, they demand that the TVA pay both interest and amortization. Enjoying the most generous relief from income taxes anybody has ever received, they propose that Uncle Sam pay income taxes to himself.

TVA—A PARTNERSHIP WITH PEOPLE OF THE AREA

The Carolina Power & Light spokesman makes a big point in the importance of participation or partnership by local interests in Federal power projects. This is something we in the Tennessee Valley also believe in and practice. I would like to read an editorial from the Voice of the Valley of Nashville, Tenn.—which addresses itself to this point as follows:

A TRUE PARTNERSHIP

In our first issue we published the balance sheet of the TVA itself. In the second issue we published the balance sheet of the 149 principal distributors of TVA power. The entire TVA power system consists of both of these combined.

We have seen that the Federal Government now has a net investment of $1,127,000,000 in the TVA; and that TVA's customers have invested $550 million through their power bills in the TVA plant. In addition we have seen that the cities, co-op members, and customers of the distributors have invested $257 million in the distribution systems in one way or another; and the Federal Government has invested some $144 million in loans or grants to the distributors. Thus, the total Federal investment now is approximately one and a quarter billion; and the total investment of the people of the valley and the consumers of TVA power is about $775 million.

Here then is a true partnership—not in mere words and advertising slogans—but in honest United States dollars and cents. Furthermore, the senior partner, Uncle Sam, is at no disadvantage despite his higher investment. The junior partner—the people and power consumers of the valley—will eventually pay the entire cost of both the TVA and the distribution systems through their power bills. The junior partner will then own the entire assets of the distributors; but even after the entire cost of the TVA itself is repaid, the TVA itself, with its far larger assets, will still belong to Uncle Sam.

Mr. Speaker, the chamber of commerce has no firmer friend and supporter than the Nashville Banner, a great conservative Southern newspaper, whose officers and executives have been very active in affairs of both the Nashville Chamber of Commerce and in national chamber activities. On the day following Mr. Sutton's testimony, the Banner editorialized in part as follows:

The major premise presented by Louis V. Sutton is, in the Banner's judgment, unsound. Baldly put, it urges Congress to sell these installations, which would mean abolishing public power facilities, and converting the whole regional establishment to hands of private operation.

Let it be observed just here that such suggestion could not mean restoration of the properties as such to these private hands, for the installations in question did not exist until the Federal Government created them. It is not, therefore, a matter of original equity.

Mr. Speaker, why are people like Mr. Sutton driven by their hate of the TVA to taking such desperate steps as this deliberate misrepresentation of a great national organization? The TVA is not the only Federal agency concerned with producing and marketing power. A number of projects in the Nation involve or will involve far greater investments of Federal funds. For example, the total cost of all projects involving power in the Columbia River Basin, constructed, under construction, or authorized by Congress will amount to $3,884,000,000. I want to hasten to add that I am not opposed to these great projects. In fact I am proud of them and commend their success. In the Missouri River Basin, where under the Pick-Sloan plan, 12 tremendous multipurpose dams are already built or being built and 2 more are authorized; the total cost will run to $5,560,000,000—almost 3 times bigger in Federal investment than the TVA. In the Arkansas-White-Red River Basin, the expenditure will be $2,263,000,000. In the Colorado River Basin, the estimates call for expenditures of $1,587,000,000. The total cost of the Central Valley project in the far West also, I understand, will exceed the cost of the TVA. The Great Lakes-St. Lawrence power project will involve a $600 million investment of American funds for American interests alone.

So why the opposition, so singular to TVA?

I believe the answer lies largely in the fact that the TVA has been the most successful in forwarding the purposes for which it was created, and particularly in providing that competition whose lack in the utility business brought on the great utility scandals of the twenties and thirties. We have learned in this country that nothing stimulates real enterprise—private enterprise, if you please—like good efficient competition. A giant private monopoly needs the force of competition to drive its best effort and the TVA yardstick has provided the competition, by example, for the private utility companies. The effect of that competition has been greatest immediately surrounding the TVA area, and among those who have been driven by this competition is Mr. Sutton's Carolina Power & Light Co. It is in the areas surrounding the TVA that the electric consumer has made the greatest savings in reduced rates. Strangely enough, those private power companies have not suffered from the reduced rates. On the contrary, the records of the Federal Power Commission show that whereas the profits of all United States class A and B utilities have risen almost 300 percent since 1937, the profits of the 9 private power companies surrounding the TVA have risen almost 650 percent. Maybe Mr. Sutton has not liked being driven by the competition by

example provided by the TVA, but his stockholders have every reason to be pleased with their increase of business profits. For the fact is that the private utilities neighboring the TVA have, in the past 20 years, acquired more customers, sold those customers far more power, made more profits doing that, and paid more dividends to their stockholders than ever before. The record shows that the TVA has helped instead of hindered their business. Mr. Sutton and his fellow private monopolists are, I fear, too gluttonous in their appetites for profit.

Concerning the proposal that TVA's territory be limited—the true facts are that TVA has not expanded outside its present territory. It does not even serve all the territory it could serve legally under the authority given it by the TVA Act, and the agency has made clear that it has no intention of extending its present service area. The TVA has too big a problem trying to find enough power to serve its present area. But we know that the mere threat of actual physical competition provides the most effective way of holding down the cost of electricity to the people in the surrounding area as well as to the people of the Nation as a whole.

The TVA has demonstrated that the American concept of high volume production and high volume consumption works just as profitably in the utility business as in the automobile, grocery, or any other business. Unwilling at first, the private utilities are now quite commonly applying TVA methods to their own operations. They, too, are now building larger steam plants, close to the source of fuel, on rivers where they can benefit from low-cost transportation; and they are finding that by doing this they can profitably serve industries like the aluminum industry which require vast quantities of low cost power. They, too, are now encouraging the all-electric home with its huge use of electricity and find they can make greater net profits through such high use at lower rates. But though the private utilities have learned many lessons from TVA, they do not seem to be able to forgive the teacher for driving the lesson home. They continue to oppose at every turn.

Mr. Speaker, as we knew 2 years ago the President recommended that additional power-generating facilities of the TVA should be financed through the issue of bonds. At this moment the appropriate committees of both Houses of Congress are holding hearings on bills which would effectuate this recommendation. Pending the enactment of such legislation, the President has for three successive budgets recommended no appropriations for power-generating facilities, stating that the TVA's needs for new capacity would be met by proceeds from bonds when appropriate legislation was passed, and the last two budgets submitted by the President included authorizations for new units to be financed by bond proceeds only after Congress passed the enabling legislation.

And, Mr. Speaker, mention of the budget reminds me that the TVA budget is about to come before the Appropriations Committee and I would like to make one comment about it. We have been largely concerned in this session with trying to cut the biggest peacetime budget ever presented to Congress. I can assure my colleagues of the House that you will not have to worry about any fat in the TVA budget. It has been trimmed, sliced, cut, and quartered by the expert butchers of the Budget Bureau until I can assure you that there is certainly no fat in the TVA budget for next year. There is little meat. It has been cut to the bone.

Opposing appropriations, the President submitted proposals for legislation authorizing it to issue bonds and these proposals with amendments have been embodied in bills presented in the Senate by Senator KERR and in the House by our colleagues, Congressmen DAVIS of Tennessee and JONES of Alabama. The Budget Bureau submitted to the last Congress a most restrictive and unworkable, so-called self-financing bill on behalf of this administration; and in the other body Senator COOPER, of Kentucky, among others, has introduced an amended version offered as a compromise proposal.

It is 3 years since the President made his first proposal for self-financing the TVA, and 2 years since Congress began to consider these measures. Meanwhile, the TVA has received no appropriations for increasing its power capacity. TVA's ability to meet the power needs of its area is becoming desperately limited.

A crisis caused by a shortage of power would deprive our people of the power needed for normal growth and would severely threaten the ability of the area to enjoy, on equal terms, the opportunity for development with the rest of the Nation.

The people of the TVA area have been thwarted on every hand and from many fronts—appropriations have been denied, opposition has been expressed against any possible further use of surplus corporate funds; and now sincere efforts to pass a workable and equitable self-financing plan are being opposed.

For years, the opponents of the TVA have been telling us that they are opposed to financing TVA's power operations through appropriations and suggesting that TVA go to the open money market for funds for additional capacity. That is precisely what the legislation now being considered by Congress proposes. For years the enemies of TVA have been saying that they had no desire to destroy the TVA but merely wanted to remove the TVA from dependence on the Treasury. That is precisely what this legislation proposes. Despite his own expressed misgivings about the TVA, the President has said that he wants to maintain the TVA at maximum efficiency but he insists that he wants to free the Treasury of the financial burden for TVA's power functions. That is precisely what the Davis-Jones & Kerr bills would accomplish.

For years now, men like Mr. Sutton of Carolina Light & Power Co., and other private power monopolists have lobbied to bring to a standstill one of the greatest and most successful experiments in democracy. They have managed this partly by means of a multimillion dollar a year barrage of propaganda, based on half-truths and much of it, indeed, on bold falsehoods. They have found a loophole in our laws dealing with truth in advertising, which apparently permits them to peddle those half-truths, misrepresentations and even outright lies, with impunity.

They have attained so much influence in the highest reaches of this administration that for example, the Federal Power Commission appears to be dedicated primarily to the task of seeing to it that the private utility interests get first choice of all the best remaining hydroelectric sites, and the Office of Defense Mobilization, that they receive enough tax certificate grants to pay for the dams out of their tax savings.

Mr. Speaker, it now appears that the private utility interests will not be satisfied with anything short of complete destruction of the world's greatest example of integrated river resource development; it appears that their strategy is to cripple and starve the TVA until such a time as they can move in and take over—no doubt with generous assistance from the administration in the form of tax relief or some other gimmicks they have not yet revealed. That is their secret goal. And in trying to achieve this goal, it is evident that they will stop at nothing—including the desperate measure of trying to mislead Congress by appearing before its committees disguised as representatives of the chamber of commerce and trying to palm off their own views as the official views of others.

Mr. Speaker, I am confident that the people of the United States will not permit this plot to destroy one of the Nation's most valuable assets to succeed. But meanwhile, whatever our differences on the issue of the TVA, I am sure my colleagues will agree that not even Mr. Sutton should be permitted to get away with this apparently deliberate attempt to mislead Congress and the public by masquerading as a spokesman of the chamber of commerce and misrepresenting the chamber's official policy declarations. I, therefore, call again on the appropriate committees of the Congress to look further into this matter of private utility lobbying and subsidy payments to the private power trusts, not only with respect to the instances here discussed, but also to determine how we can protect ourselves against similar misrepresentations and attempts to mislead in the future. Surely, Mr. Speaker, there must be a limit somewhere to our toleration of the unscrupulous tactics of greedy self-interests and the private power monopolies. The public interest must be protected.

Mr. METCALF. Mr. Speaker, will the gentleman from Tennessee yield?

Mr. EVINS. I yield to the distinguished gentleman from Montana.

Mr. METCALF. Mr. Speaker, I want to compliment the gentleman from Tennessee for his usual brilliant analysis of some of the problems that affect the advocates of public power. I was pleased that the gentleman from Tennessee mentioned the development that is going on in the Columbia and the Missouri Basins,

that great watershed of the Columbia and Missouri, both rising in the district that I represent. It is because of the development of TVA and the principle of yardstick power, the example they have set in the Tennessee Valley, that we have had the development and the progress—the industrial development in the Northwest—that we have had.

I want to assure the gentleman, as I know he has assured the Members of my area, the great Northwest, that we regard these great water resources as American developments and not as regional developments. The TVA is a part of the district that I represent just as surely as the development of the Columbia is in the interest of the district of the gentleman from Tennessee. I appreciate the analysis of the fast tax write-offs, this great fraud of rapid amortization for the utilities. I know that the gentleman has brought a valuable message to the people all over America in developing the needs of the Tennessee Valley for greater assistance. I assure the gentleman that he will have the support of the people of all the regions of this great country.

Mr. EVINS. I thank the gentleman for his contribution. Mr. Speaker, may I say that I have known that the gentleman was not provincial in his outlook. He, too, has been a great champion of the people of his area and of the Nation. These projects, I should like to repeat in conclusion, do not serve just a region of the country; they serve the Nation as a whole and we should be proud of them all over this great country; the upper Colorado storage project, Grand Coulee, and those in the Northwest; the Missouri River Basin development, the St. Lawrence and others. To take a narrow, regional, provincial attitude is certainly erroneous, wrong, in my judgment.

THE PRESIDENT'S LEGISLATIVE PROGRAM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New York [Mr. DEROUNIAN] is recognized for 20 minutes.

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and also to extend my remarks in the RECORD immediately after the remarks of the gentleman from Hawaii [Mr. BURNS].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DEROUNIAN. Mr. Speaker, I listened with great interest to the remarks of my colleague from New Jersey [Mr. THOMPSON], and I see he has made the news ticker again, so it has been a profitable evening for him.

I shall not deny that he has every right to disagree with me or other members of my party or anyone else, for that matter, and he does disagree with a lot of others because a sizable bloc in his party does not see eye to eye with him. In fact, I can ask the question today, "Which Democratic Party are you talking about, the South, Mr. THOMPSON's, or the middle-of-the-road Democrats?"

I was pleased to hear of the solicitude the gentleman from New Jersey [Mr. THOMPSON] has for our President. He recited words of tenderness for him today. I am wondering what he thought of him, though, last June 25, when he inserted in the CONGRESSIONAL RECORD a sort of nasty article about the President's health, scurrilous in nature, in my opinion, complete with innuendoes. He said at that time that he thought the American people ought to have the opportunity to read the views of a certain columnist, well known for his journalistic inaccuracies. I am glad that the gentleman from New Jersey [Mr. THOMPSON] has reconsidered his position and that he truly feels for the President of the United States.

The gentleman from New Jersey and I disagree in several respects. For example, last year he thought that Alger Hiss should not be denied the right to speak at Princeton University. I disagreed with him then.

Mr. THOMPSON of New Jersey. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield.

Mr. THOMPSON of New Jersey. I never said that Alger Hiss was all right to speak at Princeton University. I simply defended the right of the university to invite him. I would do the same thing now. I also would defend the right of any university to have anyone speak to them, because I have great faith in our universities.

Mr. DEROUNIAN. Yes, and the gentleman at that time—and I disagree with him again—did not think that any harm would come from having a Nazi torturer come and talk to Princeton University. I quote from the CONGRESSIONAL RECORD, volume 102, part 5, page 6164. Mr. Tumulty, who is no longer here, said:

> Would you want the Nazi, Sepp Dietrich, to talk at Princeton?
>
> Mr. THOMPSON of New Jersey. I do not see what harm it would do to have Dietrich talk there. I do not see what harm it does when you know what a person is. No debating society will ever be able to cloak Alger Hiss, and no American could ever cloak him with respectability. I feel that very strongly.

I would not even let Sepp Dietrich into this country, the one who murdered thousands and thousands of innocent victims whose only crimes were that they happened to be of the Jewish faith.

Mr. THOMPSON of New Jersey. I trust that the gentleman is not taking that out of context to imply that I approve of Sepp Dietrich's actions and the pogroms of Dietrich, Hitler, or anyone else.

Mr. DEROUNIAN. I am certainly not charging that.

Mr. THOMPSON of New Jersey. I am defending the right of an American university and of American universities to free speech.

Mr. DEROUNIAN. That is correct.

Mr. THOMPSON of New Jersey. I said further I would not even object to Mr. Tumulty's speaking at Princeton University. If I were president I would not invite him, but I would not object to him or you or anyone else.

Mr. DEROUNIAN. To compare Sepp Dietrich with Mr. Tumulty is unthinkable.

Mr. THOMPSON of New Jersey. I agree with that.

Mr. DEROUNIAN. Naturally, I do not charge the gentleman from New Jersey with approving such tactics, but certainly it points out the area of difference there is between us. In an article by Ray Tucker in yesterday's newspaper Mr. THOMPSON is called the leader of the Roosevelt Democrats, and that is all right with me, but the people ought to know it. Furthermore, the gentleman from New Jersey [Mr. THOMPSON] took the leadership in signing a manifesto, a "liberal manifesto," as he calls it. I would hope that Mr. THOMPSON is not for economy, because his program, if enacted, it has been estimated, will cost about $4.5 billion over the President's program on a yearly basis. I do not agree with that. I think that the taxpayers deserve a break. I was for economy before it became so fashionable this year, and so were most of my Republican colleagues.

Mr. THOMPSON of New Jersey. That article by Mr. Tucker is fair except in one respect, that it says that Mr. THOMPSON is the head of the group, and this is anything but so. Mr. THOMPSON in this instance was one of the leg men assigned by his seniors, with whom he was in agreement, to go get signatures. I did it.

Mr. DEROUNIAN. The gentleman agrees with the statement that he is challenging the Rayburn-Johnson leadership; is that right?

Mr. THOMPSON of New Jersey. Oh, absolutely not. I do not agree. I might point out too, I think it would be helpful now that I have disowned the allegation that I am a leader in any way, it would be flattering if I were in fact, but I am not, I wonder if the gentleman would insert that article in the RECORD.

Mr. DEROUNIAN. I will be happy to insert it in the RECORD at your request, and I yield to you for that purpose at this time.

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent that the article of Mr. Tucker of May 21 be inserted in full at this point in the RECORD.

Mr. DEROUNIAN. If my friend would send it to his constituents in his district, I am sure it would help him.

The SPEAKER pro tempore. Did the gentleman from New York [Mr. DEROUNIAN] make a further request?

Mr. DEROUNIAN. Mr. Speaker, I just made a comment.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The article referred to is as follows:

LIBERAL DEMOCRATS AID IKE—SUPPORT HIS DOMESTIC, FOREIGN PROGRAMS

(By Ray Tucker)

WASHINGTON.—A cohesive and cosmopolitan bloc of 80 "Roosevelt Democrats" may be responsible for saving President Eisenhower's domestic and foreign program from sabotage by Republican and Democratic conservatives, if it can be saved by their support and Ike's television crusade.

Frequently opposing the Rayburn-Johnson leadership, they vote almost solidly in the

House for his proposed expenditures to continue and expand New Deal-Fair Deal reforms.

The group is headed by Representative Frank Thompson, Jr., a Trenton, N. J., Democrat, and it paraded its ultraliberal manifesto in the CONGRESSIONAL RECORD on January 30, 1957.

Its platform is prolabor, antibusiness, and it favors extensive foreign aid. It advocates large outlays for social services, health, schools, Federal relief of all kinds, and Federal development of all natural resources.

It parallels closely the legislative proposals recently advanced by the Truman-Stevenson-Harriman faction under the auspices of national chairman Paul M. Butler's national advisory committee. In fact, the Thompson group virtually serves as the Butler Democrats' operating agency on Capitol Hill.

The bloc of 80 representatives clashes completely with the southern Democrats' wing, and it has only one member from below the Mason and Dixon line. In fact, Dixie spokesmen frequently refer to them as Roosevelt radicals, a title to which they do not object.

The 80 are mainly from such metropolitan centers as New York, Philadelphia, Chicago, Detroit, and Los Angeles. Forty represent those places, and 20 come from smaller but good-sized communities.

Their urban background explains their viewpoint on such issues as labor, racial questions, immigration, foreign affairs, and social welfare problems.

They pitch their appeal to the municipal electorates that favored F. D. R. and Truman, and kept the Democrats in power for 20 years.

Ten represent mining areas, ranging from the coal regions of the Appalachian region to the Western States which produce copper, uranium, lead, gold, silver, etc. Another 10 come from farming States of the upper Middle West, where the Farmer-Labor Party once dominated politics.

However, the predominantly urban bloc shows scant interest in agricultural problems and relief. Although they generally vote solidly on other issues, they frequently split 50–50 on more generous benefits for the farm population.

The group's lineup on a few key questions reflects its ultraliberal philosophy:

Eisenhower's Middle East doctrine—66–10 in favor.

To reduce appropriations for the Health, Education, and Welfare Department's projects—unanimously against cuts.

For grants to States for public assistance and unemployment compensation—62–2 for, and 74–1 for unemployment compensation.

To reduce $70 million for such United Nations activities as labor, health, education, etc.—64–2 against.

To defer payment of interest on British loan—55–6 in favor.

For Speaker RAYBURN's investigation of alleged conservative trend by independent agencies and commissions—58–2 in favor.

For congressional rather than Presidential commission's investigation of the administration's monetary policy—70–1 in favor.

Representative WRIGHT PATMAN, Texas Democrat, sponsored the demand for House-Senate inquiry into Ike's money program. Since PATMAN is an advocate of "easy money," Senator HARRY F. BYRD quietly stepped in, and the Senate entrusted the assignment to a committee headed by the conservative Virginian.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield.

Mr. FRELINGHUYSEN. Mr. Speaker, I think we should be encouraged, we Republicans, by the solicitude which the leadership on the opposition side has shown concerning the problems which the Republicans may or may not be facing as of today, and in particular by the remarks of the majority leader indicating that we can count on consistent earnest and active support from their side of the President's program. The truth of the matter is, of course, that very little of the President's program has been considered or enacted at this session of the Congress. The basic problem in connection with the presentation of Mr. THOMPSON is that we have gotten a very poor indication of just what it is that the Congressional Quarterly thinks is important or crucial in the question of votes. I suppose that Members of Congress are accustomed to lots of clear examples of fuzzy thinking, but I think we have had a classic one here today. We have had lots of innuendoes, implications, and insinuations but very few facts. The fear has been expressed that perhaps the Republicans are falling away from their President and that the Democrats are going to have to do something about it in order to avoid irresponsible cuts in the budget. Our basic position, and the one we have been trying to make, is that the particular article from the Congressional Quarterly is thoroughly unreliable. If an analysis shows that the Democratic leadership by 95 percent are in favor of particular votes and the Republican leadership is certainly not in favor, it seems to me we should take a second look at the nature of the particular legislative proposals.

Mr. METCALF. Mr. Speaker, I wonder if the gentleman from New York would yield to me so that I may direct an inquiry to him.

Mr. DEROUNIAN. Mr. Speaker, I decline to yield at this time.

Mr. FRELINGHUYSEN. I think our basic position as I was saying, Mr. Speaker, is that we are very much aware of the weakness of the argument as presented both by the gentleman from New Jersey, and more particularly by the article in the Congressional Quarterly. The gentleman from New Jersey has indicated that Democrats, or at least he and the people who are gathered around him, are in favor of responsible cuts. Of course, that is not the basic issue here although it may be involved in the particular issues which the Congressional Quarterly took a look at to see whether or not we were supporting the President's program. The truth of the matter is, and I think the gentleman from New York has pointed it out, that the gentleman from New Jersey [Mr. THOMPSON] has advocated and is on the record as having advocated increased programs, Federal programs, that would increase the demands on the budget by about $5 billion a year. So we have him on record, according to his own statement, I believe, as a spendthrift—that may not be the exact word, but there are indications, I think, generally speaking, that those particular votes which the Congressional Quarterly is using are economy votes and certainly not votes on whether or not we are supporting the President's program. In addition to the Middle East resolution, we have had very few Presidential support votes. I think the vote on the soil bank bill is as good an example as I can think of, yet I recall the gentleman from New Jersey [Mr. THOMPSON] voted against that—a clear case of a failure to support the President on an important issue whereas he may be claiming credit now for supporting him on particular budget requests.

It seems to me that this is a basic indictment of the Democratic leadership for having recommended lowered amounts from the Appropriations Committee than the President requested. It is, again, a repudiation of those Democrats who offered the amendments which wolud have cut certain of these items in the Health, Education, and Welfare bill. So it is not getting anywhere to show the weakness of the Republican Party to say that the Democrats are against irresponsible cuts or to imply that perhaps the Republicans are not against irresponsible cuts.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I cannot yield at the moment.

Mr. THOMPSON of New Jersey. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield.

Mr. THOMPSON of New Jersey. I might point out that in his letter of May 17 to me Mr. Sherman Adams, the Assistant to the President, said this, talking about the President:

> He thanks you for your assurances that you and others in your party will help advance the administrative programs * * * and that you will do your best, as he has been doing, and will continue to do, to keep the Congress from effecting crippling cuts in the budget.
>
> Sincerely,
>
> SHERMAN ADAMS.

Now, the gentleman from New Jersey said I would spend $5 billion more. I do not disavow anything I said I would support, but I do not have any figures available on the cost of any of those programs.

I said, for instance, along with 79 of my colleagues, that I was in favor of Federal aid for school construction; which, indeed, I am. I supported the bill and voted identically with my friend from New Jersey on it in the committee, and I would expect that we will vote identically as most of our delegation when the bill reaches the floor of the House.

Now, with respect to my spending, I might say that I do not accuse the gentlemen from New York, New Jersey, or anywhere else of trying to harpoon anyone; I am just simply using statistics which are taken from the CONGRESSIONAL RECORD.

Mr. DEROUNIAN. If the gentleman will permit——

Mr. THOMPSON of New Jersey. May I finish one more statement please?

Mr. DEROUNIAN. I yield the gentleman about 20 seconds. My time is running out.

Mr. THOMPSON of New Jersey. I regret the inclusion of the Hiss debate; I think it is irrelevant to this, but I will reiterate my remarks made at that time. I do not think that we undertook to discuss our personal political philosophies.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield.

Mr. FRELINGHUYSEN. I think the point the gentleman from New Jersey [Mr. THOMPSON] has just made demonstrates part of the problem which he faces. He has failed to take a look at what the Congressional Quarterly actually shows. He referred to 31 issues; actually, there were only 22. He should take a further look at that before stating what will be required specifically in order to justify the increased program advocated.

As I pointed out, these are commitments that if carried out would aggregate $5 billion.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I decline to yield at the moment. I will yield later if I can.

Mr. FRELINGHUYSEN. If the gentleman will yield, I think the remarks of the gentleman from New Jersey are thoroughly objectionable. He indicated that the President had bypassed the Congress in going directly to the people to discuss over television the need and the reasons for the amount of the requests he has put in the 1958 budget.

I do not think any fairminded Democrat or Republican either could possibly say there was any bypassing of the Congress in the President of the United States explaining just what is in the budget request which he has submitted. Certainly the President has been cooperative and supplied us with the necessary information. He has responded to the resolution passed by this body to suggest areas in which the budget might be safely cut; and it seems to me that his relationships both with the Democrats and with the Republicans in this matter are impeccable.

Certainly it ill behooves the gentleman to belittle what the President is trying to do in explaining to the country the need, and the serious need, of the requests that he is making in this budget.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield to the gentleman from Wisconsin.

Mr. LAIRD. Mr. Speaker, the discussion we have had here this evening proves beyond doubt that the Congressional Quarterly and the basis on which it assesses Members of Congress, as far as support for or against the President, is completely unreliable. All we have to do is to look at some 20 rollcalls the gentleman from New Jersey and the Congressional Quarterly use and we find that 14 of them were taken on one piece of legislation, yet each of the 14 economy votes was given the same weight percentage by the Congressional Quarterly as the rollcall on the Mideast resolution. How phony can this publication get?

Only last year the Congressional Quarterly deliberately misrepresented the position of the President of the United States on the Federal Aid to Education bill. The President of the United States clearly stated that Federal Aid to Education should be disbursed only on the basis of need. The Congressional Quarterly deliberately took the rollcall on a per capita distribution school construction vote and used the rollcoll as the President's program. This per capita distribution formula had the complete opposition of our President. Even this year the new Commissioner of Education in testimony before the Appropriation Committee completely rejected distributing Federal educational aids on a per capita basis. The Congressional Quarterly deliberately misrepresented the votes of every Member of this House. The rollcalls which were used by the Congressional Quarterly and the article used by the gentleman from New Jersey are completely false from the standpoint of weighing the importance of each individual vote. It is a deliberate attempt by an organization that is the New Deal mouthpiece to try to misconstrue the position of the Republican Party in this House of Representatives. The Republican Party has always been the party of fiscal responsibility. The wing of the Democrat Party to which the gentleman from New Jersey [Mr. THOMPSON] belongs has always been for big spending and deficit financing. The owners and editors of the Congressional Quarterly belong to the same wing of the Democrat Party as the gentleman from New Jersey.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield to the gentleman for a half a minute.

Mr. METCALF. I wish either the gentleman from New Jersey [Mr. FRELINGHUYSEN] or the gentleman from Wisconsin [Mr. LAIRD], one of those gentlemen who has been attacking the weighting of the Congressional Quarterly, would explain something to me, because I am interested in it, due to the fact that I am attacked at every election for not supporting the President and I am somewhat chagrined. Would the gentleman explain how we should weigh these various rollcalls? How would you weigh the difference between a rollcall on contribution to the World Health Organization and a rollcall in support of the President's Middle Eastern proposition?

Mr. FRELINGHUYSEN. I would say on that that I would certainly not myself make an effort at delivering a major speech on the basis of such thoroughly unreliable information which everybody should realize does not represent support or opposition to anybody.

Mr. DEROUNIAN. May I say in conclusion, that the remarks of the gentleman from New Jersey [Mr. THOMPSON], the remarks of my colleague from New Jersey [Mr. FRELINGHUYSEN], the gentleman from Wisconsin [Mr. LAIRD] and I, point out the difference in the Republican-Democratic philosophy of taxation and economy to the people of the country. My district demands and deserves economy. My people would like a cut in taxes. I have a responsibility as their Representative to do whatever I can in that regard without endangering our national security or other necessary functions of the Government. I am going to continue to do just that. President Eisenhower is not against Congress exercising its prerogatives; in fact he is in favor of it; he has told us that wherever we can conscientiously find places to cut we ought to go ahead and do so. I am in support of our President. He is a great President and I wish the Democrats, who control this Congress, would support him with votes, rather than occasional honeyed words, uttered at times when it appears to be to their political advantage.

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. THOMPSON of New Jersey. Mr. Speaker, I seem to have somehow quite unwittingly disturbed my friend from New York and some others. I would like to make it perfectly clear that I in no way impugn their motives, their records or the motives of the President of the United States. I simply was calling attention to the fact that there are going to be things coming up for votes in the future and I think that those of us who believe in certain parts of the President's program will have to unite if they are enacted into law.

I refer to foreign aid, I refer to military assistance, I refer to the defense budget, I refer to Federal aid for school construction, I refer to civil rights legislation and so on. I have supported them, and the majority in the past Congress on the other side of the aisle have supported them, and I hope we can return to that once this idiotic economy fever has passed.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON of New Jersey. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I would like to suggest to the gentleman that his speech today has lent precious little cement to any possible unity between his faction of the Democratic Party and the Republicans. It seems to me that he was relying on an awfully weak premise in his specific attack on 54 Republicans who backed up and will continue to back President Eisenhower.

Mr. THOMPSON of New Jersey. Mr. Speaker, I was not asking for unity between the Republican Party and the Democratic Party. That is obviously not only unhealthy but it is impossible. We have difficulties which the gentleman from New York [Mr. DEROUNIAN] alluded to. I do not know about three parties, but we have had splits here, and we have had them just as you are having them today. The point is, I have been talking about the national defense and the welfare of the people of the United States. I apologize if I have offended anyone. It was not my intention to do so, and I just simply took the time to make that clear. Especially I do not want to offend my delightful friend from New Jersey.

Mr. FRELINGHUYSEN. It seems to me, if the gentleman had confined his remarks to national defense and the national welfare, there would not have been as much controversy or at least as much discussion as there was today.

Mr. THOMPSON of New Jersey. Possibly so, but I think it is very healthy, and I thank the gentleman for remaining.

ECONOMY IN GOVERNMENT

Mr. CANFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. CANFIELD. Mr. Speaker, I am very sorry at this time of the day to have to make this observation about the debate we have just heard. I do not believe that my good friend, the gentleman from New Jersey [Mr. THOMPSON], has been promoting harmony on his side of the aisle. Now, the gentleman who should be here to hear this debate today is the distinguished gentleman from Missouri [Mr. CANNON] who heads the House Committee on Appropriations. It is the House Committee on Appropriations that is reporting out these bills effecting, some of them, drastic cuts in the President's budget. The gentleman from New Jersey has called the drive a reckless economy drive. Who is the leader on the floor with respect to this drive? None other than the distinguished gentleman from Missouri [Mr. CANNON], chairman of our House Committee on Appropriations. And I am so sorry that he cannot be here to make known his views.

Mr. THOMPSON of New Jersey. Mr. Speaker, will the gentleman yield?

Mr. CANFIELD. I yield to the gentleman from New Jersey.

Mr. THOMPSON of New Jersey. My friend from New Jersey is in part right. I think that the chairman of the Committee on Appropriations and its ranking minority member have worked very closely together to effect these cuts. I note that the record of my distinguished friend from New Jersey [Mr. CANFIELD] in opposition to what I would call irresponsible cuts is even better than mine.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. SIEMINSKI (at the request of Mr. KLUCZYNSKI) for today, May 22, 1957, on account of death in family.

To Mrs. ROGERS of Massachusetts for 2 days, Wednesday, May 22, 1957, and Thursday, May 23, 1957, on account of congressional business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. SADLAK for 10 minutes tomorrow.

Mr. HOLIFIELD for 5 minutes today, to revise and extend his remarks and include extraneous material.

Mr. THOMPSON of New Jersey, for 30 minutes, today.

Mr. BRAY, for 15 minutes, tomorrow.

Mr. EVINS, for 40 minutes, today.

Mr. DEROUNIAN, for 20 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. WILLIS and to include extraneous matter.

Mr. COLE and to include extraneous matter.

Mr. HILLINGS (at the request of Mr. ARENDS).

Mr. NIMTZ (at the request of Mr. ARENDS) and to include extraneous matter.

Mr. MCGREGOR to revise and extend his remarks made in Committee and to include extraneous matter.

Mr. RIVERS and to include a speech by Mr. BONNER.

Mr. METCALF and to include extraneous matter.

Mr. DIGGS.

Mr. PHILBIN and to include a speech.

Mr. YATES to revise and extend remarks made in Committee of the Whole and to include extraneous matter.

Mr. CANNON (at the request of Mr. YATES) and to include a letter.

Mr. RHODES of Pennsylvania (at the request of Mr. MCCORMACK).

ENROLLED JOINT RESOLUTION SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H. J. Res. 133. Joint resolution for the relief of certain spouses and minor children of citizens of the United States.

ADJOURNMENT

Mr. METCALF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 29 minutes p. m.), the House adjourned until tomorrow, Thursday, May 23, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

883. A letter from the Acting Secretary of the Interior, transmitting a report certifying that an adequate soil survey and land classification has been made of the lands in the Ainsworth unit, Sand Hills division, Missouri River Basin project, Nebraska, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

884. A letter from the Acting Secretary of the Interior, transmitting a report certifying that an adequate soil survey and land classification has been made of the lands in the Farwell unit, Middle Loup division, Missouri River Basin project, Nebraska, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

885. A letter from the Secretary of Commerce, transmitting the 39th quarterly report on export control for the first quarter of 1957, pursuant to the Export Control Act of 1949; to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BLATNIK: Committee on Public Works. H. R. 5728. A bill to clarify the general powers, increase the borrowing authority, and authorize the deferment of interest payments on borrowings, of the St. Lawrence Seaway Development Corporation; with amendment (Rept. No. 473). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MCCORMACK:

H. R. 7694. A bill to constitute the General Services Administration a Department of General Services; to the Committee on Government Operations.

By Mr. BAILEY:

H. R. 7695. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. BROOKS of Louisiana:

H. R. 7696. A bill to authorize certain persons to wear the uniform of a Reserve Officers' Training Corps; to the Committee on Armed Services.

H. R. 7697. A bill to provide additional facilities necessary for the administration and training of units of the Reserve components of the Armed Forces of the United States; to the Committee on Armed Services.

By Mr. CELLER:

H. R. 7698. A bill to amend the Clayton Act, as amended, by requiring prior notification of corporate mergers and acquisitions, and for other purposes; to the Committee on the Judiciary.

By Mr. DAWSON of Utah:

H. R. 7699. A bill to increase annuities payable to certain annuitants from the civil-service retirement and disability fund, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. FULTON:

H. R. 7700. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act so as to provide for the safety of chemical additives in food; to the Committee on Interstate and Foreign Commerce.

H. R. 7701. A bill to exempt from tax assessments paid by club members for capi-

tal improvements; to the Committee on Ways and Means.

By Mr. GARMATZ:

H. R. 7702. A bill to authorize the Secretary of Commerce to sell certain war-built dry-cargo vessels to TMT Trailer Ferry, Inc.; to the Committee on Merchant Marine and Fisheries.

By Mr. McGOVERN:

H. R. 7703. A bill to amend the public assistance provisions of the Social Security Act to eliminate certain inequities and restrictions and permit a more effective distribution of Federal funds; to the Committee on Ways and Means.

By Mr. MAY:

H. R. 7704. A bill to provide for promotion by merit of employees in the postal field service and to establish uniform procedures for examination and appointment of candidates for promotion to supervisory positions in the postal field service; to the Committee on Post Office and Civil Service.

By Mr. MONTOYA:

H. R. 7705. A bill to amend the act of June 20, 1910, relating to the admission of New Mexico into the Union, to permit the State of New Mexico to achieve greater diversity in the prudent investment of moneys from lands held in trust; to the Committee on Interior and Insulars.

By Mr. NORRELL:

H. R. 7706. A bill to entitle members of the Army, Navy, Air Force, or Marine Corps retired after 30 years' service to retired pay equal to 75 percent of the monthly basic pay authorized for the highest enlisted, warrant, or commissioned grade in which they served satisfactorily during World War I, and for other purposes; to the Committee on Armed Services.

By Mr. STAGGERS:

H. R. 7707. A bill to provide that standard time shall be the measure of time for all purposes and to authorize Congress to establish daylight saving time for any year by concurrent resolution; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMSON of Wyoming:

H. R. 7708. A bill to amend section 6 of the act approved July 10, 1890 (26 Stat. 222), relating to the admission into the Union of the State of Wyoming by providing for the use of public lands granted to said State for the purpose of construction, reconstruction, repair, renovation, furnishing, equipment, or other permanent improvement of public buildings at the capital of said State; to the Committee on Interior and Insular Affairs.

H. R. 7709. A bill to permit desert-land entries on disconnected tracts of lands which, in the case of any 1 entryman, form a compact unit and do not exceed in the aggregate 320 acres; to the Committee on Interior and Insular Affairs.

By Mr. BROYHILL:

H. R. 7710. A bill to provide for the lump-sum payment of all accumulated and current accrued annual leave of deceased employees; to the Committee on Post Office and Civil Service.

By Mr. DEMPSEY:

H. R. 7711. A bill to amend the act of June 20, 1910, relating to the admission of New Mexico into the Union, to permit the State of New Mexico to achieve greater diversity in the prudent investment of moneys from lands held in trust; to the Committee on Interior and Insular Affairs.

By Mr. DORN of New York:

H. R. 7712. A bill to authorize the Secretary of Commerce to sell certain war-built dry-cargo vessels to TMT Trailer Ferry, Inc.; to the Committee on Merchant Marine and Fisheries.

By Mr. LESINSKI:

H. R. 7713. A bill to amend the Civil Service Retirement Act to eliminate the reduction in annuity elected for a spouse when such spouse predeceases the person making the election; to the Committee on Post Office and Civil Service.

By Mr. MILLER of New York:

H. R. 7714. A bill to amend title II of the Social Security Act to include New York among the States which may obtain social security coverage, under State agreement, for State and local policemen and firemen; to the Committee on Ways and Means.

By Mr. PHILBIN:

H. R. 7715. A bill to amend section 207 of the Legislative Reorganization Act of 1946, to provide that the Boards for the Correction of Military or Naval Records shall give consideration to satisfactory evidence relating to good character and conduct in civilian life after discharge or dismissal in determining whether or not to correct certain discharges and dismissals, and for other purposes; to the Committee on Armed Services.

By Mr. COUDERT:

H. J. Res. 341. Joint resolution providing for the observance and commemoration of the 200th anniversary of the birth of the Marquis de Lafayette; to the Committee on the Judiciary.

By Mr. RADWAN:

H. J. Res. 342. Joint resolution granting the consent of Congress to an agreement or compact between the State of New York and the Government of Canada providing for the continued existence of the Buffalo and Fort Erie Public Bridge Authority, and for other purposes; to the Committee on Foreign Affairs.

By Mr. DEMPSEY:

H. Con. Res. 177. Concurrent resolution favoring congressional recognition of the National Cowboy Hall of Fame and Museum to be located at Oklahoma City, Okla.; to the Committee on Interior and Insular Affairs.

By Mr. DORN of South Carolina:

H. Res. 261. Resolution to authorize the Committee on Ways and Means to conduct an investigation and study of the administration, operation, and enforcement of the Internal Revenue Code of 1954 for the purpose of devising a different system of raising revenue for the operation of the Federal Government; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Oklahoma, memorializing the President and the Congress of the United States to pass H. R. 358 without delay, pertaining to increasing pensions to widows of veterans of the Spanish American War; to the Committee on Veterans' Affairs.

Also, memorial of the Legislature of the State of Wisconsin, memorializing the President and the Congress of the United States to enact H. R. 2474 and S. 27 relating to a salary schedule for postal employees commensurate with that in private industry; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALGER:

H. R. 7716. A bill for the relief of Theodoros Chokas, Ioannis Chokas and Efrosini Chokas; to the Committee on the Judiciary.

By Mr. BAILEY:

H. R. 7717. A bill for the relief of Mrs. Elizabeth Meta Goldbeck Milam; to the Committee on the Judiciary.

By Mr. BARTLETT:

H. R. 7718. A bill for the relief of Roy Hendricks, of Mountain View, Alaska; to the Committee on the Judiciary.

By Mr. BATES:

H. R. 7719. A bill for the relief of Juno Andrews; to the Committee on the Judiciary.

By Mr. BENNETT of Florida:

H. R. 7720. A bill for the relief of Viola Belger; to the Committee on the Judiciary.

By Mr. DONOHUE:

H. R. 7721. A bill for the relief of Sister Ignatia (Maria Nicodemia Wilhelmina Kohlmann), Sister Charlotte (Marie J. Mathijssen), Sister Laurentia (Johanna Gertrude Theresia Smeets), Sister Bernardine (Maria Hendrika Hegeman), Sister Petronella (Johanna Monica Plasmans), and Sister Raymonde (Wilhelmina Grada Weyn); to the Committee on the Judiciary.

By Mr. DOOLEY:

H. R. 7722. A bill for the relief of Pauline S. Clouston and daughter Katrine Mary Clouston; to the Committee on the Judiciary.

Mr. GORDON:

H. R. 7723. A bill for the relief of Josephine Kus; to the Committee on the Judiciary.

By Mr. GRANT:

H. R. 7724. A bill for the relief of AlaLu Duncan Dillard; to the Committee on the Judiciary.

By Mr. LAIRD:

H. R. 7725. A bill for the relief of Shizuko Sese Sheveland; to the Committee on the Judiciary.

By Mr. McDONOUGH (by request):

H. R. 7726. A bill for the relief of Jose Vicente Becerra; to the Committee on the Judiciary.

By Mr. PHILBIN:

H. R. 7727. A bill for the relief of Tso Liang; to the Committee on the Judiciary.

By Mr. POWELL:

H. R. 7728. A bill for the relief of Doctor Julia Ramirez Santos; to the Committee on the Judiciary.

By Mr. ROGERS of Colorado:

H. R. 7729. A bill for the relief of August Widmer; to the Committee on the Judiciary.

By Mr. SADLAK:

H. R. 7730. A bill for the relief of Wladyslaw Kazmierczak; to the Committee on the Judiciary.

By Mr. SAUND:

H. R. 7731. A bill for the relief of Yuke Chang Ng, his wife, Way Foon Lee Ng, and their minor son, Bok Chiang Ng; to the Committee on the Judiciary.

By Mr. SHEEHAN:

H. R. 7732. A bill for the relief of Mrs. Zofia Rylska and her son, Maciej Rylski; to the Committee on the Judiciary.

By Mr. TEWES:

H. R. 7733. A bill for the relief of Arnie M. Sanders; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

254. By Mr. CRETELLA: Resolution of the Public Utilities Commission, State of Connecticut, concerning H. R. 2809, Federal safety requirements for natural gas pipelines; to the Committee on Interstate and Foreign Commerce.

255. By Mr. NIMTZ: Petition of 34 students and priests of the Sacred Heart, Divine Heart Seminary, Donaldson, Ind., submitted by Frater Claude M. Meyer, S. C. J., urging the prevention of any loosening of trade restrictions with Red China, either by the United States or her allies, and the prevention of any recognition of Red China whatsoever; to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

Wisconsin in Forefront of Efforts for Mentally Retarded

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Wednesday, May 22, 1957

Mr. WILEY. Mr. President, I send to the desk a statement and appended articles on the heart-warming performance of the State of Wisconsin and the fine job increasingly being done in other States for the mentally retarded in our population, especially for mentally retarded youngsters. I ask unanimous consent that the statement and the appended articles be printed in the CONGRESSIONAL RECORD.

There being no objection, the statement and articles were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILEY

I was pleased to note in the Milwaukee Journal of last Sunday an article describing a helpful session, which was held at the Milwaukee Vocational School, looking toward the solution of a problem which has stirred the hearts of countless Americans.

This session was a slow-learners institute. It was designed to shed light on how to provide educational and related assistance for the 1½ to 3 percent of our population which falls into what has been described as the "mentally retarded group," especially the youngsters in that classification.

AAMD MEETING TODAY

Today is, I believe, an appropriate occasion to refer to the important progress which is being made on behalf of the slow learners, because on this very day in Hartford there is convening the American Association on Mental Deficiency's annual convention.

It will hear many leading experts discuss various phases of this mental deficiency problem.

SPLENDID WORK OF NARC

I have in my hand the text of an article from the April 1957 issue of the newspaper Children Limited, which describes this convention. This newspaper is published by the National Association for Retarded Children—a splendid nonprofit organization of parents and friends of the mentally handicapped.

In looking through every issue of this newspaper, one finds encouraging signs of what is being done on a National, State, and local basis.

Infinitely more, however, needs still be done. We have barely scratched the surface in helping the retarded. Infinitely more youngsters are not receiving adequate attention than are receiving adequate attention.

But at least we are on our way. Progress is being made, thanks to the devoted efforts of parents, educators, doctors, psychologists, and others.

ARTICLES SHOW PROGRESS IN BADGER STATE

Naturally, I am especially pleased that my own State is helping to lead the way, although far more needs be done in Wisconsin as elsewhere.

In the April 1957 issue of Children Limited there was, for example, a brief article describing how the University of Wisconsin in Milwaukee, in cooperation with the Wisconsin Council for Mentally Retarded Children, is recruiting teachers for retarded youngsters.

In the February 1957 issue was an article describing how Msgr. J. W. Feider, chaplain of the St. Coletta School for Exceptional Children in Jefferson, in my State, has surveyed the problem of religious training for retarded youngsters.

In the December 1956 issue there was depicted how the former Governor of my State, the Honorable Walter Kohler, served as honorary chairman for State Retarded Children's Week campaign.

In the April 1956 issue was an article on the formation of Phi Mu Sigma fraternity, a grand group which I was pleased to address last year (as described in the May 7, 1956, RECORD). Phi Mu Sigma is a professional fraternity for teachers of the mentally retarded.

I have selected these Wisconsin references in Children Limited merely as an illustration. These particular articles show what one State is doing at the grassroots and what, I hope, all 48 States will do and can do on behalf of these youngsters.

"NO LESS PRECIOUS"

The worthy theme of the national association is that these retarded youngsters are "no less precious" than any other youngster.

One article in the February issue of this year was well entitled "For Children Limited, Love Unlimited."

With true love, with real understanding, with expert direction, with generous contributions, we can go a long way toward fulfilling our deepest responsibilities to these youngsters and to adults as well.

REPORT BY WORLD HEALTH ORGANIZATION EXPERTS

This is not a problem affecting just a small limited group. It is a problem which affects a vast number of Americans, and naturally, it is a problem not limited to our shores alone. I point out for example the important 48-page publication, The Mentally Subnormal Child, a report prepared by a joint expert committee convened by the World Health Organization with the participation of the United Nations, ILO and UNESCO.

Let us therefore each do our part in whatever way we can toward meeting this challenge.

ARTICLES FOR CHILDREN LIMITED

There follows now the various brief articles. All are from Children Limited, published by the NARC, with the exception of the Milwaukee Journal article to which I have referred.

[From Children Limited for April 1957]

AAMD CONVENTION SLATED MAY 21–25

Connecticut Gov. Abraham A. Ribicoff will greet delegates to the first general session May 22 of the American Association on Mental Deficiency's annual convention in Hartford.

Registration will begin May 21 and the annual meeting will conclude with the installation, May 25, of the association's new president, Chris J. DeProspo.

Section meetings during the convention will deal with all aspects of work with the mentally retarded, including education, medicine, social work, psychology, administration, and parent liaison.

Dr. Romaine P. Mackie, chief of the Section on Exceptional Children and Youth of the Office of Education, and Dr. Leonard J. Duhl, psychiatrist from the Professional Services Branch of the National Institute of Mental Health, Department of Health, Education and Welfare, will address a public meeting May 22.

Rudolph P. Hormuth, specialist in services for mentally retarded children of the United States Children's Bureau, will describe the material and child health program for mentally retarded children at a sectional meeting May 22, chaired by Dr. George Tarjan, superintendent of Pacific State Hospital in California.

Another panel on May 22 will deal with a social work approach to the problems of the mentally retarded and their families. It will be headed by Mrs. Sadie E. Smith, director of social services at the Columbus State School, Ohio.

Language and speech of the mentally retarded will be discussed in a section meeting May 23. Dr. Ross H. Copeland, administrative assistant to the superintendent of the Muscatatuck (Ind.) State School, will chair the panel and present the results of a national survey of speech and hearing services for the retarded in State institutions.

Play and music therapy, hypnosis with the mentally retarded, and parent counseling will be among topics discussed at a psychology sectional meeting May 23 headed by Dr. Harold Michal-Smith of Flower and Fifth Avenue Hospitals.

Armond Carr, NARC secretary, will be a participant in a section meeting May 24 to discuss teamwork between parents and the administrator of a program for the mentally retarded.

Other panelists will discuss the roles of religion and recreation in the life of retarded children at residential facilities.

Another panel on the 24th will deal with the role of parents in a program for the mentally retarded. Dr. Arthur T. Westwell, an AAMD past president, will preside.

Manford Hall, NARC consultant on community services, will chair a discussion of Community Casework Help to Families in Dealing With the Problems of Mental Retardation.

[From the Milwaukee Journal of May 19, 1957]

SLOW LEARNER PARLEY TOPIC—PROGRESS IS SEEN

Parental shame and widespread ignorance about mentally retarded children is slowly being overcome, parents and teachers attending a slow learner institute at the vocational school were told Saturday.

About 300 persons heard problems of the mentally retarded outlined by Dr. Reynold Jensen, professor of pediatrics and psychiatry at the University of Minnesota, and Dr. Ignacy Goldberg, educational consultant for the National Association for Retarded Children, New York City.

The institute this year, seventh of its kind, dealt with the emotions of the mentally retarded child.

"We no longer need to be ashamed, or to shun, disregard, or avoid the difficult unpleasantries associated with the problem," Dr. Jensen said.

PROGRESS IN 10 YEARS

"We have learned at long last that it can be studied, and worked out. There has been a correction of an attitude about a stubborn but real problem facing society. We can talk about it, think about it, and make plans for the future."

Ten years ago, he said, a meeting such as Saturday's could not have been held because of the shame associated with the retarded child.

Help for parents of mentally retarded children has been among the most important reasons why the problem is being studied widely, Dr. Jensen said. But progress has been important only in the past 7 years—

starting with the creation in 1950 of the National Association for Retarded Children—and there is much to be learned.

Between 1½ and 3 percent of the Nation's population falls into the mentally retarded group, but the estimate might be low, he said. More research may help find the true extent of the problem as well as answers to it, he suggested.

WISCONSIN A LEADER

"Today, polio no longer needs to be feared as much as it was 2 or 3 years ago," he said, and added that with the proper research and understanding such progress might be made with the mentally retarded.

Some research is being conducted by the National Association for Retarded Children, Dr. Goldberg said.

There has been enough speculation and misunderstanding of how much training a mentally retarded child should be given, he said.

Special classes are being offered for the trainable child throughout the United States, he said, adding that Wisconsin was offering classes before many other States.

[From Children Limited for April 1957]

WISCONSIN ARC, UNIVERSITY OPEN JOINT DRIVE TO RECRUIT TEACHERS

The University of Wisconsin in Milwaukee, in cooperation with the Wisconsin Council for Mentally Retarded Children, is conducting a recruitment drive for teachers of retarded children.

Future Teachers of America clubs in 25 high schools have been offered a special program on the opportunities available in teaching retarded children.

The program, under the direction of Robert L. Erdman, associate professor in the university's department of exceptional education, consists of background material on teaching retardates, showing of the film Tuesday's Child, and a group discussion on the NARC publication If This Is Not for You.

The FTA clubs have responded enthusiastically to the proposed program, according to the council, and definite dates are now being scheduled. In several cases, FTA groups have invited other school and community organizations to attend the meetings.

[From Children Limited for February 1957]

CATHOLIC DIOCESES THROUGHOUT UNITED STATES SURVEYED ON RELIGION FOR RETARDED

Monsignor J. W. Feider, chaplain of the St. Coletta School for Exceptional Children in Jefferson, Wis., has completed a survey of the 131 Roman Catholic dioceses in the United States to ascertain the scope of religious training offered to Catholic retarded children.

The basic purpose of the study, according to Monsignor Feider, is "to formulate and recommend an ideal diocesan program of religious training for mentally retarded children on all levels."

Special consideration will be given to religious training of mentally handicapped children in public institutions and to a program within the parish for those remaining at home, the monsignor said.

Questionnaires were sent to the superintendents of schools in each Catholic diocese in the United States. Returns indicate that 7 dioceses have special day school programs, with a total of 26 classes and a total attendance of 520 pupils.

In 25 percent of the dioceses, mentally handicapped children are included in the regular school program for religious instruction. Special instruction to prepare mentally retarded children for reception of the sacraments is given by 7 percent of the dioceses contacted.

The text and teacher's guide most frequently used in giving religious training to retarded children is "My Guide to Heaven," published by St. Coletta School in Jefferson. "My Guide to Heaven" is a catechism of essential doctrine written by Monsignor Feider.

Full-time chaplains serve in 15 public institutions for the retarded. In a majority of cases, local pastors provide religious instruction and spiritual care for residents in public institutions.

Monsignor Feider cautioned that his findings represent the results of responses to his questionnaire and may not present a comprehensive picture of Catholic efforts on behalf of the mentally retarded child.

In a letter that accompanied his questionnaire, Monsignor Feider wrote:

"According to reliable statistics available, there are in the Nation 640,000 mentally handicapped Catholic children between 30 and 80 I. Q.

"Of this number only about 2,000 are definitely known to be receiving religious instructions in preparation for reception of the sacraments.

"There is serious question as to the lot of the remaining 638,000 children in the matter of religious instruction and training with a view of receiving the sacraments."

The questionnaire requested information on special day school programs, I. Q. levels of children receiving training, teaching personnel employed, texts used, program of preparation for reception of the sacraments and parochial school provision for retarded children.

Other questions related to availability of chaplains.

[From Children's Limited for April 1956]

FRIENDS OF THE SLOW LEARNERS FORMED AS PROFESSIONAL EDUCATION FRATERNITY

Phi Mu Sigma (literally, "friends of the slow learners") is a new professional fraternity for prospective teachers of the mentally retarded.

Plans for organizing the fraternity were begun on the campus of Wisconsin State College, Milwaukee, in 1953. This is the first year the group has functioned as a formal organization.

The fraternity lists its objectives as these:

"To foster better understanding of mentally handicapped children.

"To promote finer relationships between the parent and teacher of the mentally handicapped child.

"To educate the public to the existence and the special problems of such children.

"To familiarize and orient entering students to the field of mental deficiency.

"To promote and maintain professional growth by the continued contact with other workers in the field."

To help achieve these goals the fraternity carries on special projects and holds year-round professional and social meetings. Speakers, movies, and demonstrations have served as programs for the meetings.

The fraternity has also helped distribute materials for Retarded Children's Week, helped take retarded children to the circus, sponsored bulletin-board displays at the college on opportunities in teaching retarded children, and made a film dealing with the teaching of the retarded as a career.

Membership in the fraternity is open to any student who is registered as a major in the education of the mentally handicapped, and who has attained an overall scholastic average of C.

The official fraternity key is offered to pledging students who have earned at least 25 points doing service in behalf of Phi Mu Sigma.

Members of the Wisconsin State group are hopeful that other chapters of Phi Mu Sigma will be started soon on college and university campuses throughout the United States.

The fraternity recently voted to present special merit awards and citations to six persons who have contributed to the field of promoting the welfare of mentally retarded children and adults.

The six selected are President Eisenhower, Gov. W. J. Kohler, of Wisconsin, Roy Rogers and Dale Evans, Dr. Salvatore DiMichael, and Dr. Samuel A. Kirk.

The fraternity is also giving recognition to the parent organization in Wisconsin which has contributed scholarships for prospective teachers of the retarded at Wisconsin State.

The awards will be presented at ceremonies to be held at the college May 4.

Address by Hon. Harry F. Byrd, of Virginia, at St. Luke's Church, Smithfield, Va.

EXTENSION OF REMARKS

OF

HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 22, 1957

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a speech I delivered on the occasion of the completion of the restoration of St. Luke's Church at Smithfield, Va., May 19, 1957.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR HARRY F. BYRD, DEMOCRAT, OF VIRGINIA, ST. LUKE'S CHURCH, SMITHFIELD, VA., MAY 18, 1957

Mr. Day, officers and directors of the historic St. Luke's restoration, distinguished guests and friends, I am pleased to participate in this ceremony today for many reasons. I am honored to be in the presence of my friend, Henry Mason Day, and others responsible for restoration of historic St. Luke's and their guests and friends.

I salute Mr. Day and I want to pay my tribute to him. I do so not as a Virginian but as an American. It is to him that we owe the restoration of this church, one of the great landmarks of the world. His indefatigable work and his determination to succeed have made possible the great privilege we enjoy today, which will be passed on to all future generations. An opportunity, such as this, to rededicate ourselves to our God and our country is indeed a high privilege.

As we assemble here in this fine old church, now so faithfully restored, I experienced mixed sensations. They are peaceful and solemn, and they are sensations of pride and responsibility. It is inspiring to stand in this church, the oldest standing Protestant Church in America, built in 1632.

We are reminded of the great chain of historic events our forebears set in motion here in these James River environs. Here indeed was a case of the infinitely small being infinitely great.

It was in this quiet corner of tidewater Virginia, 350 years ago last Monday, that the small band of founders in three small ships landed at Jamestown and lived one of the great moments in history.

It was a moment of greatness because these men and their stanch followers built with such soundness and vision that a new world slowly but surely began to form. They were great men in whom nature succeeded. They were men who made religious use of life.

Here respect for individual rights and responsibilities was established.

Here the dignity of man was acknowledged.

Here the rights of free enterprise and initiative were encouraged.

Here truth to God, and truth to self were practiced.

On this foundation was built the first representative government in the new world—the House of Burgesses, the predecessory of our State legislatures and the National Congress.

Material results are but the tardy sign of invisible activity. The courage to hope, and live, and build for a better world was the great legacy the founders bequeathed their descendants. From this came their fortitude to fight for liberty when it was threatened, and win the independence of a great nation.

The achievements incident to the American Revolution were the immediate inspiration for the French, and since that time the cause of democratic freedom has been spreading in ever-widening sphere. Today the United States stands as a beacon of hope in the world.

So it is thrilling to come to this section of Virginia whence sprung the ideal of democracy. Here in this old churchyard sleep the dead whose mighty hopes for the future made them men.

They include some of the settlers who came to this parish in 1622 with Edward Bennett. They came with high hopes, and despite adversity, they "hung out" and ultimately the settlement prospered to make its indelible contribution to a great new country.

There could be no more noble shrine to the memory of those God-fearing settlers than this—the restored Old Brick Church, and no more sacred place of worship and rededication for this and future generations. It is a place of deep and tranquil inspiration, which nourishes, purifies and ennobles the soul of man.

As I look with admiration at this church, in its restoration of today, I am moved by the fact that it is a powerful symbol of the fruits of slowly won peace, the fruits of industry, of constitutional government, and above all it is a symbol of the will of man to express his belief in God in the most filling way possible.

Of the 522 people residing in the parish in 1634, all must have contributed either from his purse, his crops, his strength, or the fullness of his heart toward rearing this worthy place of worship. It is work, to whatever end, that gives flavor to life.

We know that in the 17th century, the colonial church here was not only the center of religious life in the parish, but it was also the center for secular affairs. In a real sense, it symbolized the parish.

In the case of St. Luke's, the church served also as one of the 5 sites in Virginia where the court of the colony was permitted to convene. Even now there seems to be a feeling of official status about the edifice. Perhaps it is best expressed in the quiet dignity of the Gothic architecture.

We have but to look around at the interior detail to see the painstaking care of the original construction. Everywhere there is evidence of the lofty purpose and continuant devotion to a great and lasting project.

In retrospect, it would seem that there is a parallel between the long days spent in construction of the magnificent old church, and the construction of the Virginia Colony. Both were built on firm foundations. Both endured the hardships of growth in a scarcely civilized, but verdant land. Both looked confidently to the future, with an inspiring mission under God.

Despite the toll of time, in the long span of its three and a quarter centuries, the church continued to stand and serve as a house of worship. And finally in our own time when the old church was threatened with total destruction, men and women of patriotism and good will all over this Nation joined in the great effort for its restoration. Many of these fine people are here today. I can imagine their sense of pride and satisfaction. Theirs has been an undertaking well done in accordance with their desire and power.

Good repair is like liberty. It is not a continuous state. We must everlastingly work at it. Fortunately, in this country, foundations for our freedom were set deep in the Virginia soil, like the foundations of old St. Luke's. Like the church, the edifice of our constitutional democracy was constructed slowly but surely, with the toil and sacrifice of our citizens. Like "Old Brick," our form of government has served us well for centuries. We must guard it vigilantly against the forces of decay from within and the forces of evil from without.

I was thrilled to be with the Vice President of the United States at Jamestown on Monday and to stand where a nation was born—and that Nation today is the most powerful in the world—the United States of America.

At the end of the 17th century, the entire colony of Virginia numbered 80,000 people. The wilderness was fast being settled all along the coast—from Maine to Florida. A steady tide of migration was pushing up the rivers and bays, and far back into the interior to the mountains. In the splurge of growing and building and creating, the little hamlet of Jamestown was soon forgotten. Brambles and bushes grew up over the ancient landmarks and ruins. Later, 2 or 3 resident tobacco farmers cleared some of these away, and their plows passed over the graves of the forgotten dead.

Now, in the year 1957, a reverent and grateful country turns again to the place of its beginnings. The multitude of Americans who visit Jamestown during the coming months will do well to remember that the very soil beneath their feet is mixed with the mortal dust of thousands of men, women, and children who perished there that a nation, our Nation, might live.

I am proud to be present on the occasion of the completed restoration of St. Luke's Church, for it is a tangible expression of our determination to keep faith with those who have gone before us in the service of our democracy and our God. I know all of you will join me in prayerful rededication to these high purposes.

The Importance of Encouraging People-to-People Friendship Between Nations

EXTENSION OF REMARKS

OF

HON. LEVERETT SALTONSTALL

OF MASSACHUSETTS

IN THE SENATE OF THE UNITED STATES

Wednesday, May 22, 1957

Mr. SALTONSTALL. Mr. President, the importance of encouraging people-to-people friendship between nations has been brought into focus recently by the visit of the Vice President and several Members at the independence celebrations in the new nation of Ghana, and the extended tour by the delegation to other parts of the vast continent of Africa.

It is also important that, in addition to official visits, and the visits by growing numbers of American citizens, efforts be made to improve the communication of words and ideas between North America and Africa. It is of particular interest to me that a special series of international broadcast programs have been beamed on Africa for the past several months from a 50-kilowatt transmitter located at Scituate, Mass., owned and operated by the World Wide Broadcasting System, under the direction of a pioneer in international broadcasting, Mr. Walter S. Lemmon. Each day the broadcasts of WRUL—the Voice of Freedom—are beamed across the Atlantic to a growing number of listeners in all parts of Africa. The Voice of Freedom began this new program service to Africa on February 28, with a special broadcast, Salute to Ghana, by Vice President NIXON and several Members of Congress. Since then, WRUL has continued to broadcast a number of special programs to Liberia, Nigeria, and other nations in that vast and friendly continent.

Because of the importance of the Voice of Freedom's Spotlight on Africa programs, I ask unanimous consent that excerpts from the Salute to Ghana broadcasts be printed in the CONGRESSIONAL RECORD, in connection with my remarks. The excerpts include brief statements by Vice President NIXON; the Senator from Rhode Island [Mr. GREEN]; myself; Representative FRANCES BOLTON; Representative BARRATT O'HARA of Illinois; and Representative DIGGS, of Michigan.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REMARKS BY VICE PRESIDENT NIXON

It gives me great pleasure to join with WRUL—the "Voice of Freedom"—in this radio salute from America to the new nation of Ghana, on the west coast of Africa.

As an American from the State of California—on the west coast of America—I cannot help but think of the days of our early pioneers as they explored, settled, and developed our gold coast on the Pacific—and by constitutional measures joined California to the Union of States some 107 years ago.

This week we salute the 5 million African citizens of the Gold Coast and the triumph they have achieved in gaining the independence of Ghana by peaceful, parliamentary means after nearly a century of colonial rule. It is a remarkable tribute to these changing times that Ghana now achieves her independence by peaceful means, and at the same time continues her association with the British, as the first Negro state to achieve full membership in the Commonwealth.

Ghana, like my own native California, is rich in tradition, in natural resources, and the pioneering spirit to get things done. Thanks to the progress of the 20th century in communications, transportation, agricultural and industrial techniques, and the all-important problems of improved health conditions and expanded educational facilities, Ghana is destined to play an important part in the making of a better world.

I am looking forward to my visit to this vital part of Africa, and joining in the independence celebrations in Accra, the capital of Ghana. I know I will be among people who are friendly to America for there is a blood relationship between millions of our American citizens and the citizens of Ghana, through their ancestors who came to America from the Gold Coast years ago. Today freedom and independence have become a reality for these citizens on both sides of the Atlantic and I look for growing friendship and cooperation between the peoples and the Governments of our two Nations.

I wish to thank Mr. Walter Lemmon and the World Wide Broadcasting System for beaming this special series of broadcasts to West Africa this week, and the part WRUL—

the Voice of Freedom—is playing in encouraging people-to-people friendship between North America and the two great equatorial continents of Africa and South America.

REMARKS BY SENATOR THEODORE FRANCIS GREEN, OF RHODE ISLAND

Congratulations and best wishes to you, the people of Ghana, on this historic occasion. With the birth of the new State of Ghana, a former dependent territory will enter the community of nations, independent and free.

The United States of America has traditionally been sympathetic with those peoples who have by their labor obtained independence and self-government. Ghana has already demonstrated its capacity to direct its own affairs in the world society. It now will rest with its leaders to carry forward its own economic and social development.

Ghana's independence marks a significant advance of Africa's peoples toward self-government. This process will, of course, continue as the spirit of independence is matched by experience and increased capacity for self-government.

As we rejoice with the people of Ghana, Americans are moved to reflect upon the earliest days of our own great Republic. Then a weak Nation, we needed the assistance of older nations in charting our course across the turbulent seas of our destiny. Ghana, too, will require such assistance. Because we in America are conscious of the problems which every new nation faces, we have gladly demonstrated our support of new governments which seek to develop stable and democratic ways of life for their peoples.

During my recent visit to your beautiful country, I was deeply impressed by the warm friendliness of your people and by the sincerity and devotion to purpose of your leaders. It is not only my hope but also my conviction that the continuing friendship between our peoples will provide an enduring basis of mutual understanding and respect.

To all you people of Ghana—my warmest greetings and my heartiest good wishes on this great day in your history.

GREETINGS TO THE NEW REPUBLIC OF GHANA, AFRICA, BY SENATOR LEVERETT SALTONSTALL, REPUBLICAN, MASSACHUSETTS, OVER STATION WRUL, BOSTON

I am glad to join Vice President NIXON and my colleagues in Congress who are taking part in this broadcast in a radio salute to the new nation of Ghana.

In the United States, we have watched the establishment of Ghana as a free country with the greatest of interest. We have been especially pleased that this has been achieved entirely through peaceful means, by the enlightened cooperation of both the citizens of Ghana and the British Government.

We know that the name Ghana is a significant one, going back to a free nation of a thousand years ago, and that the new Ghana is a symbol of the ancient traditions and aspirations of her people, now realized once again.

The people of my own State of Massachusetts and Americans everywhere are, I feel sure, confident that the relations between the United States and Ghana will be friendly and close, and characterized by lasting good will.

I should like to point out that this broadcast is being transmitted from Boston, the capital city of my State, over International Radio Station WRUL.

Good luck to Ghana.

EXCERPTS OF REMARKS BY CONGRESSWOMAN FRANCES P. BOLTON, OF OHIO

I can assure you that the World Wide Broadcasting System is honoring me to appear in this special salute program to Ghana.

I was thrilled with Africa, with every country of Africa, and to me the future is so great and so much lies ahead for its peoples and ours as we try to understand Africans and they us.

When you realize that three of the United States fits into Africa, you get a sense of the hugeness of that continent.

One gets a feeling that coming out of the very earth is the demand for a free and full life.

We have much to give in the way of technical assistance, help along the line of education, hospital, training of people for health work, which has been part of my life. The difficulty has been that we have to deal with the mother country, but now with the emergence of the new nation of Ghana, we go directly to them.

I'd like to bow to the women of Africa because they know today that they are the heart of Africa, and I have talked with enough of them and they are eager to be educated and play their part. I'm old-fashioned enough to feel that the women should guide the home, protect the children and bring them up. We do so much quietly that way. I'd urge them to be quiet, but forceful in what they do.

REMARKS BY CONGRESSMAN BARRATT O'HARA OF ILLINOIS

In the heart of every American there is joy that on March 6 of the year 1957 there will have come to the freedom-loving people of Ghana the priceless treasure of independence. Forever, March 6 will be an anniversary date of celebration for all peoples everywhere who love freedom and who know that in the climate of freedom the horizons ever are broadening and the dignity of man brought closer to the plane intended by the God of us all. In my district on the south side of the city of Chicago in Illinois, as in many other Congressional districts in the United States, are many fine men and women, our fellow Americans in the United States in the task of making this, our country, a better land for all men, whose ancestors came from this rich domain now at long last again to take its proud place in the community of free nations. When Ghana, unshackled from the old colonial chains, goes forward in national independence to a great future, in a rebuilding world, the men and women and children in my district, and other Congressional districts of the United States from coast to coast, will be on their knees giving prayers of thanks for the triumph that has culminated the long and courageous struggle of the people of Ghana, thanks that in the independent State of Ghana—first colony south of the Sahara to attain independence—the torch of freedom will be borne forever by the sons and daughters of freedom to light all Africa into a new day of equality of brotherhood and of human dignity. To the government and to the people of Ghana, our salute of victory and our affection that in the companionship together in all the good works of free people will endure forever.

REMARKS BY CONGRESSMAN CHARLES C. DIGGS, JR., OF MICHIGAN

Hello, friends, this is CHARLES C. DIGGS, JR., one of three Negro Americans who are Members of the Congress of the United States.

I am speaking to you from my home city, Detroit, Mich., United States of America, the automobile manufacturing capital of the world. It is an exalting privilege to greet and salute your distinguished Prime Minister, Nkrumah, his official family, and you, the people of Ghana, on the occasion of the celebration of your independence. It seems to me that the birth of this new African nation could not have happened at a moment more potent in this era of world history. The hopes of millions of Africans are, indeed, centered on the Gold Coast as it picks up the reins of full self-government. But, added, are the hopes of millions of people of all nations, of all races and creeds, both enslaved and free. Today, the concepts of freedom and of self-government are being challenged; and all men who believe in the glory and rightness of the free way of life have a vital stake in the ongoing struggle for its preservation and, thus, in the survival of any people who declare their independence.

For Ghana, there is a burning promise of national greatness in what you have done in the years leading to this point. You have been skillful engineers in coupling your own vehicles for passage to freedom. Your faith in the common man, your goals of political independence, your positive action toward the reality of self-government; these are, historically, the great faiths and pursuits of a democracy-minded people. And we are triumphant with you that they persevered during a century of colonialism, and we stand grateful with you that they have been honored by the grant of independence. That, under vigorous, dedicated leadership, you have been alert to the educational, scientific, industrial, and agricultural gains which must be made for the achievement of national success; and that you have been preparing for this time of independence when you would be called upon to show your self-sufficiency; and that you are resolute in your determination to cultivate and utilize the full resources of the people and your nation's natural wealth toward this end: all of this foretells your triump.. in economic independence. Two major goals of national life are counterparts of the goals of private life; one is the fulfillment of greatest individual potential—this is represented in your national objectives—and the other is utilization of the fruits of your works to the betterment of international welfare. This latter, to the gratification of the free world, you have embodied in your aim to work with other nationalistic, democratic, socialistic movements in Africa and other continents in abolishing all forms of national and racial oppression, economic inequality among nations and among races and peoples to support all action for world peace. We who rejoice with you through these days are mindful of the arduous road you must travel to realize your dreams in the life of your nation and our common dreams in the life of the world. And we are also dedicated to the proposition that this light of freedom in Ghana will grow and grow, until its rays, with ours, light up all the dark places of the earth, bringing an enduring social order of peace and good will and, for all men, freedom from oppression and want. America salutes you. We pray with you for a strong nation under God, with freedom and justice for all.

A People's Call for Action

EXTENSION OF REMARKS

OF

HON. JACOB K. JAVITS

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Wednesday, May 22, 1957

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a distinguished speech by the Senator from Minnesota [Mr. THYE]. The speech is entitled "A People's Call for Action," and was delivered before a meeting of the Combined Jewish Appeal of Chicago and the United Jewish Appeal, at the Standard Club, in Chicago, on May 16.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

A PEOPLE'S CALL FOR ACTION

(Address by the Honorable EDWARD J. THYE, United States Senator from Minnesota, before a meeting of the combined Jewish Appeal of Chicago and the United Jewish Appeal Standard Club, Chicago, Ill., Thursday, May 16, 1957)

Mr. Chairman and fellow Americans, I am honored to be able to participate with you tonight in this United Jewish Appeal campaign meeting under the sponsorship of the combined Jewish Appeal of Chicago.

Before I proceed any further, permit me to pay tribute to the honorary general chairman of the 1957 United Jewish Appeal, the Honorable Herbert Lehman. During the years I worked with him in the United States Senate, I came to know him as a man of high dedication to his country and a man of unquestioned integrity. Senator Lehman was always devoted to the cause of humanitarianism, whether it was in this great nation or in connection with problems of peoples in foreign lands. I am confident that he will have a profound effect upon the success of your current campaign to raise much needed funds for the United Jewish Appeal.

I am aware that men of all faiths are present here tonight to join hands in a cause which transcends religious boundaries. Each one of you individually is participating in the writing of one of history's most dramatic chapters. Every human emotion is involved in this campaign. The future welfare of people you may never meet depends upon the success of your efforts and contributions. You are, by your participation, engaged in an international political struggle between the forces of freedom and the forces of oppression. You are engaged in refugee resettlement and rehabilitation work. You are involved in reshaping the destiny of a nation and its people. In a very real sense you are helping to reconstruct the original cradle of human civilization.

Tonight, I shall not attempt to speak on the equities involved in the political struggles of the Middle East in which Israel plays such a key role. I would rather address my remarks to the humanitarian needs of millions of individuals such as you and I who have been caught up in the cross currents of the struggle for freedom which is taking place in the world today.

In December of 1956, I had the opportunity to visit Europe and to receive first-hand accounts of Polish and Hungarian uprisings which touched off a series of explosive international developments. I observed refugees who fled from their homelands in their quest of freedom. These were people who could no longer tolerate the yoke of oppression. They were willing to give their lives so that others might enjoy the freedoms which we take for granted. Their needs were the basic needs of men and women everywhere. They needed food, shelter, jobs, and clothing.

In addition they needed encouragement, spiritual communion, and the knowledge that they were wanted. In the weeks and months following October 29, 1956, we witnessed a genuine outpouring of brotherly love and concern for these people throughout the world.

The people in the United States responded to these needs in a display of unselfish humanitarian concern for the millions of refugees who came out of Hungary.

The United Jewish Appeal played a vital part in that effort and seeks to continue its programs through your present contribution of time and money. In the Emergency Rescue Fund alone you are seeking to assist a minimum of 100,000 persons.

The Jewish refugees who are streaming from the boundaries of oppression are seeking freedom and the right to pursue honorable lives in an atmosphere of peace.

Within the ranks of today's refugees you will find men and women from all walks of life and of all ages. There are thousands of children involved in this exodus. There are families who have been able to move together and there are families whose members have been separated and who seek each other. They too, need clothes, food, shelter, and employment. There is a need for education of the children, medical attention for the sick, and welfare and relief programs. This is the type of task which challenges the imagination and initiative of all of us.

The nation of Israel has opened up its doors to a never-ending number of Jewish refugees who seek entrance to their homeland. Israel is a young nation which is currently engaged in an effort to maintain its sovereignty, independence, and freedom. The people of this nation have made great strides in the past 9 years.

It is a nation of approximately 2,000,000 inhabitants who live in an area comparable to the State of New Jersey. It has traditionally been an agricultural country. We recall the stories and pictures of the shepherds and their flocks moving about the countryside in search of pasture and water. Limited crops were grown. Olives, citrus fruits, melons, and a few vegetables represented the basic agricultural output. Today, approximately 1 million acres of land are under cultivation; 132,000 acres are used for grazing; and 130,000 acres are planted in forests. Beef cattle have come into prominence, cotton has been introduced as a crop, sugar beet is processed in local refineries, and peanuts constitute an important crop. In 9 short years, the people of Israel have greatly expanded their agricultural economy.

Israel has also made great economic progress with its industry and the development of its labor forces. This has not been accomplished without difficulties. Israel has experienced serious inflation which poses a problem to the continued development and growth of its industrial economy. We in the United States are very sensitive to the byproducts of inflationary trends.

Added to the problem of inflation has been the problem of absorbing the refugees which continue to reach the shores of Israel. It is now anticipated that another 100,000 will come in the calendar year of 1957—principally from Hungary, Poland, and Egypt. Israel as a nation is doing its best to meet these problems. In 1948, for example, there were 280,000 gainfully employed; in 1956 the number had reached about 600,000. This integration has taken place without serious social dislocation.

This growth in the labor force has resulted in a great increase in production. The national income in Israel has increased considerably in recent years. In 1955, the increase in total real income was 9 percent and this was accomplished while taking in about 30,000 new workers whose production was probably somewhat below that of experienced workers.

This rapid growth has been stimulated by large investment during the past 9 years. This type of heavy capital investment will be required over many years to come if Israel is to continue to develop economically. There is a need to replace external investment to a certain extent by capital investment from private savings within the country. However, with a population of immigrants, most of whom arrived with few personal belongings, it is natural that savings have been invested in household and durable goods.

Israel's industry, while expanding, is dependent to a great extent on the outside world for capital, raw materials, and markets. She has been drawing heavily on both private and public foreign capital to make up her unfavorable balance of trade, and to finance settlement and development programs. Contributions to the Israeli Government by the purchase of bonds and contributions to Israeli institutions by world, and especially, American Jewry have constituted principal outside sources of funds. The productivity of Israel must continue to expand if it is to compete in the world markets.

Israel is seeking to improve its trade relations with the European countries in the next few years. Up to this point, United States aid and German reparations have allowed those two nations to dominate the supply of goods to Israel.

This brief résumé of Israel's current economic status illustrates two things: The tremendous strides which have been made in the short period of 9 years and the fact that Israel still needs assistance in her attempts to become more self-sufficient and to further strengthen her economy.

Through all of this one can observe the struggle of a nation and the personal needs of its people and its potential citizens. Through your work in the next few weeks, you will contribute in a very real sense to the building of a nation and to the resettlement of individuals who turn to Israel for refuge.

The refugees you will assist are a tired people physically, mentally, and emotionally. Many have merely existed during past years while holding out dreams of a life sometime in the future. Certainly many of the children have been subjected to disillusionment without the opportunity for the dreams and hopes of free youth. In recent months, some force has set them free and they are making their way toward Israel or some other free nation. They do not seek relief. They seek opportunity. Opportunity to work, to build a family, to contribute to society, to worship, and to give something in return. These are opportunities which you and I enjoy with each passing day. It is a part of our life and has been for all of our years.

Today we have an opportunity to show our thankfulness for the blessing which has been bestowed upon us. By responding to the United Jewish Appeal, you will play a key role in the rebuilding of a nation dedicated to freedom and world peace. Equally important, you will play a role in the rebuilding or resettlement of a human life.

Address by Secretary of Agriculture Ezra Taft Benson in Cincinnati, Ohio

EXTENSION OF REMARKS

OF

HON. HOMER E. CAPEHART

OF INDIANA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 22, 1957

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the text of an address delivered by Secretary of Agriculture Ezra Taft Benson before the Republican Regional Conference in Cincinnati, Ohio, on May 17, 1957.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SECRETARY OF AGRICULTURE EZRA TAFT BENSON BEFORE REPUBLICAN REGIONAL CONFERENCE, CINCINNATI, OHIO, MAY 17, 1957

It is a privilege to participate in this Republican regional conference.

I like your conference theme, "Concentrate on '58," because it expresses sharply and clearly what we Republicans must do to win control of the 86th Congress. As one who has had some firsthand experience with the problems which arise through divided responsibility, I can attest to the need for a Republican Congress to bring our administration programs to full fruition and thus pave the way for another great victory in 1960.

It seems to me particularly appropriate that we are meeting in Cincinnati, the birthplace and the home of the late Senator Robert A. Taft. He was truly a giant in our party and in the United States Senate where he served so long and so ably. He and I had a common ancestor several generations back, but I am even more proud of my kinship with Bob Taft's ideals.

The senatorial campaign he waged in 1950 was, in my opinion, one of the most effective in the annals of American political history. It brought him a smashing victory and it was based primarily upon just two things: Honest discussion of the issues and good, hard work—sweat, if you please.

We Republicans have the issues today. As we concentrate on 1958, let's expend the sweat that is required to bring those issues squarely before every voter in the Nation. If we do that, victory is assured.

It seems to me that the one, big, burning, overriding issue of our time involves the maintenance of peace—for without peace all other issues could be obliterated overnight. Such matters as civil rights, foreign trade, and farm price supports would become meaningless in a nuclear holocaust with not even taxes but only death as the one certainty.

Therefore, it should be clear that the political party which can best serve the Nation today is the party which can best preserve peace. I say, and the record says it far more eloquently than any man could, that party is the Republican Party.

Our party provided the leadership that brought peace with honor to our country, ending the long, stalemated Korean war—a so-called little war, but still one big enough to have cost us 157,530 casualties. President Dwight D. Eisenhower got us out of that war and he has kept us out of others. Uneasy though the state of world peace may be, it is important to remember that the difference between even an uneasy peace and war can be the difference between life and death.

By none of this do I mean even to imply that there is a war party within the United States. There is not. What I am saying is that the Republican Party, on the record, is best qualified to preserve the peace—a just and lasting peace.

Since this is true and since the preservation of peace is paramount in the hearts and minds of our people, why should we not say it again and again and again?

Oh, I know that our political opposition would like to shift the area of debate to other subjects. Sometimes they recognize our own strengths better than we do.

As we concentrate on 1958, let's put first things first. Let's keep our campaign on a positive basis. Let's emphasize our strengths—for we have many. Let's take the affirmative side of the debate and leave the negative to the Democrats.

In recent weeks there has been some tendency for the initiative to slip away from the Republican Party on the important issue of Government economy.

To me it is such an elemental fact that the Republican Party is the party of economy—of sound fiscal policies—that I can't quite believe my ears when I hear some Democrats of the "tax and tax and spend and spend and elect and elect" philosophy talking about cutting the budget. Frankly, I had never expected to live so long.

As Republicans we must meet squarely the issues of the budget and fiscal responsibility.

We have a 1958 budget with projected expenditures of more than $71 billion. It is admittedly a bigger budget than most Americans, including the President of the United States and the Secretary of the Treasury, would like to see. But the fundamental question involved here is simply this: Is it a bigger budget than we need to do the job that confronts our Government? Can we spend less and still preserve the peace that all of us want and the various services the Federal Government must provide?

Expenditures proposed for the next fiscal year are $2.9 billion larger than for the current one. Of that increase, $2.6 billion—or 90 percent—involves major security programs such as defense, atomic energy activities, mutual assistance, etc.

More than three-fifths of the budget—some $45 billion—is devoted to the job of waging peace. This is a tremendous sum. Yet the direct costs to the United States of World War II were $310 billion. The costs of another war would be incalculable.

Yes, as the President pointed out in his second inaugural address, the price of peace comes high today. Can we afford to make available less than the minimum amount which he has said is required for our own security?

Personally, I would sooner accept the considered judgment of President Eisenhower on the question of our defense needs than that of any other living man.

Moreover, I believe that we need to keep the size of the budget in perspective. We need to view it relatively not only to the programs and policies it is designed to implement but also in relationship to the continued population and economic growth of our Nation. The proposed 1958 budget represents some 16 percent of the gross national product, as compared with 20 percent for the last Truman budget year of 1953.

We need to remember that during the last 4 years of unprecedented prosperity our total output of goods and services had increased by more than $65 billion, or 18 percent. Over those same 4 years our population has grown by more than 11 million, or 7 percent.

Another fact: During the past year our per capita income rose almost $80. Federal spending on a per capita basis under the proposed budget would be up about $10.

Now, two other important facts with respect to this budget:

1. The projected budget calls for total outlays of $71.8 billion. The last proposed Truman budget called for expenditures of $78.6 billion—and this at a time when there were fewer Americans, earning and producing much less.

2. The projected administration budget is expected to be in balance for the third straight year—something this country has not seen in a quarter of a century. By way of contrast, the last proposed Truman budget carried a deficit estimated at approximately $10 billion.

As we "concentrate on 1958", let's stack the record of Republican accomplishments in the field of Government economy against the sorry spectacle of financial irresponsibility displayed by our predecessors. Honestly folks, I don't believe the opposition really wants to debate this.

On the issue of Federal taxes, you will recall that it was the Republican 83d Congress that provided the greatest tax cut in all history back in 1954. Its direct benefits to American taxpayers have already reached the staggering total of $25 billion. It was the Republican 80th Congress that voted the only other sizable tax reduction in recent history.

Let's match the Republican record of tax cuts against the opposition record of tax increases as we concentrate on 1958.

There are many additional positive accomplishments of this Republican administration that need restating and reemphasis from time to time. You know we may be inclined to take some of these things for granted because they are a part of our basic philosophy. Here are some things we can point to:

1. Government competition with private business has been substantially reduced. Some 500 commercial-type businesses operated by the Government in competition with private business have been discontinued. I speak from some personal experience on this because when I became Secretary of Agriculture, I discovered that as a member of the Virgin Islands Corporation Board I was also representing the Federal Government in the hotel business and a variety of other enterprises.

"Our" hotel—and I use the word "our" in quotes—was called Blue Beard's Castle, and it was quite a plush establishment at the time it was built by the Federal Government back in 1934. For a hostelry operating in the "red" as deeply as this one was, the use of the word "blue" in its name seemed singularly inappropriate. We sold it, and the Government was out of another business venture.

2. The rapid rise in living costs has been checked. This administration has nearly brought to a halt the violent, galloping inflation and the progressive cheapening of the dollar which marked the Truman administration.

Recently, you will recall, the advisory council of the Democratic National Committee had the temerity to point to rising living costs. The New York Times pegged that one just right. I would like to read a brief excerpt from their editorial on the subject.

"But who is responsible for the fact that living costs reached their present plateau? Consumer prices have risen, since 1946, all told, from roughly 78 to almost 119, or 41 points. But 37 of those points were accounted for before Mr. Eisenhower came to office, only 4 since the end of 1952. In other words, talk about new highs for the cost of living is neither more nor less than an attempt to confuse the fact that while the costs of living rose 47.5 percent under Mr. Truman in the 7 years, 1946–52, their rise during the nearly 4½ years of Mr. Eisenhower's administration has been 3½ percent."

3. Free enterprise has been encouraged. The faith of our party in the free-enterprise system is being vindicated anew. Today more Americans are at work in more businesses, producing, earning, and investing more than ever before in our history. Private enterprise is providing a record number of jobs at the highest wage rates ever. And all of this is happening without the stimulus of war.

4. As the party of Lincoln we are expected to move continuously forward in the field of human rights, and we are doing just that. The United States is providing a haven for tens of thousands of refugees from Communist tyranny. Racial discrimination on many fronts is giving way before the unsensational but constant, day-to-day efforts of the administration. Progress in the field of civil rights which gained its greatest momentum in 1953 and 1954, when the Nation had both a Republican President and a Republican Congress, has been slowed somewhat by a Democratic Congress, but it will not be denied.

As we concentrate on 1958, let's make these points again and again.

Now I assume that when Meade Alcorn invited me to appear here, he expected me to devote a part of my talk to the farm situation. This I propose to do now, although I might preface my remarks by saying that there must be an easier way to make a living than by being Secretary of

Agriculture. It's a job that inevitably invites more brickbats than bouquets, particularly during a period of adjustment in agriculture such as the one through which we are now passing.

Between now and the 1958 elections, we shall again be hearing politically inspired charges about the agricultural situation, and we must be prepared to meet them head on with cold, hard facts.

We'll be hearing that the family farm is disappearing—that it's on the way out. The truth is that farms are increasing in size because modern technology makes it possible for the farmer and his family to operate larger units. But it is also true that today—as 25 years ago—96 percent of the farms in this country are family operated.

Moreover, the efforts of this administration to attack specifically the problems of small farmers through the rural-development program have been stymied by the Democrat-controlled 84th and 85th Congresses. We have been denied the funds required to implement this program even on a modest basis.

We'll undoubtedly hear again, as we have in the past, that the agricultural economy is virtually bankrupt. Certainly no one will deny that agriculture is in a cost-price squeeze, but nevertheless farm assets are at an all-time high and so are farm real-estate valuations.

We'll be hearing that rigid price supports or some bob-tailed version of the Brannan plan are the answers to the farm problem. The truth is that many of agriculture's present ills developed because we continued fixed, wartime price supports too long after the situation they were designed to meet had ended. As for the Brannan plan, it's a hodgepodge of socialistic nonsense that neither farmers, farm organizations, nor Congress itself has ever shown any disposition to accept.

We'll probably see the administration's soil bank used as a whipping boy by the political opposition—the same people who a few short months ago were claiming it as their very own. Now they are attempting to blame it for all of the shortcomings of the old parent programs whose weaknesses made the soil bank necessary.

Now I should like to list some positive accomplishments of this administration—accomplishments in which we, as Republicans, can take genuine pride:

1. The St. Lawrence Seaway is under construction. This will bring enormous benefits to agriculture through lower transportation rates.

2. Five million farmers and farmworkers have been brought into the social-security program. For years farmers had helped to pay the costs of this program every time they bought anything, but not until the Eisenhower administration were they permitted to share in the benefits.

3. Farmers have received new tax benefits. There was, of course, the 10-percent income-tax reduction received by all taxpayers, but in addition to this farmers were given accelerated tax write-offs for equipment, special deductions for certain conservation practices, and a refund of taxes collected on gasoline used on the farm.

4. Emergency programs to assist farmers hit by drought, flood, and other natural disasters were instituted promptly.

5. Farm credit facilities have been broadened and made more effective.

6. Determined efforts to regain lost export markets have been undertaken. The result is that shipments of American farm goods abroad during the present crop year are running at the highest rate in history.

7. Research appropriations to aid farmers have been more than doubled.

8. Most important of all, the long slide in farm income has been halted and reversed. Net farm income in 1956 was 4 percent higher than for the previous year. A further increase is expected in 1957.

Sixty percent of the much-advertised decline in the parity ratio occurred before the present administration took office. Ninety percent of the decline came while high rigid wartime price supports were in effect.

The much-publicized decline in net farm income began 10 years ago. Incomes have declined every year since then but two. One was the wartime year, 1951; the other a year of peace, 1956.

The peak of net farm income was reached in 1947. Gross cash farm income from marketings is higher today than it was 10 years ago. The reduction in net income is a result of higher costs, not lower gross income.

Tonight I want to talk about the road ahead for agriculture.

Much attention has been focused on the huge stocks of farm products owned by or under loan to the Government—stocks which now represent an investment of $8.3 billion. Agriculture is faced not only with the necessity of reducing these stocks; there is the even greater challenge of using constructively the abundant production which, year after year, is likely to flow to market from American farms.

This great outpouring of agricultural abundance is the result of improved technology, of course. But it is also partly the result of a prolonged period of incentive prices—incentives supplied first by the market place and then by law.

Price support policies of the past are responsible, to a degree, for the presently overexpanded agricultural plant. While the technological revolution undoubtedly supplied the means for increasing output, the support program helped provide the incentives. And while these policies increased production on the one hand, they choked off consumption on the other. The result is an accumulated stock and a continuing production of farm products greater than our growing population can assimilate unless adjustments are made.

How can we best make the adjustments called for by the prospect of agricultural abundance?

Can we reduce production? For 25 years we have tried to control production by restricting the acreage of a few selected crops. Yet total production has increased even more rapidly than the increase in our population. The evidence of the past quarter century is that farmers offset acreage controls by fertilizing more heavily, increasing the yield per acre. And they use the acres diverted out of one crop to produce other crops.

Shall we sell these surplus commodities abroad? Yes, we should and we are. Agricultural exports this year are at an alltime high. We sell our commodities for dollars, both for cash and for credit. We sell them for foreign currency, and we barter them for strategic materials. Yet there are limits—and we may be approaching them—to what we can do in the way of selling our abundance abroad.

Shall we give the commodities away? Yes, we should within prudent limits, to the extent that we can do so constructively. This past fiscal year we donated more than 2 billion pounds of farm products to public agencies, charitable organizations and needy persons at home and abroad.

Shall we put a part of our excess productive capacity into the soil bank? Yes, and we are doing this, chiefly through the acreage-reserve program. But this is temporary and costly. It would be difficult to justify the continued payment of such sums as would be needed to operate a permanent acreage-reserve program. And a permanent program which subsidizes nonproduction is contrary to our tradition.

Shall we destroy food, or let it spoil? No, we should not, and we have exercised every safeguard to prevent spoilage. Our people would not condone such moral bankruptcy or such economic waste. The capacity to produce abundantly is a blessing; the challenge is to make wise use of this abundance.

Is there any way out of this impasse? I am convinced that the answer is "yes."

We can so price our products that we reduce the incentive for overproduction.

We can price our products so they will move into use.

We can move away from acreage-control programs that do not control.

We can expand markets for industrial and nonfood uses—as we are doing in our increasingly vigorous research programs.

We can, above all, build up our markets for livestock products—milk, meat, and eggs—wholesome, tasty, nutritious foods that people can and will purchase in greater quantities if the price is attractive.

We can consume more of our food in the form of livestock products. We have been moving toward an animal agriculture during the past 20 years and we can move further.

We can give special attention to the problems peculiar to small farmers—as we are doing in the rural-development program.

The present mandatory price support-acreage control program for corn, based on legal formulas, has the opposite philosophy. Its objective is scarcity. Corn acreage, cut back by the control program, is now at the lowest level in 66 years. This program has reduced corn acreage in the Corn Belt and increased it in California, Washington, Oregon, and other areas. The corn producing area has been spread out and diluted. Nineteen years ago, when the commercial corn area was laid out for acreage control purposes it included parts of 12 States. Now it includes parts of 24.

But even more amazing is the size of the corn allotment in the commercial area. In 1938 the allotment totaled 40.5 million acres; for 1957 the allotment is 37.3 million acres. With a smaller pie being cut into more pieces, is it any wonder that most corn producers here in the Corn Belt prefer to ignore their allotments?

Corn is the major feed grain, far exceeding in importance all the other feed grains combined. But the other feed grains are moving up. But cutting back on corn, the program has provided an opportunity for an expansion in the acreage of competing feed grains such as barley and sorghum grain.

Are corn farmers willing to move in the direction of competitive pricing, more freedom and growing markets?

It appears they are. More than 61 percent of the corn farmers who voted in last fall's referendum expressed a preference for greater freedom to plant, coupled with greater flexibility of price supports. Yet, because the law required a two-thirds vote to carry, corn farmers today continue under a program which the majority of them have disapproved.

We now have this interesting situation:

A clear majority of the corn farmers voting in the referendum have expressed a willingness to move toward greater freedom of operation and greater reliance on our marketing system. Yet the law has not been changed. In fact, efforts to obtain more realistic corn legislation were beaten down in recent months in both the House and the Senate. In both instances a majority of Republicans supported the bills while a majority of the Democrats opposed them.

Is there not the courage to strike a legislative blow for freedom when the people directly concerned have, in effect, requested it?

We have heard, until now, that economic freedom is lost because the people most concerned bargain it away in exchange for security. The leaders of the people, we are told, cannot stand against the strong popular urge for what is considered to be economic security.

But how shall we then explain a circumstance in which the people themselves request less Government interference, but their Government will not relax its paternalistic grip?

We have come a long way indeed, in this land of liberty, when we continue to impose on a particular group of farmers, against the will of the majority, control programs which do not control, and support programs which pile up surpluses and lose markets. Let's remember this as we concentrate on 1958.

There are more than 200 farm products for which we are authorized to provide price supports. For six of these, corn among them, programs are in effect to control production and to support prices according to a legal formula.

These 6 commodities bring in only 25 percent of our farm income.

Yet for these six commodities, surpluses are greater, costs are higher, infringements on individual liberty are more extensive, international relations are placed in greater jeopardy, and farm complaints are more vociferous than for all the other of the 200 commodities combined.

Farmers who produce certain commodities, such as soybeans and livestock, have demonstrated that realistic pricing can build markets and increase net income.

Our present need is not to stimulate production to meet the demands of war. Our need is for agricultural adjustments to accommodate the tremendous technological revolution through which agriculture is passing. And it is time to make further program changes called for by these new conditions.

Most of the professional research institutions which have studied the problem have said so.

The corn farmers, voting with both their corn planters and their referendum ballots, have said so.

These voices are being heard in a growing crescendo.

We should ever lend our ears to voices raised in behalf of freedom, responsibility, and enterprise. The most glorious pages of history result from giving audience to the plea for freedom; the darkest pages result from its denial.

The Republican Party has a long and glorious history in the never-ending battle for human freedom. We must and we will continue to give leadership in that great cause.

Freedom can come to full flower only in a world at peace. Therefore, the achievement and maintenance of a just and lasting peace remains the major objective of this administration.

May God give us the strength and wisdom to attain that objective.

Goshen News Honored

EXTENSION OF REMARKS

OF

HON. F. JAY NIMTZ

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. NIMTZ. Mr. Speaker, it is with genuine pride that I call the attention of my colleagues to the fact that one of the most coveted honors in the field of journalism has been won by a newspaper in the Third Congressional District of Indiana. The newspaper is the Goshen News, of Goshen, Ind., and the award was the 1957 Ayer cup for excellence in typography, makeup, and printing.

The Goshen News was chosen by the judges for this great honor in competition with 823 other newspapers of all sizes in the United States. Of particular note is the fact that the News, with a circulation of only 7,745, is the smallest newspaper ever to have won the Ayer cup.

Under leave to extend my remarks in the RECORD, I would like to include a letter of congratulations to Frank L. Haskell, publisher of the News, together with an article by R. C. Lehman, managing editor, which appeared in that newspaper under date of May 15, 1957:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 11, 1957.

Mr. FRANK L. HASKELL,
Publisher, Goshen News,
Goshen, Ind.

DEAR BUD: It was with extreme pleasure and pride that I read of the award of the N. W. Ayer cup to the Goshen News for excellence in typography. It is my understanding that you won this award in competition with 823 other newspapers in the United States.

Please extend to your staff my congratulations upon winning this award and bringing this great honor and distinction of the newspaper publishing world to the Third District of Indiana.

Kindest personal regards to you and the Goshen News family.

Sincerely yours,

F. JAY NIMTZ,
Member of Congress.

CONGRATULATORY EXPRESSIONS POUR IN TO THE NEWS FOR WINNING AYER AWARD

(By R. C. Lehman)

Ever since announcement was made a month ago of the awarding of the Ayer Cup for excellence in typography, makeup, and printing to The Goshen News, messages of congratuations have poured into The News office. They have come from every part of the country, from Maine to Texas and from Alaska to Florida. They have come largely from the publishers of other newspapers—professionals of the craft whose praise is especially sweet to our ears—but they have also come from representatives of every facet of the printing trade, from public officials, and from friends who have no connection at all with the industry.

There have been so far well over a hundred formal letters and telegrams in addition to the countless telephone calls and personal congratulations. They have come from some of the biggest newspapers in the Nation and from some of the smallest, from papers far away and from our neighbors here in Indiana. The volume of messages has been so great and the value and significance of the award has been so stressed in them that even we here at The News, who were really overwhelmed at receiving the award, are only now beginning to realize how truly great a distinction has been conferred on The News. The News was chosen in competition with 823 other daily English language newspapers by N. W. Ayer & Son, of Philadephia, as being the best, regardless of size, in typography, makeup, and printing. In other words The News was chosen as making the best appearance to the eye of any of the entries, which included many if not most of the largest newspapers published in this country.

ACCOUNTS OF AWARD

Many newspapers carried extensive accounts of the awards. The Christian Science Monitor was one which published a long account, together with a two-column 6-inch reproduction of the front page of the winning issue of The News and a history of the paper. The Monitor itself received third honorable mention for papers in its class of over 50,000 circulation. The News circulation is 7,745, and is the smallest newspaper ever to have received the top award. The Monitor was among those who sent a message of congratulations to The News.

Among other newspapers heard from were the New York Daily News, which has the largest circulation of any newspaper on this continent. Robert G. Shand, managing editor, sent his congratulations. And separately, from the White House correspondent of this same newspaper, Francis M. Stephenson, a onetime resident of Goshen and well known here, came another letter which said: "You not only put out a good looking paper from a typographical side but you publish one of the newsiest papers."

From closer at home was a letter from Philip Maxwell of the Chicago Tribune, extending congratulations, and another from Quentin P. Gore of the Chicago Sun-Times who said "It is a notable achievement." Barry Bingham of the Louisville Courier-Journal and the Louisville Times, said: "I feel sure that you must share my conviction that no newspaper can achieve maximum effectiveness unless its appearance makes an appeal to the eye of the reader. Your success in this direction in a community the size of Goshen is really outstanding."

FROM FAR NORTH

From Sitka, Alaska, came a letter from Franklin R. Hoff of radio station KSEW asking for a tape recording of an interview on the subject, stating that "we would not only broadcast this on KSEW but also send it to the four stations on the Midnight Sun network and the Northern Light Broadcasting Co. at Cordova. This must have been a great moment for the man who is responsible for the makeup that won the prize."

Franklin D. Schurz, editor and publisher of the South Bend Tribune, wrote: "I think you have an excellent newspaper and I am sure that it will continue to improve and grow in the future." From the same newspaper also came congratulations from Paul Neville.

W. L. White, of the Emporia (Kans.) Gazette, another famous newspaper, has asked for a copy of the prize-winning issue, and Charles Reynolds, news editor of the Des Moines Register and Tribune, who also has an Elkhart County connection, wrote: "It made me proud of my home area. I showed several issues of your paper to various people on our staff here and they agreed that you put out a neat, distinctive paper." Mr. Reynolds is a son of Mr. and Mrs. Robert Reynolds, of New Paris, and his wife is the former Frances Beck, of Goshen.

Some writers hinted a little wryly but good naturedly of feelings of jealousy or envy. A. W. McCall, editor of the Daily Tribune at Grand Haven, Mich., a friend of the publisher of the News, wrote, "I thought you were going to bring your foremen up to this area sometime (to see how the Tribune operated.) Maybe it would be better if we came down to see you." Malcolm Bauer, associate editor of the Oregonian, at Portland, Oreg., wrote, "Congratulations on your winning the Ayer award. You have our respect and envy." Dale Stafford, editor of the Daily News at Greenville, Mich., said, "For years I have been entering newspapers and to date I haven't received an honorable mention, so I know how difficult it is to get the prize." John Stingle, of the Los Angeles Examiner, wrote, "Congratulations on your achievement from one of the losers," and a communication from the Manchester Evening Herald, Manchester, Conn., is signed "Jealously, Louis Mandell, news editor."

LETTER FROM GOVERNOR

Harold W. Handley, Governor of Indiana, wrote to the editor of the News that "It is with a great deal of pride I read that an Indiana newspaper, the Goshen News, has been awarded the coveted Ayer Cup for typographical excellence. Please convey my heartiest congratulations to all members of the News family for the vital part each has

played in bringing national recognition not only to your newspaper but to the community and State it so proudly represents."

Another letter of congratulations also came from F. JAY NIMITZ, the Indiana Third District's Representative in Congress.

The Honorable Carl Vinson

EXTENSION OF REMARKS
OF

HON. STERLING COLE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. COLE. Mr. Speaker, on yesterday, the Secretary of Defense, Mr. Charles E. Wilson, was host to the members of the Armed Services Committee of the House, members of the Joint Chiefs of Staff, and other distinguished persons in the field of aviation, at a luncheon in his office at the Pentagon to provide an opportunity for the National Aeronautic Association to present the Elder Statesmen of Aviation award to our distinguished colleague, the Honorable CARL VINSON, chairman of the Armed Services Committee of the House.

It was my privilege to be present on this occasion and join with my colleagues in paying tribute to our great chairman.

After preliminary introductory remarks by Thomas Lamphier, president of the association, a eulogy of Mr. VINSON was made by Mr. John F. Victory, chairman, Committee on Elder Statesmen of Aviation, National Aeronautic Association. His remarks were as follows:

Mr. Secretary, Mr. VINSON, and honored guests, when Orville Wright made the first successful flight of an airplane in 1903, there was but small realization by the world of the future impact of that event upon the progress of civilization and the destinies of nations. Likewise the election of Hon. CARL VINSON, of Georgia, to the United States Congress 3 months after the start of World War I, did not forecast the significance of the contributions he would make to American aviation. On September 12, 1925, there occurred the first of a long series of events which were to bring to bear on the future of American aviation the devotion, talents, and wisdom of this budding statesman from Georgia.

At that stage in our history, World War I had intervened. Airpower, for the first time in history, had become an instrument of warfare. But 7 years after the close of that war, military aviation in the land of its birth was still in its infancy. On June 30, 1925, the Army had about 1,400 planes, of which 396 were designated "standard planes," a term which we understand today as meaning "combat ready." The Army Air Service, as it was then known, had 912 officers.

Naval aviation had 398 service airplanes, of which 218 were with the fleet and the remainder in reserve. Naval aviation had 623 officers, of whom 377 were pilots. It had one carrier, the *Langley*, which was a converted collier used chiefly for experimental purposes.

There was a more or less popular movement in those days to unite Army and Navy aviation into one separate organization, to discontinue the surface fleet, and to limit the Navy to submarines. Had such policies been adopted in 1925, it would have been quite difficult, to say the least, for America to have carried the war to Japan during World War II. The country is indebted to farsighted and responsible officials in those days who kept America's military policy on an even keel. Among those men of vision, courage, and statesmanship was our guest of honor today, Congressman CARL VINSON, of Georgia. He was one of nine men appointed by President Coolidge as members of the President's Aircraft Board, commonly known as the Morrow Board, in honor of its Chairman, Dwight W. Morrow.

That Board of distinguished Americans was appointed September 12, 1925, "for the purpose of making a study of the best means of developing and applying aircraft in national defense and to supplement the studies already made by the War and Navy Departments on that subject."

After extensive hearings, the Morrow Board separated the wheat from the chaff, and made such sound and solid findings and recomendations, that for the first time in our history an entire program of legislation proposed by an investigative body was enacted into law. For example, the Morrow Board recommended and the Congress approved 5-year aircraft procurement programs for the Army and Navy; assistant secretaries for aeronautics in the Departments of War, Navy, and Commerce; and enactment of the Air Commerce Act that became the legislative cornerstone for the remarkable development of civil and commercial aviation in America. Approval by the Congress of these and other recommendations of the Morrow Board marked the true beginning of the transition of airpower from infancy to adulthood.

Among other important steps were: The change of the name of the Army Air Service to Army Air Corps; representation for Army aviation on the Army General Staff; making permanent the principle of extra pay for flying duty; and renewed emphasis on the procurement of additional personnel for flight training and duty, as well as new and improved types of aircraft. Practically the same recommendations were made with reference to naval aviation, and it is significant to note that each of these recommendations was subsequently fully implemented, the Congressman from Georgia being the author of a number of the legislative proposals which resulted from the Board's recommendations. So, for the first time in the peacetime history of our Nation, aviation as an instrument of national defense received the full blessing and support of the highest echelons of our Government.

The dominant role of airpower in World War II was universally recognized. Following that war, and the establishment of a separate Department of the Air Force, economy again threatened the growth of aviation. Here again came Mr. VINSON'S vision and statesmanship. He was the author of legislation providing for a 70-group Air Force. He successfully led a fight for additional funds for more planes for the Air Force, and this in the face of a then current economy drive in the Congress. He was the author of the Air Force Organization Act. He was the author of the Marine Corps Organization Act, which gave that organization its first statutory charter, with 3 combat divisions and 3 air wings. He has consistently and successfully led the support of naval aviation.

As Chairman of the House Armed Services Committee, he guided the difficult hearings which resulted from the B–36 controversy in 1949. Faced with serious dissension among the military services, he directed the Committee inquiry in such a manner as to allay the fears of service personnel and preserve the steady growth of aviation in the military services. He then defined national airpower as follows: "The national airpower consists of the military airpower of the various services, plus commercial aviation, plus the national industrial and manpower resources pertaining to aviation." That definition was adopted by the Committee and remains the guiding policy of the Nation today.

Elected to the Congress on November 3, 1914, Mr. VINSON is now serving his 43d consecutive year in the House of Representatives. He was Chairman of the Naval Affairs Committee for 16 years, and is now serving his 7th year as Chairman of the House Committee on Armed Services.

In the judgment of the National Aeronautic Association, the long and fruitful legislative career of CARL VINSON, Congressman from Georgia, and his steadfast and farsighted support of modern facilities for aeronautical research as the foundation of air progress; his support of the fullest practicable development of airpower by an independent Air Force, and of air arms inseparable from the Army, Navy, and Marine Corps, stamp him as a most constructive and influential public servant in the Congress of the United States. Over a long period of years he has, with exceptional competency and vision, provided for the vitally important development of all segments of airpower, and has demonstrated outstanding leadership in providing a sound legislative basis for the national security. On this record the National Aeronautic Association proudly designates CARL VINSON "Elder Statesman of Aviation."

At the conclusion of Mr. Victory's statement, Secretary of Defense Wilson read to the assemblage the citation, which is as follows:

The board of directors of the National Aeronautics Association of the United States of America, pursuant to authority duly vested in it, does hereby constitute and designate CARL VINSON elder statesman of aviation in recognition of his significant and enduring contributions over the years to the progress of aeronautics, and his demonstrated qualities of patriotism, integrity, and moral courage worthy of emulation.

Mr. VINSON then responded in a very effective, moving, and appropriate manner with the following statement:

Mr. Secretary, Mr. Lamphier, Dr. Victory, my colleagues, and distinguished guests, I deeply appreciate the high honor that the National Aeronautic Association has conferred upon me by designating me an elder statesman of aviation.

There are times in a man's life when it seems almost impossible to find either the voice or the words to express the emotion of the human heart. Today is such an occasion in my life.

For you, to ascertain the deep feelings that surge within me, I urge you to look beyond my simple words, and understand the gratitude, that I have for the honor which has been bestowed upon me, and for the overly generous things that have been said.

To you—the officers and members of the National Aeronautic Association who have selected me for this award, to the civilian and military leaders of our Nation, and to you my colleagues of the Congress honoring me by your presence—I want to express my deep appreciation.

This is an occasion which I shall remember to the last day of my life.

Fate has been kind to me. I have been privileged to be a Member of the Congress for almost 43 years.

During that time, I have experienced the trials and tribulations of three wars, followed by the elation of victory, and the gratitude that our great Nation continues to survive, prosper, and champion the cause of freedom throughout the world.

During this same period, I have been privileged to observe and perhaps make a modest contribution in legislation to the irresistible growth of American aviation.

To me, it seems but yesterday that our Nation's aircraft flew at speeds of scarcely 100 miles an hour, with a maximum range of 200

miles, and the ability to carry only the smallest types of military weapons and bombs.

I must confess that I had unbounded faith in the future of aviation when I sat as a member of the Morrow Board in 1925 and assisted to the best of my limited ability in writing a legislative program to chart aviation as an important weapon in our national defense. But I am frank to say that my vision did not forecast the status of aviation as it is today.

In the brief space of about 30 years, we were destined to be in the jet-atomic age, with manned aircraft traveling three times the speed of sound, carrying atomic and hydrogen weapons so devastating that they defy the mind of man.

But even now, the inventive genius of man is bringing us into an age of rockets and missiles of such speeds and capabilities as to further defy imagination.

Who knows what vistas will yet be opened through the further genius of man in this great field of aviaton.

In recalling the progress of aviation over the past 43 years, I can only conclude, that its future will be as startling as its past.

While its pathway has not always been smooth in the legislative halls—it has seen its ups and downs—I am deeply gratified that my contributions, small as they may have been, have helped in keeping American aviation high in the sky.

We who write the law, formulate the policies, and provide the money—all of which is important—nevertheless play but a minor role in the full development of aviation. The greater contribution to American aviation is made by the men and women who labor at the drafting boards, the scientists at the wind tunnels, the engineers at the test laboratories, and above everyone else, those brave and patriotic officers and men who have in the past and are now dedicating their lives to the actual operation of manned aircraft who proudly wear on their uniforms the insignia of the pilot's wings.

So long as this Nation remains militarily strong, we will be a free people. Our national defense must ever be the paramount concern of the Nation.

I have no hesitancy in saying that today the capabilities of American aviation are of such powerful and forceful character as to provide the Nation with the shield of protection that gives us the peace we enjoy at this hour.

As the years slip by, my life has been greatly enriched by my association of over 40 years with the officers, men, and civilian heads of our armed services, as well as our leaders in government, research, and the aviation industry.

This scroll, so beautifully inscribed, will be placed in an honored spot in my home and will be one of my most prized possessions. And as the shadows of the long, long night begin to fall across my pathway, it will ever be a reminder to me that in my humble and feeble way, I tried to make some contribution for the benefit of our beloved country.

I thank you from the bottom of my heart.

Steamship "Matsonia" To Strengthen American Merchant Marine

EXTENSION OF REMARKS

OF

HON. PATRICK J. HILLINGS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. HILLINGS. Mr. Speaker, it was recently my pleasure to inspect the steamship *Matsonia*, the fourth and newest of the Matson Lines "white ships," recently reconstructed at Newport News, Va.

Interior design was carried out under the direction of Harry Neafie, a New York industrial designer and stylist who spent 2 years researching the colors of the Pacific with the aid of 19 prominent American artists. Hawaiian motifs have been carried out in bamboo, teak wood, leather, Venetian glass mosaic, gold and silver leaf, and lava stone, as well as abalone shells, feathers, and flowers. Indirect lighting has been installed throughout the ship, unusual effects being achieved with the use of mirrors and tropical plants.

The ship is complete in special shops and services, some of which are a swimming pool, beauty and barber shop, photo workshop and print shop, motion-picture equipment, a hospital complete with operating table and 4 separate wards, and kennels accommodating 12 pets.

Completely air-conditioned, the *Matsonia* provides its 760 first-class passengers with facilities to select the temperature of their own staterooms. Safety as well as comfort is a prime feature of this liner which totals 638 feet in length and 82 feet in width. Two radar sets and a thermostatically controlled sprinkler system are present in addition to the latest aids to navigation. There are 560 telephones, 1 in each stateroom and in all public areas, shops, offices, and officer quarters. Three hundred loud speakers are strategically installed throughout the ship for programs and announcements. The all-electric galley is one of the most modern kitchens to be found anywhere and is furnished with eight ranges, a bakery, and a butcher shop.

The *Matsonia* will travel the California-Hawaii route made famous by the Matson Navigation Co., currently under the very able presidency of Mr. Randolph Sevier. Her 26,000 tons will be driven by a twin-screw, geared turbine propulsion plant to maintain a cruising speed of 20.5 knots. Alternate crossings from Los Angeles and San Francisco will be completed in 4½ days, thus the *Matsonia* with 165,693 cubic feet of dry cargo space is forging another link in our trade with the Pacific and Hawaiian Islands. In addition to this contribution to increased trade, the *Matsonia* will help strengthen the United States Merchant Marine, inasmuch as she will be readily available as a troop carrier in the event of war.

Michigan Week

EXTENSION OF REMARKS

OF

HON. CHARLES C. DIGGS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. DIGGS. Mr. Speaker, throughout the State of Michigan this week, May 19–25, citizens will be celebrating Michigan Week, a special observance calling to mind the rich heritage, resources, and opportunities of Michigan, as well as its contributions to the rest of the Nation and world. Special tributes and celebrations will take place in educational, civil, social, and political groups, being highlighted by an exchange of mayors in 48 communities, and recorded by press, radio, and TV.

The theme of this celebration, appropriately enough, is It's Great to Live in Michigan. Michiganders mean this—for Michigan has much to offer. It has amazing variety in both types of industry and in the varied origin of its people. It is an example of dynamic progress—in both astounding production of material goods as well as enlightened ideals and goals.

Michigan's variety is reflected in its three leading industries—manufacturing, agriculture, and the tourist trade. Michigan ranks first in the manufacturing of automobiles, pharmaceuticals, adding machines, foundry products, machine tool accessories, ranges and heating devices, paint and heavy chemicals. Detroit, its largest city, is the industrial capital of the world. No other major city, on a per capita basis, has as many factory workers or as large a volume of manufactured products. Michigan is also a leading producer of such products as furniture, paper products, furnaces, chemicals, and cements. Already America's largest inland world trade center, Michigan is eagerly awaiting the completion of the St. Lawrence Seaway to realize the vast potential it will bring, enabling Michigan to become an even larger and more effective international trade center.

Simultaneous with a greater production of goods, Michigan has set an impressive example by its constant striving for recognition of the dignity, rights, and human worth of every individual, and a higher standard of living for all. The struggle to realize these ideals is being waged by the practical idealism, imagination, and industry of dedicated labor unions, enlightened management, numerous social organizations, and State and local government. Recent concrete evidence of the effectiveness of their efforts is a fair employment practices law, and that thousands of refugees have found new lives in Michigan.

Agriculturally, Michigan leads the Nation in the production of sour cherries, navy beans, cantaloups, celery, cucumber pickles, and strawberries for market, and ranks second and third in many other fruit and vegetable categories. Hand in hand with food production, however, one notes that Michigan is also a leader in agricultural research and development. Michigan established the first agricultural college, Michigan State College, which itself founded the first horticultural laboratory, first short course in dairying, first hybridization of corn, and first building in America for teaching scientific agriculture. Not only does MSU continue exploring new horizons in agriculture and horticulture, but it is sharing its knowledge with the rest of the world, as evidenced in educational missions established in such far-flung places at Okinawa, Colombia, and India.

The tourist trade, which ranks as the leading industry in two-thirds of the State, balances the concentration of mechanical industry perfectly by offering 11,037 lakes, the longest shoreline of any State—3,121 miles—bordering 4 of the 5 Great Lakes, scenic farm and forest land, and renowned fishing and hunting facilities. All types of sports abound, from skiing to swimming, golf to baseball. Supplementing these natural resources, Michigan leads the Nation in number of State parks and prepared campsites—5,200—available to the public, topped off by a friendly and generous people, happy to greet visitors and help them enjoy the wonders of their State.

In addition to contributions through industry and natural resources, Michigan has contributed in large measure to the cultural, intellectual, and social advancement of our country. From her early schools, libraries, and cultural and philanthropic groups have emerged many illustrious scholers and statesmen, and institutions such as the Detroit Symphony, Museum of Art, Cranbrook Academy of Art, Greenfield Village, and the Edison Institute, to mention a few. Michigan boasts an excellent and expanding school system with several outstanding State and private colleges. The University of Michigan has consistently forged ahead with important "firsts": the first major university to admit women—1870—first school of public health, first school of natural resources, the only center for Japanese studies in tht United States. The Ford Foundation supplies one outstanding example of philanthropic work on a worldwide basis, making a profound contribution on the present and future by supplying funds to organizations doing research in the field of social advancement.

Although justly rejoicing in accomplishments of the past and present, Michigan gives every evidence of being well aware of the revolutionary future fast dawning: the perils and promise of automation, atomic energy, revolutionary concepts of time and space, the dangers of communism, and the crusade of civil rights for all, as aptly described in the Michigan Declaration of June 2, 1956. Proud of past accomplishments, and cognizant of the present, Michigan is quietly and diligently working forward toward a new era of peace and prosperity for all.

Address of Hon. Herbert C. Bonner, of North Carolina, at Maritime Day Celebration

---

EXTENSION OF REMARKS

OF

HON. L. MENDEL RIVERS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. RIVERS. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include therewith an address by the Honorable HERBERT BONNER on the occasion of Maritime Day, Charleston, S. C., May 21, 1957.

Mr. Speaker, no man in the Nation has done more for our fourth arm of defense—our merchant marine—than has this distinguished chairman of the great Committee on Merchant Marine and Fisheries. He is rightfully entitled to the name of "Mr. Merchant Marine." Mr. BONNER knows what it means to be without this indispensable force of security. He is in the process now of bringing our American-flag vessels into the greatest tonnage in the world. His wonderful address to my people in Charleston reflects his understanding and knowledge of this important national defense organization.

Mr. Speaker, also included herewith is a newspaper account of Mr. BONNER's speech from the Charleston News and Courier, May 22, 1957.

The address and article follow:

REMARKS BY HON. HERBERT C. BONNER, DEMOCRAT, NORTH CAROLINA, CHAIRMAN OF THE HOUSE COMMITTEE ON MERCHANT MARINE AND FISHERIES, AT MARITIME DAY CELEBRATION AT CHARLESTON, S. C., MAY 21, 1957

I am pleased to be your guest in the great and historic port of Charleston to celebrate National Maritime Day and to commemorate the 138th anniversary of the sailing of the American steamship *Savannah* across the Atlantic. This history-making event, originating in your neighboring State in the Port of Savannah, was the first voyage by a steam vessel across any ocean.

As Chairman of the Committee on Merchant Marine and Fisheries in the House of Representatives, I am particularly concerned about the growth and development of the port cities of our country—and their adequacy to serve the needs of the Nation in both peace and war.

As a North Carolinian, and your neighbor, I view with personal pride the growth and increasing importance of the South Atlantic ports, and the significant contribution which they are making to the economic welfare of the Nation.

Because this harbor afforded a natural haven for ships and could be easily defended by both land and sea, Charleston became an important port in earliest colonial times following the settlement of the Carolinas.

As early as 1682, she was sending steady supplies of naval stores, tar, pitch and rosin to the islands in the Carribean. In the days prior to the Revolutionary War, rice and indigo became her chief items of commerce, while in the succeeding years to come, cotton and tobacco were to gain considerable prominence.

Although a leading port, Charleston did not develop without difficulty. With mounting pressures from other port areas in an expanding economy, coupled with the disadvantage of unfavorable rail rates, ocean tonnage declined.

The proud part played by the port and city of Charleston through the War Between the States—a struggle against tremendous odds—left scars that were not fully healed until the early part of the century when she became an important military center.

Since World War II, your port has made remarkable progress. Under the guidance of your progressive-thinking Ports Authority, she has managed to more than double the amount of her pre-World War II tonnage.

Today, she ranks among America's leading ports, and great quantities of cargoes move across her highly mechanized and modern facilities.

Maritime Day is a major national anniversary, one of deep significance to this country whose origins and growth developed from commerce on the seas. Our gathering here tonight is being repeated all over the country by thousands of informed Americans who know the part that our maritime commerce has played in making the United States—from pioneer beginnings—the greatest Nation on earth.

This occasion is being celebrated in recognition of the lessons of history that have taught us that we must develop and maintain a strong merchant marine if we are to continue to enjoy the bounteous blessings of this great and productive country of ours and remain secure from forces from without that would destroy our culture and our way of life.

Usually when we talk of the progress of our merchant marine we talk in terms of commodities, of tonnages and dollars of exports and imports, of deadweight tons and speed of ships, of numbers of shipways and area of terminal facilities. In time of war we talk of ships sunk compared with ships built. The statistics and figures on these things are impressive and revealing as to our progress.

But, in this year of 1957 when we are enjoying a growth and expansion of economy unprecedented in the history of the world, I want to talk about people and not statistics. I want to pay tribute to the men of the American merchant marine who build and man our ships in peace and war.

Three times in the past 40 years the American merchant marine has been called upon for seemingly superhuman efforts to meet the common enemy. Each time our maritime industry has met the challenge and performed miracles of production to speed the final victory.

Today, in the midst of peace and prosperity, let us not forget the thousands of merchant mariners who died without military honor or other recognition when their ships were torpedoed, bombed and shelled during 4 years of World War II—just a few short years ago. These men—over 5,000 of them—died for what we have today. Through their efforts, and those of their brave shipmates, the Allied Forces were able to deliver the most devastating blow any enemy has yet encountered. Indeed, the movement of ships manned by these courageous men was the greatest logistic feat the world has ever known.

The impact of World War II was first felt by American citizens on the night of September 3, 1939, aboard the British passenger liner *Athenia*. As the *Athenia* was calmly steaming on a westward course off the Scottish Hebrides, her 1,400 passengers—800 of whom were Americans—were busy listening to radio reports of the new war. In her wake, 120 miles away, was the American freighter *City of Flint*, also sailing on a westward course. Shortly after 9 p. m., the *Flint's* radio operator was seen rushing to the ship's captain. His message told a tragic tale; the *Athenia* has been torpedoed. While the Berlin radio denied that a U-boat was responsible, and captured German records later showed that Admiral Karl Doenitz, Hitler's chief submarine commander, had ordered to let the *Athenia* pass, this incident foretold what American seamen were soon to face.

After participating in the rescue of survivors from the *Athenia*, the *City of Flint* returned to New York, discharged her passengers, and again sailed westward. But this time, she was seized by a German battleship and ordered to proceed to Germany as a prize of war. Fortunately, before reaching her destination, she was intercepted by the British Navy and released to return home.

Within the first month of the war, German subs had sent over 30 ships to the bottom; Britain had declared a blockade on Germany, which threatened our own shipping; and, over 60,000 Americans were trapped abroad.

The next incident involving an American ship was the attempted seizure of the freighter *Mormacsea*, which was caught by the Germans in a Norway port. The story is told that her captain personally guarded the gangplank and defied the Nazis to pass. After 6 days, she was permitted to sail.

After President Roosevelt's famous "Arsenal of Democracy" speech, in which he declared that the United States would supply any nation who fought against Germany and Italy, things grew worse. On November 8, 1940, we lost our first merchant vessel, the freighter *City of Rayville*. As she sailed along the Australian coast, she is said to either have struck a mine or was torpedoed. Following this incident, in May 1941, the United States freighter *Robin Moor* was torpedoed off Africa. During the same month, the President declared a national emergency, followed by his famous "shoot on sight" order. In the succeeding months, just before Pearl Harbor, 3 more United States ships were torpedoed.

Shortly after Pearl Harbor, the Matson liner *Lurline* sailed from Honolulu under strict naval orders not to deviate from course. As she journeyed along, her 800 passengers were told of a distress message received from the United States freighter *Cynthia Olson*. Since that time, no one has ever heard from the *Olson's* crew of 33 and 2 soldiers.

A more terrifying incident occurred when the United States freighter *Lahaina* was sunk. On the night of December 10, 1941, as she was steaming off the Hawaiian Islands, shells from the deck guns of a Jap sub tore into her without warning. The survivors of her crew quickly manned lifeboats. The Japs approached one of the boats, trained a machinegun on her helpless crew, then suddenly submerged. Although most of her crew were able to escape in open boats, this incident was the beginning of a merciless campaign, marked by the ruthless slaughter of helpless survivors.

As more and more of these incidents occurred, seamen began to shout "give us the guns" and "give us the chance to fight back." But the Navy was needed elsewhere, a goodly portion of our fleet having been destroyed at Pearl Harbor.

In these first frantic days of open warfare, there were few reports of victory over the enemy.

The situation became so bad that President Roosevelt in January of 1942 asked Congress for appropriations to build some 1,700 ships within a 2-year period. This was the beginning of our Liberty fleet, affectionately called by the late President "the fleet of ugly ducklings." These ships were destined to carry over 75 percent of our total overseas cargo.

But, before this program could be launched, the Germans had already begun their Atlantic coast massacre. Up to that time, over 1,000 Allied ships had been sunk with only 66 German losses. Under the personal direction of Admiral Doenitz, the Atlantic operation started with the sinking of the United States tanker *Allen Jackson* off Cape Hatteras, which claimed the lives of 22 men. Within 2 months, this operation caused the loss of 145 ships and 600 lives.

With complete mastery over the Atlantic, the Germans next moved into the Caribbean and the Gulf. Here, they concentrated on tankers which were supplying the RAF with high octane gasoline. Only five naval vessels had been assigned to this highly strategic area. The enemy assault was led by the sinking of the United States freighter *Virginia*, with 13 casualties off the Mississippi River; followed by the torpedoing of the United States tanker *David McKelvy* which was making way out of Corpus Christi.

And, I am sure there are those among you here tonight who saw the oil-soaked, tragic litter of our South Atlantic beaches, grim reminders of the fate of unsung heroes within sight of their own shores.

A New York Times editorial graphically gave this picture of the merchant sailor in wartime:

"Tankermen and other men of the American merchant marine literally go through fire to carry supplies to our Armed Forces in remote lands. Each week they are pulled or washed up out of the sea, after incredible hardships, or after death amid vast stretches of flaming oil. Quietly, when their burns are healed, their long thirst or hunger satisfied, the survivors slip out of port again with more supplies, with more oil and gasoline for our fighting planes and tanks. Many come through 3 or 4 sinkings, yet do not hesitate when new ships are ready. No one turns in the street to admire their uniforms. They wear no uniform. No one steps up to the bar to buy them drinks. No moist-eyed old ladies turn to them in the subway to murmur "God bless you." The cop on the beat, gentle with the tipsy soldier or the unsteady gob, is apt to put his nightstick to the britches of a merchant sailor who has tippled heavily in the town's bars to celebrate his rescue from the sea."

By Independence Day of 1942, 3,000 merchant seamen had been killed, and before this operation was over, 3 million tons had been sunk.

From 1942 through 1945, the Allies maintained perhaps the most dangerous supply line of the entire war—on this run to the free Russian port of Murmansk, American seamen delivered over 16 million tons of cargo in over 1,000 separate convoys. The objective was to stave off Hitler's attacks on the Russians. Veterans of Arctic convoy duty truly deserve recognition as heroes. Not only did they encounter heavy enemy opposition, but they were also opposed by extremely adverse weather conditions.

In late June of 1942, Hitler personally directed the attack against the ill-fated convoy PQ-17, composed of 36 ships, 22 of which were American. With some 200 German planes in the air, the convoy commander was forced to order his ships to scatter and proceed. As the surviving ships altered course, German U-boats, lurking in the background, moved in. Before the end of this tragic engagement, 23 ships had been sunk.

The vicious struggle to cut America's vital supply lines was fought throughout the world.

In the lonely waters of the Southern Hemisphere, the Axis claimed 66 United States ships and 1½ million tons of cargo.

In this ruthless warfare, friend often could not be distinguished from foe until it was too late. As the Liberty ship *Stephen Hopkins* sailed out of Capetown, she met two merchant vessels, both flying neutral colors. Both vessels quickly unmasked and fired direct hits on the *Hopkins*. Before the surprised Liberty went down, 1 of her crew, an engineroom cadet, chose to remain on board. Singlehanded, he fired five 50-pound sheels scoring hits on 1 of the enemy vessels. In an open boat, a few yards away, his shipmates saw him destroyed by the enemy. Only 15 survived, after 2,000 miles in an open boat. Time after time, Allied shipping was caught off guard in this theater of battle.

One of the few ships caught by the Japs in these waters was the United States freighter *Henry Knox*. After sinking her, the enemy removed the food and water from the lifeboats, and only 28 men survived after 11 days afloat. This was one of many examples of cruelty experienced by American seamen in fighting the Japs.

Although the Navy had won notable victories in the Pacific, it was realized that final victory was dependent upon the occupation of Japanese territory. To this end, merchant seamen were required to maintain a supply line of over 6,000 miles across the Pacific. In support of our troops at such unfamiliar places as Guadalcanal, Attu, Kiska, Okinawa, Luzon, and many more, merchant mariners served valiantly.

In the meantime, over 100 merchant and naval vessels had formed in the Mediterranean for the Allied invasion of Africa. And, nearly 500 more were to participate in the next jump to Sicily.

The winning of the war depended upon gigantic supply movements in American built ships, manned by American merchant mariners who went to the fighting fronts side by side with their brothers in the Armed Forces. In his book, Crusade in Europe, President Eisenhower spoke of the services of the American merchant mariner as being "with a devotion to duty and a disregard to danger and hardship that defies any attempt to describe."

Although the loyalty and heroism of the American seafarer was responsible for delivering the goods to feed our global military machine, there are many others whom we should remember and pay tribute to on this Maritime Day.

Foremost among these is our late great President, Franklin Delano Roosevelt, who, when others were criticizing the American maritime industry and complaining of the cost of Government aid, had the understanding and foresight to call for legislation to reestablish our merchant fleet on the high seas and rehabilitate our impoverished shipbuilding industry. The Merchant Marine Act of 1936, sometimes called the magna carta of the American merchant marine, resulted from Roosevelt's dynamic call for action. As the result of his insight and perception the outbreak of war in Europe found us with a sound nucleus of shipbuilding skills from which to expand into the gigantic merchant ship construction program which spelled the difference between victory and defeat. The enactment of the 1936 act and President Roosevelt's direction for the commencement of a destroyer building program in the middle thirties found us at the entry of the war with an invaluable, though not numerically large, pool of fast modern ships.

Then I want to mention another of the great ones in our maritime war effort—Vice Adm. Emory Scott Land—who was Chairman of the Maritime Commission and War Shipping Administrator throughout the conflict. It fell to dynamic Jerry Land's lot to guide and execute our vast program of ship construction which astounded the world with a fabulous output of nearly 6,000 large merchant ships in less than 4 years; to establish a recruitment and manning program and a system of training schools for all classes of seamen; and to operate, in coordination with our allies, the farflung global supply system to satisfy the competing demands of the military leaders in the several theaters of war. The President's directions to Admiral Land were brief and concise: "Give me ships as fast as you can." That was all. But Jerry Land and the devoted men around him overcame all obstacles. His outstanding performance deserves the praise and gratitude of every American.

Others who fought the good fight on the home front were the hundreds of thousands of Americans in our wartime shipbuilding industry who performed production feats never before dreamed of. With only a small nucleus of management and skilled personnel in our shipyards at the start of the war, we had to create new yards all over the country and train patriotic citizens in the many difficult and unfamiliar shipyard trades. They, too, met their challenge and their production record will forever stand as a monument to American vitality, as well as a reminder that we must have, at all times, a strong and adequate American-flag merchant marine.

It is to all of these people, great and small, who took part in all of the phases of our

wartime effort that I salute and pay tribute to tonight.

With the coming of peace again most of those who served during the war returned to other pursuits when their services were no longer needed. Time may never again be on our side, so in remembering the men of the merchant marine in war, let us never forget our need for those same men in our merchant marine in times of peace.

I think it would be appropriate to close with the lyrics of the King's Point Academy song, "Heave Ho":

"Heave Ho! my lads, Heave Ho!
It's a long, long way to go,
It's a long, long pull with the hatches full,
Braving the wind, braving the sea
Fighting the dangerous foe.
Heave Ho! my lads, Heave Ho!
Let the seas roll high or low.
We can cross any ocean,
Sail any river,
Give us the goods and we'll deliver.
Damn the submarines!
We're the men of the Merchant Marine."

[From the Charleston (S. C.) News and Courier of May 22, 1957]

ROLE OF MARITIME SERVICE IS CITED—JOINT MEETING OF SEVEN GROUPS HEARS BONNER

Tribute was paid here last night to the American Merchant Marine at a meeting of seven maritime groups. The fleet was cited as an arm of war and an economic base for peace.

United States Representative HERBERT C. BONNER, Democrat, of North Carolina, told a banquet meeting that much of the Nation's prosperity depends on continued growth of the Merchant Marine. The event, held at the Country Club of Charleston, commemorated World Trade Week and National Maritime Day.

BONNER traced the growth of the United States merchant fleet and made special note of such vessels during World War II. He is chairman of the House Committee on Merchant Marine and Fisheries. He also noted the importance historically and the development of the port of Charleston.

RIVERS ATTENDS

About 150 persons attended the banquet. BONNER was introduced as "Mr. Merchant Marine" by Representative L. MENDEL RIVERS of Charleston. James J. Lamb, president of the Propeller Club here, presided.

Other sponsoring organizations represented were the Port of Charleston, Greater Charleston Chamber of Commerce, State Ports Authority, Charleston chapter of the National Defense Transportation Association, Maritime Development Association of South Carolina, and the Charleston Pilot's Club.

BONNER said he was particularly concerned about the growth of port cities and their adequacy to serve the Nation in peace and war.

"As a North Carolinian, and your neighbor," he said, "I view with personal pride the growth and increasing importance of the South Atlantic ports, and the significant contribution which they are making to the economic welfare of the Nation."

He said the local port rose in importance during Colonial days and during the War Between the States. But he said the port did not develop without difficulty.

TRACES PROGRESS

"Since World War II," he continued, "your port has made remarkable progress. Under the guidance of your progress-thinking Ports Authority, she has managed to more than double the amount of her pre-World War II tonnage."

"Today, she ranks among America's leading ports, and great quantities of cargoes move across her highly mechanized and modern facilities."

He noted the economic importance of sea commerce as commemorated by Maritime Day. Bonner then traced the struggle and heavy losses in ships, cargoes and crews during World War II.

"Today, in the midst of peace and prosperity, let us not forget the thousands of merchant mariners who died without military honors * * * during World War II—just a few short years ago."

LEADERS PRAISED

Bonner praised leaders in building the merchant fleet, the shipbuilding industry and the seamen. He said:

"It is to all these people, great and small, who took part in all of the phases of our wartime effort that I salute and pay tribute to tonight."

He and Representative RIVERS were commissioned "6-star admirals" in the naval section of the Sumter Guard. They also were given $100 and $200, respectively, in Confederate money to take back with them to Washington.

Special guests included local Naval, Air Force and Army officers, State and local officials and business and maritime leaders.

Dr. Ernest V. Abbott Honored for Outstanding Service to Sugar Industry

EXTENSION OF REMARKS
OF
HON. EDWIN E. WILLIS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 22, 1957

Mr. WILLIS. Mr. Speaker, it is a great pleasure and most gratifying to me, as Member of Congress from Louisiana's Sugar Bowl, and to the entire sugar industry, to join in congratulating and commending Dr. Ernest V. Abbott, of Houma, La., who on yesterday received a superior service award from the United States Department of Agriculture.

Among employees recognized for their outstanding service and presented with awards by Secretary of Agriculture Benson during the Department's annual honor awards ceremony, Dr. Abbott was cited for leadership in the production of improved disease-resistant commercial sugarcane varieties and for basic research on sugarcane diseases, establishing him as a world authority in this field.

Dr. Abbott, who is in charge of the sugarcane research station at Houma, has been employed by the Department of Agriculture for 26 years. He entered the Government service as an assistant pathologist in 1930, was promoted to pathologist in 1942, and to senior pathologist in 1948. In 1950 he was promoted to his present title as principal pathologist.

Through the high quality of his research and leadership which he has demonstrated in the field of pathology, Dr. Abbott is recognized as an outstanding authority on sugarcane diseases, throughout the world. His ability is indicated by the fact that he is called upon for advice by his colleagues in the Department of Agriculture, by State experiment stations, and by sugarcane pathologists and breeders in many parts of the United States and foreign countries. He has served as consultant on sugarcane problems in Formosa and South America and has been a leader in connection with the work of international committees on diseases and the evaluation of their importance. An honorary life membership in the American Sugar Cane League was bestowed upon him in appreciation of his distinguished service to the sugarcane industry of Louisiana.

Among Dr. Abbott's specific accomplishments is his work in sugarcane breeding activities that have resulted in producing high yielding disease-resistant varieties for Louisiana and other areas. This serves as an outstanding example of the control of epidemic plant diseases through breeding. Some of the principal varieties developed commercially as the result of these investigations are C. P. 44–101, C. P. 29–116, C. P. 29–320, C. P. 34–120, C. P. 36–105, C. P. 47–193, and C. P. 48–103.

According to Department reports, C. P. 44–101 occupies more than 50 percent of the current acreage devoted to sugarcane production in Louisiana, while C. P. 48–103 has the highest sugar content early in the season of any variety ever produced by the Department and grown commercially in Louisiana.

For these and other very valuable contributions, Dr. Abbott is indeed deserving of the honors that have been paid him, and the sugar industry is fortunate indeed in having the great benefit of his talent and services.

Theodore Roosevelt's Relations With Labor

EXTENSION OF REMARKS
OF
HON. JOSEPH C. O'MAHONEY
OF WYOMING
IN THE SENATE OF THE UNITED STATES
Wednesday, May 22, 1957

Mr. O'MAHONEY. Mr. President, as vice chairman of the Theodore Roosevelt Memorial Commission, I ask unanimous consent to have printed in the RECORD an article entitled "Theodore Roosevelt: His Relations With Labor." This material has been prepared by the Legislative Reference Service of the Library of Congress, and is thoroughly documented.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THEODORE ROOSEVELT: HIS RELATIONS WITH LABOR

Theodore Roosevelt was "by nature a conservative," wrote Hermann Hagedorn, "(but) he recognized * * * that true conservatism demanded a just reappraisal of industrial and economic conditions, and prompt, far-reaching remedial action."[1] One of the peculiarities of Roosevelt's career was that despite his conservative nature, his initial distrust and suspicion of the labor movement were gradually but steadily moderated until, toward the end of that career, he had become

[1] Encyclopedia Britannica, 1953 edition, vol. 19, p. 538.

an ardent and outspoken champion of labor causes.

In his first political post, New York State assemblyman, Roosevelt opposed almost every piece of legislation sponsored or favored by the unions. He fought the movement to abolish convict contract labor. He opposed and helped defeat in 1882 bills to increase the wages of New York City laborers. He was hostile to the attempt to increase the salaries of New York City firemen and police.[3] He opposed several measures to regulate and shorten hours of work. He thought that men who worked 14 and 16 hours a day were unfortunate, but he "refused to countenance the sort of legislation which contemplated an interference with the rights of individual employers."[4] In short, as he put it, he did not "pretend to have the interest of workingmen at heart."[5]

Reform, however, was always a major interest for Roosevelt and he made exceptions in his generally antilabor position when the problems of women, children, and public health were concerned. During the campaign by the New York labor and reform forces against conditions in the tenement house cigar manufacturing industry, Roosevelt was appointed to the legislature's investigating committee. "As a matter of fact," he later wrote, "I had supposed I would be against the legislation * * * for the respectable people I knew were against it. * * * However, my first visits to the tenement-house districts in question made me feel that, whatever the theories might be, as a matter of practical commonsense I could not conscientiously vote for the continuance of the condition which I saw."[6] Thereafter he vigorously supported bills to abolish tenement-house manufacturing, not because labor unions supported the legislation but almost despite that support. The law was a necessary "hygienic measure."[6] He told Governor Grover Cleveland, while pleading for the governor's approval for the legislation, that he was "opposed to most trade union measures, but this bill was an exception to the rule."[7]

As the Republican candidate for mayor of New York City in 1886, Roosevelt enjoyed the support of the most conservative elements of the city. He ran third to Tammany's Abram S. Hewitt and to the candidate of the labor movement, Henry George.

Roosevelt was to change many of his ideas about labor, but he never gave up his vigorous opposition to labor violence. He was furious at the Haymarket rioters of 1886.[8] As a member of the New York Police Board, he was zealous in efforts to quell violence. The New York Times commented, shortly after Roosevelt's appointment, that "for a mob, the force had neither fear nor favor, and for a mob of strikers it was peculiarly prompt and thorough".[9] To union leaders, Roosevelt asserted that he was "a strong believer in the rights of labor" but that he was "all the more bound to see that lawlessness and disorder were put down, and that no rioter was permitted to masquerade under the guise of being a friend of labor."[10] In 1895 he wrote, "The reckless labor agitator who arouses the mob to riot and bloodshed is in the last analysis the most dangerous of the workingman's enemies. This man is a real peril; and so is his sympathizer, the legislator, who to catch votes denounces the judiciary and the military because they put down mobs."[11]

GOVERNOR OF NEW YORK

By the time he became Governor of New York, Roosevelt's views on labor causes had become quite favorable; and he pursued his goals with his usual energy. About a third of his first message to the legislature he devoted to a discussion of the need for better enforcement of existing labor legislation and the passage of rigid factory laws. Poor enforcement he attributed, at least in part, to the fact that employees rarely complained "for fear of being discharged." He recommended that the "enforcement of the entire body of legislation relating to labor be placed under the board of factory inspectors."[12] In addition, he announced plans to eliminate unlicensed employment bureaus, settle strikes with the aid of the bureau of mediation and arbitration,. improve the work of the bureau of labor statistics, and speed up the municipal courts' handling of wage disputes.[13]

In his second annual message to the legislature he devoted less space to labor. For the most part he pointed to the record of his first year. The only major recommendation he made was for the passage of an employers' liability law.[14]

His record as governor in the field of labor legislation was impressive. Roosevelt worked vigorously to secure the passage of a sweatshop law to make buildings used for manufacturing purposes meet decent health standards in order to be licensed. He was convinced that "the uneconomic, unwholesome, and un-American sweatshop system [must] disappear from our industrial life."[15] The legislature responded with a law providing for additional factory inspectors, licensing of tenements in which manufacturing was carried on, labeling of tenement-made goods, and the extension of the powers of the factory inspector. Roosevelt's interest in this matter was so acute that, in 1900, he personally toured the tenement sweatshop districts to inspect for violations of the law, the first such visit by a Governor of New York.

Although he failed to secure the enactment of an employers' liability law, he did sign a mass of labor bills. Among the more important were those which required licenses for tenement house manufacturers, increases in the size and power of the factory inspector, the creation of a tenement house commission whose findings resulted in much legislation to improve housing conditions, regulation of the working hours of women and children, the protection of women and children from dangerous machinery, building equipment inspection for workers' safety, amendment and extension of the mechanics' lien laws, reduction of the hours of drug clerks, and provision for the prosecution of violators of the 8-hour law and prevailing rate of wages on State work. In addition, he signed bills giving a salary increase to New York City public-school teachers, for the registration of laborers for municipal employment so that preference might be given according to the date of application, to amend the law requiring seats for women in factories to include waitresses in a hotel or restaurant, for the prosecution of labor law violators by district attorneys in any county on complaint of the factory inspector, and for the publication of a quarterly bulletin on labor conditions.[16]

Roosevelt failed to gain the legislature's consent to some of his proposals. Under pressure from retail merchants, the lawmakers refused to transfer the enforcement of the mercantile law of 1896, which regulated the work of women and children in stores, from the New York City Board of Health to the State factory inspector. He was not able to obtain State supervision of private employment agencies. And he vetoed a bill relating to safety appliances on scaffolding for the use of employees because it might have forced the use of a certain patented device by all builders.[17]

"I know we should work for humanity," Roosevelt told the City Club in New York in 1899, "but I also know that it is dangerous to interfere with relations between employer and employed."[18] At first he was reluctant to approve legislation regulating labor's hours and wages, but he signed the law for an 8-hour workday and prevailing rate of wages on State work because, he said, it was "wise for the State to set a good example" and because he regarded the general tendency toward an 8-hour day as "healthful."[19]

"I believe in shortening the hours of labor and I am happy to say that we have passed in New York State a very drastic 8-hour law for public employment," he wrote. "It is the kind of progress which should be made very slowly and with caution."[20]

Roosevelt was, of course, acutely conscious of the influence of labor leaders. One of the first things he did on arriving in Albany was to ask various labor leaders to come to see him. He sought a wide range of opinion on labor measures, conferring with national as well as local labor leaders, rival union groups, and intellectuals in the labor movement. He sympathized with labor's disappointment over the failure of the legislature to pass an employers' liability law and did his best to secure its passage.[21]

Despite the achievements of his administration, Roosevelt remained an object of suspicion to many labor men, chiefly because of his propensity for the use of troops in industrial disturbances. The slightest threat of violence, and Roosevelt was ready to rush troops to the scene of the dispute. He did so in the Croton Dam strike, and was prepared to do so in the Buffalo grain shovelers strike and the New York City street railway strikes. The critics of this policy he accused of truckling to the labor vote.[22]

In the opinion of one commentator, Roosevelt, as Governor, had not reached the point where he was willing to accept organized labor as a bargaining power with rights equal to those of employers and government. He resented the persistent pressure which labor placed upon him and in his correspondence expressed disgust for labor's methods. He had hoped for the approval and admiration of trade-union men, but his best efforts failed to win appreciation.[23]

PRESIDENT

Still feeling his way in the Presidency, Roosevelt's first annual message to the Congress was essentially cautious in tone. He asked for, and later was granted, the creation

of a Department of Commerce and Labor. He requested the maintenance of the tariff to protect labor and the reenaction of the Chinese Exclusion Act. He asked for legislation to do away with the competition of convict contract labor in the open labor market, to enforce the 8-hour law, to protect women and children from excessive hours of labor, night work, and unsanitary conditions. He praised the efforts of labor unions, but cautioned that "the chief factor in the success of each man * * * must ever be the sum total of his own individual qualities and abilities."[24]

Implementing his policies, he tried to remedy the lax enforcement of the Federal 8-hour law by Executive action, helped push through Congress laws improving working conditions of miners in the Territories, supervising employment agencies in the District of Columbia, and protecting street railway motormen and conductors in the District. Also for the District, legislation was passed to safeguard factory employees against accidents and to control child labor. Roosevelt urged the Congress to pass a workmen's compensation law for the protection of Government employees, but accepted a watered-down version of his original proposals. He consoled himself with the thought that it was the best he could get and that at least it committed the Government to the right policy.[25] Roosevelt also obtained legislation to improve railroad safety standards, and to regulate the number of consecutive hours of duty for railroad workers.[26] He urged the Congress, in later messages, to prohibit child labor throughout the Nation and particularly requested a model child-labor law for the District of Columbia.[27] When the Supreme Court declared unconstitutional the Employers' Liability Act relating to common carriers, he suggested that the Congress reenact the law to meet the objections of the Court.

The most dramatic event concerning labor during Roosevelt's Presidential tenure occurred during the coal strike of 1902. The striking miners, under the leadership of John Mitchell and the United Mine Workers, were opposed by mine operators who refused to negotiate. George F. Baer, spokesman for the operators, declared that "the rights and interests of the laboring man will be protected and cared for—not by the labor agitators, but by the Christian men to whom God in His infinite wisdom has given control of the property interests of this country."[28]

As the strike dragged on, a national coal shortage developed, and as conciliatory gestures emanated only from the union, public sentiment began to swing to the miners. Roosevelt felt compelled to act (although there was great doubt as to his legal powers in the matter), both to protect the public interest and because he feared the political repercussions of a coal famine.[29]

He called a conference of both parties at the White House. Mitchell offered to accept the findings of a commission to be appointed for the purpose of examining the union's complaints, but Baer bluntly refused. The meeting ended in failure and the strike went on.

Roosevelt now decided to intervene even more directly. He secretly drew up a plan whereby the Army would take over the mines and run them as receiver. The owners were indirectly notified of the President's intentions and capitulated under this pressure. They requested the President to set up an arbitration commission. That body was duly appointed and granted the miners a 10 percent increase, reduced the working day to 8 and 9 hours for different types of work, and set up a special body to settle disputes arising during the 3 years the award was to be in effect.[30]

The President did not hesitate to displease labor leaders if he felt himself in the right. He later wrote:

"If I were a factory employee, a workman on the railroads, or a wage earner of any sort, I would undoubtedly join the union of my trade. I believe in the union and I believe that all men who are benefited by the union are morally bound to help to the extent of their power in the common interests advanced by the union. Nevertheless, irrespective of whether a man should or should not, and does or does not, join the union of his trade, all the rights, privileges, and immunities of that man as an American and as a citizen should be safeguarded and upheld by the law."[31]

Roosevelt implemented this stand by reinstating a Government printer who had been dismissed because he did not belong to the union. The President resisted the protests of Gompers and other labor leaders on this question, despite the impending presidential election of 1903.

Roosevelt's final thoughts on labor policy are probably best embodied in the Progressive Party's labor plank in 1912. These included:

Effective legislation to prevent industrial accidents, occupational diseases, overwork, involuntary unemployment, and other injurious effects incident to modern industry;

The fixing of minimum safety and health standards for the various occupations, and the exercise of the public authority of State and Nation to maintain such standards;

The prohibition of child labor;

Minimum-wage standards for women;

The prohibition of nightwork for women and the establishment of an 8-hour day for women and young persons;

One day's rest in seven for all wage-workers;

The 8-hour day in continuous 24-hour industries;

The abolition of the convict contract labor system;

Publicity as to wages, hours, and conditions of labor;

Standards of compensation for death by industrial accidents and diseases which would transfer the burden of lost earnings from the families of working people to the industry, and thus to the community;

The protection of home life against the hazards of sickness, irregular employment, and old age through the adoption of a system of social insurance adapted to American use.[32]

Excise Tax Exemption for Neighborhood Nonprofit Swimming Pool Groups

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, in March 1956 I introduced a bill, H. R. 10113, 84th Congress, to exempt amounts paid as dues and initiation fees to neighborhood nonprofit swimming pool organizations from the 20 percent Federal excise tax imposed on "social, athletic, or sporting clubs" under section 4241 of the Internal Revenue Code of 1954. The Internal Revenue Service had previously held that such payments to these nonprofit swimming pool groups were subject to the 20 percent excise tax.

As I told the House on March 21, 1956, I feel that these organizations serve many useful purposes in providing healthy recreational outlets for our children, young people and their parents. They furnish, on a privately financed, nonprofit basis, recreational facilities which many local communities have been unable to supply because of already burdensome tax rates. The purpose of the bill was to provide the needed incentive to assist such local organizations to build their own swimming pool facilities.

It was my feeling that these nonprofit swimming pool organizations, because of their many unique characteristics, were not intended to be taxed within the definition of this section of tax law relating to "social, athletic, or sporting clubs." The proposed legislation was designed to give these groups statutory exemption, just as is now enjoyed by certain fraternal societies, orders, and associations under this section of the law.

The bill was referred to the Subcommittee on Excise Tax, Technical and Administrative Changes of the House Ways and Means Committee, whose chairman is the able and distinguished gentleman from Rhode Island [Mr. FORAND]. After a study of the organization and purposes of these nonprofit neighborhood swimming pool groups, the subcommittee made language revisions in the bill and made it a part of the omnibus excise tax measure introduced by Congressman FORAND last July (H. R. 12298, 84th Cong.).

The subcommittee conducted hearings on this omnibus excise tax bill in late November and early December of last year. Several witnesses representing nonprofit swimming pool groups testified in favor of the tax-exemption provision of the bill. They described the objectives, recreational values, and operating procedures of their groups and stressed the adverse effects of the 20 percent Federal excise tax on the growth of swimming pool associations in other communities. Many other such groups filed statements and resolutions in support of the tax-exemption provision of the bill.

In its report to the full committee the Forand subcommittee recommended favorably the repeal of the excise tax on dues and fees paid to these nonprofit swimming pool organizations. This exemption was also approved by the full committee and is now included in the current excise tax revision bill, H. R. 7125, introduced on May 2, 1957, by Congressman FORAND. It is my understanding that the formal report is now being prepared and that the bill will soon be favorably reported to the House.

Meanwhile, coincidental with the above-mentioned action on the bill to

give statutory tax exemption to these groups, a petition for refund of a payment of this tax was filed by a Mr. and Mrs. Robert J. McIntyre, of Rockville, Md. They were required by the Commissioner of Internal Revenue to pay $25 excise tax on their initial payment of $125, by which they were granted membership in the Twinbrook Swimming Pool Corp., a nonprofit neighborhood swimming pool group of the type referred to in my bill. The petition for refund was not acted on by the commissioner within the required 6 month period, and suit was filed for recovery of the tax in the United States District Court for the District of Maryland, Baltimore. The plaintiffs were represented by Mr. Ralph R. Sachs, a Washington attorney residing in the Rockville community, who himself is a member of the Twinbrook swimming pool group.

The decision in this case was rendered by Judge W. Calvin Chesnut on May 14, 1957. Judge Chesnut ruled that dues and fees paid to this nonprofit swimming pool organization are exempt from the 20 percent Federal excise tax because it is not, in effect, a social, athletic, or sporting club or organization. He therefore directed a refund of the $25 tax to the plaintiffs.

I was naturally elated at Judge Chesnut's ruling in this case because it upholds the position taken in seeking statutory exemption for these groups. His ruling takes into account the beneficial purposes of nonprofit swimming pool organizations in providing needed recreational facilities in the community and, in my opinion, is a sound, equitable, and logical decision.

Judge Chesnut's decision in this case does not, however, eliminate the necessity for enactment of the statuatory exemption from the tax on these groups, as provided in H. R. 7125. The Government has 60 days from the date of the decision to file an appeal. This action would, of course, withhold refunds under this decision of the court, pending the outcome of the appeal. However, if the pending legislation is acted upon favorably by the House in the interim period, an appeal may not be taken, since in view of the subsequent Congressional action the matter would then be moot.

Mr. Speaker, under leave to extend my remarks in the RECORD, I include the text of Judge Chesnut's decision in this case. I am sure that the many interested swimming pool groups and individuals all over the country will want to read this decision.

The decision follows:

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF MARYLAND—ROBERT J. MCINTYRE AND CLARE MCINTYRE *v.* UNITED STATES OF AMERICA, FILED MAY 14, 1957, CIVIL ACTION No. 9125

CHESNUT, DISTRICT JUDGE

This is a suit to recover an excise tax which the plaintiffs were required by the Commissioner of Internal Revenue, to pay under title 26, United States Code Annotated, section 4241, which imposes a 20 percent tax on initiation fees and annual membership dues in excess of $10 paid by members of social, athletic, or sporting clubs, or organizations.[1] The plaintiffs' husband and wife, became original members of the Twinbrook Swimming Pool Corp. and made an initial payment thereto of $125 for so-called life membership. They also paid $25 to cover the 20 percent tax on their initial payment, which was paid by the corporation to the district collector under protest. A petition for refund was duly filed and not having been acted on within 6 months, this suit has resulted. All procedural requirements for the suit have been duly met.

The principal question in the case is whether the Twinbrook Corp. is a social, athletic, or sporting club or organization. The case has been submitted for decision on a written stipulation and a considerable amount of oral testimony, from which I find the following relevant and important facts:

1. The Twinbrook Corp. was duly formed in 1955 under the general incorporation laws of the State of Maryland. It conducts a swimming pool with appropriate bathhouse facilities situated in a generally residential area of the city of Rockville, which is the county seat of Montgomery County, Md., the population of which is said now to be about 15,000. The size of the pool is 60 by 165 feet with a depth of 2½ to 5½ feet. It is situated on a tract of land of about 5 acres acquired by the club after, on its application, the city authority had rezoned the particular land to allow its use for the particular purpose. The land was acquired and the pool facilities constructed at a cost of about $125,000.

2. The purpose of the club as stated in its certificate of incorporation was "to provide a swimming pool or pools and other facilities to its members." It is a nonprofit, nonstock corporation. Its organization, membership, and government are provided for by its bylaws.

3. The principal provisions of the by-laws which are relevant here are:

Membership is limited to 600 persons or families owning residential property or business places within a designated portion of the city of Rockville. The holders of each original membership were required to pay an initial fee of $125 and an additional sum of $25 to be applied to the payment (under protest) of the 20 percent excise tax referred to. The privileges of membership involving principally the use of the swimming pool were accorded to the holders of the 600 initial memberships upon the payment of annual dues of $10; and the pool could be used by them and their dependent children and by certain occupants of their respective households, not including employees. The holders of these initial membership certificates were designated as "life members" in the by-laws. The certificates of membership were transferrable on certain conditions, not here important or relevant. Permission could be given by the corporate authorities on prescribed conditions for the use of the pool by children sponsored by various civic or philanthropic organizations, without charge, or at times for a very nominal charge to defray extra cost of maintenance.

4. The motivation for the formation of the corporation was due to the public-spirited initiative of a few civic leaders who realized the importance of having additional recreation facilities for the Twinbrook area. At first an effort was made to have the public authorities of Rockville provide for the swimming pool at the taxpayers' expense; but when this proved to be impossible of accomplishment, these civic leaders determined to provide for the creation of a swimming pool at private cost of those members of the local community who would be willing to provide funds for the project. Very shortly the 600 memberships were acquired and the necessary funds raised for the acquisition of the land and construction of the pool, aided by a mortgage loan obtained from private banking sources. Much of the work in building the pool was performed either at cost or gratuitously by interested parties. In one sense the project was in substance a community enterprise. This is well expressed in a summary by a quotation from the brief of counsel for the Government as follows

"The plaintiffs have sought to go behind the certificates of incorporation and the by-laws. They have introduced evidence to show that the organizers of the pool project acted with the highest possible motives in organizing and carrying through their scheme to build a pool facility. They showed that the members of the corporation were interested in providing a wholesome summer meeting place for themselves and their children. They demonstrated the appeal of their project by showing that many people gave their labor free of charge to build the pool and that others contributed materials and land at cost. The use of the pool has been in keeping with the high motives of those who organized its construction. Many worthwhile organizations have been allowed to use the facility at a minimal charge.

"The plaintiffs have proved and the Government has not disputed that by a concerted community effort the 600 members of the pool corporation have provided themselves with a pool facility which was not forthcoming from the local government of Rockville, Md., and have demonstrated a willingness to let worthwhile outside organizations share the fruits of their efforts."

5. The only activity of the corporation has been the operation of the pool. The evidence does not show that there have been any other entertainments of a social nature such as dinners or other meetings of the membership. The only social features are those which naturally occur in connection with the use of the pool. With respect to athletics, there have been no competitive or purely athletic features for the use of the pool other than the bathing and swimming therein.

Coming to the applicable law, I find that the statute (now title 26, s. 4241) was originally enacted in substantially its present form as a tax excise measure in 1917. The Government contends, and the plaintiffs deny, that on the principles established by the adjudicated cases the corporation should be classed as a social, athletic, or sporting organization. I do not conclude that the Government's contention is sound under the controlling facts.

There have been many judicial decisions applying the statutory provision to the varied

---

[1] 1: S. 4241. Imposition of tax.

(a) Rate: There is hereby imposed—

(1) Dues or membership fees: A tax equivalent to 20 percent of any amount paid as dues or membership fees to any social, athletic, or sporting club or organization, if the dues or fees of an active resident annual member are in excess of $10 per year.

(2) Initiation fees: A tax equivalent to 20 percent of any amount paid as initiation fees to such a club or organization, if such fees amount to more than $10, or if the dues or membership fees, not including initiation fees, of an active resident annual member are in excess of $10 per year.

(3) Life membership: In the case of life memberships, a tax equivalent to the tax upon the amount paid by active resident annual members for dues or membership fees other than assessments, but no tax shall be paid upon the amount paid for life membership. In such a case, the tax shall be paid annually at the time for the payment of dues by active resident annual members.

(b) By whom paid: The taxes imposed by this section shall be paid by the person paying such dues or fees, or holding such life membership.

facts of particular cases with naturally varying results. There seems to be no Supreme Court decision upon the subject but some principles are, I think, well established. (1) Particular cases are not to be decided merely upon the literally stated name or purpose of the club; but rather from the nature and particular character of its actual activities; (2) a club or organization not originally properly classified as a social or athletic organization may nevertheless by a change in its activities become properly so classified; (3) the mere fact that there is some kind or degree of social intercourse between the members is not of itself controlling because every organization of individuals which brings the members into personal contact from time to time must necessarily include to some extent social relationships; (4) if the predominant purpose and activities of the club are primarily for the promotion of some common interest or objective and the social contacts of the members in connection with the furtherance of that object are only incidental, the organization should not be classified as a social club.

After reviewing many of the decided cases, I think the most clearly and concisely stated principle to be applied is to be found in the opinion of Judge Green, speaking for the Court of Claims in one of the earlier cases dealing with the application of this section. *Army & Navy Club of America* v. *United States* (53 F. 2d. 277 (1931)). It is this case which has been cited by counsel for the Government in support of its position. The facts of that case are, however, quite different with regard to the social aspects of the club as compared with those in the instant case. At page 282 the opinion in that case summarizes the matter by saying:

"* * * if the predominant purpose of the organization is not social, and its social activities are merely incidental to the furtherance of this different and predominant purpose, then the club is not a social one within the meaning of the law. But both of these matters must exist in order to create an exemption from the tax."

In that case the facts found by the court warranted the conclusion that the Army & Navy Club was a social organization within the meaning of the statute. Certiorari was applied for but denied by the Supreme Court. (285 U. S. 548 1932.)

In adopting and applying that principle to the facts here found, I conclude that the Twinbrook Corp. is not a social organization. Its predominant purpose is not social but the conduct of a swimming pool as a recreation center for the benefit of residents of a certain community area. Its qualifications for membership are based on local and not personal considerations. The personal contacts that necessarily occur from the use of the pool by its members and their children and other so-called underprivileged children, to whom the facilities of the pool are accorded by permission of the officers and directors of the corporation, are only those incidentally arising from the use of the pool.

I think it unnecessary to review in any detail the facts appearing in the many judicial decisions which have been cited respectively by counsel for the parties. It will be found that in those cases where the club has been held to be a social organization, the basis of the conclusion is to be found in the degree and extent of the social features in proportion to the whole activities of the club. It is not necessary that the purely social gatherings or entertainments constitute a majority or even a very large minority of the whole activities; provided the social aspects are in and of themselves, while possibly only a byproduct, yet nevertheless are an important substantial feature of the club promoting membership therein of those who may be more interested in the social acquaintances and contacts to be formed than in the major functional purposes of the club. Thus a downtown luncheon club in a large metropolis with luxurious dining rooms, reading rooms, with elaborate cuisine and lounging facilities and opportunity for recreational activities such as billiard and card tables, has been held to be a social club within the meaning of the statute. But in such a situation the social aspects of the club are, I think, more than merely incidental as in the present case. See *Duquesne Club* v. *Bell* (127 F. 2d 363 (3d Cir. 1942)); *Turks Head Club* v. *Broderick* (166 F. 2d 877 (1st Cir. 1948)). Some other cases where the club has under the facts been properly classified as social are: *Lake of the Forest Club* v. *United States* (137 F. 2d 843 (10th Cir. 1943)); *Town Club of St. Louis* v. *United States* (68 F. 2d 620 (8th Cir. 1943)).

On the other hand where the social aspects of the club are only minor and subordinate and principally incidental, the organization has been held not to be social in its nature within the meaning of the statute. *Washington Club* v. *United States* (49 F. 2d 656 (Court of Claims, 1930)); *Builders' Club of Chicago* v. *United States* (58 F. 2d 503 (Court of Claims, 1932)); *California State Auto Association* v. *Smyth* (77 F. Supp. 131 (D. C. N. D. Cal. 1948)); reversed on other grounds (175 F. 2d 752, cert. den. 338 U. S. 905); *Squantum Association* v. *Page* (7 F. Supp. 815 (D. C. R. I. 1934)); *Engineer's Club of Dayton* v. *United States* (133 F. Supp. 72 (D. C. S. D. Ohio, 1955)); *Rockefeller Center Luncheon Club* v. *Johnson* (131 F. Supp. 703 (D. C. S. D. N. Y. 1955)); *Furniture Club of America* v. *United States* (67 F. Supp. 764 (D. C. N. D. Ill. 1946)); *Malibu Lakeside Mutual Water Co.* v. *United States* (97 F. Supp. 542 (D. C. S. D. Cal. 1951)).

I have examined the Treasury regulations applicable to the statute. I do not find in them any provisions inconsistent with the principles heretofore stated; but on the whole the judicial decisions are generally consistent with them. Section 101.24 provides in substance that organizations having social, athletic, or sporting features are presumed to be included under the statute unless and until it appears to the contrary. Section 101.25 with respect to social clubs provides in part:

"Any organization which maintains quarters or arranges periodical dinners or meetings, for the purpose of affording its members an opportunity of congregating for social intercourse, is a 'social * * * club or organization' within the meaning of the Code, unless its social features are not a material purpose of the organization but are subordinate and merely incidental to the active furtherance of a different and predominant purpose, such as, for example, religion, the arts, or business. The tax does not attach to dues or fees of a religious organization, chamber of commerce, commercial club, trade organization, or the like, merely because it has incidental social features, but if the social features are a material purpose of the organization, it is a 'social * * * club or organization' within the meaning of the Code."

Counsel for the Government has not pressed the point that the Twinbrook Corporation is an athletic club, if it is held not to be a social club within the statute; and I do not find any adequate basis for classing it as an athletic club. No case has been called to my attention by counsel that would support the contention that it is. While swimming is, of course, a kind of athletics in the general sense of that term, I do not think that the nature of this swimming pool is such that it makes the corporation an athletic or sporting organization within the statute. In its actual activities the use of the pool is largely for children, and the evidence is that there have not been any competitive swimming events. The athletic exercise involved in swimming is, of course, a merely muscular activity incidental to the exercise itself, which is primarily a matter of recreation similar to that of tennis, golf, or other unorganized amateur sports. And in support of this view, counsel for the plaintiffs call attention to the tax regulation effective January 1, 1956, s. 101.26—

"Athletic or sporting clubs: The possession and use of a gymnasium, swimming pool, or other athletic facilities by an organization having religious or philanthropic social service for its exclusive or predominant purpose do not bring the organization within the class of athletic or sporting clubs or organizations."

I think the same principle must apply in determining whether a club is an athletic organization within the statute that we have seen to apply in the case of whether it is a social club; that is to say, where the athletic features are only incidental to the main purpose and activities, the organization should not be classed as athletic within the meaning of the statute. For the converse on the facts, see *Block Hall, Inc.* v. *United States* (57 F. 2d 918 (Court of Claims, 1932)).

The plaintiffs also contend that, even if the Twinbrook Corporation should be classed as a social organization, nevertheless the tax paid by the plaintiffs should be recovered by them because it was based on the amount paid by them for acquisition of a life membership in the corporation. On the contrary, counsel for the Government contend that the sum of $125 paid by the plaintiffs on the organization of the corporation was an initiation fee and not a fee for life membership. The statute, 26 USCA. s. 4241 (a) (2) provides that the 20 percent tax is payable on initiation fees where the amount is in excess of $10; while section 4241 (a) (3) provides—

"Life memberships—In the case of life memberships, a tax equivalent to the tax upon the amount paid by active resident annual members for dues or membership fees other than assessments, but no tax shall be paid upon the amount paid for life membership. In such a case, the tax shall be paid annually at the time for the payment of dues by active resident annual members."

It will be remembered that the amount of dues paid by active resident annual members does not exceed $10 a year, and therefore under the statute no tax is payable upon the amount paid for life membership. But if the payment of $125 made by the plaintiffs was an initiation fee and not a fee for life membership, then the tax was payable if the corporation was a social or athletic organization. As I have decided that the Twinbrook Corporation was not a social, athletic, or sporting organization, it is not necessary to decide this second question; but as it has been fully argued by counsel on both sides, I will state my opinion upon it.

The principal factors to be considered here are the incidents and characteristics of the membership certificate issued to the plaintiffs for which they paid the sum of $125. This appears from the bylaws. In the first place it is to be noted that the certificate is called a life membership although this is not of itself conclusive. While the certificate gives to the holders the privileges of membership in the corporation so long as they respectively live and hold the certificate as husband and wife, subject, however, to termination of membership upon transfer of the certificate to others on the conditions provided for in the bylaws (not seemingly important here), or until expulsion from membership under stated conditions, it is important to note that the certificate does not of itself entitle the holders or their children to the use of the swimming pool except upon the payment of annual dues of $10. Counsel for the Government argues that the term "life membership" as used in the statute should be read in the light of common understanding of what constitutes life membership in a club; and contend that this common

understanding is that a life member of a club is one who is exempted during his lifetime from the payment of annual dues. It is said to be a commutation of the amount of annual dues. In addition the argument is that on looking at the conditions leading to the formation of the Twinbrook Corporation and its objective of obtaining and operating a swimming pool, it is apparent that the cost of the undertaking was met only from the initial contributions in the way of payments of $125 for each of the 600 membership certificates; and that therefore in reality the money so paid by each holder of a certificate constituted in effect if not in name an initiation fee. In addition attention is called to the Treasury Regulation No. 101.28 relating to initiation fees.[2] It provides in part that "under the code the term 'initiation fees' includes any payment, contributions or loan required as a condition precedent to membership, whether or not any such payment, contribution, or loan is evidenced by a certificate of interest or indebtedness or share of stock, and irrespective of the person or organization to whom paid, contributed, or loaned."

The scope of this definition of initiation fees seems to be broad enough to include the payment by the plaintiffs in this case, despite the bylaws provision that the certificate constitutes "life membership," which, as I have said, is not conclusive; and despite also the fact that the kind of payment made in this case by the plaintiffs is probably not within the ordinary understanding and practice of what is an initiation fee. Probably the general understanding of an initiation fee required to be made to acquire membership in a club is where a new member is elected to membership in a going club and the initiation fee is required in the nature of equalizing the position of the old members with the new members, with respect to their interests in the club assets.

If, therefore, the common understanding of the terms "initiation fee" and "life membership" are to be applied here, it seems that the kind of payment made by the plaintiffs does not clearly come within the general understanding of either.

There is no evidence in this case that the terms "initiation fees" and "life membership" have any certain and definite meaning in their application to the subject matter here involved; and counsel have not referred the court to any applicable judicial opinion as to the meaning of either term, with the exception of *Biddle* v. *Rothensies* (C. C. H. 1942, 2 U. S. T. C. Civil No. 1762, U. S. D. C.). Eastern district of Pennsylvania, dealing with what was called a proprietary membership in the well-known Merion Cricket Club of Philadelphia. While in that case the membership was held to be equivalent to a life membership as referred to in the statute, I do not find the conclusion reached necessarily controlling in principle of this case where there is a different factual situation.

It is clear enough from what has been said that there is a very meager basis in the evidence for the decision on the point. Looking at the matter from a practical and realistic standpoint, what occurred is simply this. Certain residents and property owners of a particular neighborhood decided to build and operate a swimming pool as an additional recreation facility. To defray the cost, individuals owning in whole or in part 600 separate properties in the neighborhood, agreed to contribute the sum of $125 each to the project. In carrying out the plan a corporation was formed which authorized the issuance of so-called life-membership certificates to 600 house or property holders, and evidently to meet the current cost of operation of the pool when built, the certificate holders were required to pay annual dues of $10 for the use of the pool. The question is whether payments so made are more properly to be called initiation fees or the acquisition of life membership. Neither term would seem to be precisely applicable. Clearly the mere designation of the certificate as constituting life membership is not of itself controlling. The nature and effect of the whole transaction is the more important consideration.

While the question is certainly not free from great difficulty, I take the view that looking at the realities of what occurred, the payments are more nearly to be considered initiation fees than constituting life membership. As the statute does not define the term "life membership" (which is nontaxable) and as the regulation as to initiation fees does in terms seem to include the kind of a payment made by the plaintiffs in this case, the better view seems to be that the payment would be taxable as an initiation fee, if the Twinbrook Corp. should be held to be a social, athletic, or sporting organization.

For these reasons I conclude that the plaintiffs are entitled to a judgment in their favor for the return of the $25 tax paid by them. The clerk is instructed to enter judgment accordingly in favor of the plaintiffs for $25.

W. CALVIN CHESNUT,
United States District Judge.

---

[2] Sec. 101.28 (as amended by T. D. 5349, 1944 Cum. Bull. 639):

Initiation fees: Any amount paid as initiation fees to a club or organization coming within the provisions of section 1710 is subject to the 20 percent tax imposed by the code, as amended (a) if such fees amount to more than $10, or (b) if the dues or membership fees (not including initiation fees) of an active resident annual member are in excess of $10 per year.

Under the code the term "initiation fees" includes any payment, contribution, or loan required as a condition precedent to membership, whether or not any such payment, contribution, or loan is evidenced by a certificate of interest or indebtedness or share of stock, and irrespective of the person or organization to whom paid, contributed, or loaned. It is not material whether the applicant has any hope or expectation of a return of his payment upon resignation, death, or other circumstances, nor is it material to whom he pays the money. For instance, if a golf club requires incoming members as a condition precedent to membership to purchase either from it or from retiring members a share of stock, the tax attaches to any such payment for the stock regardless of the fact that it represents a property interest in the assets of the club. Likewise, if the purchase of a share of stock in a landholding corporation is a necessary precedent to membership in the club, the amount paid for such share of stock is taxable. In the case of a transfer of stock from a retiring member the club should collect the tax on the amount paid by the new member for the stock as well as tax on any transfer fee required from the new member.

Clinton Turn Verein 90th Anniversary

EXTENSION OF REMARKS
OF
HON. PHILIP J. PHILBIN
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 22, 1957

Mr. PHILBIN. Mr. Speaker, on Sunday, May 19, the Clinton, Mass., Turn Verein celebrated its 90th anniversary with 250 guests in attendance at impressive exercises conducted at Turner Hall.

It was my distinct privilege and honor to be guest speaker on this outstanding occasion and under unanimous consent I include in the CONGRESSIONAL RECORD the text of my remarks before this distinguished and patriotic organization.

The guests included many officers of the Massachusetts Turn Vereins and 16 members of the Clinton Turn Verein, all members of the organization for 50 or more years, who were paid special tribute during the 90th anniversary celebration. These 50-year members are Herman J. Brockelman, Frederick J. Krauss, Charles F. Lamlein, Christian Ploss, Arthur E. Wohlrah, Charles M. Schwab, Paul A. Schneider, Gustave H. Gleisburg, Robert Jendrick, George H. Lamlein, Edward T. Onrda, John A. Schott, Albert W. Schneider, Alfred Scheid, Oswals Heinold, and Robert Hillner.

The Honorable Morris N. Gould, associate judge of the Clinton District Court, was a brilliant master of ceremonies and the Honorable Werner Hollebem, German Consul, extended the warm greetings and congratulations of West Germany to the gathering.

The text of my speech follows:

It is a great privilege as well as a real pleasure to be with you on this truly historic occasion when we are celebrating the 90th anniversary of the Clinton Turn Verein.

As you all so well know, I come here today not only as the Congressman from this great district in our beloved Commonwealth with its hundreds of thousands of loyal Americans, but I come here also as your neighbor, dear friend and a proud fellow member of this distinguished organization. There is no group anywhere that I more greatly admire for achievement and fine citizenship, and there is no group of its kind that I am bound to any more closely by enduring bonds of lifelong friendship, fellowship, and affection, or for whom I have greater respect and higher regard, than this one I have the honor to address today.

Of course we can all be proud of the sterling record that has been made by our Clinton Turn Verein throughout the years. It is heartwarming and inspiring when we reflect as we do today, upon the history of our group, to note that for so long a time it has so outstandingly served our community and our country as well as cherished needs of our own membership.

So many men and women have devoted themselves in such a true spirit of dedication to the great objectives and valuable activities of Turn Verein that I could not even begin to mention them. Their contributions, which have been so significant, so meaningful, and so beneficial, are worthy of our recollection and profound gratitude. We can be especially proud and especially grateful for the imagination, genius, ability, and devotion of those who had the vision and the spirit to establish this organization, as well as those who have carried its unblemished banner with such fervor, loyalty, and wholesome results from the time it was founded up to this very hour.

Because of the historic aspect of these exercises, it may be appropriate for me, as briefly as I can, to allude to the origin, background and progress of Turn Verein. The first noteworthy fact is that Turn Verein is a German institution which was founded in the early part of the 19th century by a great gentleman and far-sighted thinker named Friedrick Ludwig Jahn for the purpose of furthering physical education. Today, as we know, the activities of the Turners have been expanded to include people of different nationalities and faiths and to include not only physical training but mental training as well. In addition, the Turners have collected libraries, established schools, and founded a newspaper and have engaged in

many other activities designed to improve the individual and benefit the civic and patriotic welfare of the Nation.

It is interesting to note that the first Turn Verein in America was founded in the city of Cincinnati way back in the year 1848, largely due to the efforts of Friedrick Hecker, one of the heroes of the German Revolution.

Like the old Turn Verein in Germany, the American Turner Society had as its slogan: Frish, frohm, froh, frei, which for the benefit of my good Irish friends who have happily become so prominent in this organization today, and others who may not understand the beautiful, rich German language, means bold, devout, gay, and free.

At the time the basic purpose of the organization was stated as follows: "cultivation of rational training, both intellectual and physical, in order that members may become energetic, patriotic citizens of the Republic, who could and would represent and protect common human liberty by word and deed." How well these objectives have been realized is best attested by the clean living, high character, industrious habits, unsurpassed citizenship and lofty patriotism of those who embrace this organization.

During the Civil War, for example, not so long after the organization came into being, the Turners played an important part. The renowned 20th New York Regiment in that war consisted only of Germans. The Ninth Ohio Regiment was made up predominantly of Turners. Several other regiments consisted wholly or in part of Turners. It is reported that over 51 percent of the total membership of the organization at the time served during the Civil War, and it can be said to the everlasting credit of our illustrious society that that example continued to be followed in every succeeding war and conflict in which our country was engaged, wherein the Turners and the descendants of the German people in this country have played such a prominent part, and exemplified an imperishable record of loyalty, devotion, and willingness to sacrifice their lives, if necessary, for the perpetuation of American ideals and the American Republic.

At the close of the Civil War the Turn Vereins of the East and West were reunited and a new Turn Zeitung was established with New York as a center. The Turners, back from the war, now turned their attention and activities to gymnastic and cultural pursuits. The clubs reached a high level during the late 1860's and during the 1870's which was about the period that our own fine club was established here in Clinton.

Always of forward-looking philosophy and progressive viewpoints and principles, the Turners advocated many reforms that were later adopted by the Nation. As early as 1871, recognising the great worth, zeal, and influence of women, they advocated woman suffrage. For many years they urged that gymnastics be taught in schools until finally schools throughout the country began instructions in gymnastics which brought and are still bringing such untold benefits to American children in many generations. The Turners advocated every good cause and are famous for their moderation in all things.

In 1948 the Turners celebrated their centenary in the city of St. Louis and the program included not only competitions in gymnastics, but also of track and field events, basketball and volleyball. Competitions were held also in song writing, poetry and essay writing and singing contests which have always been one of the most zestful and enjoyable activities of the Turners.

Women's auxiliaries of Turn Verein have been generally established and competitions are now open to women as well as men and the outstanding work that the women have done and are doing is not only well known, but is a source of great pride to all of us.

Today the Turners have a far-reaching educational program. The Turner Society appeals to every member of the family, and that is why Turnerism has been so valuable in enriching wholesome family life here in Clinton and in many other places. Not only the women but the young folks have been brought into this happy mingling of free spirits seeking agreeable human companionship, seeking to promote good causes and seeking to build up strength in the individual and the family and the community because they realize well that this, in turn, means strength for the entire Nation.

In Clinton the Turners have conferred innumerable and immeasurable benefits upon our community life, upon the quality of our citizenship, upon our civic spirit, our social relationships and upon the development of understanding, tolerance and strong friendships that bind us together regardless of origin, race or creed, in a union devoted to bring out the best in the individual and in the community and aiming for the highest goals given to free American citizens in our land to unbounded opportunities. That encouragement to high aspirations is one of our greatest needs of the hour in this confused and bewildering era.

There is a lesson that we can all take from the story of the early Turners and the early German settlers. They came to this country fired by a fierce impulse for its freedom and its opportunities. They were scrupulously honest, industrious and willing to work. They had unflagging energy and they were prudent and frugal in their ways, yet always charitable, generous and just. While they never forgot the rich heritage they had left and while they kept it alive in all its breadth and fullness in their homes, their families and in this very Turn Verein, they never lost sight of basic human and spiritual values. They had superlative faith in their Creator and unshakable faith in free institutions. They were loyal in the way of life they had brought with them, and they were loyal even unto death to the great new country of which they became such proud and worthy adopted sons and daughters.

Their constant aim was to preserve and protect this country, and they opposed and they denounced and they fought, just as their descendants here today do, the terrible plague of godless communism and subversion that stalks through the world working to dismember nations and condemn individuals to the role of serfs and slaves. Yes, my friends, you may search the whole world over, you may comb every nook and cranny of America, but you will never find more devout people, better Americans, or more loyal and devoted citizens of this great land than those who founded and for so many years carried on with such fruitful and happy results the Turn Verein that we today hail with so much pride and joy.

Judged by every measure, they were great citizens and great Americans and great human beings. In accordance with Turner traditions an the spirit of their own great homeland they were bold, as real men should be when the occasion requires, they were devout, as we all must be, they were gay, as every person desires to be, and they were free, as all men and women everywhere yearn to be and were destined to be by Him who gave them life and gave them liberty at the same time.

I have many happy memories of this hallowed place and the many wonderful people who frequented it and made it what it is. Here, like most of you, I have spent happy hours, and I have known some of the greatest people, some of the warmest, finest friends that it has ever been anyone's high privilege and good fortune to know. Here, in truth, there has been friendship, there has been brotherhood, there has been tolerance, understanding and affection, there has been that gay and buoyant spirit which we call "Gemutlichkeit," there has been adherence to high ideals, there has been the cultivation of loyal and lofty Americanism, there has been the exaltation of underfiled family life and the free, expansive development of the individual. Above all, there has been a grateful acknowledgment of the Supreme Being, and the confidence and faith that He will, in time, if we but persevere in that faith, show us the pathway to peace and to justice.

And so, my friends, with this magnificent legacy which is ours handed down to us from the past by such loving souls and spirits that we almost speak of them with bated breath, let us rejoice in this happy celebration of what their hands and minds have wrought. Let us be thankful for all that they have done for our Turn Verein, for Clinton and for our country and in a real spirit of humility, as well as deep appreciation, let us rededicate ourselves to their unfinished work in this great society, in our beautiful town so deserving of our help and in our great free country which today needs loyal citizens to defend it against the ravages and threats of tyranny more than ever before in its history.

And let us proudly hold the banners of Turnerism aloft and continue, as our predecessors did, to exemplify its finest traditions.

May our noble and beloved Turn Verein, under God, enjoy many more returns of this happy birthday celebration. Let us all pledge ourselves anew to its great cause and to the cause of freedom and justice for all.

Statement by Hon. George McGovern, of South Dakota, in Regards to Senate Concurrent Resolution 3 and House Concurrent Resolution 160

EXTENSION OF REMARKS
OF
HON. LEE METCALF
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 22, 1957

Mr. METCALF. Mr. Speaker, our colleague, the gentleman from South Dakota [Mr. McGOVERN], well stated the case for a point 4 program for the American Indians in his recent appearance before a subcommittee of the other body.

Mr. McGOVERN and I are cosponsoring companion measures to Senate Concurrent Resolution 3, by the senior Senator from Montana, Senator MURRAY, to extend to the first Americans the same type of economic assistance that we have extended to the people of underdeveloped areas of other parts of the world.

Mr. McGOVERN's concern for the welfare of our Indians—and for the communities which serve them—predates his election to the Congress. Therefore, it is not surprising that he has taken such an active interest in this important policy declaration. Mr. McGOVERN's statement follows:

STATEMENT OF REPRESENTATIVE GEORGE McGOVERN BEFORE SUBCOMMITTEE ON INDIAN AFFAIRS OF SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS RE SENATE CONCURRENT RESOLUTION 3 AND HOUSE CONCURRENT RESOLUTION 160, MAY 13, 1957

Mr. Chairman and members of the committee, I am very much pleased to have this opportunity to testify before you today in support of Senate Concurrent Resolution 3. I have a very special interest in this item of

legislation as I am the sponsor of a companion resolution, House Concurrent Resolution 160, in the House of Representatives, where it is also sponsored by the gentleman from Montana [Mr. METCALF].

I sponsored this resolution because of my deep concern over the status and conditions of the Indian people of my State. Anyone who has visited the Indian reservations of South Dakota will agree that there are few places in our country where people live in greater misery, in greater want of the basic necessities of human life. And what is most disturbing about their situation is that, with some localized exceptions, nothing truly constructive is being done to improve present-day conditions.

On the Indian reservations of the State of South Dakota, you find a population of more than 30,000, a population which is constantly growing, subsisting on what is far below a minimum living standard. The great economic advances of our Nation have passed these people by. And the gap between them and the rest of the country is constantly widening. It is essential that a sincere effort be made to close it.

For many years we have been appalled by the statistics on infant mortality, tuberculosis, mortality from infectious disease, and the short life span generally on Indian reservations. Recently, the Congress has given vigorous support to the efforts of the Public Health Service to improve Indian health conditions. But the service soon recognized that as long as Indians from early childhood on suffer from malnutrition, and live crowded into unhygienic shacks, the chances of success of any public health program are severely limited.

Malnutrition and poor housing conditions, in turn, are simply the result of extreme poverty. These factors also breed all the other social ills on Indian reservations, just as they do in other areas: crime, juvenile delinquency, and social disorganization. Beyond that, they lead to a general climate of disillusionment, hopelessness, and despair, which makes it extremely difficult for a younger generation to lead the Indian people toward a better future.

Let me make it clear that in describing present-day conditions on Indian reservations, I am not approaching this problem in a partisan manner. I would certainly hope that in dealing with the problems of human misery among Indians we can achieve bipartisan cooperation.

As my remarks so far have indicated, I believe that improvement of the economic status of Indians would help solve many ills which today beset them. But what I have seen in my State is that conditions instead of getting better, are rapidly deteriorating.

Living in an agricultural State, being dependent on agriculture, the Indians of South Dakota have, of course, suffered from the general decline in agricultural income in recent years. But they have suffered more than the rest of the population. If you ask a South Dakota Indian today as to what constitutes the most important problem on his reservation, he will tell you that it is land sales. When you ask him whether it is not true that these sales are voluntary, he will tell you that they are, but only in a technical sense, as it is sheer need which forces people to sell their land.

From my observations I find that most Indians who sell their land have not made a satisfactory adjustment to life off the reservation. They either stay on their reservation, becoming an even greater burden to the other members of the tribe, or move off to the Indian slum areas of our cities, which certainly does not constitute any visible improvement of their status.

In trying to tackle the problems of the Indians of South Dakota, the Bureau of Indian Affairs has placed great emphasis on its relocation program, which tries to place reservation Indians in industrial jobs in cities like Chicago. In many cases this program has undoubtedly succeeded. In cases in which it has failed, it was surely not for lack of sincere effort. But anyone who knows the Indian reservations and the Indian people of our State, knows that for a long time to come relocation cannot be the sole answer.

Something must be done for the Indians who stay on the reservations or who eke out a meager existence in the slums of our cities. It must be done in recognition of the fact that the Indian communities of the Dakotas are here to stay for some time to come, both because many Indians want it that way, and because there is no realistic alternative.

The resolution before you recognizes these basic facts. It lays down a policy under which we would extend to our own Indian people the same type of economic assistance that we have extended to the people of underdeveloped areas of other parts of the world. Isn't it almost self-evident that if the Indian people of Bolivia or Guatemala qualify for our economic and technical assistance, the Indian people of the United States, our own citizens, should have the same benefits?

By extending this assistance we would be discharging a moral debt to the first Americans. We would also be making a sound investment, for better economic conditions for Indians would not only reduce Indian health and welfare costs, but, by eliminating these pockets of squalor, would raise the economic level of entire areas, affecting non-Indians as well as Indians.

This resolution is by its very nature a mere policy declaration. It would necessarily have to be followed up by concrete actions of both the executive branch and the Congress. But I would hope that by passing this resolution, we can help inaugurate an era in which we can, for once, be proud of what we are doing for our Indian people.

Extravagant Hoover Commission Recommendations for Savings

EXTENSION OF REMARKS
OF
HON. CLARENCE CANNON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 22, 1957

Mr. CANNON. Mr. Speaker, under leave to extend remarks in the RECORD, I include reply to the letter of Chairman Clarence Francis, of the Citizens Committee for the Hoover Report, received May 16, 1957, as follows:

MAY 16, 1957.

Hon. CLARENCE CANNON,
Chairman, Committee on Appropriations, House of Representatives, Washington, D. C.

DEAR MR. CANNON: I am writing with reference to your remarks on the floor of the House on May 14, 1957. In your address you seriously questioned whether actual economies can result from the recommendations of the bipartisan Hoover Commission. The Citizens Committee has looked into this question with considerable care and would like to furnish you with the results of its study.

In this connection, our research department prepared the attached special research memorandum No. 11, entitled "Specific Examples of Savings, Capital Returns, and Increased Revenues Resulting From Reports and Recommendations of the Bipartisan First (1947–49) and Second (1953–55) Hoover Commissions." This study covers only a part of the total recommendations but it does document some $2.8 billion in savings. All of these figures are either taken directly from, or based upon, statements made by officials of the executive branch or by the Comptroller General of the United States.

With respect to the first Hoover Commission, the committee has looked into five specific areas of economy. The results of the survey indicated that economies in these five areas had resulted, as follows:

	Million
General Services Administration	$677.0
Veterans' Administration (cancellation of hospital beds)	545.0
Post Office Department (post and postal cards only)	72.0
Reconstruction Finance Corporation (abolition of)	474.4
Defense Department	569.5
Total	2,337.9

Additional results of the work of the first Hoover Commission would doubtless be found in other areas of Government but I think these figures are sufficient to make the point. Definite economies of substantial size are traceable to the first Hoover report through the statements of the agencies themselves.

With respect to the second Hoover Commission, the Citizens Committee has also made a study of some of the savings which so far can be attributed directly or indirectly to the Commission's findings. The results of this survey are as follows:

	Million
Treasury Department	$20.3
General Services Administration	131.7
Federal Housing Administration	.5
Interior Department	.6
Commerce Department	19.3
Veterans' Administration	13.6
Post Office Department	56.0
Health, Education, and Welfare Department	2.2
Defense Department (10 percent of total economies)	235.9
Total	480.1

Here we would like to point out that only 39 percent of the 314 recommendations of this second Commission have been installed in whole or in part. Many of them have been installed rather recently, so that considerable time must pass before results can become evident. An example is the legislation providing a cost-accounting system for the Federal Government. Installation alone will take several years.

May I emphasize that these figures cover only a part of the total Federal operation and that they are meant simply to illustrate the fact that substantial savings have been certified by responsible governmental agencies. To study completely the budgets of all departments and agencies over a span of 9 years would involve the task of compiling and comparing material on approximately 11,000 pages, with an average of at least 50 items per page, or more than 550,000 separate budget items. In our view, there are additional and very substantial savings which would be divulged by a more thorough study than that which we have been able to undertake.

In conclusion allow me to refer to the subject of appropriations on an annual accrued expenditure basis as provided in H. R. 2494 currently before the House. Varying estimates have been made as to the savings which might come to the taxpayer through this measure. We would like to point out that substantial economies might flow from a reduction in the so-called "carryover" funds—that is, unspent funds available from appropriations in previous years.

These funds are today estimated to be in the neighborhood of $50 billion. As a most conservative estimate, a thorough scrutiny of such funds might lead to a reduction of only 1 percent—and this is a minimum. This alone would be $500 million per year. It is our feeling that the savings would be considerably more substantial.

Thank you very much for hearing our views on this matter.

Sincerely yours,

CLARENCE FRANCIS.

SPECIAL RESEARCH MEMORANDUM NO. 11, CITIZENS COMMITTEE FOR THE HOOVER REPORT—SPECIFIC EXAMPLES OF SAVINGS, CAPITAL RETURNS, AND INCREASED REVENUES RESULTING FROM REPORTS AND RECOMMENDATIONS OF THE BIPARTISAN FIRST (1947–49) AND SECOND (1953–55) HOOVER COMMISSIONS

Much current controversy centers around the record peacetime Federal budget of $71.8 billion for fiscal 1958. There is general agreement on the need for economy but widespread debate over specific cost-cutting proposals.

The question then arises: "Are substantial savings available through adoption of the recommendations of the bipartisan Hoover Commission?"

In the following pages, the Research Department of the Citizens Committee lists some examples of concrete economies, capital returns, and increased revenues clearly attributable to the work of the bipartisan first (1947–49) and second (1953–55) Hoover Commissions.

Four points should be noted:

1. This list traces $2.3 billion in aggregate economies to recommendations of the first Hoover Commission and $480.1 million to the second—a total of some $2.8 billion for both to date.

2. This is a partial list, intended only to illustrate broadly the principle that specific economies are available through adoption of Hoover Commission recommendations.

3. These examples are based almost entirely on official reports of the Federal departments and agencies concerned.

4. Most of the examples are based directly on Hoover Commission recommendations, but some are byproducts of the Commission's work, illustrating the ways in which a document like the Hoover report can stimulate economy-consciousness in governmental operations.

Five Congresses and two administrations have had a hand in the bipartisan effort through which some 72 percent of the proposals of the first Hoover Commission and, to date, 39 percent of the second have been adopted. The process of effectuation following adoption is often a long one and the results, when obscured by sudden developments such as the Korean action, are difficult to identify.

The fact remains that definite savings of a major nature, far greater than the totals shown by these examples, have been made. It may be reasonably concluded, therefore, that substantial additional economies remain available in the unenacted 61 percent of the second Commission's recommendations.

Attached are:

1. Appendix A (specific examples of savings, capital returns, and increased revenues resulting from the reports and recommendations of the bipartisan first (1947–49) Hoover Commission).

2. Appendix B (specific examples of savings, capital returns, and increased revenues resulting from the reports and recommendations of the bipartisan second (1953–55) Hoover Commission).

An examination of these two appendixes indicates the figures are almost entirely official statements of the Federal departments and agencies. In only two of the scores of specific figures here quoted has the Citizens Committee's Research Department posed its own estimate; and in these two cases, the estimates are premised upon official figures.

APPENDIX A

SPECIFIC EXAMPLES OF SAVINGS, CAPITAL RETURNS, AND INCREASED REVENUES RESULTING FROM THE REPORTS AND RECOMMENDATIONS OF THE BIPARTISAN FIRST (1947–49) HOOVER COMMISSION

The first Commission on Organization of the Executive Branch of the Government was created by unanimous act of Congress on July 7, 1947. The Commission was empowered to "study and investigate the present organization and methods of operation of all departments, bureaus, agencies, boards, commissions, offices, independent establishments, and instrumentalities of the executive branch of the Government."

The Commission divided up its total project of studying the executive branch into a series of major-purpose activities and functional problems. Twenty-four task forces were created. Some of these dealt primarily with Cabinet departments, while others centered on broader categories of interest. The task force reports were completed in the late summer and autumn of 1948; and the Commission reported to Congress during the first 6 months of 1949. Most of the reports had minority opinions and dissents, proving that the recommendations were not accepted without a good deal of examination.

In enumerating the savings, capital returns and increased revenues attributable to the first Hoover Commission, the Citizens Committee covers five major areas. They are: the General Services Administration, the Veterans' Administration, the Post Office Department, liquidation of the Reconstruction Finance Corporation, and the Department of Defense. These estimates are not all-encompassing of the whole area of savings effected by the first Hoover Commission. They are chosen merely to illustrate some of the financial benefits which demonstrably have resulted from the recommendations of the Commission.

1. THE GENERAL SERVICES ADMINISTRATION

It should be remembered that there would be no General Services Administration had it not been for a specific recommendation of the first Hoover Commission. In February 1949 the Commission recommended to Congress that responsibility for three internal service operations, Supply, Records Management, and the Operation and Maintenance of Public Buildings, be placed in an Office of General Services with a director appointed by the President (Report on Office of General Services—Supply Activities, Recommendation No. 1). The agency was created by the Federal Property and Administrative Services Act later in that year.

The agency's annual reports have stated economies, as follows:

Fiscal year and savings [1]

		Million
1951		$81.0
1952		127.3
1953		130.6
1954		147.6
1955:		
(a) Personal property	$168.7	
(b) Real property	14.6	
(c) Records	3.6	
(d) Administrative	3.6	
		190.5
Total		677.0

[1] Stated officially by Jess Larson and Edmund Mansure, the 1st 2 General Services Administration Administrators, and found in the GSA Annual Reports.

2. THE VETERANS' ADMINISTRATION

Cancellation of congressional authority to build 16,000 hospital beds for the Veterans' Administration was the biggest savings item in this field. (Report on Medical Activities, p. 6.) There are various methods by which nonrecurring or onetime savings like a hospital cancellation can be amortized. The Citizens Committee used a 5-year basis in making its estimates, believing that the normal patient load accretions would cause such construction to be authorized again toward the end of such period. However, good economic conditions, important reductions in the incidence of tuberculosis, new drugs and medical techniques, and a number of other factors have mostly deferred this construction program, perhaps indefinitely. Hence, while the committee's 5-year amortization estimate seemed a reasonable basis when the estimate was made, it may have been too short for this particular case.

The aggregate saving of $545 million is shown as follows:

Fiscal year and savings [1]

	Million
1951	$67
1952	97
1953	127
1954	127
1955	[2] 127
Total	545

[1] Bed construction amortized without interest factor over a 5-year period; operation and maintenance costs carried on an annual basis, starting in 1952, at ½ of full annual figure of $60,113,000; and at full figure thereafter.

[2] Construction cutback was fully amortized according to Citizens Committee basis by June 30, 1954, but annual operation and maintenance savings of $60,113,000 would continue thereafter.

3. THE POST OFFICE DEPARTMENT

The most notable achievement here was the increase in the price of penny post and postal cards from 1 cent to 2 cents. (Report on the Post Office, Recommendation No. 8.) Congressional action on this Hoover Commission proposal led to an average annual revenue increase of $7.4 million—$5 million in fiscal year 1952, and an aggregate total of $32 million thereafter on postal cards. The aggregate revenue thus added has been $37 million through fiscal 1956.

To this can be added revenues from increasing penny post cards from 1 to 2 cents, which are estimated by the Post Office Department to have returned another aggregate of $35 million. This is necessarily an estimate since the postal accounting system compounds these revenues into the normal sale of 1-cent stamps.

The total, thus, is $72 million.

The rate on postal cards and post cards had stood at 1 cent since May 13, 1873, except for a temporary 1-cent increase during World War I.

4. THE RECONSTRUCTION FINANCE CORPORATION

In its report to Congress on Federal business enterprises in March 1949, a task force of the first Hoover Commission recommended the liquidation of the Reconstruction Finance Corporation. The Commission itself recommended drastic cutbacks in lending, but did not recommend total liquidation. However, the combined efforts of these two groups resulted in its termination effective September 28, 1953.

For the most accurate description of the capital returns realized from the Reconstruction Finance Corporation in liquidation, a direct quotation is taken from the 1956 annual report of the Treasury Department:

"After giving effect to assets transferred to other Government agencies under the provisions of the RFC Liquidation Act and Re-

organization Plan No. 2, of 1954, there remained for liquidation loans, securities, and commitments amounting to $592,200,000. By June 30, 1956, this portfolio had been reduced to $117,800,000. The total reduction of these assets was $474,400,000, of which $114,300,000 was accomplished during the year.

"The proceeds realized from liquidation of the Corporation's assets are returned to the Treasury. In the fiscal year 1956, there was paid into the Treasury from cash on hand and amounts realized during the year a total of $150 million."[1]

5. THE DEPARTMENT OF DEFENSE

The major segment of savings and budget reductions achieved from the original Hoover Commission fell within the Department of Defense, and these were most substantial. Some were annually recurring and some were nonrecurring, but, in the 1949–50 period, $569,675,000 of a total of over $1.5 billion saved in the Defense Department can be linked with Hoover Commission recommendations.

Due to the outbreak of hostilities in Korea, many of these Defense savings were immersed in the necessarily increased expenditures for war. Thus it is impossible to go beyond this point with regard to savings. Most savings effected by the Defense Department after the Korean war relate to the work of the second Hoover Commission and are dealt with later in appendix B of this memorandum.

The savings of $569,675,000 for 1949 and 1950 and stemming in whole or in part from the Commission and its task force are as follows:

	Savings[1] *(million)*
Lowered cost of recruiting program	$2.3
Lowered cost of printing and binding	2.3
Inactivation of administrative vehicles and substitution of civilian type vehicles for heavy military type vehicles	11.9
Inactivation of facilities surplus to peacetime needs	169.2
Lowered cost of petroleum reserves	.5
Lowered cost of classified project	2.1
Restrictions on civilian travel	.4
Bringing the rating structure of enlisted men into line with actual distribution and the structure plan for fiscal year 1951	9.9
Institution of the monetary maintenance allowance system in lieu of issue-in-kind	13.8
Curtailing and closely examining requirements for issuance of change of station travel orders	3.6
Lowered cost of quarters allowances for enlisted personnel resulting from adjustments in the rating structures	1.9
Early discharges, releases to CAD officers, and lower requirements for recruit outfits	9.5
Reduced requirement for operation of aircraft	5.0
Decrease in depot and base supply and maintenance	4.2
Lower fuel requirements from reduction in steaming hours of the active fleet and operation of a smaller fleet	2.6
Rescheduling and combining cargo shipments	7.9
Lowered operating expenses of ships other than fuel	3.0
Adjusting schedules for ship overhauls, reevaluation of scope of work required for individual ships, and accomplishment of increased self-maintenance by ships' crews	$10.0
Decrease in the total communications requirements for the Department of Defense including those resulting from the operation of AFSA	6.6
Reduced procurement of organizational clothing, motor transport spare parts, general supply items, signal supply items, and curtailment of repairs, upkeep, and improvements for Marine Corps	1.0
Lower level of support for courts-martial, chaplain supplies, miscellaneous schools, etc	.7
Curtailment of major repairs and replacements and general maintenance of naval facilities	7.6
Savings through consolidation of Reserve training facilities, joint use of facilities and inactivation of some smaller training vessels while at the same time extending the training schedules of some of the larger vessels which will accommodate greater numbers of Reserve personnel for training	13.5
Reevaluation of research and development projects	17.2
Cancellation of the quinquennial overhauls of reserve fleet vessels and reduced preservation and maintenance of other war reserves	13.5
Curtailment of information and education activities	.3
Employment of better traffic policies and procedures in the operation of a central Military Land Traffic Office	1.6
Reduction of leased space after consolidation of activities	.07
Reduction and unification of military attaché office staffs	1.4
Lower cost of planned field exercises	.5
Savings in maintenance and operation of hospital facilities	5.3
General appropriation reprogramming by deferred maintenance, personnel reductions or turn-over, lower level of operation in order to absorb wage board and other pay increases	156.5
Flying hours reduced	57.7
Reevaluation of industrial mobilization	25.9
Total	569.5

[1] From Semiannual Report of the Secretary of Defense, July 1–December 31, 1949, pp. 53–55.

CONCLUSION

It will be noted that all the examples cited in appendix A, except those relating to the Veterans' Administration and the Post Office, are taken wholly from official reports and releases of executive branch departments and agencies, and, in those two cases, the estimates are based upon official figures.

These examples, to repeat, are simply intended to illustrate the point that concrete economies can be substantiated. They do not by any means represent the probable total of all such economies if all departments and agencies could have been included in this study.

The total of this partial list is itself impressive, however:

	Million
General Services Administration	$677.0
Veterans' Administration	545.0
Post Office Department	[1] 72.0
Reconstruction Finance Corporation	[2] 474.4
Department of Defense	569.5
Total	2,337.9

[1] Increased revenues.
[2] Capital returns.

[1] Annual Report of the Secretary of the Treasury, for the fiscal year ended June 30, 1956, p. 138.

APPENDIX B

SPECIFIC EXAMPLES OF SAVINGS, CAPITAL RETURNS, AND INCREASED REVENUES RESULTING FROM THE REPORTS AND RECOMMENDATIONS OF THE BIPARTISAN SECOND (1953–55) HOOVER COMMISSION

The second bipartisan Hoover Commission was created in cognizance of the need for continued study and improvement of Federal administration. The Brown-Ferguson Act (Public Law 108, 83d Cong., 1st sess.) provided for a second Commission on Organization of the Executive Branch of the Government. It was passed without a dissenting vote in either House. President Eisenhower signed the bill on July 10, 1953.

The new Hoover Commission was assigned the responsibility of recommending methods and procedures for: Reducing expenditures to the lowest amount consistent with efficient performance of activities; eliminating duplication of functions; consolidating services of a similar nature; abolishing those activities not necessary to efficient conduct of Government; eliminating those functions which compete unnecessarily with private enterprise; defining responsibilities of officials, and relocating independent agencies directly responsible to the President into departments or other agencies.

The major difference between the first Hoover Commission and the second lies in the fact that, while the first Commission was directed to concern itself with the procedural aspects of Federal administration, the second Commission was, in addition, instructed to go beyond this, to raise the substantive question of whether a given Federal activity should be continued or discontinued regardless of the efficiency or lack of efficiencies with which that activity was being administered.

The Citizens Committee estimates that $480.1 million has resulted in savings from the second Hoover Commission recommendations already put into effect. The figures listed in this appendix reflect those savings made during the year 1955 and thereafter, with a few from 1954.

The examples here cited are all taken from official reports. While most are directly attributable to the Commission's recommendations, some are byproducts, due in whole or in part to the stimulus of the Commission's proposals.

1. THE TREASURY DEPARTMENT

New management programs were installed as well as audit studies, evaluation of the revenue accounting system, operational cost reports, and workload statistics. These and other managerial information leading to savings resulted wholly or in part from the recommendations of the second Hoover Commission.

Total net space requirements were reduced. Programs were carried on to provide more suitable and efficient space and facilities. Related activities have been put under one roof to provide for more efficient operations. Much effort has been devoted to improving and modernizing accounting systems within the Department. In many Treasury activities new, modern equipment was installed.

The origin of these savings can be traced to the stimulus of Hoover Commission recommendations on central accounting and reporting, spread of workload, discontinuance of detailed appropriation and receipts accounts, and methods of recovery of capital sums to the Treasury. The savings for 1955 and 1956 are detailed as follows:

Fiscal year 1955[1]

	Million
Savings in cartage costs	$0.1
Reductions in export control operations	.1

[1] Annual report of the Secretary of the Treasury on the state of the finances for the fiscal year ended June 30, 1955.

Fiscal year 1955—Continued

	Million
Procedural and organizational realinements in the Bureau of the Public Debt	$0.4
Conversion of disbursing accounts	.2
Closing of four regional accounting and disbursing offices	.2
Installation of mechanical equipment in the Division of Disbursement	.2
New system for correspondence control	.6
New form of index card maintenance	.2
Reduction in supervision by Internal Revenue storekeepers	.4
Discontinuance of coinage operations at two offices	.4
Disposal of excess properties by the Coast Guard	.9
Transfer of three Coast Guard supply depots to the Navy	.2
Decommissioning of 10 Coast Guard vessels	1.6
Better utilization of personnel	.2
Overall reduction due to improved methods and procedures	4.6
General management improvement program in the Bureau of Accounts	.6
Reorganization improvements in the Bureau of the Mint	.6
Total	11.5

Fiscal year 1956: Improved management actions saved a total of $8 million—Annual recurring savings—$6 million [1]

Revised procedures for the examination of printed products in the Bureau of Engraving and Printing	$0.3
Revisions in taxpayer-assistance programs in Internal Revenue	2.8
Extended use of mechanical and electrical equipment	.1
Transfer of Coast Guard supply facilities to the Navy	.2
Disposal of one supply base	1.0
Transfer of 46 parcels of property to General Services Administration for disposal	.4
Disposal of surplus vessels by the Coast Guard	.2
Space and equipment utilization survey in the Bureau of Customs	.5
released space valued at and declaration of surplus equipment	.1
Customs Bureau reductions in manpower, space, and equipment	.8
Management improvement program in the Division of Disbursement	.6
Savings on an annual basis (recurring) from the Management Improvement program	.6
Elimination of duplicate sets of records [2]	1.0
Reorganization of the Bureau of Accounts and the Savings Bond Division (recurring)	.2
Total	8.8

[1] Items 1 through 11 obtained from the annual report of the Secretary of the Treasury on the state of the finances for the fiscal year ended June 30, 1956.

[2] Accounting and Auditing Developments in the United States General Accounting Office—United States Government Printing Office, 1957.

2. THE GENERAL SERVICES ADMINISTRATION—FISCAL YEAR 1956

Many new savings factors have been introduced into the General Services Administration since the second Hoover Commission completed its work. An accrued cost system of accounts was established, and large reductions in paperwork resulted from the creation of a single fund for administrative operations. Expansion of electric accounting-machine operations brought about savings in several accounting processes throughout the administration. A performance-analysis system was installed to measure performance in terms of accomplishments and cost. Finally, the internal audit program was more clearly defined so as to emphasize the review of internal controls on an agencywide basis.

These improvements embrace the Hoover Commission recommendations for storage and distribution, paperwork management, procurement, property management, records management, stockpiling and warehousing, and surplus-property distribution within the General Services Administration. The record of savings for the General Services Administration in 1956 is listed below:

	Million
More efficient telecommunications service [1]	$1.0
Continued utilization of real property transfers	5.7
Records management surveys	4.3
Releasing of storage space	.7
Curtailed expenditures for new cabinets	2.3
Curtailed expenditures for transfer cases	.4
Transfer, instead of new procurement, of property	95.0
Repair and rehabilitation of equipment instead of new purchase	1.2
Improved audits and financial management	1.0
Reduction of motor vehicle fleet (recurring) [2]	20.0
Improved payroll procedures [3]	.1
Total	131.7

[1] Annual report of the Administrator of General Services for the year ending June 30, 1956 (items 1 through 9).

[2] GSA press release, February 17, 1956.

[3] 8th Annual Progress Report under the Joint Program To Improve Accounting in the Federal Government, 1956.

3. THE FEDERAL HOUSING ADMINISTRATION

The opportunity for administrative savings does not exist in as great a degree in the Federal Housing Administration as it does in other Departments or agencies.[1] However, management improvements for FHA in 1955 were responsible for savings of approximately $0.5 million.

It is as a result of recommendations of the first Hoover Commission that the Housing and Home Finance Agency embraces all Federal activities in the housing field except the Veterans' Administration and the Farmers' Home Administration. The Federal Housing Administration naturally falls within the scope of the Agency. Recommendations of the second Hoover Commission regarding the Federal Housing Administration are, for the most part, concerned with authority and studies of mortgage-loan insurance. These would be extremely hard to evaluate in terms of savings. General management improvements are most indicative of the savings made by the Federal Housing Administration and appear below.

Fiscal year 1955 [2]

	Million
Management improvements in Comptroller's Division—expected to effect annual savings in personal services of	$0.2
Records management economies	.2
Better use of space, and printing economies	.1
Total	.5

[2] Twenty-second annual report, Federal Housing Administrator, for year ending December 31, 1955.

4. DEPARTMENT OF THE INTERIOR

The Interior Department also participated in accounting reviews and cost-type budgeting. The Department also continued to examine internal functions in order to discontinue those activities which were in competition with private enterprise. This directly follows the recommendations of the second Hoover Commission. In addition, the Department proceeded to dispose of unneeded real property and to better organize field organizations. Much progress was made in records management and also in the area of general administration.

Evidence of the influence of Hoover Commission recommendations on business enterprises, paperwork management, and disposal of surplus property can be clearly seen in the savings shown here.

Fiscal year 1955 [1]

	Million
Decrease in volume of reclamation records	$0.1
Disposition of excess property, Bureau of Mines	.2
Total	.3

[1] 1955 Annual Report, Secretary of the Interior, Partnership in Resource Conservation and Development, for the fiscal year ended June 30, 1955.

Fiscal year 1956 [1]

	Million
Reduction in volume of stored records, releasing space and equipment worth approximately	$0.2
Transfer of surplus property to other agencies	.1
Total	.3

[1] 1956 Annual Report, Secretary of the Interior, the Conservation of Natural Resources, for fiscal year ended June 30, 1956.

5. THE DEPARTMENT OF COMMERCE

A modified accrual basis of accounting is also being used by the Commerce Department. The full benefit of this system is yet to be realized, but some economies have been made. The Department has also installed modern electronic machines which have greatly simplified paperwork management. Space transfers, reduction of inventories, new filing methods, consolidation of records space, and sale of surplus property have effected savings of more than $19 million. Again, these management improvements are in accord with recommendations of the second Hoover Commission. Those savings which can clearly be identified are set down as follows:

Fiscal year 1955

	Million
Transfer of space from Army to Panama Canal Company [1]	$0.8
Reduction of inventories of the Panama Canal Company [1]	3.0
Simplified methods and modern electronic aids in taking the 1954 business census [2]	4.0
Reorganization and clearance of filing systems [2]	0.2
New cost control study by the Maritime [2]	0.3
Elimination of paperwork in Bureau of Public Roads [2]	0.5
Reduction of records storage space [2]	1.5
Sale of the Inland Waterways Corporation [3]	9.0
Total	19.3

[1] Annual Report of the Comptroller General of United States, 1955, 84th Cong., 2d sess., H. Doc. No. 255.

[2] Commerce Department release, Apr. 8, 1956, G655.

[3] Contained in special report to Congressional committee.

6. THE VETERANS' ADMINISTRATION

Improvements in management and administration in the Veterans' Administration

[1] Also the FHA is essentially a self-supporting Federal agency.

brought about significant results. Cost studies and new purchase practices were established, as well as control summaries and cost-type budget schedules. Procedural improvements in hospital administration were highly gratifying in light of the Hoover Commission recommendations. Progress was also made in the transfer and destruction of records and in the application of work simplification techniques.

The savings made by the Veterans' Administration clearly reflect the second Hoover Commission's recommendations applying to administrative procedure, medical supplies, storage operations, supply depots and distribution, and business-type services. The Veterans' Administration has adopted the Hoover Commission's principle that paperwork management places heavy proper emphasis on controlling the creation, maintenance, and use of records as well as storage and disposal. Achievements along these lines have been noteworthy, as may be seen by the savings figures:

Fiscal year 1955 [1]

	Million
Reduction in ratio of employees to patients in VA hospitals resulted in saving in salaries of approximately	$6.0
Cost studies in Department of Medicine and Surgery stimulated improved management at field stations	.7
Improved purchasing practices of items such as proprietary drugs and hearing aids	.4
More economical use of office space—release of excess space	.3
Redistribution of supplies	.2
Transfer of VA records to GSA Federal Records Center	.3
Disposal of unnecessary records	.2
Application of work simplification techniques	.2
Reduction of depot inventories within VA	.2
Transferring accounting functions of loan guaranty divisions to finance divisions in regional offices, resulting in elimination of approximately 65 positions	.4
Redistribution of excess personal property within the VA	2.1
Total	11.0

[1] Administrator of Veterans' Affairs—Annual Report, 1955.

Fiscal year 1956 [1]

	Million
Development of electric accounting procedures for loan accounting	$0.2
Procurement of thorazine at one depot with direct delivery to each station	.2
Microfilming of records eliminated annual expenditures for microphotographic equipment	.2
Transfer of adjustment and refund functions	.2
Release of filing equipment for other VA departments	.1
Reorganization of regional offices and transfer of work	.9
Consolidation of divisions at 10 VA hospitals	.5
Disposition and transfer of records	.2
Improved procedures and controls in supplies and services	.1
Total	2.6

[1] Administrator of Veterans' Affairs, annual report for fiscal year ending June 30, 1956.

7. POST OFFICE DEPARTMENT

The first Hoover Commission recommended improved accounting and budgeting procedures, and a comprehensive cost-control system for the Post Office Department. The new Hoover Commission emphasized real-property management and maintenance along with general reorganization of the Department. In following these recommendations the Postal Establishment has made substantial savings. Considerable progress has been made in modernization of controllership and management programs, conversion to punched card checks, the establishment of a reports management program, development of accurate measures of cost, improved classification of accounts, transportation procedures, and paperwork management. Savings stimulated in whole or in part by the Commission for the years 1955 and 1956 are as indicated.

Fiscal year 1955 [1]

	Million
Discontinuance of over 1,100 post offices	$1.5
Consolidation of 333 rural delivery routes with other rural routes	1.0
Change from advance authorization of space to "space used" agreements with railroads	10.0
Discontinuance of city distribution in 180 railway post offices	.4
Replacement of RPO service by closed pouch or star route service on 193 trains	4.0
Elimination of duplication in weighing magazines and newspapers	1.8
Total	18.7

[1] Annual report of the Postmaster General, fiscal year ending June 30, 1955.

Fiscal year 1956

	Million
Discontinuance of 813 post offices [1]	$1.1
Revised plant arrangement and mechanization of New York City west side terminal [1]	.8
Survey of all star routes in the southeastern States [1]	.2
Special agreements with rail and highway carriers for moving mail equipment [1]	.7
Modernization of financial and accounting practices [2]	20.0
New procedure for controlling overages from the sale of stamped envelopes [2]	.2
Discontinuance of city distribution for 120 cities in 200 RPO's [2]	.5
Discontinuance of RPO and closed pouch service on 900 trains [2]	8.0
Improved practices in dispatching and loading [2]	.1
Authorization of multielement rates and mileage equalization and 13 trunkline carriers [2]	5.1
Centralization of money order audit operation [3]	.5
Reduced printing costs through adoption of punch-card certificate form [3]	.1
Total	37.3

[1] Annual report of the Postmaster General, fiscal year 1956.

[2] Interim report, the Postmaster General to the President of the United States, September 30, 1956.

[3] Report on installation of industrial-type controllership, July 1, 1953, to June 30, 1956, Bureau of Finance, Post Office Department.

8. THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

This department, although relatively new, has made significant contributions in its measures of economy. Improvements have been made in accounting operations and general management procedures.

Fiscal years 1955 and 1956 (2-year totals) [1]

	Million
Freeing office equipment for reuse elsewhere in the Government	$0.7
Reduction in floorspace	.2
Reduction in motorized equipment	.2
Abolition of offices and divisions	.1

[1] Contained in special report to Congressional committee.

Fiscal years 1955 and 1956 (2-year totals)—Continued

	Million
Management improvements in Bureau of Old-Age and Survivors Insurance	$1.0
Total	2.2

9. THE DEPARTMENT OF DEFENSE

Two-thirds of the second Hoover Commission's recommendations apply to the Department of Defense. Improvements were underway in the Department even before the Commission completed its report; and, during the period the Commission was working, many were developed in cooperation with the Commission's task forces. Others have resulted directly from the recommendations of the Commission.[2]

Economies shown here are taken from official Defense Department reports and also from reports on the joint accounting program by the Comptroller General. While not all the economies listed can be directly attributed to the Hoover Commission, a substantial portion directly flows from the recommendations of both the first and second Commissions. It is here estimated—and most conservatively—that 10 percent of the total economies reported in the following pages can reasonably be attributed to the Commission's work. In fact, a logical case could be made for a far higher percentage. The total reported by the Department was $2,359 million, 10 percent of that is $235.9 million.[3]

Fiscal year 1955

During the fiscal year 1955, major emphasis was placed on improvements in supply management. In the field of standardization of stocks the beneficial effects of a new cataloging program were immediately evident. Standardization actions eliminated many items from military supply systems and developed common standards and specifications for commercial and military components. The Department estimated that savings from standardization of stocks in 1955 were $29 million.[4]

Similar improvements were made in the management of excess stocks. Increased efficiency was also achieved in the use of storage space. The introduction of uniform reporting systems made possible more cross-servicing in storage activities and the transfer of facilities from one department to another. An annual saving of $30 million resulted from the closing of 17 Army supply depots. When 6 of these depots were transferred to the Air Force, $16 million was saved in lieu of new construction costs. Improved transportation rate negotiations saved approximately $48 million.[5]

Work simplification is an integral part of the overall management improvement effort

[2] Action already taken on the second Commission's recommendations regarding food and clothing will eventually lead to substantial economy. This applies primarily to the "head count" on a service installation whereby the number of meals served is restricted to the number of personnel on that post. Food was ordered and meals prepared on the basis of an estimated total number of personnel. Because substantial percentages of the estimated total number were on leave, ill, or not present for a variety of reasons, this led to a great waste of food. The task force on food and clothing estimated that if this and other of its recommendations were fully implemented, a savings of $200 million a year would be possible.

[3] The use of the conservative 10-percent estimate also takes account of duplications (e. g.) as between reports of the Department and of the Comptroller General.

[4] Semi-annual report of the Secretary of Defense, January 1 to June 30, 1955, p. 42.

[5] Ibid., p. 43.

of the Army. The Defense Department estimated that a $13 million saving resulted from improvements installed by supervisors trained in this field.[6]

The Army financial management plan brought about many improvements in installation accounting and better use of stock inventories. Cutbacks in inventory levels have brought about the greatest monetary savings, according to Defense Department figures; $585 million in excess capital was relinquished in 1954 through reductions in stock, and $700 million in 1955.[7]

The Navy also contributed greatly to general economy and management improvements within the Department of Defense. Studies were made of the accounting features of cross-servicing and monetary accountability procedures. Audits of contractors' claims and other accounting and audit work brought about substantial savings. The Navy was able to save an estimated $123.5 million in the cost of materiel procurement.[8]

Air Force management underwent the same comprehensive study, and the Secretary of the Air Force estimated that $440 million was saved in contract costs resulting from improved audit procedures (this combines actual and potential reductions).[9]

Fiscal year 1956

The joint accounting improvement program carried on during the period January 1, 1956, to September 30, 1956, is illustrative of savings made in the Defense Department during that year. According to the Comptroller General of the United States, better management practices and financial improvements in the Department resulted in savings of $202 million.[10]

Improvements in inventory control resulted in the relocation of supplies and the saving of 250,000 square feet of space. It eliminated 187 different records for various financial inventory categories and brought about discontinuance of overlapping stocks of similar supply items. These measures reflected an estimated saving of approximately $133,000 per year. Method improvements based on a management study of in-transit warehouse procedures effected an estimated saving of $150,000. The indirect material inventory has been decreased by $381,000.[11]

Improved direct labor efficiency in the Department brought about a saving of $625,000.[12]

An internal review of inventory at the Long Beach Naval Shipyard resulted in a reduction of approximately $307,000 in ship stores insurance items. A ship stores inventory purification program at the San Francisco Naval Shipyard resulted in a reduction of approximately $386,000.[13]

At the Pearl Harbor Naval Shipyard, elimination of duplicate records and the abolition of 74 supply department positions through transfer of items saved $339,000.[14]

This joint program to improve accounting to which we refer, also highlights the internal audit program within the Department of Defense. It estimates that savings in the cost of Government procurement amounted to $166.4 million in fiscal year 1956.[15]

A navywide review of records, resulting in the elimination of duplicate records, saved an estimated $400,000. Reduction of stock-fund inventory at one naval activity amounted to $2.8 million as the result of an audit. At still another activity, disposition of excess stocks in the amount of $600,000 was instituted.[16]

CONCLUSION

As in dealing with the first Hoover Commission, it must be emphasized here that the departments and agencies used do not constitute the total areas of economies. While these figures are merely representative, they are perhaps the most illustrative ones obtainable.

Savings and financial returns are primarily limited to the years 1955 and 1956 because the second Hoover Commission's recommendations were mainly implemented in those years.

It is evident that savings in the Department of Defense constitute the greatest proportion of savings in the areas covered. This is valid because two-thirds of the second Hoover Commission's recommendations directly apply to the Defense Department.

The compilation of savings from recommendations of the second Hoover Commission and the corresponding departments and agencies is condensed as follows:

	Millions
Treasury	$20.3
General Services	131.7
Federal Housing	.5
Interior	.6
Commerce	19.3
Veterans	13.6
Post Office	56.0
Health, Education, and Welfare	2.2
Defense (at 10 percent)	235.9
Total	480.1

MAY 20, 1957.

Mr. CLARENCE FRANCIS,
Chairman, Citizens Committee for the Hoover Report, 777 14th Street, N. W., Washington 5, D. C.

DEAR MR. FRANCIS: Am glad to have your letter of May 16 concerning the Hoover Commission recommendations and my remarks on them in the House on Tuesday, May 14, 1957. Am especially glad to have a copy of the study made by your committee listing certain savings claimed to have resulted from the two series of Hoover Commission reports.

Permit me to correct you on one point. At no time have I said that no economy whatever can be expected to result from adoption of Commission recommendations. Certainly cut of the multitude adopted, there will be some savings, somewhere, however small. Have at no time contended otherwise. So, you erroneously conclude when you state that I "seriously questioned whether actual economies can result from the recommendations of the bipartisan Hoover Commission". I have stated or inferred, or both, and offered support thereof, and now repeat that—

1. The second Hoover Commission pointedly failed to list specific estimates of savings.

2. Failing this, it prominently listed the bloated estimates of savings made by the various task forces, and then made the sweeping and unsupported statement that adoption of the recommendations would produce enough savings to balance the budget and reduce taxes.

3. These grossly exaggerated, unbelievably fantastic claims have been advertised and sold to the American people. The people have been sold a bill of goods by your Citizens Committee and others. This is unfair to them and to their representatives in the Congress. Furthermore, it is a disservice to whatever worthwhile suggestions the Commission may have made.

4. Thus misled, the people have been bombarding the Congress demanding adoption of all the Hoover Commission recommendations and thus save billions—the most oft-used figures are $5 or $5½ billions.

5. The Hoover Commission recommendations to the contrary notwithstanding, Federal expenditures have consistently increased since the first Commission reported in 1949. All recommendations adopted, so far as can authoritatively be determined, have had no appreciable effect in reduction of the budget.

6. Perhaps the most absurd claim of all is that billions can be saved merely by adopting the budget and accounting reforms, the key feature of which is the proposed change to the so-called accrued expenditure basis of making appropriations. The original claim of savings was advertised as $4,000,000,000.

Sound appropriating processes are so vital to protection of the people's tax funds, and the claim of savings attributed to the proposed changes therein are so utterly groundless, that the fallacy of this accrued expenditure proposition must be exposed. I consider it in the public interest to undertake to persuade you and the Citizens Committee to see the preposterous dimensions of both the claim of savings and the shortcomings of the proposal itself. You are of course aware of the genesis of the $4 billion estimate of savings. The task force merely expressed "belief" that such savings could "reasonably be expected". At your national conference here in Washington last February, the Commission chairman stated that "there are savings estimated at over $3 billions to be had" by adoption of the accrued expenditure technique. Basis for that estimate was not given.

This accrued expenditure idea was apparently conceived in ignorance of certain budgetary and legislative facts of life. Those who persist in stirring the people to agitate for its adoption have seemingly accepted without question the faulty premises on which the idea rests. The first premise is that the Congress has lost control of the purse strings by reason of existence of billions of unexpended appropriation carryover balances and that adoption of the accrued expenditure method would eliminate or at least drastically reduce such balances, thus recouping control of the purse. Every day the Committee on Appropriations receives letters, pamphlets, and bulletins from across the country so stating. But they are sadly in error—exactly 180 degrees off. This system, if adopted, would not result in any reduction whatsoever in carryover balances. What would happen would be a large reduction in "appropriation" balances and an equally large increase in contract authorization balances, with no change in total unexpended carryover balances. That is an indisputable fact—it simply cannot be successfully denied. And contract authorization balances are just as important as appropriation balances. A government obligation or contract can and would be just as valid under one as under the other and, furthermore, once granted would result in just as much eventual spending. So, the first premise is completely without substance. It is unnecessary here to discuss the question in detail, but there is no substance to the contention that control of the purse has been lost merely because of large carryover balances, or for that matter, lost at all. Congress has absolute power in its hands, right now, to appropriate or not appropriate, as it sees fit.

You state that "as a most conservative estimate, a thorough scrutiny of such funds (carryover balances) might lead to a reduction of only 1 percent—and this is a minimum. This alone would be $500 million per year. It is our feeling that the savings would be considerably more substantial". This statement unmistakably shows that

[6] Ibid., p. 130.
[7] Ibid., p. 132.
[8] Ibid., p. 207.
[9] Ibid., p. 270.
[10] The Eighth Annual Progress Report Under the Joint Program To Improve Accounting in the Federal Government, 1956, by the Comptroller General of the United States.
[11] Ibid., p. 40.
[12] The Eighth Annual Progress Report Under the Joint Program To Improve Accounting in the Federal Government, 1956, by the Comptroller General of the United States, p. 41.
[13] Ibid., p. 45.
[14] Ibid., p. 45.
[15] Ibid., p. 49.
[16] Ibid., p. 50.

you, like so many others, apparently do not fully understand present procedures. And unfortunately, it also shows that you make the mistake of indulging, as did the task force and others, in broad, unsupportable generalizations in this respect. You twice indicate that reduction of carryover balances "might" lead to savings—a minimum of $500 million, you say. You "feel" that the savings would be considerably more substantial. Mr. Hoover says over $3 billion in savings are to be had through adoption of the plan. Why do you say "might"—why not offer some specific evidence of the basis for whatever estimate you produce?

You suggest "thorough scrutiny" of carryover balances. The Hoover Commission and those who advocate its recommendations have led the people to believe that Congress does not now scrutinize these carryover funds when considering requests for additional appropriations, or at best gives inadequate attention to them. Nothing could be further from the truth. It is standard operating procedure of the Committee on Appropriations to do so. Carryover balances should of course be held to absolute minimum and so should new appropriations. It is amazing that anyone would suggest that a mere change in the way appropriations are now stated would somehow more or less automatically assure closer examination of carryover balances. They are examined now. If it be contended that such examination is sometimes inadequate, certainly it is somewhat naive to expect that a mere procedural change would impart closer scrutiny.

Possibly the worst feature of the plan is that it would mean automatic return to the use of contract authority, a procedure abandoned generally some years ago. The Committee on Appropriations found from hard experience that contract authority costs the taxpayers more money in the long run. It has a certain appeal, and that is its principal defect. Experience demonstrated time and again that a request for direct appropriation received more searching scrutiny than a request for contract authority. It was often easier to secure acceptance of what was frequently said to be "merely contract authority". But once granted it results in eventual expenditure just as much so as under the usual direct appropriation method. It is the more costly method and for that reason, not only would the accrued expenditure idea not save $4 billion, or $3 billion, or $500 million, it would not save a single dollar. The Director of the Budget, Mr. Brundage, went so far as to say he always carefully avoided any mention of savings. When pressed to elaborate, he said he "felt satisfied" that the plan would save "several million dollars". It not only would not save money, past experience with contract authority suggests beyond reasonable doubt that it would actually cost money. Assume you are aware that just two months ago the Committee on Appropriations approved a report of a special subcommittee appointed to study the proposition because it so importantly concerns the business of the Committee. The Members of that subcommittee are experienced in legislative matters. They know something about the business of appropriating. They concluded that the idea "has disadvantages and offers no improvement".

The propaganda campaign to pressure the Congress into enacting the second Hoover Commission reports is strikingly similar to the one following the first Commission reports several years ago. That became so confused and ridiculous that, as you doubtless know, the Senate Committee on Government Operations issued a report in January 1953, reviewing the situation. The committee, the report stated, was "unable to find any sound basis for the unsubstantiated estimates of savings claimed by some of the proponents".

Have not had time to fully evaluate the many pages of detailed savings included with your letter, totaling $2,337.9 millions for the first Commission and $480.1 millions for the second Commission. They are described as being "clearly attributable" to the work of the two Commissions. First inspection of the lists, however, discloses some amazing items. For example:

1. Lower fuel requirements from reduction in steaming hours of the active fleet and operation of a smaller fleet. Claimed savings, $2.6 millions.

2. Flying hours reduced. Claimed savings, $57.7 millions.

This is the first knowledge at hand that steaming and flying hours or size of the fleet of the Navy was ever influenced by the Hoover Commission.

3. Lowered cost of classified project. Claimed savings, $2.1 millions.

Did the Commission in fact secure this saving?

4. General appropriation reprogramming by deferred maintenance, personnel reductions or turnover, lower level of operation in order to absorb wage board and other pay increases. (Defense Department) Claimed savings, $156.5 millions.

Is it a certainty that the Hoover Commission secured this item?

There are many others in the lists. You submit no conclusive evidence on which they can be accepted as a whole at face value.

The proposition at issue, however, is the recommendations of the Second Commission. On these you fail to substantiate the exaggerated claims of savings being made in their behalf. That is the issue.

Sincerely,

CLARENCE CANNON,
Chairman.

SENATE

THURSDAY, MAY 23, 1957

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

God of all grace, we turn to Thee for refuge from the noise and hurry of the world about us. Help us, being in it, not to be of it. May we fear only to be disloyal to the best we know, to betray those who love and trust us, and to disappoint Thy expectations concerning us. In a world where we see the dreadful penalties of selfish human separations, in this anguished generation we would dedicate ourselves as builders of bridges across all the dividing gulfs which mar and rend this divided earth.

Help us this new day to meet its joys with gratitude, its difficulties with fortitude, its duties with fidelity. Deliver us from petty irritations and resentments which dim the far look. Bring us to the ending of the day unashamed and with a quiet mind. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Wednesday, May 22, 1957, was approved, and its reading was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 6871) making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1958, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ROONEY, Mr. PRESTON, Mr. SIKES, Mr. MAGNUSON, Mr. CANNON, Mr. COUDERT, Mr. BOW, Mr. CLEVENGER, and Mr. TABER were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 2. An act to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes; and

H. R. 7599. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1958, and for other purposes.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 1400. An act for the relief of Mitsuko A. Hachita;

H. R. 1983. An act to provide for the conveyance of the reversionary interest of the United States in certain lands to the Clint Independent School District and the Fabens Independent School District in the State of Texas, or to either of them, and for other purposes;

H. R. 2018. An act to permit any State of the United States or any political subdivision of any such State to purchase from the District of Columbia Reformatory at Lorton, Va., gun mountings and carriages for guns for use at historic sites and for museum display purposes;

H. R. 2781. An act to amend the act entitled "An act to authorize the Secretary of the Navy to enlarge existing water supply facilities for the San Diego, Calif., area in order to insure the existence of an adequate water supply for naval installations, and defense production plants in such area," approved October 11, 1951;

H. R. 2797. An act to amend title 10, United States Code, to authorize the Secretary of a military department to furnish stevedoring and terminal services and facilities to commercial steamship companies, and for other purposes;

H. R. 4285. An act to authorize the sale of degaussing equipment by the Department of the Navy to the owners or operators of privately owned merchant ships of United States registry;

H. R. 5832. An act to increase the retired annuities of the civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School; and

H. R. 6454. An act to amend the act for the retirement of public schoolteachers in the District of Columbia, and for other purposes.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H. R. 2. An act to authorize the State of Illinois and the Metropolitan Sanitary District of Greater Chicago, under the direction of the Secretary of the Army to test, on a 3-year basis, the effect of increasing the diversion of water from Lake Michigan into the Illinois Waterway, and for other purposes; to the Committee on Public Works.

H. R. 7599. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1958, and for other purposes; to the Committee on Appropriations.

COMMITTEE SERVICE

On motion of Mr. KNOWLAND, and by unanimous consent, it was

Ordered, That the following be the members on the part of the minority of the Select Committee on Small Business:

Senator EDWARD J. THYE, of Minnesota.
Senator LEVERETT SALTONSTALL, of Massachusetts.
Senator ANDREW F. SCHOEPPEL, of Kansas.
Senator BARRY GOLDWATER, of Arizona.
Senator THOMAS H. KUCHEL, of California.
Senator JACOB K. JAVITS, of New York.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Internal Security Subcommittee of the Committee on the Judiciary was authorized to meet today during the session of the Senate.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of executive business, to act on the new reports on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORT OF A COMMITTEE

As in executive session,

The following favorable report was submitted:

By Mr. GREEN, from the Committee on Foreign Relations:

Executive C, 85th Congress, 1st session. A protocol between the United States and Canada to the Convention of May 26, 1930, for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River System; without amendment (Executive Rept. No. 2).

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the calendar will be stated, beginning with the new reports.

UNITED NATIONS

The Chief Clerk read the nomination of Harold M. Randall, of Iowa, to be Representative of the United States of America to the 7th session of the Economic Commission for Latin America of the Economic and Social Council of the United Nations.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

PUBLIC HEALTH SERVICE

The Chief Clerk proceeded to read sundry nominations in the Public Health Service.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Public Health Service nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

DEPARTMENT OF THE NAVY

Mr. JOHNSON of Texas. Mr. President, it is my plan to ask the Senate, while it is in executive session, to proceed to consider the nomination of J. Sinclair Armstrong, of Illinois, to be an assistant Secretary of the Navy. However, inasmuch as certain Senators who are interested in the nomination are not available at this time, I shall ask the Senate to postpone until a later time the consideration of that nomination.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, for the introduction of bills and the transaction of other routine business. In that connection, I ask unanimous consent that statements be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, when morning business is concluded, I plan to ask the Senate to proceed to the consideration of the nomination of J. Sinclair Armstrong, of Illinois, to be an Assistant Secretary of the Navy. I ask the attachés to notify Senators on both sides of the aisle.

PROPOSED APPROPRIATION OF AN ADDITIONAL SUM FOR COMPLETION OF INTER-AMERICAN HIGHWAY

The VICE PRESIDENT laid before the Senate a letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize appropriation of an additional sum required for completion of the Inter-American Highway, which, with the accompanying papers, was referred to the Committee on Public Works.

PETITION

The VICE PRESIDENT laid before the Senate a concurrent resolution of the Legislature of the State of Oklahoma, which was referred to the Committee on Finance, as follows:

Enrolled House Concurrent Resolution 538

A concurrent resolution memorializing the Congress of the United States of America to pass H. R. 358 without delay

To the Senate and House of Representatives of the United States in Congress assembled:

Whereas H. R. 358 is pending before the Congress of the United States to increase pensions to widows of veterans of the Spanish-American War; and

Whereas the passage of this measure is necessary to adjust such pensions in accordance with the increase of the cost of living: Now, therefore, be it

Resolved by the House of Representatives of the 26th Oklahoma Legislature (the honorable Senate concurring therein), That the Congress of the United States of America be, and it hereby is, requested to pass H. R. 358 without delay; and be it further

Resolved, That a duly certified copy of this resolution be sent to the Senate of the United States and one to the House of Representatives of the Congress of the United States, and a copy to all Members of the Oklahoma congressional delegation.

Adopted by the house of representatives the 25th day of April 1957.

B. E. HARKEY,
Speaker of the House of Representatives.

Adopted by the senate the 9th day of May 1957.

COWBOY PINK WILLIAMS,
President of the Senate.

REPORT OF A COMMITTEE

Mr. GREEN. Mr. President, from the Committee on Foreign Relations, I report an original resolution, extending to January 31, 1958, the authority of the Special Committee to Study the Foreign Aid Program, and I submit a report (No. 373) thereon.

The VICE PRESIDENT. The report will be received and the resolution will be placed on the calendar.

The resolution (S. Res. 141) was placed on the calendar, as follows:

Resolved, That Senate Resolution 35, agreed to January 30, 1957, is hereby amended by striking out June 30, 1957, wherever it appears therein, and inserting in lieu thereof, January 31, 1958.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of Texas (for Mr. HENNINGS):

S. 2148. A bill to amend section 3 of chapter 324 of the act of June 11, 1946 (60 Stat. 238) to clarify and protect the right of the public to information; and

S. 2149. A bill to authorize the Secretary of Health, Education, and Welfare to make grants from funds obtained under the Trading With the Enemy Act to assist the States and local communities to provide facilities for older persons including the surviving parents of veterans of World War II and the Korean conflict; to the Committee on the Judiciary.

(See the remarks of Mr. JOHNSON of Texas when he introduced the above bills, which appear under a separate heading.)

By Mr. JOHNSON of Texas (for Mr. HENNINGS and Mr. GREEN):

S. 2150. A bill to revise the Federal election laws, to prevent corrupt practices in Federal elections, and for other purposes; to the Committee on Rules and Administration.

(See the remarks of Mr. JOHNSON of Texas when he introduced the above bill, which appear under a separate heading.)

By Mr. HUMPHREY:

S. 2151. A bill for the relief of Rosemarie Eggebraaten; to the Committee on the Judiciary.

By Mr. CASE of South Dakota:

S. 2152. A bill to provide for the acquisition of lands by the United States required for the reservoir created by the construction of Randall Dam on the Missouri River and for rehabilitation of the Indians of the Crow Creek Sioux Reservation, South Dakota, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BARRETT (by request):

S. J. Res. 97. Joint resolution to establish certain national policies for Federal water and power projects in accordance with the recommendations of the Commission on Organization of the Executive Branch of the Government; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. BARRETT when he introduced the above joint resolution, which appear under a separate heading.)

PRINTING OF ADDITIONAL COPIES OF HEARINGS ON S 963, CONTROL OF ADVERTISING ON INTERSTATE HIGHWAYS

Mr. CHAVEZ submitted the following resolution (S. Res. 139), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Committee on Public Works of the United States Senate 800 additional copies of the hearings on Control of Advertising on Interstate Highways, Senate bill 963, held by that committee during the current session of Congress.

PRINTING OF ADDITIONAL COPIES OF SENATE REPORT NO. 130, 85TH CONGRESS, 1ST SESSION, ENTITLED "JUVENILE DELINQUENCY"

Mr. KEFAUVER submitted the following resolution (S. Res. 140), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Committee on the Judiciary 3,000 additional copies of Senate Report No. 130, 85th Congress, 1st session, entitled "Juvenile Delinquency," with sundry footnotes.

EXTENSION OF AUTHORITY OF SPECIAL COMMITTEE TO STUDY THE FOREIGN AID PROGRAM

Mr. GREEN, from the Committee on Foreign Relations, reported an original resolution (S. Res. 141) extending to January 31, 1958, the authority of the Special Committee to Study the Foreign Aid Program, which was placed on the calendar.

(See the remarks of Mr. GREEN when he reported the above resolution, which appear under the heading "Report of a Committee.")

INTRODUCTION OF BILLS ON BEHALF OF SENATOR HENNINGS

Mr. JOHNSON of Texas. Mr. President, on behalf of the Senator from Missouri [Mr. HENNINGS], I introduce three bills.

Yesterday, I visited the Senator from Missouri, who is in Bethesda Naval Hospital, where he is undergoing treatment for gall stones. I announce for the benefit of his friends, that he is resting comfortably; and all of us hope he will return to the Senate in a few days.

I ask unanimous consent to have printed in the RECORD statements prepared by the Senator from Missouri, relating to each of the bills just introduced.

The VICE PRESIDENT. The bills will be received and appropriately referred; and, without objection, the statements will be printed in the RECORD.

The bills, introduced by Mr. JOHNSON of Texas (for Mr. HENNINGS) were received, read twice by their titles and referred, as indicated:

To the Committee on the Judiciary:

S. 2148. A bill to amend section 3 of chapter 324 of the act of June 11, 1946 (60 Stat. 238) to clarify and protect the right of the public information.

The statements accompanying Senate bill 2148 are as follows:

STATEMENT BY SENATOR HENNINGS

I introduce, for appropriate reference, a bill to amend 5 U. S. C. 1002, the public information section of the Administrative Procedure Act.

This bill may be considered a companion to S. 921, which I introduced earlier in this session. Both are the result of studies made by the Senate Judiciary Subcommittee on Constitutional Rights, of which I am chairman, and deal with the vital subject of freedom of information and opposition to unwarranted secrecy in Government.

S. 921 amends an old Federal "housekeeping" statute to make it clear that authorization for agency heads to keep official records "does not authorize withholding information from the public or limiting the availability of records to the public."

The bill I am introducing today seeks to restore the original intention of Congress to the pertinent section of the A. P. A., as I understand it to have been, namely, to insure that the public receives adequate information from administrative agencies concerning their activities and procedures, to the maximum extent consistent with necessary requirements for protection of the national defense and security.

Paradoxically, many agencies have been citing this law as grounds for refusing to make information available to the public. This trend can be reversed, apparently, only by statutory amendments which will clarify some unfortunate, loose terminology now found in the statute but not properly defined.

When the provisions of the bill I am introducing today were made public several weeks ago, Secretary of Defense Wilson issued a public statement that the bill "either ignores or seeks to repeal the constitutional separation of powers, which nearly 170 years of experience has demonstrated to be one of the keystones supporting our great form of government."

I do not care to become involved in a public quarrel with Mr. Wilson, but I cannot let his statement stand unchallenged. He is dead wrong in saying that this bill either ignores or seeks to repeal the constitutional separation of powers. The bill does neither.

As I stated at the time its provisions were first made public, this bill is an outgrowth of the work of the Constitutional Rights Committee during the past year dealing with freedom of information, and was drafted only after long and detailed study. Careful consideration was given to every aspect of the bill, including the respective rights of the people, the rights and powers of the executive departments affected, and the rights and powers of Congress. It neither ignores nor seeks to repeal the constitutional principle of the separation of powers.

Under the circumstances, it is very difficult to understand what prompted Mr. Wilson's remark. In fairness to him, I think he should be given the opportunity to explain in detail just what it is about the bill that bothers him. Accordingly, when the bill is referred for consideration to the Constitutional Rights Committee—as I expect it to be—I will make every effort, as chairman of that committee, to see that Mr. Wilson is one of the first persons invited to testify about the bill's merits or demerits.

I attach herewith a statement I have prepared on this bill and S. 921 to be printed in the RECORD as part of my remarks. The two bills, together with this explanatory statement, will be circulated among executive departments, commissions, boards, administrative agencies, and independent Government offices, for their official comments. I also intend to send the two bills to officers and representatives of news-gathering associations for any observations and suggestions they may care to offer. And, as I have previously announced, it is contemplated that the constitutional rights subcommittee will conduct public hearings in the general area of freedom of information.

STATEMENT BY SENATOR THOMAS C. HENNINGS, JR., ON PROPOSED AMENDMENTS TO TITLE 5, UNITED STATES CODE, SECTION 22 AND TITLE 5, UNITED STATES CODE, SECTION 1002

In recent years, there has been an increasing tendency in this country toward secrecy in the conduct of governmental affairs. The trend toward secrecy has become so pronounced, in fact, that for the past year the Senate Subcommittee on Constitutional Rights has been making a careful and detailed study of the extent to which restrictions on freedom of information may be infringing the constitutional rights of the people, and it plans to continue this study during the coming year.

The staff of the Subcommittee on Constitutional Rights has found many instances of what appear to be clearly unwarranted withholdings of information from both the public and Congress by various governmental departments and agencies. When the departments and agencies involved have been asked to show by what authority they justify such withholdings, they frequently have cited and attempted to rely upon section 22 and section 1002 of title 5 of the United States Code.

If we turn to section 22 and section 1002, however, and delve into their legislative history and the purposes for which they were enacted, we find that they were in no way intended to authorize many of the limitations on the availability of information for which they have been cited.

It is to eliminate, or at least sharply curtail, the unjustified citation of section 22 and section 1002 as authority for withholding information about public affairs that the following amendments to these sections have

been prepared. The effect of these amendments should be to force Federal officials to seek proper statutory warrant, or presidential directives of indisputable constitutionality, for their decisions to keep information from the public.

PROPOSED AMENDMENT TO TITLE 5, UNITED STATES CODE, SECTION 22 (S. 921)

Section 22 of title 5 of the United States Code now reads:

"SEC. 22. Departmental regulations

"The head of each department is authorized to prescribe regulations, not inconsistent with law, for the government of his Department, the conduct of its officers and clerks, the distribution and performance of its business, and the custody, use, and preservation of the records, papers, and property appertaining to it."

This section was enacted in 1789 and its language has remained unchanged since then. The language of the section is simple, and on its face its purpose is obvious. It is a mere housekeeping statute, authorizing department heads to make regulations regarding the internal, day-by-day operations of their departments, including the routine handling of records and papers and their preservation for historical and other reference purposes. Nothing is said about authority to withhold information from the public, and there is nothing in the legislative history of the section to show that Congress intended it to bestow such authority.

Despite the obviously limited purpose of section 22, it has been cited, as noted above, to justify withholding from the public, including the press and other interested persons, information pertaining to public affairs. To stop such misuse of section 22, I introduced in the Senate on January 29, 1957, S. 921, a bill which is pending now before the Subcommittee on Constitutional Rights.

S. 921 would amend section 22 to read as follows:

"SEC. 22. Departmental regulations

"The head of each department is authorized to prescribe regulations, not inconsistent with law, for the government of his department, the conduct of its officers and clerks, the distribution and performance of its business, and the custody, use, and preservation of the records, papers, and property appertaining to it. This section does not authorize withholding information from the public or limiting the availability of records to the public."

The addition of the proposed new sentence should restore section 22 to its original housekeeping function, and should prevent department and agency officials from reading into the language of the section a grant of authority to censor which was never intended. It will not interfere with the proper classification of military secrets nor will it jeopardize defense security in any way.

PROPOSED AMENDMENT TO TITLE 5, UNITED STATES CODE, SECTION 1002

Section 1002 of title of the United States Code presently reads:

"SEC. 1002. Publication of information, rules, opinions, orders, and public records

"Except to the extent that there is involved (1) any function of the United States requiring secrecy in the public interest or (2) any matter relating solely to the internal management of an agency—

"(a) Every agency shall separately state and currently publish in the Federal Register (1) descriptions of its central and field organization including delegations by the agency of final authority and the established places at which, and methods whereby, the public may secure information or make submittals or requests; (2) statements of the general course and method by which its functions are channeled and determined, including the nature and requirements of all formal or informal procedures available as well as forms and instructions as to the scope and contents of all papers, reports, or examinations; and (3) substantive rules adopted as authorized by law and statements of general policy or interpretations formulated and adopted by the agency for the guidance of the public, but not rules addressed to and served upon named persons in accordance with law. No person shall in any manner be required to resort to organization or procedure not so published.

"(b) Every agency shall publish or, in accordance with published rule, make available to public inspection all final opinions or orders in the adjudication of cases (except those required for good cause to be held confidential and not cited as precedents) and all rules.

"(c) Save as otherwise required by statute, matters of official record shall in accordance with published rule be made available to persons properly and directly concerned except information held confidential for good cause found."

This section, enacted June 11, 1946, is the public information section of the Administrative Procedure Act. Its legislative history shows clearly that Congress intended that the section should serve as a means of insuring that the public would receive adequate information from administrative agencies about their operations and procedures. As stated by the Senate Judiciary Committee in 1946:

"(Section 1002) was drawn upon the theory that administrative operations and procedures are public property which the general public * * * is entitled to know or have the ready means of knowing with definiteness and assurance" (S. Doc. 248, 79th Cong., 2d sess., 198).

It is ironic—but the studies of the Subcommittee on Constitutional Rights show that it is a fact—that this statute, "drawn upon the theory that administrative operations and procedures are public property which the general public is entitled to know," has frequently been invoked by administrative agencies as authority for denying information to the public.

Part of the explanation for this perversion of section 1002's original purpose seems to lie in the way the section presently reads. Some of its terms and phrases are vague and undefined, giving agency officials wide latitude in interpreting and applying them. Included among these terms and phrases are:

1. Any function * * * requiring secrecy in the public interest.
2. Any matter relating solely to the internal management of an agency.
3. Required for good cause to be held confidential.
4. Matters of official record.
5. Persons properly and directly concerned.
6. Information held confidential for good cause shown.

The amendments now proposed are aimed at tightening the language of section 1002 by replacing these loose terms and phrases with language of more definite meaning, and making it clear beyond any doubt that the basic purpose of the section is to insure the dissemination of the maximum amount of information reasonably possible.

Section 1002 as it is proposed to be amended would read as follows:

"SEC. 1002. Public information

"In order to provide adequate and effective information for the public—

"(a) Organization and forms: Every agency shall separately state and promptly file for publication in the Federal Register and the Code of Federal Regulations: (1) Descriptions of its central and field organizations, including delegations by the agency of final authority; (2) statements of the general course and method by which its functions are channeled and determined, including the nature and requirements of all formal or informal procedures available; (3) descriptions of all forms for public use and instructions related thereto including a statement of where and how such forms and instructions may be obtained; and (4) every reorganization, amendment, or revision of the foregoing.

"(b) Rules: Every agency shall separately state and promptly file for publication in the Federal Register and in the Code of Federal Regulations: (1) All procedural rules; (2) rules relating to the availability of information to the public; (3) all statements of general policy or interpretation formulated and adopted; (4) all other rules; and (5) every amendment, revision, or repeal of the foregoing.

"(c) Orders and opinions: Every agency shall promptly file its orders and opinions, or make them available to the public in accordance with a rule published in the Federal Register and the Code of Federal Regulations, stating where and how they may be obtained, copied, or examined. No order or opinion shall be valid or effective until it has been published or made available for public inspection.

"(d) Public records: Every agency shall promptly make available to the public, in accordance with a published rule stating where and how such records may be obtained, examined, or copied, all records, files, papers, and documents submitted to and received by the agency. Public records include, but are not limited to, all applications, petitions, pleadings, requests, claims, communications, reports, or other papers, and all records and actions by the agency thereon, except as the agency by published rule finds that withholding is required by subsection (f) hereof. Every individual vote and official act of an agency shall be entered of record and made available to the public.

"(e) Effect of failure to publish: No rule, order, opinion, or public record shall be relied upon or cited by any agency against any person unless it has been duly published or made available to the public in accordance with this section. No person shall in any manner be required to resort to any organization or procedure not so published.

"(f) Exceptions: The provisions of this section shall not require disclosure of subject matter which is (1) specifically exempt from disclosure by statute, (2) required to be kept secret in the protection of the national security, or (3) of such a nature that disclosure would be a clearly unwarranted invasion of personal privacy; however, nothing in this section authorizes withholding of information or limiting availability of records to the public except as specifically stated in this subsection."

The proposed changes should go far to make of section 1002 the public information section it was originally intended to be.

S. 2149. A bill to authorize the Secretary of Health, Education, and Welfare to make grants from funds obtained under the Trading With the Enemy Act to assist the States and local communities to provide facilities for older persons including the surviving parents of veterans of World War II and the Korean conflict.

The statement accompanying Senate bill 2149 is as follows:

STATEMENT BY MR. HENNINGS

I introduce for appropriate reference a bill to authorize funds obtained from the Trading With the Enemy Act to assist the States and local communties in providing facilities for older persons.

First of all, I would like to say a few words about why I propose that these particular funds be used. I think that the time is long overdue for the question of the disposition of alien property to be completely settled. Congress has held innumerable and extensive hearings, the ground has been

covered and discussed to the point of exhaustion, and still very little action has been taken. Even today, we have a bill that will prevent further liquidation of seized enemy assets. I have signed the minority report to this bill, and one of my reasons for so doing is that I want no part of any additional delaying procedures. I also read in the papers that the Attorney General has indefinitely delayed his sale of the stock of General Analine, ostensibly because of the pendency of litigation affecting the properties. This certainly represents a departure from the Department's previous position that an early sale was extremely desirable.

Also, as a matter of principle, I am against return of the property to the Germans and Japanese. Such a giveaway would transfer to the United States taxpayers a burden that the defeated German and Japanese Governments agreed to bear. In addition—and this is an important point—this money would bestow an enormous windfall on a small number of leading German industrial firms which helped to build up the Nazi regime. We would also be violating agreements made with our allies. Moreover, there is no precedent in international law that would support the theory that the property should be returned. Consequently, I deeply believe that the property should stay in this country, and it is certainly going to do no one any good unless it is put to some use. I am convinced that—in addition to paying our own citizens for damages incurred during the war—we can divert some of these funds into a program that the whole country needs and wants and that will be of tangible benefit to everybody.

The program I propose is one to benefit our older citizens. First, I want to point out why I think our older citizens should be the ones to benefit from this money. Quite simply, of all the people in America today, I think that they are the ones who need help the most. Unquestionably, in this regard, the parents of veterans who died in the service of their country should be the first to benefit because they no longer have the help of their children upon whom they would normally depend. In addition, America has entered a new phase of its social development. Our rapidly increasing older population, together with lengthening life expectancy, have brought about many complex problems that we, as a nation, must solve.

There are many opportunities for older persons to make genuine and important contributions in their later years, and I am convinced that there is an increasing duty on the part of the Congress, the States, the communities, and the individual citizens to establish community services for those who need some assistance. We must give some kind of help to these older people, so that they may better employ the skills and resources that they have gained throughout their life. Lacking the stimulation of activity and human contacts, many of our older people are receding into premature tages of deterioration, and our hospitals, mental institutions, and old-age homes are strained to the breaking point.

To the extent we succeed in meeting the challenge of utilizing our older people's full capacities, we shall continue to build and make secure our Nation's strength. I am convinced that without some help, the growing numbers of old people will become a terrible social, medical, and financial burden to their children and to our total economy.

The money with which I propose to give this assistance is not coming out of the Federal budget. It is frozen money, which we obtained as a result of World War II. The money is in hand. It should be spent for a worthy purpose that would benefit the whole country.

My bill is designed to help the communities—on a 50–50 matching basis—in purchasing, building or remodeling, according to their own needs and desires, any combination of three kinds of facilities:

1. Community center which includes, insofar as possible, recreational, educational, and counseling programs.

2. A dormitory-like center for older people who do not need constant medical care, but cannot manage adequately for themselves.

3. Housing units with separate, complete apartments suitable for occupancy by one or two older persons.

Local rental agencies shall be authorized to rent and manage this property. The dormitory center shall be managed by the local community, or whomever the local community designates. Rental fees should not exceed the individual's reasonable ability to pay.

Studies undertaken by the Committee on the Aging in the Department of Health, Education, and Welfare, and by leading private authorities, give unequivocal proof that community centers are one of the major needs for older persons. Some communities have already established such centers and their success is almost phenomenal. Likewise, there is an undeniable need for homes for the older people who are feeble, but not sick. Currently, almost no help is provided for these persons. They do not belong in, or cannot afford, nursing homes, and yet they cannot manage for themselves. My proposal would give them the security of food and shelter and would save them from being candidates for expensive care in institutions. In regard to the housing units, practically every community that has surveyed the needs of its older people, places high priority on having adequate housing facilities. Of course, the problem of increasing the supply of housing for the aged is an essential element of the basic problem of increasing the general availability of housing. I hope that the money made available in my bill will stimulate public and private agencies in their overall planning.

There are 10 million older peope who do not have a regular employment income, and a majority of these are having trouble making ends meet. These people lack activity and human contact and, in many cases, are burdensome to themselves and the society around them. I know that my bill will help these people and will go a long way toward making them, once again, useful, productive, and happy members of this great democracy of ours.

By Mr. JOHNSON of Texas (for Mr. HENNINGS and Mr. GREEN):

To the Committee on Rules and Administration:

S. 2150. A bill to revise the Federal election laws, to prevent corrupt practices in Federal elections, and for other purposes.

The statement accompanying Senate bill 2150 is as follows:

STATEMENT BY SENATOR HENNINGS ON BEHALF OF HIMSELF AND THE SENATOR FROM RHODE ISLAND, MR. GREEN

I introduce, for appropriate reference, a new election bill.

At the beginning of the current session, on January 9, 1957, I introduced an election bill which was given the number S. 426. For this reason I wish to add a few words of explanation why I thought it necessary to introduce today a new legislative proposal.

Bill S. 426 is, with one exception, a restatement of the bill introduced by me on January 21, 1955—bill S. 636—and commonly referred to as the clean elections bill. Only in one point have I deviated from the scheme of my original bill. As title IV of S. 426 I have introduced amendments to section 315 of the Communications Act of 1934. My participation in the past election campaign has shown to me that the unrestricted provision for granting equal broadcast time to candidates represents an imposition on broadcasters and the public in that it opens radio and television to misuse by insignificant splinter parties, or even crackpots. It therefore appeared reasonable to me to adopt the remedial provisions of the bill sponsored during the last session by the distinguished majority and minority leaders.

Otherwise there is identity between S. 636 and S. 426. Both include a wide definition of the term "political committee," which subjects in Federal reporting provisions any such committee handling $100 or more for the purposes of election campaigns. Both bills define the term "election" as to include primaries which, as we know, in some States amount to elections, and which generally are an integral part of the Federal elective process.

In the majority of the States, seekers of Federal office can become candidates for election only by means of a primary vote. Identical also are the limitations on campaign spending and both bills provide for a strict system of reporting campaign contributions and expenditures so that the money aspect of elections should unfold itself as openly as possible before the American people.

It is our thought that these provisions would greatly improve the Federal election process. Clean elections must afford a reasonable chance to any candidate and any political party to present their cause to the voters in an adequate fashion. In our view, these ends can be achieved when provision is made for realistic limitations on campaign spending and full disclosure of the sources of campaign financing. None of the bills, however, which I introduced heretofore expressed the idea that clean elections can be established only by means of shackling the political freedom of our citizens. Both bills avoid petty paternalism and policelike supervision of citizens' activities in connection with Federal elections, as suggested in some recent legislative proposals.

The bill I have just introduced shares the spirit of its predecessors and, substantially, the wording. Yet it must be considered a new bill because of two new provisions which I wish to explain.

In former bills the activity of political committees was made dependent on the authorization of candidates they would like to support. No political committee was permitted to accept contributions or to make expenditures without such an authorization. According to the original scheme, this provision did not apply to political committees supporting candidates for President and Vice President as well as to political committees which are subdivisions of a party legally existing under State laws. And yet, in spite of these exceptions, doubts were raised in some quarters as to the constitutional validity of the authorization provision. It was said that the right to grant or to withhold authorization would constitute the candidate a censor of the political activities of his fellow citizens. It was thus argued that the provision would be a violation of the right of free speech and of the right of free assembly guaranteed by the first amendment to the Constitution.

With this position, I could not agree at the time and do not agree now. It is reasonable to draw a line between political freedom and the right to raise and spend funds in connection with the exercise of this freedom. It is indeed my own belief that while the First Amendment guarantees freedom of speech and freedom of assembly, it does not prevent Congress from regulating and licensing the operation of money raising and money spending where such use of funds may contribute to the distortion of the very freedom of speech and assembly.

In spite of this belief of mine, I have modified the authorization provision. I do not wish that it should stand in the way when we take action on the pending election bills. Under the new section 201 (a) the candidate is still responsible for the financial

operations of political committees authorized by him. Yet, the lack of such authorization does not prevent unauthorized political committees from accepting contributions and making expenditures for the benefit of the candidate. At the same time, the candidate is required to make public the names of political committees acting under his authorization and every political committee, in its turn, is required to state whether or not it acts with the authority of the candidate. In this manner, the authorization requirement acquires a political and moral emphasis instead of its original stress on financial responsibility. It forces the candidate to disclose to the prospective voters his political affiliations.

The second major modification incorporated in the new bill relates to the system of administration of the Election Act. The administration of the existing election laws exhibits considerably laxity of enforcement. The Clerk of the House of Representatives, who is at present entrusted with oversight in matters of elections, does not possess sufficient independence and authority. For this reason, the new bill charges the Comptroller General with the administration of the proposed Election Act (section 207 and passim).

I shall not dwell on the other new characteristics of the election bill just introduced. I shall just remark in passing that I have made the income-tax-deduction bill, S. 920, title V, of the new bill. This would provide for tax exemption on account of political contributions, in order to stimulate as many small givers as possible to participate in the financing of our election campaigns.

In concluding my brief remarks I would like to add with all emphasis and conviction at my disposal that we have delayed election reform for far too long. I say this though I am not an advocate of hasty legislative measures. I believe that time and common interest contribute valuable legislative ideas and proposals. I believe, however, that in regard to election reform, we have turned from seeking new ideas to mere restatement of well known evidence of abuses and corrupt practices. Instead of the effort of passing new election laws, we have recently devoted ourselves to the effort of technically perfecting the presentation of evidence. In these circumstances, delays are futile. It is time that words should cease and action be taken.

NATIONAL POLICIES FOR FEDERAL WATER AND POWER PROJECTS

Mr. BARRETT. Mr. President, by request, I introduce, for appropriate reference, a joint resolution to establish national policies for Federal water and power projects, which has been prepared after many months of detailed study by the Chamber of Commerce of the United States, through its highly specialized departments.

The Senate Committee on Interior and Insular Affairs, along with the Public Works Committee, will soon consider a report on Senate Resolution 281, which deals with the same subject matter, namely, the guides for evaluating and considering, with respect to the executive and legislative branches of the Government, proposals for the development of water resources.

I am certain that the joint resolution I am now introducing does not cover the complete problem which is constantly before the Congress in connection with water-resource projects, but I think it has a great deal of merit, and could be considered along with several other measures and proposed legislation in this field.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 97) to establish certain national policies for Federal water and power projects in accordance with the recommendations of the Commission on Organization of the Executive Branch of the Government, introduced by Mr. BARRETT (by request), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

COMPACT BETWEEN STATE OF NEW YORK AND GOVERNMENT OF CANADA—ADDITIONAL SPONSOR OF SENATE JOINT RESOLUTION

Mr. IVES. Mr. President, on yesterday I introduced the joint resolution (S. J. Res. 95) granting the consent of Congress to an agreement or compact between the State of New York and the Government of Canada providing for the continued existence of the Buffalo and Fort Erie Public Bridge Authority, and for other purposes. The name of my very able colleague, the junior Senator from New York [Mr. JAVITS], was supposed to appear on the joint resolution as a co-sponsor, with me. However, inadvertently his name was omitted. Therefore, I ask unanimous consent that the name of the junior Senator from New York [Mr. JAVITS] be added as a co-sponsor of Senate Joint Resolution 95.

The VICE PRESIDENT. Without objection, it is so ordered.

NOTICE OF CONSIDERATION OF CERTAIN NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

Mr. GREEN. Mr. President, as chairman of the Committee on Foreign Relations, I desire to announce that the Senate received today the nominations of 97 persons for appointment to the Foreign Service, and Consular and/or Diplomatic appointments for Foreign Service officers, staff officers, and Reserve officers.

Notice is given that these nominations will be eligible for consideration by the Committee on Foreign Relations at the expiration of 6 days in accordance with the committee rule.

THE FULBRIGHT SCHOLARSHIP PROGRAM

Mr. FULBRIGHT. Mr. President, Newsweek magazine in its forthcoming issue will carry an informative news article about the exchange of persons program which is supported by our Government.

Mr. President, in the press in recent days there has been considerable discussion of the action taken by the Senate on the United States Information Agency appropriation. On yesterday Mr. Marquis Childs complained, in his article, about that action.

I think the article in Newsweek is a very good answer to that complaint, and I recommend it to my colleagues as a very informative article on one of the important programs of the Government.

In my opinion, as between the overt propaganda of the USIA and the Exchange, the Exchange is the more effective. If we could divert funds from some of the less effective activities to USIA, I should have no objection to having that done.

I ask unanimous consent that the article from Newsweek be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE FULBRIGHT PILGRIMS

At home and abroad, the Fulbright scholarship program has had its share of critics. But the most sacrosanct of its appraisers, the academic circles of Europe, seemed this week to have become nearly unanimous in praise of the program as it faced its second decade.

A candid observation by a biology professor at the 500-year-old Albert Ludwig University in Freiburg: "Since the Fulbrighters came in we've have to revise completely our notions about the peaks that the American educational system can achieve."

At the London School of Economics and Political Science, where more than 100 Fulbright scholars have studied, Dr. Ann Bohn said: "They are, almost without exception, first class. The program is one of the best things to come out of America in years."

One effect of the program in its first decade, according to Dr. John F. Mead, executive secretary of the West German Fulbright Commission, has been "gradually to give bearers of Fulbright scholarships a distinction not unlike that usually associated with the ultra-choice Rockefeller, Guggenheim, Ford, and even Rhodes scholarships."

Since the first Fulbright scholars went abroad in 1947, a total of 27,739 students, teachers, research scholars, lecturers, and technical specialists have received Fulbright help. Of these, more than 11,000 were Americans who received not only travel money but living expenses and scholarships. (Foreigners who come to America receive only travel grants from Fulbright funds.) By the end of June, next year's American scholars will have been chosen on the basis of character, interview, scholastic background, and type of study project.

Intangible values: Despite the enthusiasm felt abroad about the Fulbrighters, the program has not always had smooth sailing at home. The cost of the project, which was set up at the suggestion of Senator J. WILLIAM FULBRIGHT, Arkansas Democrat, is met by the sale of American surplus materiel left abroad after the Second World War. Since then, Congress has authorized supplementary funds. It is these supplementary funds, under congressional debate again last week, which have been the sore point. A year ago, FULBRIGHT himself felt the Republican administration "is completely wrong in cutting this modest program. * * * The outlay is small, only $20 million per year, as compared to billions under the others." FULBRIGHT now feels that the program "hasn't remade the world, but it has a good prospect to in the long run. * * * The values of the program are intangible, like religion."

Quite tangible is the difficulty of American students in adjusting to the slower pace of European learning. Some, like Eunice M. Wood, 29, an ichthyologist with an M. A. from Mount Holyoke, feel frustrated by the fact that they cannot cram enough into the period abroad. Miss Wood, now working for a second year at the Laboratoire de Physiologie Générale in Paris, thinks that it would take me 4 to 5 years to finish my project

here, but I could do it in 2 or 3 years in America.

In contrast, Warren Zimmerman, 22, a summa cum laude Yale graduate who is studying English history at King's College, Cambridge, says that "almost all conversation and leisure is subtly melded into the pursuit of ideas. The pace is easy, but then you have all those months before examinations to spread yourself and soak up the place."

Sam P. Lyon, 29, of Chicago, agrees: "All the Fullbrighters I've met seem to have a pretty well-conceived notion of where they are going." Lyon is now completing work at Ludwig Maximilian University in Munich for his dissertation on the Sovietization of Czechoslovakia. He differs from most of the 700 Fullbrighters in Europe in that he is married, has a 2-year-old daughter, and is older than most.

In Munich now, he finds the lectures excellent, well-prepared, full of information and profound thoughts, and presented in an atmosphere of intellectual alertness.

The millionaires: The thing which worries Lyon most is money, and this is a primary concern for many of the Fullbrighters. Europeans, the scholars say, still seem to think all Americans are millionaires and tend to take advantage of the scholars financially. Harriet Polt, 24, a San Francisco girl studying Austrian and American literature at the University of Vienna, discovered that she was paying the whole of her landlady's monthly gas bill—an item described on her bill as washing dishes in hot water.

Perhaps the most impressive effect of the Fullbright program is that a large part of the students return to the United States with a strong urge to become teachers. "This phenomenon," said Dr. Mead last week, "makes it likely 10 years from now, the majority of the top teaching positions, above all in the humanities and social sciences, might be filled with ex-Fullbrighters—all of whom have had at least a full year abroad in their specific field. This extended international outlook might bear tremendous importance to an entire generation to follow."

Mr. FULBRIGHT. Mr. President, in the early part of last October, the Institute of International Education held in New York a conference on the subject of the Arts and Exchange of Persons. The distinguished President of the Institute opened the conference with a statement; and the Director of the Worcester Art Museum, Francis Henry Taylor, formerly Director of the Metropolitan Museum, made an excellent statement entitled "European Curiosity About American Culture."

These statements are pertinent to our present consideration of the exchange program and the United States Information Agency, and I ask unanimous consent that they be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

THE ARTS AND EXCHANGE OF PERSONS

(Report of a conference on the Arts and Exchange of Persons held October 4 and 5, 1956, at the Institute of International Education, New York City)

Conference advisory council: Gilbert W. Chapman; Aaron Copland; Robert W. Dowling; A. Conger Goodyear; G. Lauder Greenway; Arthur A. Houghton, Jr.; David M. Keiser; Grayson Kirk; Lincoln Kirstein; Robert Lehman; Pierre Monteux; Mrs. John D. Rockefeller III; Theodore Roszak; Mrs. Henry Potter Russell; Mrs. George Hamlin Shaw; Edward M. M. Warburg.

PROGRAM

October 4, morning session: Chairman, Edward M. M. Warburg.

Addresses by Francis Henry Taylor and Senator J. WILLIAM FULBRIGHT.

Afternoon: Panel meetings.

October 5, morning session: Chairman, Kenneth Holland. Reports from the panel chairmen.

This conference was made possible by a grant from the New York foundation.

"BACKGROUND OF THE CONFERENCE

"(By Kenneth Holland, president, Institute of International Education)

"The Institute of International Education called this conference on the arts and exchange of persons to explore the role of the artist in interpreting the culture of his own country to others; to review the opportunities for exchanges in the creative arts; to identify the artistic fields and geographical areas needing attention; and to determine the most effective methods for international exchanges in the arts.

"We wanted to know how important foreign experience is to the creative artist, what the roles of government and of private agencies are in the exchange of artists, and how effective the exchange of artists is without provision for exchange of their works.

"For this purpose we invited creative artists, performing artists, representatives of foundations and organizations concerned with the arts, program administrators and cultural representatives of foreign governments to discuss these questions with us.

"We at the Institute, have always assumed that all programs of exchange of artists, whether at the student, trainee, or higher professional level, contribute to the enrichment of all cultures, to better understanding among people of all nations, and to the development and advancement of the individual's artistic career. Much has recently been said about the need to counteract the cultural propaganda offensive of the Soviet Union which stresses their cultural achievements and disparages those of the United States. While this is an important factor, there are more basic reasons underscoring the values of exchanges in the arts.

"In most parts of the world, cultural and spiritual life hold a predominant place in the life of the people. Their impressions of us are formed by what they believe to be our way of life and our cultural patterns. We have been pictured as a materialistic society, interested only in money and gadgets, and lacking in sensitivity. It is important that the rest of the world know and understand the cultural and spiritual life in the United States and since the arts transcend language barriers, national barriers and political barriers, they are in a strategic position to convey to other peoples the real values of American life.

"At the same time, the United States has much to gain from exchanges in the fields of the arts. In a speech before the International Council of the Museum of Modern Art on May 12, 1955, George F. Kennan made the following statement: '* * * however great the importance of international cultural exchange from the standpoint of our relations with other countries * * * this is not the main reason why we Americans have need for cultural contacts with other peoples at this time. The main reason lies rather in our own need as Americans for just this sort of enrichment of our national spirit. I'm persuaded that any really creative development * * * is intimately connected with international contact and is, in fact, unthinkable without it. To test the proof of that proposition, I think, you only have to glance at the roots of our own American culture and see how varied they are and from how many types of soil, both in time and in space, they spring. No such culture could ever have developed in isolation, and, what is more important to us today. I'm sure that no such culture can continue to retain its spiritual vigor if it is kept in isolation.'

"Since its formation in 1919, the Institute has promoted and administered a limited number of exchanges in the creative arts. From 1919 through 1955–56, more than 2,200 persons in the arts fields received grants for exchange study through the Institute. In the period from the academic year 1949–50 through the academic year 1955–56, approximately 1,100 American students in the arts studied abroad and approximately 550 foreign students in the arts studied in the United States (in both instances these figures refer only to art students holding grants administered by IIE).

"Programs in this field, however, were very small until 1946 when the Fulbright Act was passed by Congress. The largest and most significant of exchange programs in the arts has been the Fulbright program. Nearly 1,700 American and foreign art students have been awarded Fulbright grants to study abroad since 1948–49. In 1955–56, out of a total of 1,000 Fulbright awards in all fields to United States students, 152 were granted to young artists.

"Fewer in number, but no less significant, are the Buenos Aires Convention awards administered for the Department of State by IIE since 1953. The Convention for the Promotion of Inter-American Cultural Relations, known as the Buenos Aires Convention, was signed in 1936 and has since been ratified by 17 countries, including the United States. The objectives of this program are similar to those of the Fulbright. The Convention provides for the annual exchange of two graduate students of each of the participating countries. Painting, sculpture, music, and folk art may be studied in many of the participating countries. Currently, American students in Latin America on BAC fellowships include two painters, one in Haiti, the other in Peru. Two young painters who won awards in 1954–55 have just returned from Peru and Venezuela, and in the previous year the arts were represented by a student of theater in Costa Rica, and a student of contemporary Mexican drama in Mexico.

"In a letter published in the October 1956 News Bulletin of the IIE, the grantee now in Peru wrote: 'everywhere, people are drawn to the painter and when he is out sketching here, or wandering through museums, he is likely to be approached for conversation, and this sometimes leads to an invitation for dinner.' Of the Indians in the jungle he wrote:

" 'They had no understanding of my drawings since the only drawing they know of is what they put on their own bodies, a linear pattern that conforms in part with the muscular contours. * * * These Indians and their surroundings will probably have the greatest influence on any work [although] it may be years before the effects of Peru (except for the subject matter) turn up in my work.'

"Awards given by foreign governments, foreign universities, private foundations and educational organizations are also administered by the Institute. Most of these awards do not cover the entire expenses of a year of foreign study, but in some cases it is possible for a scholarship winner to obtain a supplementary Fulbright grant to cover transportation. Students in the arts may apply for these awards, which are given by the Governments of Austria, Denmark, France, Italy, Mexico, the Netherlands and Sweden, and by universities, national societies and private organizations for study in Germany, Italy, and Spain. In Mexico, graduate students in architecture have the opportunity of being assigned as apprentices to leading architects of the country.

"The traffic, however, is not all one way. IIE is also responsible for introducing foreign artists into the United States, although the

number of those who come here is smaller than the number of American artists who go abroad under similar programs. Perhaps the members of this conference can tell us why relatively few foreign students apply for scholarships to study the arts in the United States. In 1953, for example, of 2,000 fellowships awarded through IIE to foreign nationals for study in this country, only 60 went to students of the fine arts.

"Under a grant from the Rockefeller Foundation in 1949, the Institute administered what it believes was the first large-scale planned program for the exchange of creative artists. This program brought 22 young artists from 10 European countries, Canada, and Mexico, in the fields of music, painting, sculpture, drama and writing. These young creative artists received scholarships for summer study and attended such centers as the Berkshire Music Center, the Boston Museum School, the Wellesley Summer Theater and the Harvard University Summer School.[1]

"In 1950, the program was renewed under a grant from the Rockefeller Foundation, and in 1952, the Institute again administered an international arts program under a grant from the Rockefeller and Ford foundations. In 1950, 19 young creative artists, and in 1952, 23 creative artists in the fields of painting, sculpture, theater, the dance, music, literature, and architecture came to the United States from Europe, Asia, Africa, and Latin American countries.

"A young Nigerian was able to take back to his country a knowledge of the silk-screen process of art reproduction; a New Zealand writer was tremendously interested in the possibilities of developing in the outlying communities of his own country the civic radio system which he found in Louisville, Ky.; a Japanese girl discovered basic ballet techniques and methods of choreography which she believed would enable her to translate classical Japanese folk gestures and expressions into modern ballet movements. American artists and art groups found much to interest them in the visitors, and one lasting result was the planning of a long-term exchange of architectural photographs between leading American and Japanese photographers to supplement the selection made available through the United States Information Service in Japan. Many of the visiting artists gave talks at a number of universities on some aspect of artistic development in their country.

"The visiting artists, who as intellectuals were fully aware of the propaganda purposes for which 'cultural congresses' and other such exchanges can be used, were impressed by the absence of any attempt to influence them toward a particular attitude or point of view. They recognized the absence of political overtones, of any effort to introduce political issues into discussion of the arts. They appreciated the program's emphasis on mutual problems in the arts, no matter what the country, and on the contribution of the individual artists to the cultural heritage of mankind. The following paragraph from the final report submitted by John Reece Cole, writer from New Zealand, stresses this point:

" 'The kind of experience that the international arts program affords the artists is almost unique. In a world that places so much emphasis on utility, on the scientist and the technician, it is rare to find such consideration given to the humane arts. It is probably rarer still to have the opportunity to travel, to attend an international gathering and to study in one's chosen field with complete personal freedom; freedom from chauvinistic flag waving, political manifestos, or approved lines in the arts. This is heartening indeed. I feel strongly that this particular aspect of the program will do more than anything to promote international understanding and good will.'

"We shall continue to encourage cultural exchange both by publicizing the need for further exchanges in the arts and by enabling the work of young artists to be seen and heard. We hope also to find, in cooperation with groups active in the arts and with interested individuals, new ways to improve and increase exchange of persons in these fields."

EUROPEAN CURIOSITY ABOUT AMERICAN CULTURE

(By Francis Henry Taylor, Director, the Worcester Art Museum)

"Not only have I had an opportunity in the last 2 years of going abroad in a much more leisurely fashion than I was ever able to do when I was at the Metropolitan Museum, but I have also had an opportunity to meet many kinds of groups in various places. I have, in that 2-year period, driven 6,000 miles through Europe, rather slowly, and I have spoken in 38 different European cities. I feel that I know something of the climate of opinion and the sense of curiosity which was latent in the discusisons I had about America and Europe.

"We are an unknown quality. There is virtually no American history taught in Europe, with the exception, I think, of 1 or 2 chairs at Oxford and Cambridge and at the University of London and possibly St. Andrews. On the Continent there is scarcely anything that we would call a chair of American history. Certainly, in France, until very recently, no such thing has existed except perhaps in the College de France. I remember, going back to my teaching experience in Chartres, how fascinated my pupils in the lycee were to learn even the most elementary things about this country, things that are so elementary to us that we never think of them.

"There is a time lapse, I believe, between the visual experience gained through motion pictures about the Western World and the literary experience which seems to underlie the foreigner's ideas about us. In other words, the elite are fairly conversant with the American novel, they know a little bit about American poetry and they are quite familiar with our gadgets, our iceboxes, our electric stoves, and automobiles. But they have no knowledge whatever of the things that make up our American atavism and our American historical climate.

"This is the experience of the average child who goes to the lycee at 8 or 9 and comes out a bachelor of arts at 19. He has heard of Christopher Columbus. He has heard rather nice things about the courage and virtue of the French missionaries in Canada in the 17th and 18th centuries. He has also done a certain lipservice to the memory of Lafayette. Then, because of fortuitous circumstances, as the author was very admirably translated into French, he knows the Leather Stocking Tales of James Fenimore Cooper almost by heart, and also because they were translated extremely well and are almost better in French than English, the short stories of Edgar Allen Poe. That brings us to the Civil War which, of course, was of no importance except that we thwarted the ambitions of Napoleon III in Mexico by the injunction of the Monroe Doctrine. Then there was a time lag in which some fortunes were made, not very properly, and imperialism finally reared its ugly head in the Spanish-American War.

"It is a pity, they say, that we didn't do quite what we should have in 1914 and 1918. And so it goes.

"There is very little real knowledge of American history or American life. Wherever I went, I talked chiefly about the background of American culture. It was the question period that was always the time I enjoyed the most and which brought out in the open this latent curiosity about us which is felt everywhere in Europe. Even in the most modest provincial circumstances the same curiosity existed that one encountered in the most sophisticated areas and the great capitals.

"I don't want to speak to you today about the techniques employed in the presentation of your own spheres of interest in the arts abroad. You know a great deal more about that than I do. But I would like to make a few observations.

"First and foremost, I think there has been too great a reluctance on the part of our professors, and I am speaking of people who go into the higher brackets of the Government exchanges rather than the students out of college, to go into the provincial cities abroad on exchange grants.

"This past winter I wanted to collect material for a book on the history of art in the 19th century. I wanted to see what the tycoons in the 19th century collected, so my wife and I took a car and visited the industrial cities of England, Ireland, and Wales. In Belfast and all through Lancashire and Derbyshire, we saw a tremendous poverty of knowledge about anything existing outside the immediate area, and particularly a skepticism about the various facets of the so-called American spiritual life.

"I want to touch upon the question of European's reaction to our American claims for life of the spirit in the United States. We have spent rather too much time in trying to teach our grandmothers how to suck eggs and they don't like it. Rightly or wrongly, they feel that practically the only one thing left to them of their native pride is their culture. We have pauperized them in virtually every other way. They find consolation in parading a certain inherited sophistication, if you want to call it that, or belief in their superior ability to understand the life of the mind.

"Of course, that is just nonsense. It is up to us to present the American life of the spirit in terms that justify our own belief in it. But I am afraid we are not doing it because we have not been giving them the things that go into the roots of American civilization. Nationally speaking, the roots of American civilization are now about as old as the roots of any of the nations of Europe. Yet I do not mean to imply by this that the 300 years of American history are comparable with the 1,000 years of development of France and Italy. I do mean, nevertheless, that the existing form of government and mode of operations is as old and conservative in this country as it is anywhere abroad. In fact, too often, rather more so.

"What the Europeans want to know is where do we have points in common in our past and how do they apply to the present. I think that we should place more emphasis than we do upon the background material of our Nation. For instance, one of the things that is most misunderstood in Europe is the American reaction to the concept of colonization. I found in talking with European audiences that when I explained to them that we too had had our colonial period but that it differed from the European in that our colonial expansion was between the Atlantic seaboard and the Pacific; and that we had gone through the same necessity to occupy new territories that they had, only there was space on the American continent for us to do it between the boundaries of our own Nation. Then they understood that we did have something in common, that we

[1] At the end of the summer, the group met at Columbia University for a conference on world understanding through the arts. They evaluated their summer's experience, gave a theatrical performance and exhibited some of their paintings, sculpture and writings.

were not just being holier than thou on the question of colonialism.

"There are hundreds of similar things that can be stressed—the expansion of the West, the opening of the frontier. For instance, there was shown 3 or 4 years ago in Dallas a perfectly extraordinary exhibition called The Fabulous West. It was based primarily on the work of Professor Prescott at the University of Texas, who has done such impressive work in presenting the development of the civilization of the plains.

"All of those things are interesting to people abroad because they reflect in actuality the very things which they have read about in the American novel. Among the novels that are very much read, particularly in France, are the novels of Willa Cather. One of Ours, for example, is a book that means a good deal to them because, for the first time, they begin to understand that we have not got a static peasantry such as they have in Europe, that each generation promotes itself into a new and higher stratification of society.

"Those are the things that I think we should emphasize. We should, of course, continue to show exhibitions of our best artists, but we should also bear in mind that there is a fairly sophisticated group of artists in this country today who have acquired a great deal of internationalism and have virtually ceased being American.

"I found a tremendous interest, incidentally, in the ashcan school. In the first place, the phrase ashcan was something that was both romantic and completely incomprehensible to them. In our discussions, it led to comments on the city life of New York as it had developed since the 1890's. Again they saw these things in terms of their reading and they really wanted to know more.

"What I want to emphasize is this need for satisfying this deep-seated curiosity. The best way we can satisfy it is by sending to Europe people of sufficient maturity and breadth of experience who are willing not only to visit the capitals but who are willing to go out into the sticks. I can't claim any virtue for having done so. I had a motive. I wanted to go to the midlands for my own research. But I am very glad I did from other points of view.

"I know one of the things that is weighed in the balance is whether an applicant for a foreign study award is mature enough and competent enough in his craft to make the best of the year he gets abroad. I don't think, really, that at the student age level, competence or experience are matters of deep importance. The essential thing is to pick the right people to go abroad—those who will understand what they see and who will get a rich orientation about Europe. Then they will come home and create American sympathy for European culture. Since the Fulbright program is a two-way street, I think it is just as important for us to bring over alert, keen young minds from Europe who are going to take America as they see it and not as it has been handed to them by the propagandists in their own countries."

ANALYSIS OF UNOBLIGATED BALANCES AVAILABLE AT THE END OF FISCAL YEAR 1958

Mr. SALTONSTALL. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a letter and analysis which I have received from the Director of the Bureau of the Budget, Percival Brundage, in response to a request I made of him for a breakdown of the unobligated balances as of June 30, 1957, which are to be a part of the 1958 budget.

There being no objection, the letter and analysis were ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D. C., May 17, 1957.

Hon. LEVERETT SALTONSTALL,
United States Senate,
Washington, D. C.

MY DEAR SENATOR SALTONSTALL: In compliance with the request in a note you handed me in a Leaders' meeting a short time ago, there is attached a detailed analysis of unobligated balances estimated to be available at the end of the fiscal year 1958. This analysis supplies a complete breakdown of the data shown in table 7 of the 1958 budget.

The total unobligated balances of all kinds of authorizations are expected to amount to something over $25 billion as you suggested at the Leaders' meeting last week. In addition, of course, there will be obligated balances of some $45 billion which must be held to pay on delivery for goods and services already ordered. The most significant portion of the unobligated total from the standpoint of the annual budget is that for regular appropriations. They amount to about $9 billion, the figure I mentioned at the meeting. Of these appropriation balances $7.9 billion are in the Department of Defense and are made up of amounts in the major procurement accounts to cover commitments under long-term contracts which have not reached the legal obligation stage. Examples are funds to cover obligations for electronic and communications equipment to be placed on ships after delivery, initial spare parts, and funds for short lead time components which can be made available at the appropriate time in the production schedule. I believe we should continue to follow the sound procedure of fully funding the procurement of all items necessary for the full operation of such major things as airplanes, tanks, and ships when the initial appropriation is made. We would lose budgetary control of these programs if we adopted a policy of partial funding for such items.

The largest remaining part of the unobligated balances is expected to be in authorizations to expend from debt receipts. This would amount to about $12 billion. A large part of this is in the nature of standby authority to support Government guaranty and insurance programs of various kinds. For example, this total includes $3 billion which by law must be available on call of the Federal Deposit Insurance Corporation, $1,750 million to insure the liquidity of the Federal Home Loan Bank System, and $500 million for flood-indemnity operations. There is also included $2,540 million required by law to be available to the International Bank for Reconstruction and Development should the need arise. In addition to the $500 million for flood indemnity mentioned above, approximately $2.4 billion is in the Housing and Home Finance Agency to cover various commitments for which the Housing Agency will need authority but which will not have reached the stage of legal obligations.

Over $600 million is shown as balances of contract authorizations. Nearly all of this is for the Housing and Home Finance Agency and covers commitments of the same kind mentioned above.

There are expected to be over $3.5 billion remaining unobligated in revolving and management funds. About $2.2 billion of this is in the Department of Defense, and represents the unobligated portion of the capital of the various industrial and stock funds. Nearly $600 million is expected to be unobligated in the Federal Housing Administration fund which supports the various mortgage-guaranty operations of the Federal Housing Administration.

In considering all these balances it is well to note that about $15 billion, or 59 percent, of them are for purposes for which no new authority is being requested for 1958.

In preparing the 1958 budget we gave very careful consideration to the use of balances wherever possible in lieu of requesting new authority for 1958. The passage of time may uncover additional balances, however, I do not believe these will be large. Their use to reduce the amount of new obligational authority provided in 1958 would not affect budget expenditures for that year.

Sincerely yours,
PERCIVAL BRUNDAGE,
Director of the Bureau of the Budget.

Analysis of certain large unobligated balances in the 1958 budget document

[In millions]

Description	June 30, 1958	Remarks
BALANCES OF PRIOR AUTHORIZATIONS FOR EXPENDITURE		
Appropriations enacted or recommended:		
Independent offices:		
National Advisory Committee for Aeronautics: Construction and equipment.	$37	Total funding of long-term construction projects. New authority requested for modernization of and addition to existing research facilities.
Veterans' Administration: Hospital and domiciliary facilities.	99	Total funding of long-term construction projects. New authority requested for replacement or modernization of existing facilities and construction of new hospitals, etc.
Farm Credit Administration: Federal intermediate credit banks investment fund.	40	Available by law as a revolving fund for investment in capital stock of Federal intermediate credit banks. No new authority requested in 1958.
Department of Agriculture: Removal of surplus agricultural commodities.	175	Permanent appropriation permanently available for obligation; legal limit on unobligated balance is $300 million annually. New authority (30 percent of customs receipts) available for expanding foreign and domestic market outlets for farm commodities.
Department of Commerce:		
Establishment of air navigation facilities	63	Reserved to finance installation of equipment on order and anticipated for future delivery. New authority requested for modernization and buildup of air safety program.
Ship construction, maritime activities	17	Commitments under long-term contracts which at this time are not bona fide obligations, such as amounts held out for changes in the course of construction. New authority requested for ship construction-differential subsidies, research and development, and replacement of vessels (acquisition cost).

Analysis of certain large unobligated balances in the 1958 budget document—Continued

[In millions]

Description	June 30, 1958	Remarks
BALANCES OF PRIOR AUTHORIZATIONS FOR EXPENDITURE—con.		
Appropriations enacted or recommended—Continued		
Department of Defense—Military:		
Military construction, Army Reserve Forces	24	Contingent upon availability of State funds for construction of National Guard armories. New authority requested to provide training and storage facilities for National Guard and Army Reserves.
Procurement and production, Army	816	Commitments under long-term contracts which at this time are not bona fide obligations, such as electronic and communications equipment to be placed in ships after delivery by the manufacturer. Other examples are initial spare parts, and funds for short lead-time components which can be made available at the appropriate time in the production schedule. New authority requested to maintain the national security.
Research and development, Army	20	
Marine Corps procurement	141	
Aircraft and related procurement, Navy	1,619	
Shipbuilding and conversion, Navy	1,001	
Procurement of ordnance and ammunition, Navy	39	
Military construction, Naval Reserve forces	21	
Research and development, Navy	19	
Aircraft and related procurement, Air Force	3,624	
Procurement other than aircraft, Air Force	490	
Research and development, Air Force	60	
Military construction, Navy	30	Commitments under long-term contracts which at this time are not bona fide obligations, such as electronic and communications equipment to be placed in ships after delivery by the manufacturer. No new authority requested in 1958.
Department of Health, Education, and Welfare: Grants for hospital construction, Public Health.	86	Balance of 2-year appropriation available contingent upon approval of plans and specifications in long-term planning span. New authority requested to defray part of construction costs incurred by States and Territories.
Department of the Interior: Federal aid in wildlife restoration.	10	Contingent upon availability of State funds on a matching basis. Committed but not a bona fide obligation. New permanent authority (equal to tax revenue from firearm, shell and cartridge manufacture) for wildlife conservation projects and related costs.
District of Columbia: Loans for capital outlay	36	Unused loan authority for highway improvements and expansion and improvement of the water system. New authority requested for same purpose.
Other	78	
Total, balances of appropriations enacted or recommended	8,545	
Appropriations proposed for later transmission:		
Independent offices: Tennessee Valley Authority	20	Unused authority to borrow from the public to finance public works. New authority requested for an additional unit at an existing steam plant.
Housing and Home Finance Agency: Payment for flood indemnity operations.	40	Available for contingencies under the Federal Flood Insurance Act. New authority requested for subsidy contributions, payment for services rendered by private organizations, etc.
Department of Commerce: Area assistance	42	Unused corpus to be paid into revolving fund over 4-year period for assistance to areas of persistent and substantial unemployment.
Department of Defense—Military: Public works and other military programs.	529	See explanation for other DOD balances above.
Other	2	
Total, balances of appropriations proposed for later transmission.	633	
Grand total, balances of appropriations	9,178	
Authorizations to expend from debt receipts:		
Funds appropriated to the President:		
Expansion of defense production	355	Contingency reserve for changes in costs and other conditions of materials (purchase and resale program) extending as far as 1965. No new authority requested in 1958.
Investment in discharge of investment guaranty liabilities, Mutual Security Act.	12	Unused guaranty authority needed to maintain program on a going basis. No new authority requested in 1958.
Independent offices:		
Investment in Federal Deposit insurance Corporation	3,000	Available for the insurance of individual bank deposits. No new authority requested in 1958.
Export-Import Bank of Washington fund	831	Unused borrowing authority. No new authority requested in 1958.
Investment in Federal Home Loan Bank Board	1,000	Available to insure the liquidity of the home loan bank system against economic downturns. No new authority requested in 1958.
Federal Savings and Loan Insurance Corporation	750	
Housing and Home Finance Agency:		
Investment in public facility loans	64	Uncommitted lending authority. No new authority requested in 1958.
Investment in urban renewal	443	Uncommitted authority to lend to local agencies. No new authority requested in 1958.
Investment in flood indemnity operations	500	Available to cover flood insurance losses. No new authority requested in 1958.
Loans for secondary market operations	98	Required to backstop or indirectly guarantee an estimated $800,000,000 outstanding debentures sold to the public. No new authority requested in 1958.
Low-rent public housing program fund	844	Primarily for temporary financing of construction of low-rent projects by local authorities. No new authority requested in 1958.
Department of Agriculture:		
Loans, Farmers' Home Administration	371	Unused balance of 5-year loan authorization. No new authority requested in 1958.
Commodity Credit Corporation fund	60	Uncommitted portion of long-term borrowing authority provided by CCC charter. No new debt authority requested in 1958.
Treasury Department:		
International Bank for Reconstruction and Development	2,540	Available to cover unpaid subscriptions in capital stock of the bank should the need arise. No new authority requested in 1958.
Investment in civil-defense program	246	Contingency reserve held for emergency lending. No new authority requested in 1958.
Other	17	
Total, balances of authorizations to expend from debt receipts.	11,131	
Authorizations to expend from debt receipts proposed for later transmission:		
Housing and Home Finance Agency:		
Investment in secondary market operations	$700	See above.
Investment in college housing loans	175	Commitments which are not bona fide obligations conditional upon submission of an acceptable full loan application. New authority requested to finance reservations of funds incurred in the program.
Investment in special assistance functions	45	Reserve for unforeseen contingencies. New authority requested to increase mortgage participation program.
Other	9	
Total, balances of authorizations to expend from debt receipts proposed for later transmission.	929
